## QUARTERLY ACTIVITIES REPORT FOR THE PERIOD ENDED 31 MARCH 2024

Warriedar Resources Limited (ASX: WA8) (**Warriedar** or the **Company**) is pleased to report on its activities for the quarter ended 31 March 2024.

### HIGHLIGHTS

#### Golden Range and Fields Find Projects, Western Australia

- Drilling activities for CY2024 commenced at the Golden Range Project with a reverse circulation (**RC**) program at the Ricciardo deposit, twenty-one (21) holes drilled for 3,500m drilling.
- Ricciardo sits in the middle of the 25km-long 'Golden Corridor' at Golden Range, which hosts six discrete deposits (18 historic pits) that are all open at depth and possess immediate growth potential.
- Assay results from three (3) holes drilled in December and eighteen (18) holes drilled in February were received during the quarter, with all holes returning significant gold mineralisation. Results include:
  - **32m @ 3.59 g/t Au from 148m, incl. 1m @ 10.85 g/t Au from 151m**
  - **8m @ 11.40 g/t Au from 166m, incl. 3m @ 22.38 g/t Au from 167m**
  - **3m @ 5.61 g/t Au from 114m, incl. 1m @ 11.20 g/t Au from 114m**
  - **11m @ 3.43 g/t Au from 149m**
  - **6m @ 4.69 g/t Au from 142m**
  - **8m @ 2.63 g/t Au from 160m**
  - **9m @ 1.97 g/t Au from 201m**
  - **20m @ 1.03 g/t Au from 177m**
  - **14m @ 1.15 g/t Au from 114m**
- Results demonstrate the excellent potential for further Resource growth along the 'Golden Corridor', below and between historic open pits.
- Assay results from a further three (3) holes drilled beneath the Ardmore pit are pending, with results anticipated this month.
- Further growth-focused drilling along the 'Golden Corridor' is planned for Q2 CY2024.

## Big Springs Project, Nevada

- Proposed Plan of Operation (PoO) application continues to progress.

## Corporate

- Resignation of Non-Executive Director Mr Mingyan (Joe) Wang.
- Successful bookbuild for A\$6.0 million two-tranche equity placement, with binding commitments received from new and existing shareholders.
- Cash of A\$4.8 million as at 31 March 2024 and zero debt (excluding typical trade creditor balances).

## Western Australian Projects

The Golden Range and Fields Find Projects (the **Projects**) are located approximately 350 km northeast of Perth and 260 km east-southeast of Geraldton (Figure 1). The total consolidated land package of the Projects is 813 km<sup>2</sup>, extending for over 70 km of strike from north to south and covering much of the central Yalgoo-Singleton and Warriedar Archean greenstone belts.

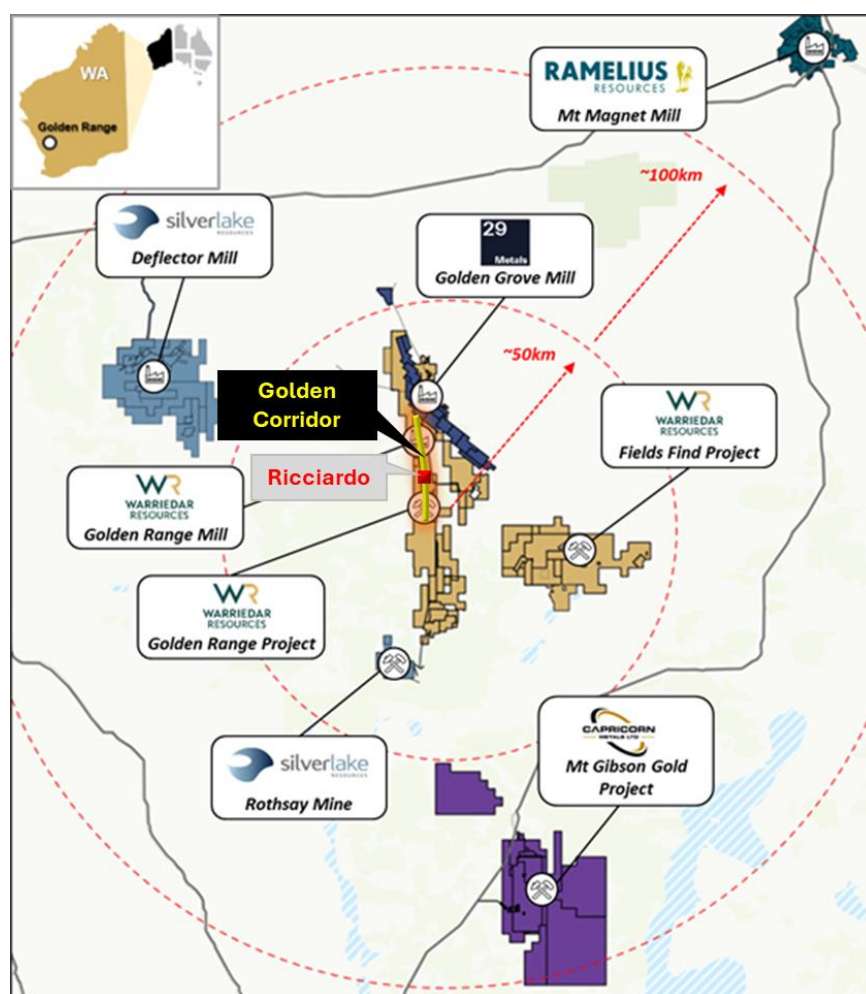

Figure 1: Regional setting of the Golden Range and Fields Find Projects in the Southern Murchison Province of Western Australia.

Total historical gold production from Golden Range and Fields Find was ~350 koz, with the existing oxide plant placed on care and maintenance in August 2019.

The current JORC (2012) Mineral Resource Estimate (**MRE**) for Golden Range is 19.2 Mt at 1.5 g/t Au for 945 koz contained gold (of which 461 koz at 1.6g/t Au sits in the Measured and Indicated classifications). For further Mineral Resource estimate details, refer to ASX release dated 28 November 2022.

