Appendix

Change's role in the payments process depends on the region, client type and services provided

Vertexon in the payments process

- ▶ **Processing:** An Issuer (Change's client) using the Vertexon Platform (**technology only**) to manage their cards – client is the Issuer and cards can be issued on any card network supported by Vertexon
- ▶ **Processing & Issuing (P&I):** A client using the Vertexon Platform (**technology**) to manage their cards with Change as Issuer (**regulatory & licence**) – **Change** is the Issuer and cards are issued on the **Mastercard Network**

- Processing:** Customer pays with card (all card networks supported) & purchases goods/services from merchant
 - P&I:** Customer pays with a **Change** issued **Mastercard** & purchases goods/services from a merchant
- Payment authenticated – the merchant point-of-sale system captures the customer's account information & securely sends it to the acquirer (i.e. merchant's bank)
- Transaction submitted – merchant acquirer asks card network to get authorisation from the issuer (i.e. customer's bank)
- Processing:** Authorisation requested – card network submits transaction to issuer for authorisation
 - P&I:** Authorisation requested – card network submits transaction to **Change** (as Issuer) for authorisation
- Processing:** Authorisation response – using Vertexon Platform issuer authorises the transaction and routes the response back via the card network and acquirer
 - P&I:** Authorisation response - using the Vertexon Platform **Change** (as Issuer) authorises the transaction and routes the response back via the card network and acquirer
- Processing:** Settlement – card network debits the issuer and pays the acquirer who in turn makes payment to the merchant
 - P&I:** Settlement – card network (**Mastercard**) debits the issuer (**Change**) and pays the acquirer who in turn makes payment to the merchant

Cards can be physical and virtual cards (inc. Apple Pay, Google Pay, etc.) available via Vertexon
