

ASX ANNOUNCEMENT

7 May 2024

ChemX Materials (ASX:CMX) (ChemX or the Company), an Australian high purity critical materials company, is pleased to advise Chief Executive Officer Peter Lee will be delivering the attached presentation during ChemX's national investor roadshow this week.

Shareholders are reminded that the Company's Share Purchase Plan is due to close at 5.00pm (WST) on Friday 10th May 2024. Shareholders can access the offer via the secure link on the Company's website <https://cmxspoffer.computersharecas.com.au/offer/>

This Announcement has been authorised for release by the Board.

The Company confirms that it is not aware of any new information or data that materially affects the information in the relevant market announcements, and that the form and context in which the Competent Persons findings presented have not been materially modified from the original announcements.

About ChemX Materials (ASX: CMX)

ChemX Materials (ASX:CMX) is an ASX-listed critical materials company developing innovative processing technology to produce high purity alumina for advanced technology and clean energy applications. ChemX Materials' 100% owned, Australian patented HiPurA[®] process technology offers a low cost and energy intensity production method to produce high purity alumina (HPA). The Company's vision is to support the clean energy transition through the delivery of high purity materials and technology that provide real solutions to lowering carbon emissions. The Company is currently constructing a 24 tpa HiPurA[®] Pilot Plant in Perth, Western Australia along with a high purity manganese (HPM) Project on the Eyre Peninsula in South Australia.

INVESTOR PRESENTATION

MAY 2024 ASX:CMX

Important Information

Disclaimer and Forward-Looking Statements

This document has been prepared by ChemX Materials Limited (ChemX Materials). This document is not an offer, invitation, solicitation, advice or recommendation with respect to the subscription for, purchase or sale of, any security, and neither this document nor anything in it will form the basis of any contract or commitment. Nothing contained in this document constitutes investment, legal, tax or other advice. This document does not purport to contain all of the information that prospective investors may require to evaluate a possible acquisition of securities and it does not take into account the investment objectives, financial situation or particular needs of any prospective investor. Certain information in this document has been derived from third parties and though ChemX Materials has no reason to believe that it is not accurate, reliable or complete, it has not been independently audited or verified by ChemX Materials. Any forward-looking statements included in this document involve subjective judgment and analysis and are subject to uncertainties, risks and contingencies, many of which are outside the control of, and may be unknown to, ChemX Materials. In particular, they are current only as of the date of this document, they assume the success of ChemX Materials' strategies, and they are subject to significant regulatory, business, competitive and economic uncertainties and risks. Actual future events may vary materially from the forward-looking statements and the assumptions on which the forward-looking statements are based. Recipients of this document (Recipients) are cautioned to not place undue reliance on such forward-looking statements. ChemX Materials makes no representation or warranty as to the accuracy, reliability or completeness of information in this document and does not take responsibility for updating any information or correcting any error or omission which may become apparent after this document has been issued. To the extent permitted by law, ChemX Materials and its officers, employees, related bodies corporate and agents (Representatives) disclaim all liability, direct, indirect or consequential (and whether or not arising out of the negligence, default or lack of care of ChemX Materials and/or any of its Representatives) for any loss or damage suffered by a Recipient or other persons arising out of, or in connection with, any use or reliance on this document or information.