During the quarter, and up to the reporting date, the Company:

- commenced its 2024 exploration drilling activities at the Golden Range Project, with a total of twenty-one (21) holes drilled for 3,500m at the Ricciardo deposit<sup>1</sup>.
- received assay results from three (3) holes drilled in December<sup>2</sup> and eighteen (18) holes drilled in February<sup>3 4</sup> at Ricciardo, with all holes returning significant gold mineralisation.
- Planned for execution of its 3-pronged strategy for Resource growth in 2024<sup>5</sup> (see Figure 2)

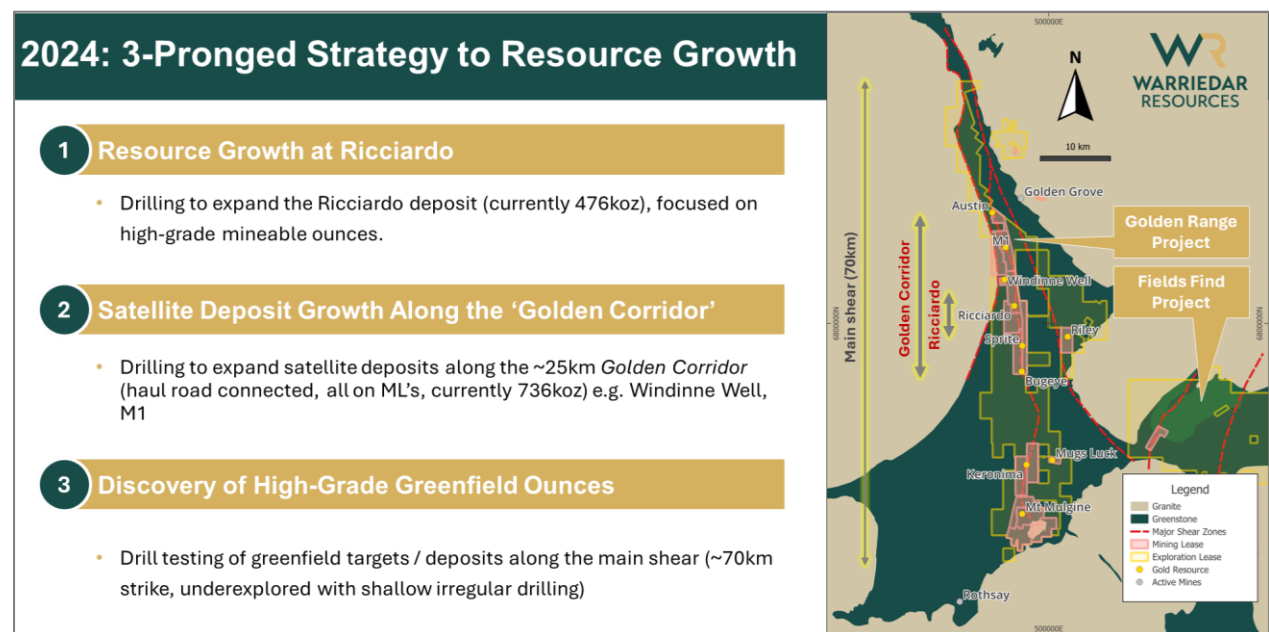

Figure 2: The Company's strategy for Resource growth in 2024.

The following is a comprehensive summary of the Company's activities.

<sup>1</sup> WA8 ASX release 28 February 2024: Drilling recommences at Ricciardo

<sup>2</sup> WA8 ASX release 1 February 2024: Wide, high-grade gold intercepts at Ricciardo

<sup>3</sup> WA8 ASX release 18 March 2024: Warriedar Delivers High Grade Gold Extensions at Ricciardo

<sup>4</sup> WA8 ASX release 17 April 2024: Further High-Grade Extensional Gold Intercepts at Ricciardo

<sup>5</sup> WA8 ASX release 13 February 2024: RIU Explorers Conference - Investor Presentation

## Drilling recommenced at Ricciardo

On 28 February 2024, Warriedar announced the commencement of its 2024 drilling activities at the Ricciardo deposit, the largest of the six (6) deposits within the 25km long 'Golden Corridor', at the Golden Range Project (see Figures 1 & 2 for location).

Ricciardo has a current Mineral Resource estimate of 8.7 Mt @ 1.7 g/t Au for 476 koz gold (6 koz Measured, 203 koz Indicated, 267 koz Inferred).

Mineralisation at Ricciardo is comprised of a series of high-grade shoots. These shoots remain open at depth (where very limited drilling has been undertaken below 100m) and along strike (where additional high-grade shoots are interpreted but require follow up drilling).

Figure 3: Plan view of the Ricciardo deposit and the locations of the 2024 drill hole collars.

As a result of its scale, grade and further immediate growth potential, Ricciardo is a key focus area for Warriedar this year. Ricciardo is located on a granted Mining Lease, is accessible via a high-quality haul road, and is located approx. 8 kms (by road) to Warriedar's existing oxide process plant and approx. 26 kilometres (by road) to the neighbouring Golden Grove plant.

Throughout the March quarter, twenty-one (21) holes were drilled at the Ricciardo deposit for 3,500m of drilling. This drilling was planned to:

- extend the Ricciardo Mineral Resource boundaries at depth and along strike
- improve the continuity and extent of the known high-grade shoots below the historic pits
- define new high-grade shoots believed to exist based on 3D modelling of the data

All three of the program goals were achieved, based on assay results received from 18 of the 21 drillholes, prior to the reporting date.

### Robust high-grade extensions delivered across Ricciardo

During the quarter (and up to the reporting date) the Company received assay results from three (3) holes drilled in December<sup>2</sup> and eighteen (18) of twenty-one (21) holes drilled in February<sup>3 4</sup> at Ricciardo, with all holes returning significant gold mineralisation.

To date, the most significant results received from Ricciardo are summarised below (for the full list of results, refer to Table 2).

