The Offers do not, and are not intended to, constitute an offer in any place or jurisdiction in which, or to any person to whom, it would not be lawful to make such an offer or to issue this Prospectus.

The Offers are not being extended and Options will not be issued to applicants with a registered address which is outside Australia or New Zealand.

New Zealand

The Offers to New Zealand investors are regulated offers made under Australian and New Zealand law. In Australia, this is Chapter 8 of the Corporations Act 2001 (Aust) and regulations made under that Act. In New Zealand, this is subpart 6 of Part 9 of the Financial Markets Conduct Act 2013 and Part 9 of the Financial Markets Conduct Regulations 2014.

These Offers and the content of the offer document are principally governed by Australian rather than New Zealand law. In the main, the Corporations Act 2001 (Aust) and the regulations made under that Act set out how the offer must be made.

There are differences in how financial products are regulated under Australian law. For example, the disclosure of fees for managed investment schemes is different under the Australian regime.

The rights, remedies, and compensation arrangements available to New Zealand investors in Australian financial products may differ from the rights, remedies, and compensation arrangements for New Zealand financial products.

Both the Australian and New Zealand financial markets regulators have enforcement responsibilities in relation to this offer. If you need to make a complaint about this offer, please contact the Financial Markets Authority, New Zealand (<http://www.fma.govt.nz>). The Australian and New Zealand regulators will work together to settle your complaint.

The taxation treatment of Australian financial products is not the same as for New Zealand financial products.

If you are uncertain about whether this investment is appropriate for you, you should seek the advice of an appropriately qualified financial adviser.

The Offers may involve a currency exchange risk. The currency for the financial products is not New Zealand dollars. The value of the financial products will go up or down according to changes in the exchange rate between that currency and New Zealand dollars. These changes may be significant.

If you expect the financial products to pay any amounts in a currency that is not New Zealand dollars, you may incur significant fees in having the funds credited to a bank account in New Zealand in New Zealand dollars.

If the financial products are able to be traded on a financial product market and you wish to trade the financial products through that market, you will have to make arrangements for a participant in that market to sell the financial products on your behalf. If the financial product market does not operate in New Zealand, the way in which the market operates, the regulation of participants in that market, and the information available to you about the financial products and trading may differ from financial product markets that operate in New Zealand.

3.13 Enquiries

Any questions concerning the Offers should be directed to Stephen Strubel, Company Secretary on +61 08 6374 2070 or email info@chemxmaterials.com.au.

4. PURPOSE AND EFFECT OF THE OFFERS

4.1 Purpose of the Offers

No funds will be raised from the issue of the Options as they are being issued free-attaching to Shares issued to Placement Participants, SPP Participants and Shortfall Participants under the Placement, SPP and SPP Shortfall, respectively, and to the Lead Manager in consideration for lead manager services provided.

4.2 Effect of the Offers

The principal effect of the Offers will be to increase the number of Options on issue from 37,644,774 as at the date of this Prospectus to 55,398,945.

5. The final number of Options issued under the Offers will depend on the level of applications received under the Placement, SPP and SPP Shortfall, and the rounding of fractional entitlements of the Placement Options, SPP Options and Shortfall Options, respectively.

The Company currently has 117,280,681 Shares on issue (including 2,000,000 restricted Shares and 21,937,508 Shares issued under the Placement). The Company may issue up to an additional 10,416,667 Shares under the SPP and SPP Shortfall which is intended to occur after the date of this Prospectus. There will be no resulting change to the number of Shares on issue by virtue of the Offers.

As stated above, there will be no proceeds from the Offers. The expenses of the Offers (approximately \$18,206) will be met from the Company's existing cash reserves. A total of approximately \$1,618,000 was raisable under the Capital Raising.

(c) **Expiry Date**

Each Option will expire at 5:00 pm (WST) on the date which is three (3) years from the date of issue (**Expiry Date**). An Option not exercised before the Expiry Date will automatically lapse on the Expiry Date.

(d) **Exercise Period**

The Options are exercisable at any time on or prior to the Expiry Date (**Exercise Period**).

(e) **Notice of Exercise**

The Options may be exercised during the Exercise Period by notice in writing to the Company in the manner specified on the Option certificate (**Notice of Exercise**) and payment of the Exercise Price for each Option being exercised in Australian currency by electronic funds transfer or other means of payment acceptable to the Company.