This document, including the information contained in this disclaimer, does not constitute, or form any part of, an offer to sell, or a solicitation of an offer to buy, securities in the United States or to, or for the account or benefit of, any "US person" (as defined in Regulation S under the US Securities Act of 1933, as amended (the US Securities Act)) (US Person), or in any other jurisdiction in which such an offer would be illegal. Securities may not be offered or sold in the United States or to, or for the account or benefit of, US Persons unless the securities have been registered under the US Securities Act or pursuant to an exemption from, or in a transaction not subject to, such registration requirements. The securities of ChemX Materials have not been and will not be registered under the US Securities Act, and may not be offered or sold in the United States or to, or for the account or benefit of, US Persons except pursuant to an exemption from, or in a transaction not subject to, such registration requirements. Accordingly, securities of ChemX Materials will only be offered and sold outside of the United States to persons that are not, and are not acting for the account or benefit of, US Persons, or in the United States to Eligible US Fund Managers, in each case, in compliance with Regulation S under the US Securities Act and the applicable laws of the jurisdiction where any offer and sale may occur. As used herein, the term "Eligible US Fund Manager" means a dealer or other professional fiduciary organised, incorporated or (if an individual) resident in the United States that is acting for an account (other than an estate or trust) held for the benefit or account of persons that are not US Persons for which it has and is exercising investment discretion, within the meaning of Rule 902(k)(2)(I) of Regulation S under the US Securities Act. Persons who come into possession of this document who are not in Australia should seek advice on and observe any such restrictions. Any failure to comply with such restrictions may constitute a violation of applicable securities laws. No action has been taken to register the securities of ChemX Materials outside Australia. By receiving this document, you acknowledge and represent to ChemX Materials that you have read, understood and accepted the terms of this disclaimer. It is the responsibility of all recipients of this document to obtain all necessary approvals to receive this document and receipt of the document will be taken by ChemX Materials to constitute a representation and warranty that all relevant approvals have been obtained.

Who is ChemX Materials

An Australian critical materials company on the cusp of high purity alumina (HPA) production at scale

- 100% owned, Australian patented, HiPurA[®], high purity alumina, processing technology.
- ChemX has produced HPA above 4Ns (99.99%) purity at Micro Plant scale.
- HiPurA[®] 24tpa pilot plant under construction to deliver HPA at scale (x100 Micro Plant scale).
- Targeting to produce 100 kg/d 4N/5N HPA once in production CY2024.
- South Australian High Purity Manganese (HPM) asset internal scoping study advanced.

Above 4Ns (99.99%) pure HPA produced at Micro Plant scale in 2023.

Experienced team to drive production and scalability

Warrick Hazeldine
Non-Executive Chair

20+ years' experience across capital markets and strategic communications with a focus on battery materials.

Alwyn Vorster
Non-Executive Director

30+ years' experience in technical and senior commercial (including offtake & approvals) and leadership roles across the mining supply chain.

Stephen Strubel
**Executive Director /
Company Secretary**

Company Founder with 20 years' experience in finance and corporate governance.

Peter Lee
Chief Executive Officer

20+ years' tier one operational and technical experience across mining, metals processing and chemical industries within Canada and Australia.

Linda Gimondo
Head of Corporate Affairs

20+ years' experience in Corporate Affairs (most recently Pilbara Minerals) specialising in government relations, reputation and brand management.

Russell Vallis
Operations Manager HPA

20+ years' experience across the advanced materials and nanotechnology sectors and in project delivery.

ChemX Materials Capital Structure

Tight Capital structure¹

Ordinary Shares:	117,280,681
Options various strike prices:	37,644,774
Performance Shares and Rights:	4,200,000
Convertible Note ² :	2,640,000

Share Purchase Plan (SPP) Open³

- Seeking \$500,000 at \$0.048
- 1 Option for 2 shares held 3 year term strike price \$0.09
- Closes 5pm (WST) Friday 10 May 2024

¹ See ChemX ASX Appendix 2A, 9/4/2024

HiPurA[®] processing technology

Innovative processing method to supply HPA to the lithium-ion battery, synthetic sapphire, LED and semiconductor industries

- 100% - ChemX owned, Australian patented technology.
- Patents pending in other international jurisdictions.
- Micro Plant has proven HiPurA[®] can produce HPA above 4N (99.99%) purity.
- 24tpa HiPurA[®] Pilot Plant under construction, commissioning targeted for mid 2024.
- HiPurA[®] Pilot Plant production samples for customer qualification.

HiPurA[®] commercial
plant and/or
licencing of
technology to end
users

HiPurA[®] competitive advantages

Lower costs

both capital and operating lower than Kaolin to HPA.

Independent feedstock

process is not tied to mine production and uses a readily available aluminous industrial chemical.