#### BENEATH ARDMORE PIT:

- RDRC019: **32m @ 3.59 g/t Au from 148m, incl. 1m @ 10.85 g/t Au from 151m**, ended within mineralisation
- RDRC018: **9m @ 1.97 g/t Au from 201m**, ended within mineralisation
- RDRC018: **20m @ 1.03 g/t Au from 177m**, ended within mineralisation

#### BENEATH SILVERSTONE PIT:

- RDRC041: **8m @ 11.40 g/t Au from 166m, incl. 3m @ 22.38 g/t Au from 167m**
- RDRC031: **11m @ 3.43 g/t Au from 149m**
- RDRC020: **6m @ 4.69 g/t Au from 142m**
- RDRC034: **8m @ 2.63 g/t Au from 160m**
- RDRC032: **8m @ 1.84 g/t Au from 171m**

#### BENEATH SILVERSTONE SOUTH PIT:

- RDRC025: **3m @ 5.61 g/t Au from 114m, incl. 1m @ 11.20 g/t Au from 114m**
- RDRC027: **10m @ 1.63 g/t Au from 156m**, ended within mineralisation
- RDRC022: **14m @ 1.15 g/t Au from 114m**

These results demonstrate the high-grade growth potential beneath Ricciardo both along strike and down dip of all five historic pits (Eastern Creek, Silverstone South, Silverstone (Copse), Ardmore, and Silverstone North), see Figure 4.

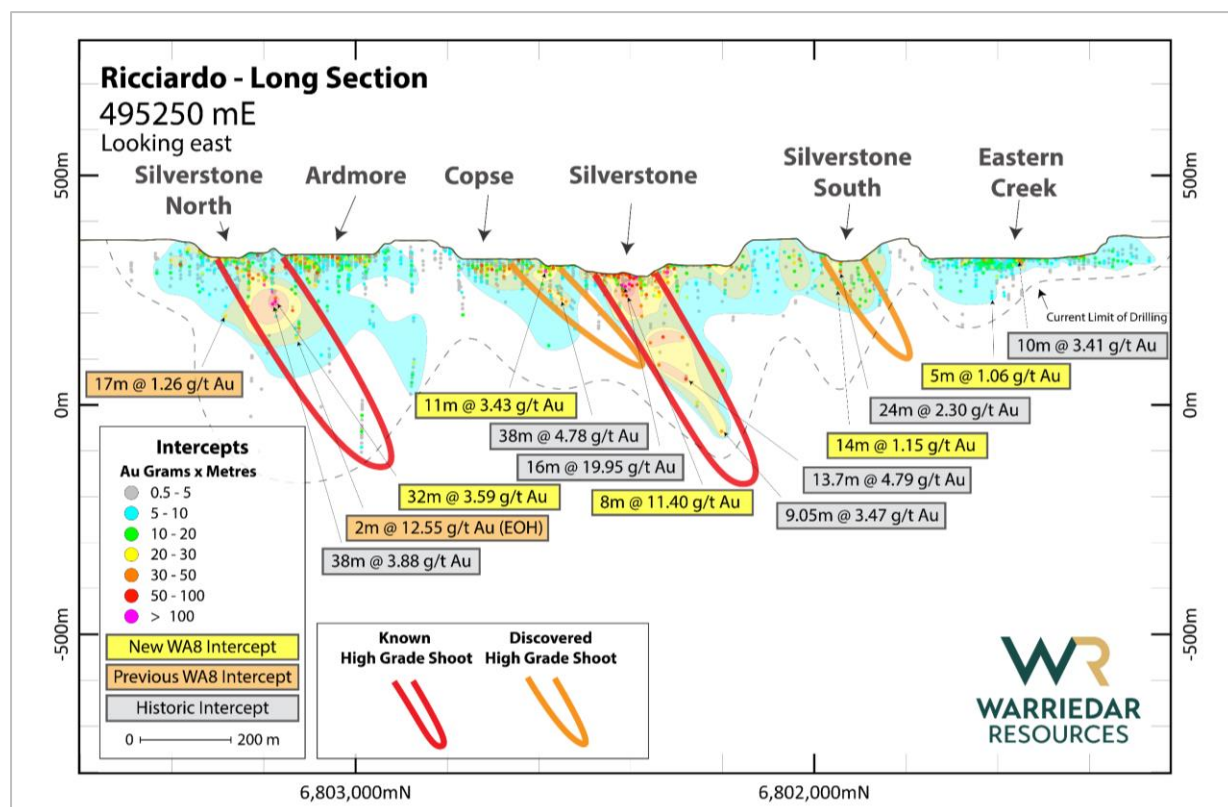

Figure 4: Ricciardo long section outlining relative location of current mined pits to defined mineralised zones. High-grade shoots outlined along section plunging southwest within the shear zone. Figure from ASX Release 17 April 2024, modified. Intercepts labelled in yellow were released during this quarter. Intercepts labelled in orange were released by Warriedar in previous quarters (during 2023).

## BENEATH ARDMORE PIT

### Wide mineralisation identified below Ardmore pit

The two RC holes drilled beneath the Ardmore pit in Q4 CY2023 to test extensions of high-grade shoots under the northern end of the pit returned wide high-grade gold mineralisation:

- RDRC019: **32m @ 3.59 g/t Au from 148m**, including **1m @ 10.85 g/t Au from 151m**
- RDRC018: **20m @ 1.03 g/t Au from 177m**; and  
**9m @ 1.97 g/t Au from 201m**.

The two holes ended prematurely within mineralisation due to ground conditions and will be re-entered and extended with a diamond tail (refer Figure 3 for location and Figure 5 for Cross Section). Additional diamond holes are also planned to be drilled into this high-grade zone to improve the understanding of structural controls on mineralisation.

Assays from a further three holes (RDRC038 – RDRC040) designed to test extensions of mineralisation under Ardmore and Silverstone North are pending (see the orange collar symbols in Figure 3).

