ASX Release

GREAT DIVIDE MINING LTD.

Great Divide Mining is a Gold, Antimony and critical metals explorer in Queensland, with four projects across eleven tenements. GDM's focus is on developing assets within areas of historical mining and past exploration with nearby infrastructure, thus enabling rapid development. Through a staged exploration and development programme, GDM intends to generate cash flow from its initial projects to support further exploration across its portfolio of highly prospective tenements.

Chief Executive Officer of Great Divide Mining, Justin Haines, commented:

“We’re pleased that we were able to progress exploration planning across all our projects, hold expenses tight, and be ready to head in-field as soon as possible.

It has been a busy quarter for GDM, following through on our exploration efforts last quarter.

We are coming out of the wet season and had always planned to use this time productively finalising work from last season and preparing to kick off exploration again once the ground dries up.

Our primary focus has remained on Yellow Jack, following up the last exploration results and undertaking additional sampling and doing additional geological, metallurgical, and process studies. The key for Yellow Jack is finding the best ore processing solution which will define our mine optimisation studies.¹

Sampling in December at our Cape Project has shown that some of the pegmatites and greisens there are in the fertile range for lithium and pegmatite mineralisation. While we are still focussed on gold and base metals at Cape, this gives us another vector to explore during the year, and a potential additional revenue stream, over and above that projected.

We are also completing exploration scheduling for Coonambula and Devils Mountain, ready for when access becomes feasible”.

¹ Refer to Listing Rule Disclosures at end of document.

Recent Highlights

- Significant gold assay results for Yellow Jack Project (EPM 17321).
- Work progressing on Yellow Jack Project commercial viability.
- Lithium and Rare Earth Element (REE) potential identified at Cape Project (EPM 26646).
- Progressed exploration planning for all projects.

Project Overview and Updates

Yellow Jack

- Announcement 12 January 2024:
 - Assays from three diamond drill holes from Yellow Jack were received in January 2024, which include significant gold intercepts of:
 - 12 m @ 2.70 g/t Au from 25 m depth in hole 23YJDD219.
 - including 6 m @ 4.15 g/t Au from 30 m depth.
 - 6.2 m @ 1.1 g/t Au from 80 m depth in hole 23YJDD217.
- Results indicate that the gold mineralisation is open along strike and at depth, as well as having pockets of higher grades (see Figure below).
- Offsite work continued over the wet season, including geological, metallurgical and mining studies, commercial viability.
- Updated JORC (2012) Mineral Resource statement finalised.
- Mine optimisation studies underway.
- A bulk metallurgical composite sample (~30 kg) is to be laboratory tested, to confirm preferred processing option.

Cape Project

- Initial reconnaissance field survey completed at the New Goldfield Project. Additional assay results pending.
- Announcement 21 March 2024:
 - Gold and base metals continue to be the primary focus of exploration at New Goldfield.
 - Lithium and Rare Earth Element (REE) potential has been identified.
 - Further exploration is required to assess the potential for Lithium and REE.
- A follow up field program including a soil sampling survey has been scheduled.

Coonambula

Exploration planning completed in preparation for the commencement of the field season. Soil sampling survey scheduled over a prominent untested target adjacent to known Banshee antimony-gold mineralisation.

Devils Mountain

Exploration planning completed in preparation for the commencement of the field season.

The Devils Mountain Project comprises two main prospects – the Devils Mountain gold prospect and the Gibraltar Rock Copper prospect.

Devils Mountain Gold Prospect:

Exploration planning for soil sampling and geological mapping completed.

Gibraltar Rock Copper Prospect:

Scheduling for a geophysical survey (induced polarisation) is imminent. Amendment to the Company's Environmental Authority received to conduct this work.

Corporate Overview

The March quarter is the wet season in northern Australia, which significantly limits access for exploration activities. During Q3 FY24 GDM completed the planned analysis of results and desktop studies plus planning for resumption of onsite activities during Q4 FY24.

Exploration expenditure during the quarter totalled \$122k, with the majority of those funds being allocated towards Yellow Jack - funding the resource and mining studies.

The Company expects exploration cash outflows in Q4 FY24 to return to budget levels.

PROSPECTUS USE OF FUNDS CALCULATIONS

In accordance with ASX Listing Rule 5.3.4 the Company provides the following comparison between the Prospectus Use of Funds and the actual expenditure by the Company.

Accordingly the Company does not expect to report any funds expended against that provision.