Lower carbon footprint

low energy intensity technology.

Modular

can be built near end users' manufacturing operations.

Easily scalable

production output can increase based on demand.

Optionality

Australian patented technology can be licenced to end users.

Pictures of progress – HPA Pilot Plant 24tpa

Solvent extraction installation

- 100 kg/d HPA production capacity
- Patented technology
- 4N and 5N HPA capable
- Modular, scalable deployment
- Low energy, carbon intensity

Australian Government engagement

Co-funding partnership opportunities for Australian critical material companies like ChemX

- ChemX has appointed a government funding and relationships expert.
- Multi-billion critical minerals funding facility.
- Future Made in Australia Act proposal.
- National Reconstruction Fund - \$15B investment.
- High purity alumina on Australia’s critical minerals list.
- Ongoing dialogue with end users and governments around the globe.

Visits to ChemX's facilities by senior Government Ministers
Top - Minister for Industry, Hon Ed Husic MP and Federal Member for Fremantle, Hon Josh Wilson MP.

Bottom - Minister for Resources, Hon Madeleine King MP and past WA State Minister for Mines, Hon Bill Johnston MLA.

HPA critical for high tech and clean energy applications

LEDs

- Sapphire substrates (TVs, Mobile Phones, Tablets)
- Fluorescent lights
- Synthetic sapphire glass (Watches, Lenses, Defence applications)

SEMICONDUCTORS

- Boehmites for chemical mechanical planarization (CMP) slurries
- Al-Nitrates and Al-Sulphates for CMP slurries
- Nano HPA for polishing silicon chips used in AI

ELECTRIC VEHICLES

- Li-battery separators
- Li-battery cathode chemistry (e.g. LMFP, NMC, NMX)
- Precursors for Li-battery anodes (coating)

Building safer, smarter batteries

HPA is used to coat separators in lithium-ion batteries

High purity alumina is known for:

- Its inert chemical stability and hardness.
- Good thermal conductivity.
- High electrical insulative properties.

Used in battery technology HPA provides:

- Greater thermal stability which:
 - ✓ reduces the risk of batteries catching fires.
 - ✓ improves battery life cycle and lowers self-discharge.

Lithium-ion battery - HPA is used to coat the separators.

Target markets to drive shareholder value

Innovative processing method to supply HPA to the lithium-ion battery, LED and semiconductor industries globally

Likely revenue streams:

- Joint Venture
- Technology Licencing
- Offtake
- Pre-payment

South Korea

- Large conglomerate EV materials producers
- 26% of global EV market
- Second largest semiconductor manufacturer