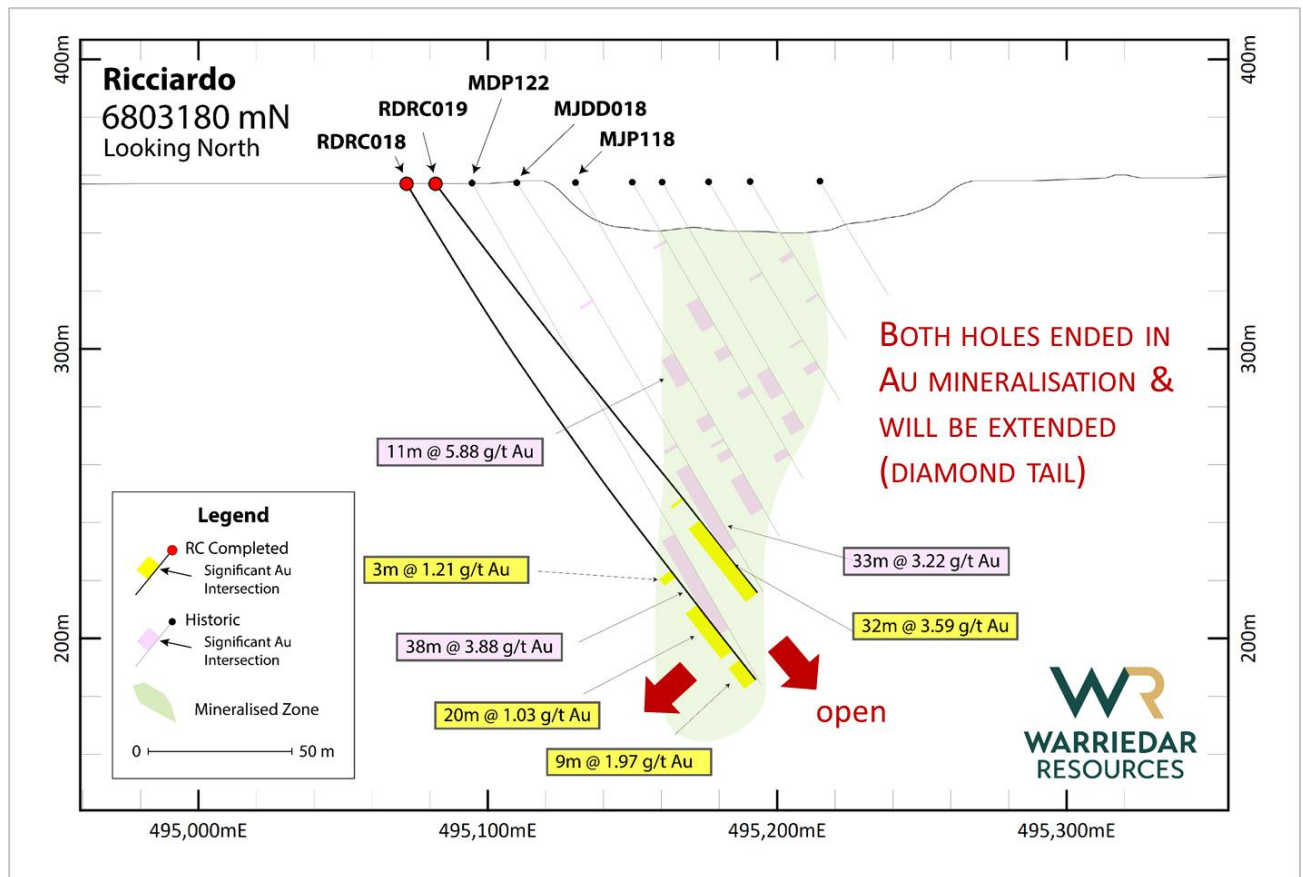

Figure 5: Cross Section below the Silverstone pit (see Figure 3 for location) highlighting holes RDRC018 and RDRC019 relative to previous drilling. Figure from ASX Release 18 March 2024.

### **BENEATH SILVERSTONE PIT**

#### **Extension of high-grade shoot**

RDRC020, RDRC033 and RDRC041 were drilled to target the gaps in the Ricciardo MRE where high-grade shoots were identified (refer Figure 3 for location and Figure 6 for Long Section). The holes successfully intersected thick, high-grade shoots plunging to the south-west, confirming the continuity of these zones.

RDRC041 drilled through an area that was previously modelled at grades of ~2 g/t and returned 8m at 11.40 g/t Au (including 3m at 22.38 g/t Au). The result shows the high-grade shoot has good continuity along the plunge direction.

RDRC033 tested a zone in between two high-grade shoots, confirming strike extension of the mineralisation under the Silverstone pit (refer Figure 6).

- RDRC041: **8m @ 11.40 g/t Au from 166m, incl. 3m @ 22.38 g/t Au from 167m**
- RDRC020: **6m @ 4.69 g/t Au from 142m**
- RDRC033: **2m @ 1.15 g/t Au from 174m and**  
**5m @ 1.86 g/t Au from 179m**

These intersections demonstrate consistent improvements to the Resource with enhanced understanding of the geology by the Warriedar team and provides more confidence to the future MRE update.

Further work to understand the structural controls of the high-grade shoots is ongoing. Additional review of historic core is underway and diamond holes are planned to be drilled in this area during H2 CY2024.

Figure 6: Long Section below the Silverstone pit (see Figure 3 for location), highlighting the **extension & continuity of the high-grade shoot** (holes RDRC020 and RDRC041), the **new high-grade shoot** (holes RDRC031 & RDRC032), and the **extensions outside the known modelled resource** (holes RDRC034, RDRC035 & RDRC037). Figure updated from that shown in ASX release 17 April 2024.

### New high-grade shoot identified under Silverstone pit

Results from holes RDRC031 and RDRC032, have confirmed a newly discovered high-grade shoot that requires follow-up drilling (refer Figure 3 for location, Figure 6 for Long Section & Figure 7 for Cross Section). The returned results include:

- RDRC031: 11m @ 3.43 g/t Au from 149m
- RDRC032: 8m @ 1.84 g/t Au from 171m

RDRC031 intersected a high-grade shoot plunging to the southwest in the same orientation as the Ardmore high-grade shoot.