Japan

- Large conglomerate EV materials producers
- World's second biggest automaker

USA

- Inflation Reduction Act
- Targeting domestic battery manufacturing investment

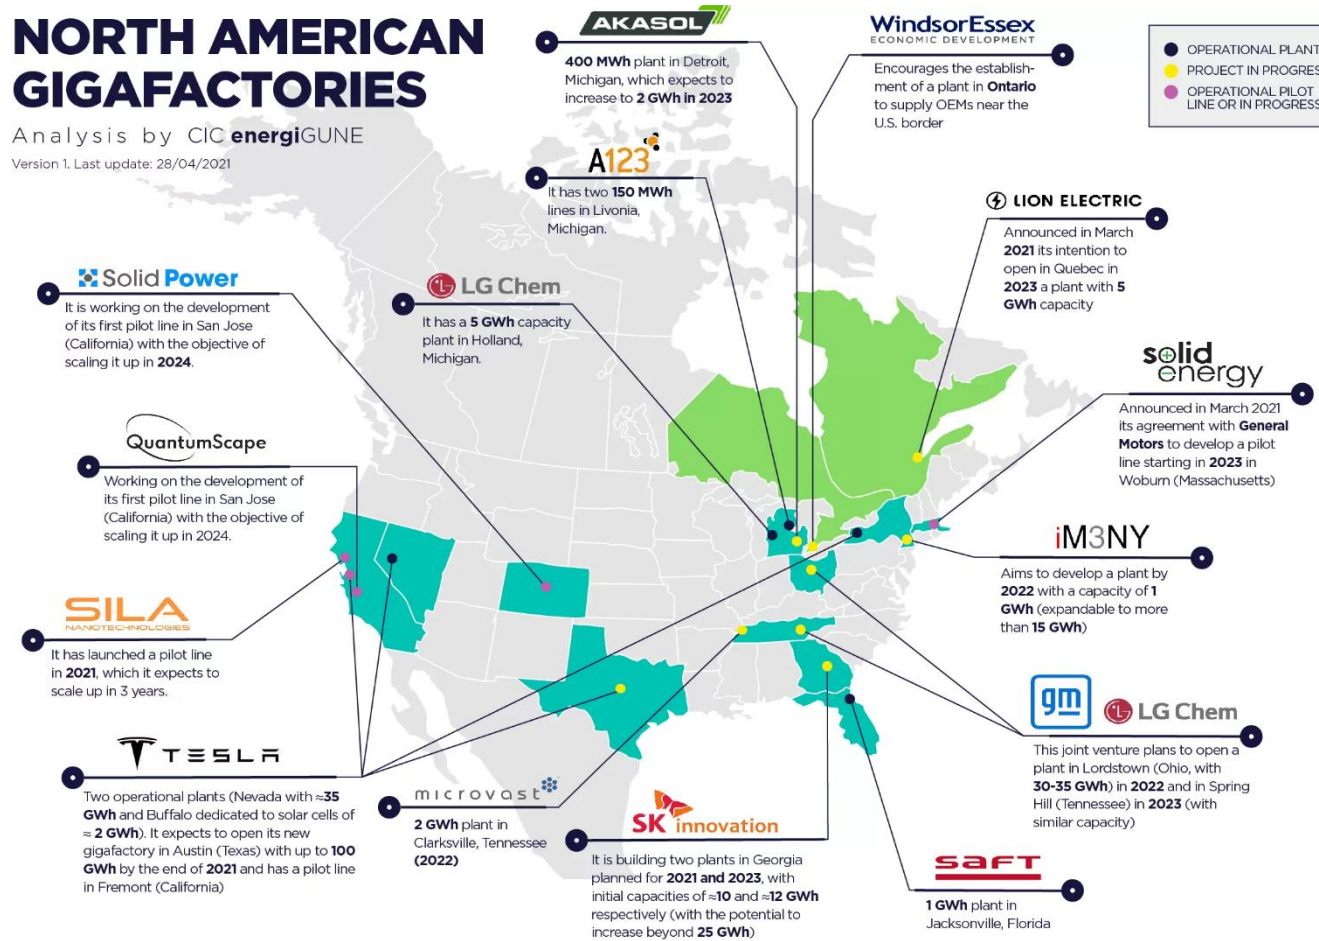

Strategic North American focus

NORTH AMERICAN GIGAFACTORIES

Version 1. Last update: 28/04/2021

Project 2 – High Purity Manganese (HPM)