The intercept of 11m @ 3.43 g/t Au from 149m (including 1m at 9.25 g/t Au from 154m and 1m at 9.51 g/t Au from 157m) is located up-plunge from a previously steeper dipping interpretation, this result outlines further potential for an approximate 300m long shoot that has limited drill testing. See Figure 4 for context of shoot orientation in long section.

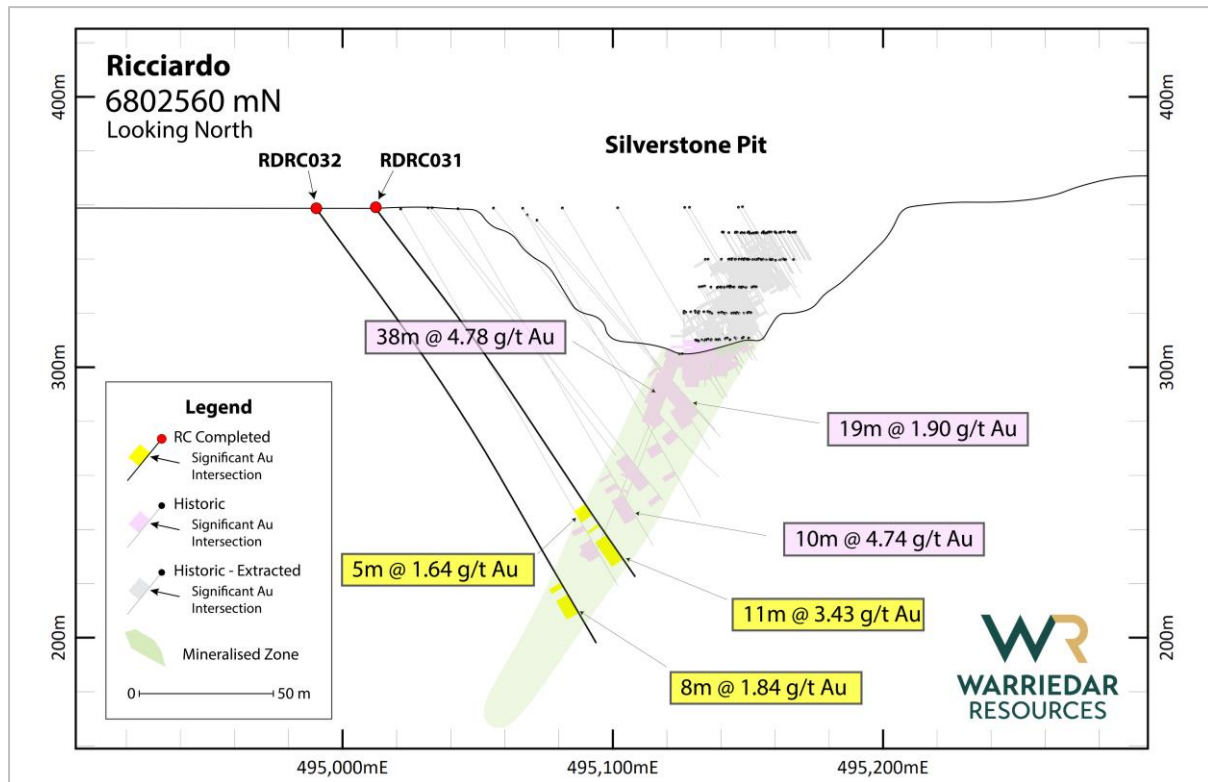

Figure 7: Cross Section below the Silverstone pit (see Figure 3 for location) highlighting holes RDRC031 and RDRC032 relative to previous drilling. Figure from ASX Release 18 March 2024.

### Extensions outside the known modelled resource

RDRC034 was drilled to test the continuation of the modelled MRE along strike underlying the Silverstone pit. The drill hole successfully intersected gold mineralisation where anticipated and highlighted the growth potential along strike where the existing MRE model abruptly terminates due to poor quality historic composite results impacting the model (Figures 6 & 8).

The confirmation of significant mineralisation here allows the Company to progressively step out along strike and down dip targeting further immediate significant growth to the current MRE at Ricciardo.

The returned results include:

- RDRC034: **8m @ 2.63 g/t Au from 160m**

Holes RDRC035 & RDRC037 also confirmed the gold mineralisation is continuous outside the modelled resource (see Figure 6).

Figure 8: Cross Section below the Silverstone pit (see Figure 3 for location) highlighting hole RDRC034 relative to previous drilling and the JORC MRE. Yellow interval annotation = current WA8 results, grey interval annotation = results from previous explorers. Figure from ASX Release 17 April 2024.

### **BENEATH SILVERSTONE SOUTH PIT**

#### **Mineralisation extended under Silverstone South pit**

Seven holes drilled under the Silverstone South pit were designed to test extension of mineralisation at shallow depths. All seven holes successfully intersected gold mineralisation with significant intercepts including:

- RDRC022: 14m @ 1.15 g/t Au from 114m
- RDRC024: 14m @ 0.78 g/t Au from 154m
- RDRC025: 3m @ 5.61 g/t Au from 114m, including 1m @ 11.2 g/t from 114m.
- RDRC027: 10m @ 1.63 g/t Au from 156m, ended within mineralisation
- RDRC028: 5m @ 1.34 g/t Au from 144m

RDRC025 was also planned to test for a high-grade shoot and successfully intersected gold mineralisation up to 11.2 g/t Au (refer Figure 3 for location & Figure 9 for Cross Section). The orientation of the interpreted shoot is the same as at Ardmere and Silverstone, providing confidence in the validity of the interpretation. Additional holes are required to assess continuity and thickness along plunge.