Manganese the essential high purity cathode and industrial material

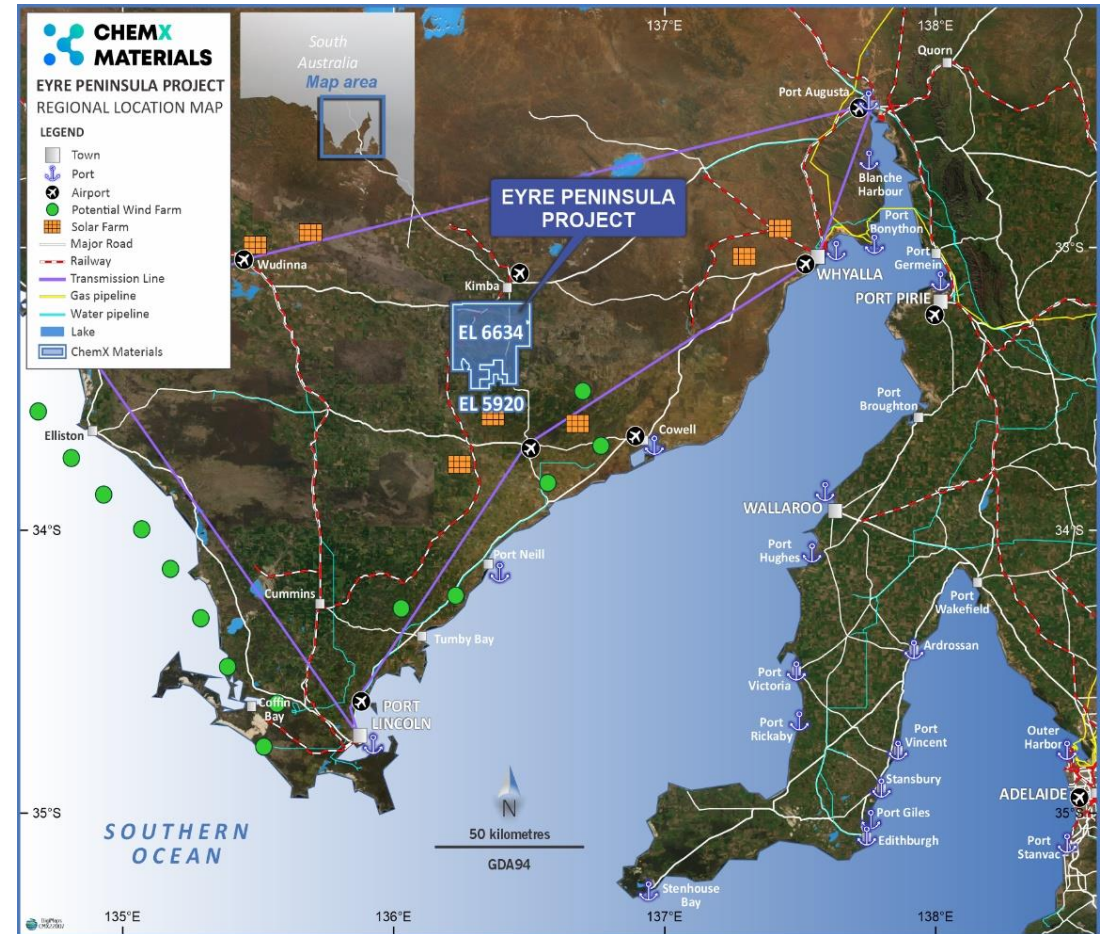

Jamieson Tank Manganese Project, South Australia

Developing an Australian manganese asset

- Exploration tenements cover a combined area of 718km².
- Located 150km south-west of Whyalla on the Eyre Peninsular in South Australia.

Infrastructure rich region

- Rapidly developing renewable energy infrastructure (wind, solar and future hydrogen).
- Sealed roads, approx. 160km to Port of Whyalla.
- Local skilled workforce and social infrastructure with major regional airport for workforce expansion.
- Internal scoping study advanced.

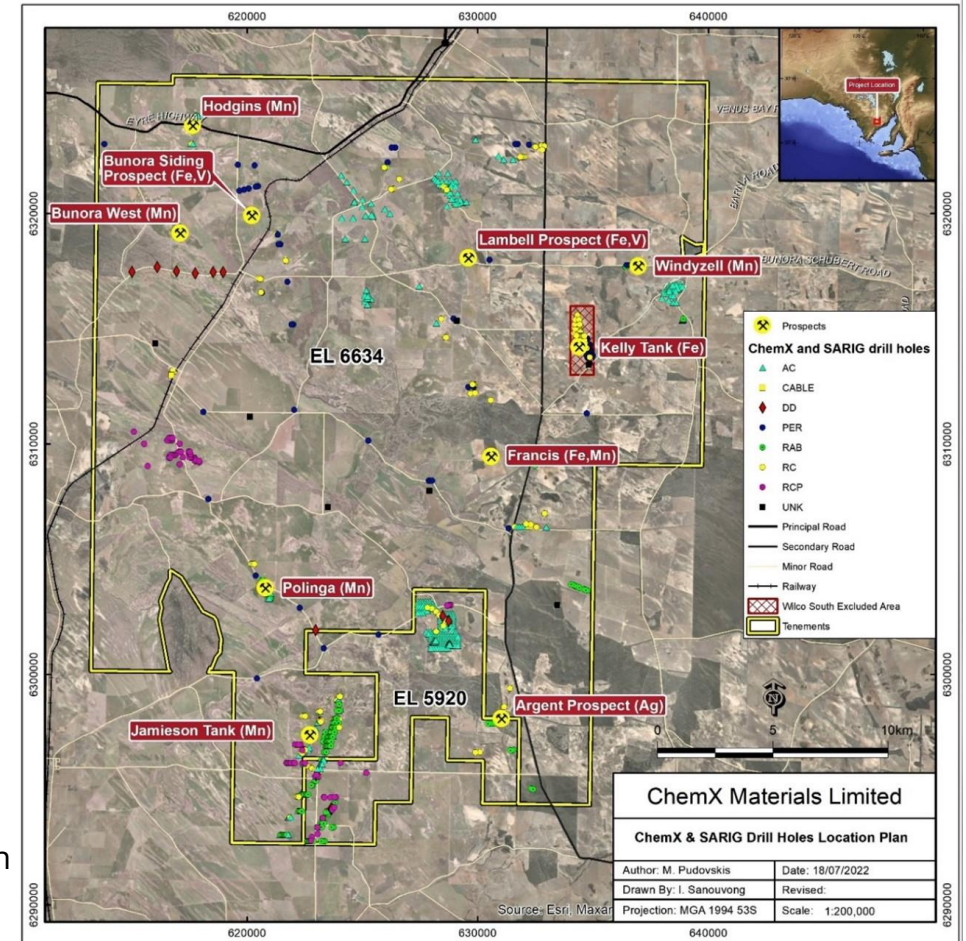

Jamieson Tank Manganese Project, South Australia

Developing an Australian manganese asset

- Maiden Mineral Resource 13.1 Mt at 5.7%Mn established within 2023 drilling program.
- Significant potential upside with ~70% of the identified Jamieson Tank strike awaiting further extensional drilling of high grade, near surface targets.
- Testwork shows an accessible, near-surface resource with excellent upgrade characteristics.