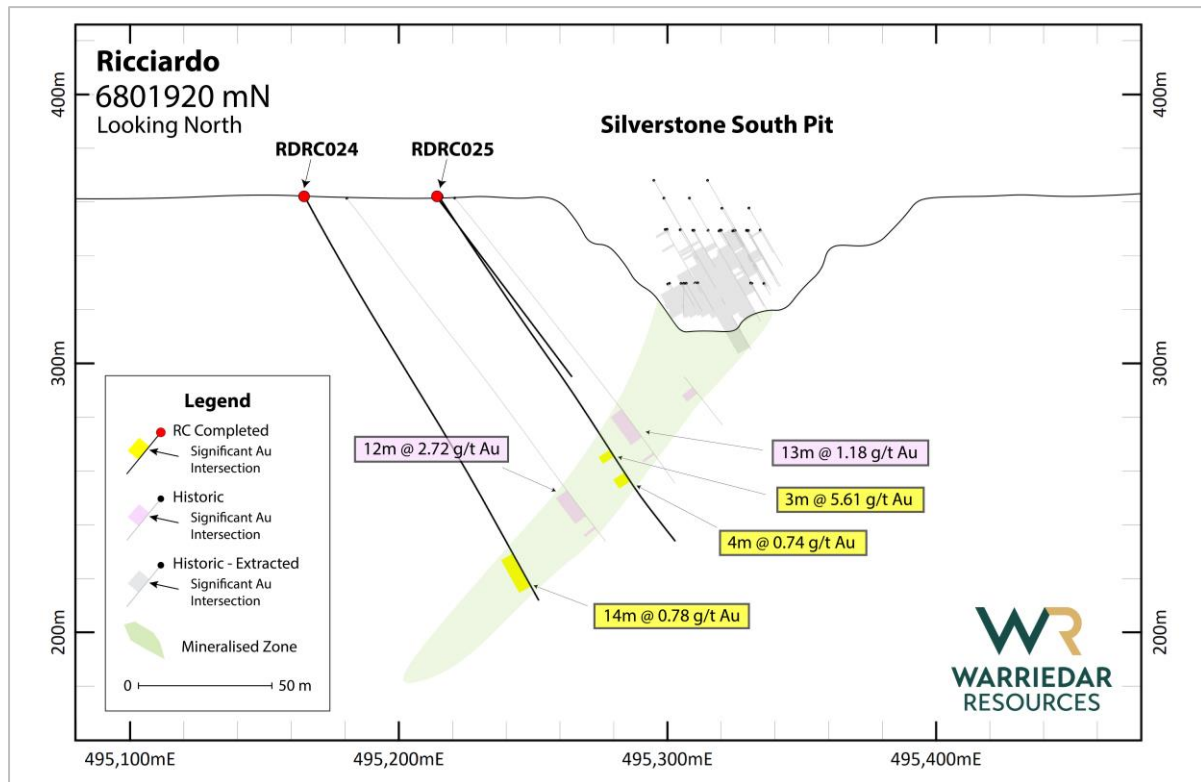

Figure 9: Cross Section below the Silverstone South pit (see Figure 3 for location) highlighting holes RDR024 & RDR025 relative to previous drilling.

### **BENEATH EASTERN CREEK PIT**

#### ***Mineralisation extended under Eastern Creek pit***

Two holes (RDR029 and RDR030) were drilled under the Eastern Creek pit to test for extension of the mineralisation at shallow depths. Both holes were drilled into mineralisation but terminated early due to ground conditions. Diamond tails are planned to extend these holes and test for further extensions. Returned assays have demonstrated initial extension of gold mineralisation at shallow depth including:

- **RDR030: 4m @ 1.28 g/t Au from 142m and  
5m @ 1.06 g/t Au from 149m**

Refer to Figure 3 for the location of the Eastern Creek pit and the collar location of the two holes.

#### ***Next steps***

The results from the Ricciardo program are an excellent outcome, confirming the continuation of the mineralised system, extending known high-grade shoots, defining new high-grade shoots, supporting future expansion of the MRE boundaries, and increasing the overall confidence of high-grade historical results produced from previous explorers.

A follow-up extensional drilling program consisting of both RC and diamond drilling is planned to commence in May CY2024, targeting further extension of the existing Mineral Resources within the 'Golden Corridor', and further discoveries along the mineralised shear. The current drilling plan (ASX release 19 April 2024) designed to achieve these goals during CY2024 is shown in Figure 10.

Focus area	H1 CY2024		H2 CY2024	
<div><div></div><div>15,500m drilling planned</div><div></div></div>				
Resource extension, 'Golden Corridor'	RC Drill Program 1	RC Drill Program 2	RC Drill Program 3	RC Drill Program 4

## Big Springs Project, Nevada USA

### Introduction

Big Springs is a Carlin-type gold deposit; located in northern Nevada; one of the world's most prolific gold production provinces. See Figure 11 for the location of Big Springs with respect to the major gold deposits and trends in northern Nevada.

Big Springs is located 20km from the Jerritt Canyon gold mine complex which has produced approximately 10 Moz of gold in 40 years of operation.

The Big Springs deposit was mined between 1987 and 1993 at an average grade of ~4.1g/t Au, producing ~386koz Au. Production stopped due to the low gold prices at the time.

The current JORC (2012) Mineral Resource estimate for Big Springs is 15.5 Mt at 2.0 g/t Au for 1.01Moz contained gold (of which 555 koz at 2.5 g/t Au sits in the Measured and Indicated classifications). For further Mineral Resource estimate details, refer to ASX release dated 15 November 2022.

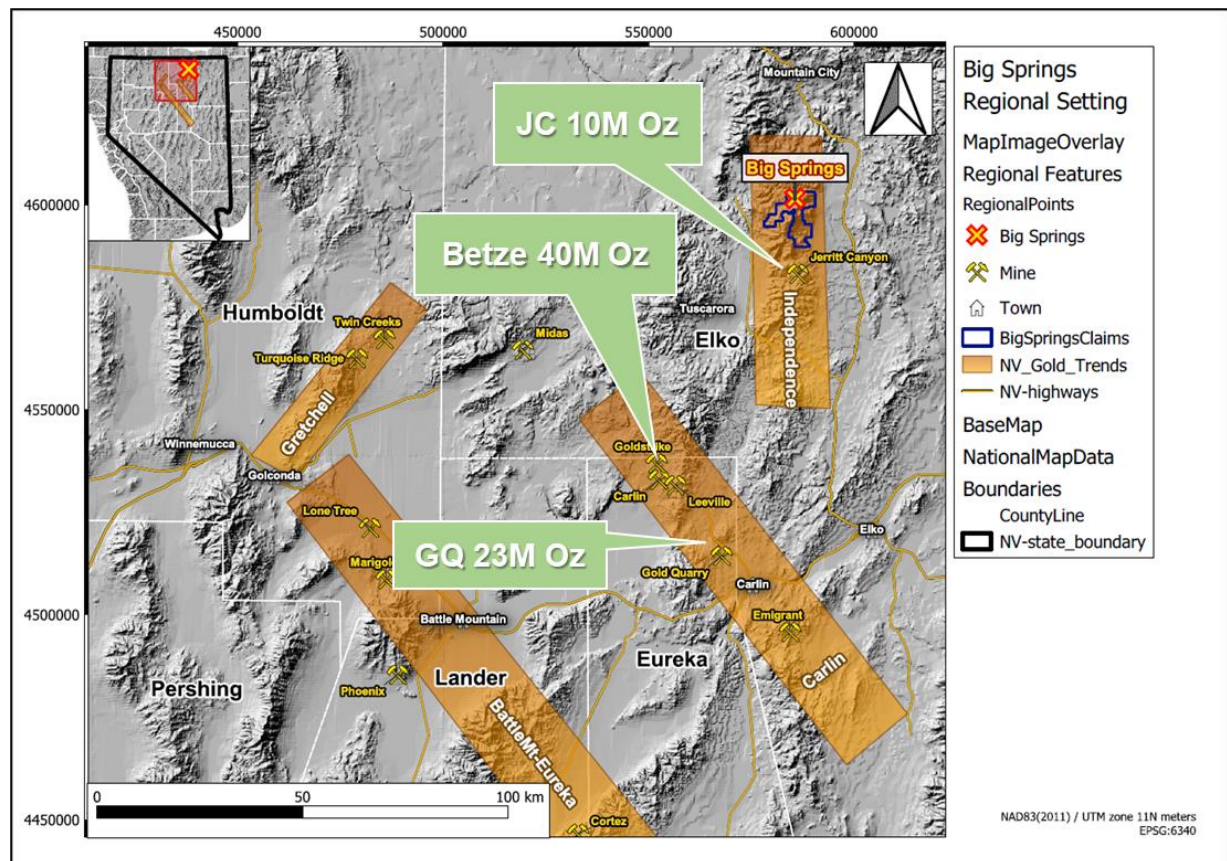

Figure 11: The location of the Big Springs Project in NE Nevada. JC = Jerritt Canyon. Betze = Betze Post deposit, the largest gold deposit in the Carlin trend, ~40Moz Au. GQ = the Gold Quarry deposit

### Big Springs strategic review

Following the acquisition of the Golden Range and Fields Find Projects in February 2023, the Company's focus is on its Western Australian Projects. The company believes that a strategic partner (or other structure) is the appropriate way forward to realise the inherent upside embedded within the Big Springs Project.

Big Springs is an existing million-ounce resource, on a permitted Mining Lease, with a Resource extension drill program ready to execute, with the right partner.

## Corporate

### Resignation of Non-Executive Director

On 15 January 2024, Mr Mingyan (Joe) Wang resigned from the Warriedar Board due to personal reasons, including a desire to spend more time with his family.

Joe was appointed to the Warriedar Board in March 2020 and has played a pivotal role in the advancement of Warriedar (and its predecessor company, Anova Metals Limited).

### Successful completion of A\$6.0 million equity placement

On 25 March 2024, Warriedar secured binding commitments for a two-tranche placement to raise A\$6.0 million. The placement stipulated the issue of approximately 157.9 million shares at an issue price of A\$0.038 per share.

The Placement details are disclosed below:

- An unconditional placement of 119.1 million fully paid ordinary shares, to raise approximately A\$4.5 million, issued using the Company's available Listing Rules 7.1 and 7.1A capacity (Tranche 1); and
- A conditional placement of 38.8 million fully paid ordinary shares, to raise approximately A\$1.5 million, will be issued subject to Warriedar shareholder approval to be sought at an upcoming General Meeting expected to be held in May 2024 (General Meeting) (Tranche 2).

The placement received strong support from both new and existing shareholders, with Warriedar's directors having also applied to participate for A\$60,000. Director participation will form part of Tranche 2 which will be subject to shareholder approval at the General Meeting.

### Financial position

At 31 March 2024, Warriedar held cash of A\$4.8 million and zero debt (excluding usual creditor balances).

### ASX additional information

**ASX Listing Rule 5.3.1:** Exploration and Evaluation Expenditure during the Quarter was A\$1.7m. Details of the exploration activity during the Quarter are set out in this report.

**ASX Listing Rule 5.3.2:** There were no substantive mining production and development activities during the Quarter.

**ASX Listing Rule 5.3.5:** Payments to related parties of the Company and their associates during the Quarter totalled A\$0.205m. The Company advises that this relates to non-executive director's fees and executive directors' salaries.

**ASX Listing Rule 5.3.3:** Warriedar Resources Limited (ASX: WA8) reports as follows in relation to mining tenements held at the end of the 31 March 2024 quarter and acquired or disposed of during the quarter and their locations.

## Mining tenements held by Warriedar Resources Limited as at 31 March 2024:

#### About Warriedar

Warriedar Resources Limited (ASX: WA8) is an advanced gold and copper exploration business with an existing resource base of almost 2 Moz gold (149 koz Measured, 867 koz Indicated and 944 koz Inferred)<sup>1</sup> across Western Australia and Nevada, and a robust pipeline of high-calibre drill targets. Our focus is on rapidly building our resource inventory through modern, innovative exploration.

1. For further Mineral Resource estimate details, refer to ASX releases dated 15 November 2022 and 28 November 2022. Warriedar confirms that it is not aware of any new information or data that materially affects the information included in those releases. All material assumptions and technical parameters underpinning the estimates in those ASX releases continues to apply and has not materially changed.