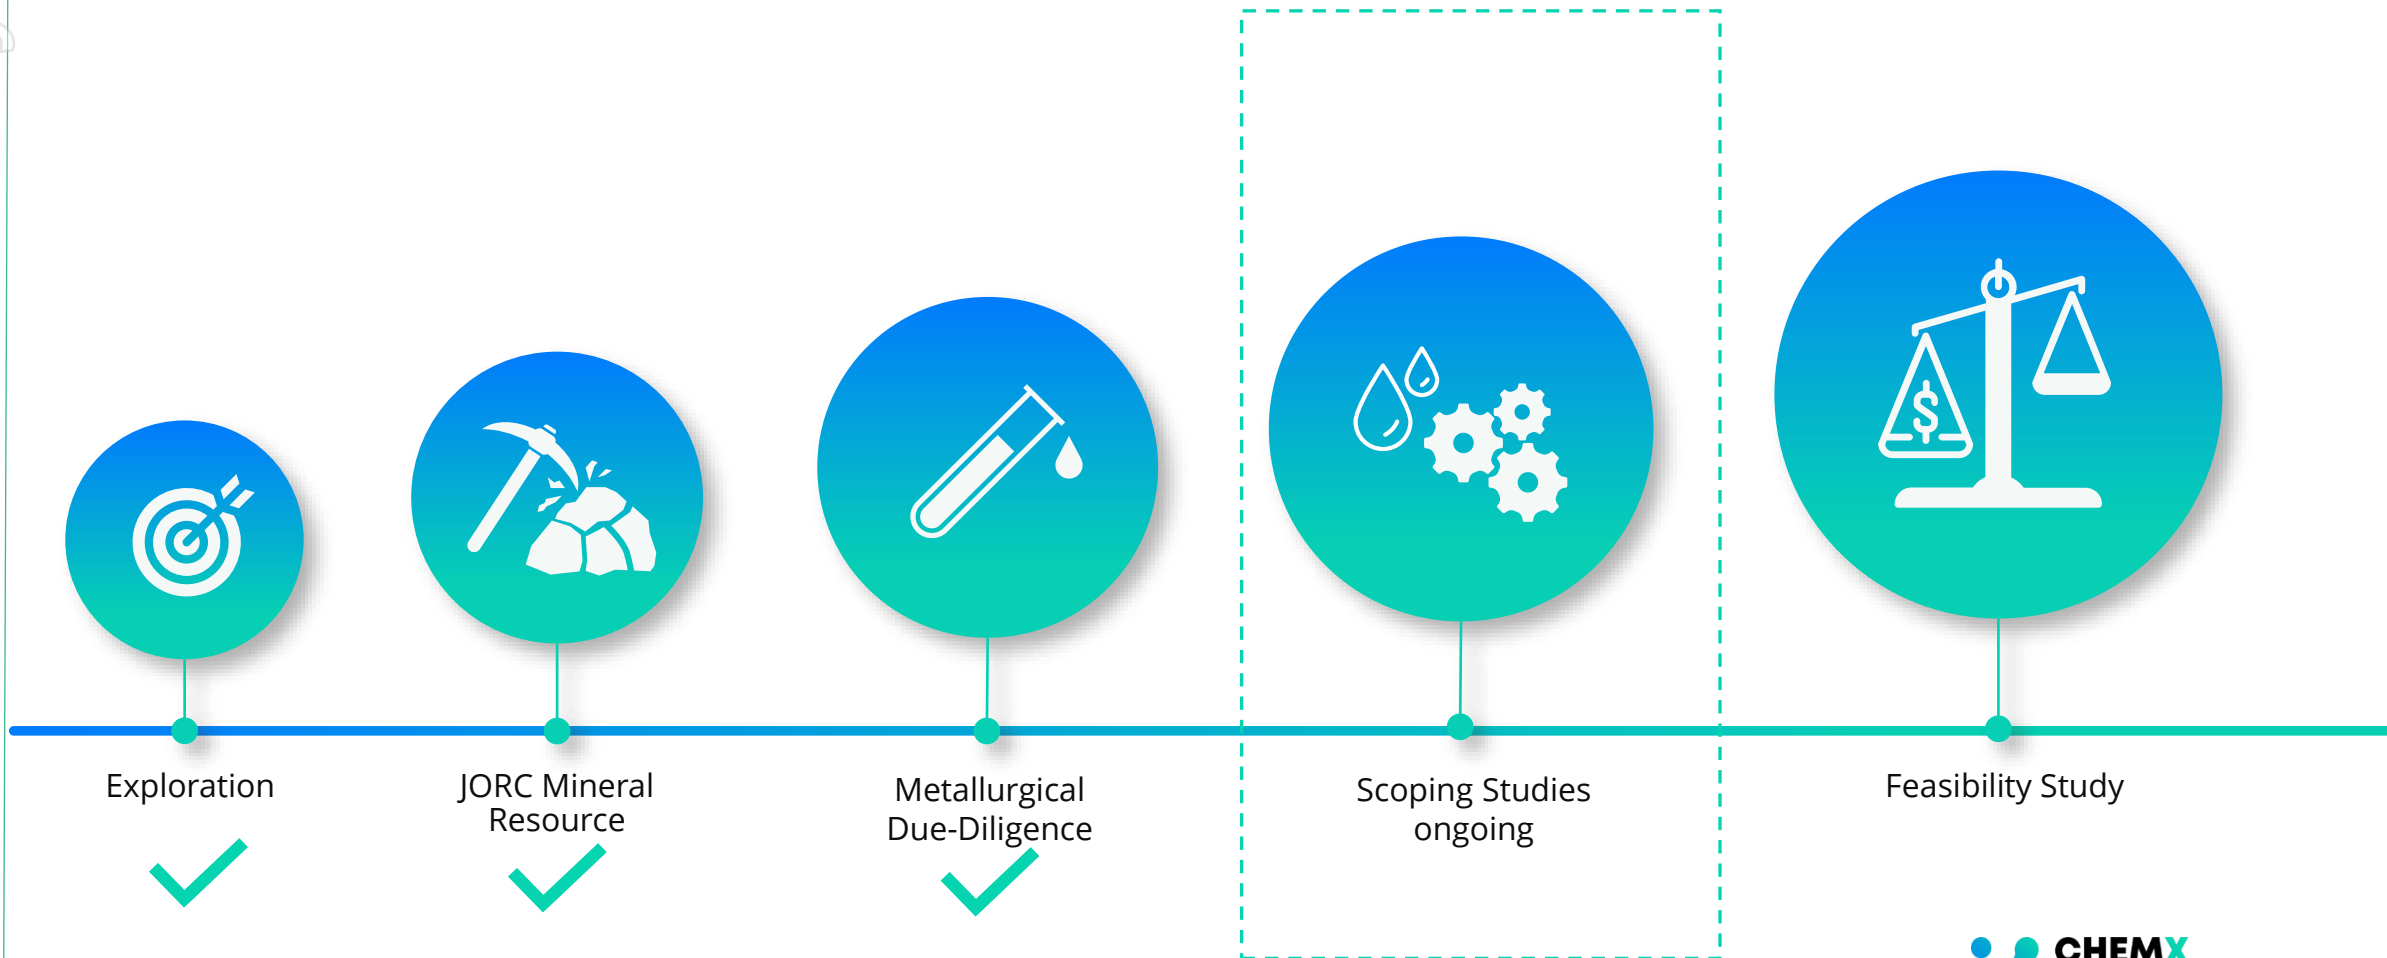

JORC classification	Tonnes (Mt)	Mn (%)	Fe (%)	SiO ₂ (%)	Al ₂ O ₃ (%)	P (%)
Indicated	2.7	5.9	14.8	48.9	9.1	0.093
Inferred	10.4	5.6	14.8	48.7	10.2	0.095
Total	13.1	5.7	14.8	48.7	10.0	0.094

Table A: Mineral Resource estimate (MRE) summary, with applied grade cut-off 4%Mn

De-risking project outcomes

Building a high purity manganese for export to global battery manufacturers

Why invest?

ChemX on the cusp of high purity alumina production at scale

Proven technology

Proven HiPurA[®] can produce an above 4N (99.99%) pure HPA at Micro Plant scale.

Innovative and sustainable

Australian patented technology that is lower in energy intensity than alternative methods.

Flexible

HiPurA[®] not tied to mine production and scalable and modular so can be located close to end users.

Commercialisation

HiPurA[®] pilot plant to be commissioned in June Quarter 2024 paving way for commercialisation.

Growing market

Global demand for HPA is growing as the world pursues clean energy and advanced technologies.

Mineral Resources Disclosure

Information on historical exploration results and Mineral Resources for the Jamieson Tank Manganese Project presented in this announcement, together with JORC Table 1 information, is contained in an ASX announcement released on 20 September 2023.

The Company confirms that it is not aware of any new information or data that materially affects the information in the relevant market announcements, and that the form and context in which the Competent Persons findings are presented have not been materially modified from the original announcements.

Where the Company refers to Mineral Resources for the Jamieson Tank Manganese Project in this announcement (referencing previous releases made to the ASX), it confirms that it is not aware of any new information or data that materially affects the information included in that announcement and all material assumptions and technical parameters underpinning the Mineral Resource estimate in that announcement continue to apply and have not materially changed. The Company confirms that the form and context in which the Competent Persons findings are presented have not materially changed from the original announcement.