The information in this report that relates to estimation, depletion and reporting of the Golden Range and Fields Find Mineral Resources for is based on and fairly represents information and supporting documentation compiled by Dr Bielin Shi who is a Fellow (CP) of The Australasian Institute of Mining and Metallurgy. Dr Bielin Shi has sufficient experience relevant to the style of mineralisation and type of deposits under consideration and to the activity which he is undertaking to qualify as a Competent Person as defined in the 2012 Edition of the Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves. Dr. Shi consents to the inclusion in the report of the matters based on the information in the form and context in which it appears.

The information in the release that relates to the Estimation and Reporting of the Big Springs Mineral Resources has been compiled and reviewed by Ms Elizabeth Haren of Haren Consulting Pty Ltd who is an independent consultant to Anova Metals Ltd and is a current Member and Chartered Professional of the Australasian Institute of Mining and Metallurgy and Member of the Australian Institute of Geoscientists. Ms Haren has sufficient experience, which is relevant to the style of mineralisation and types of deposits under consideration and to the activities undertaken, to qualify as a Competent Person as defined in the 2012 Edition of the "Australasian Code of Reporting of Exploration Results, Mineral Resources and Ore Reserves (The JORC Code).

## Competent Person Statement

The information in this report that relates to Exploration Results is based on information compiled by Dr. Amanda Buckingham and Dr. Peng Sha. Buckingham and Sha are both employees of Warriedar and members of the Australasian Institute of Mining and Metallurgy and have sufficient experience of relevance to the styles of mineralisation and types of deposits under consideration, and to the activities undertaken to qualify as Competent Persons as defined in the 2012 Edition of the Joint Ore Reserves Committee (JORC) Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves. Dr. Buckingham and Dr. Sha consent to the inclusion in this report of the matters based on his information in the form and context in which they appear.

## Appendix 5B

## Mining exploration entity or oil and gas exploration entity quarterly cash flow report

7.	<b>Financing facilities</b> <i>Note: the term "facility" includes all forms of financing arrangements available to the entity. Add notes as necessary for an understanding of the sources of finance available to the entity.</i>	<b>Total facility amount at quarter end \$A'000</b>	<b>Amount drawn at quarter end \$A'000</b>
7.1	Loan facilities		
7.2	Credit standby arrangements		
7.3	Other (please specify)		
7.4	<b>Total financing facilities</b>		
7.5	<b>Unused financing facilities available at quarter end</b>		
7.6	Include in the box below a description of each facility above, including the lender, interest rate, maturity date and whether it is secured or unsecured. If any additional financing facilities have been entered into or are proposed to be entered into after quarter end, include a note providing details of those facilities as well.		

8.	<b>Estimated cash available for future operating activities</b>	<b>\$A'000</b>
8.1	Net cash from / (used in) operating activities (item 1.9)	(2,179)
8.2	(Payments for exploration & evaluation classified as investing activities) (item 2.1(d))	-
8.3	Total relevant outgoings (item 8.1 + item 8.2)	(2,179)
8.4	Cash and cash equivalents at quarter end (item 4.6)	4,795
8.5	Unused finance facilities available at quarter end (item 7.5)	-
8.6	Total available funding (item 8.4 + item 8.5)	4,795
8.7	<b>Estimated quarters of funding available (item 8.6 divided by item 8.3)</b>	2.2
<i>Note: if the entity has reported positive relevant outgoings (ie a net cash inflow) in item 8.3, answer item 8.7 as "N/A". Otherwise, a figure for the estimated quarters of funding available must be included in item 8.7.</i>		
8.8	If item 8.7 is less than 2 quarters, please provide answers to the following questions:	
8.8.1	Does the entity expect that it will continue to have the current level of net operating cash flows for the time being and, if not, why not?	
Answer: N/A.		
8.8.2	Has the entity taken any steps, or does it propose to take any steps, to raise further cash to fund its operations and, if so, what are those steps and how likely does it believe that they will be successful?	
Answer: N/A.		
8.8.3	Does the entity expect to be able to continue its operations and to meet its business objectives and, if so, on what basis?	
Answer: N/A.		
<i>Note: where item 8.7 is less than 2 quarters, all of questions 8.8.1, 8.8.2 and 8.8.3 above must be answered.</i>		

## Compliance statement

- 1 This statement has been prepared in accordance with accounting standards and policies which comply with Listing Rule 19.11A.
- 2 This statement gives a true and fair view of the matters disclosed.

Date: **29 April 2024**

Authorised by: **By the Board**  
(Name of body or officer authorising release – see note 4)

## Notes

1. This quarterly cash flow report and the accompanying activity report provide a basis for informing the market about the entity's activities for the past quarter, how they have been financed and the effect this has had on its cash position. An entity that wishes to disclose additional information over and above the minimum required under the Listing Rules is encouraged to do so.
2. If this quarterly cash flow report has been prepared in accordance with Australian Accounting Standards, the definitions in, and provisions of, *AASB 6: Exploration for and Evaluation of Mineral Resources* and *AASB 107: Statement of Cash Flows* apply to this report. If this quarterly cash flow report has been prepared in accordance with other accounting standards agreed by ASX pursuant to Listing Rule 19.11A, the corresponding equivalent standards apply to this report.
3. Dividends received may be classified either as cash flows from operating activities or cash flows from investing activities, depending on the accounting policy of the entity.
4. If this report has been authorised for release to the market by your board of directors, you can insert here: "By the board". If it has been authorised for release to the market by a committee of your board of directors, you can insert here: "By the [name of board committee – eg Audit and Risk Committee]". If it has been authorised for release to the market by a disclosure committee, you can insert here: "By the Disclosure Committee".
5. If this report has been authorised for release to the market by your board of directors and you wish to hold yourself out as complying with recommendation 4.2 of the ASX Corporate Governance Council's *Corporate Governance Principles and Recommendations*, the board should have received a declaration from its CEO and CFO that, in their opinion, the financial records of the entity have been properly maintained, that this report complies with the appropriate accounting standards and gives a true and fair view of the cash flows of the entity, and that their opinion has been formed on the basis of a sound system of risk management and internal control which is operating effectively.