(f) **Exercise Date**

A Notice of Exercise is only effective on and from the later of the date of receipt of the Notice of Exercise and the date of receipt of the payment of the Exercise Price for each Option being exercised in cleared funds (**Exercise Date**).

(g) **Timing of issue of Shares on exercise**

Within 5 Business Days after the Exercise Date, the Company will:

- (i) issue the number of Shares required under these terms and conditions in respect of the number of Options specified in the Notice of Exercise and for which cleared funds have been received by the Company;
- (ii) if required, give ASX a notice that complies with section 708A(5)(e) of the Corporations Act, or, if the Company is unable to issue such a notice, lodge with ASIC a prospectus prepared in accordance with the Corporations Act and do all such things necessary to satisfy section 708A(11) of the Corporations Act to ensure that an offer for sale of the Shares does not require disclosure to investors; and

- (iii) if admitted to the official list of ASX at the time, apply for official quotation on ASX of Shares issued pursuant to the exercise of the Options.

If a notice delivered under (ii) for any reason is not effective to ensure that an offer for sale of the Shares does not require disclosure to investors, the Company must, no later than 20 Business Days after becoming aware of such notice being ineffective, lodge with ASIC a prospectus prepared in accordance with the Corporations Act and do all such things necessary to satisfy section 708A(11) of the Corporations Act to ensure that an offer for sale of the Shares does not require disclosure to investors.

(h) **Shares issued on exercise**

Shares issued on exercise of the Options rank equally with the then issued shares of the Company.

(i) **Reconstruction of capital**

If at any time the issued capital of the Company is reconstructed, all rights of an Optionholder are to be changed in a manner consistent with the Corporations Act and the ASX Listing Rules at the time of the reconstruction.

(j) **Participation in new issues**

There are no participation rights or entitlements inherent in the Options and holders will not be entitled to participate in new issues of capital offered to Shareholders during the currency of the Options without exercising the Options.

(k) **Change in exercise price**

An Option does not confer the right to a change in Exercise Price or a change in the number of underlying securities over which the Option can be exercised.

(l) **Transferability**

The Options are transferable subject to any restriction or escrow arrangements imposed by ASX or under applicable Australian securities laws.

5.2 **Rights and liabilities attaching to Shares**

The following is a summary of the more significant rights and liabilities attaching to the Shares to be issued upon the exercise of the Options offered pursuant to this Prospectus. This summary is not exhaustive and does not constitute a definitive statement of the rights and liabilities of Shareholders. To obtain such a statement, persons should seek independent legal advice.

Full details of the rights and liabilities attaching to Shares are set out in the Constitution, a copy of which is available for inspection at the Company's registered office during normal business hours.

(a) **General meetings**

Shareholders are entitled to be present in person, or by proxy, attorney or representative to attend and vote at general meetings of the Company.

Shareholders may requisition meetings in accordance with section 249D of the Corporations Act and the Constitution of the Company.

(b) **Voting rights**

Subject to any rights or restrictions for the time being attached to any class or classes of shares, at general meetings of shareholders or classes of shareholders:

- (i) each Shareholder entitled to vote may vote in person or by proxy, attorney or representative;
- (ii) on a show of hands, every person present who is a Shareholder or a proxy, attorney or representative of a Shareholder has one vote; and
- (iii) on a poll, every person present who is a Shareholder or a proxy, attorney or representative of a Shareholder shall, in respect of each fully paid Share held by him, or in respect of which he is appointed a proxy, attorney or representative, have one vote for each Share held, but in respect of partly paid shares shall have such number of votes as bears the same proportion to the total of such Shares registered in the Shareholder's name as the amount paid (not credited) bears to the total amounts paid and payable (excluding amounts credited).

(c) **Dividend rights**

Subject to the rights of any preference Shareholders and to the rights of the holders of any shares created or raised under any special arrangement as to dividend, the Directors may from time to time declare a dividend to be paid to the Shareholders entitled to the dividend which shall be payable on all Shares according to the proportion that the amount paid (not credited) is of the total amounts paid and payable (excluding amounts credited) in respect of such Shares.

The Directors may from time to time pay to the Shareholders any interim dividends as they may determine. No dividend shall carry interest as against the Company. The Directors may set aside out of the profits of the Company any amounts that they may determine as reserves, to be applied at the discretion of the Directors, for any purpose for which the profits of the Company may be properly applied.

Subject to the ASX Listing Rules and the Corporations Act, the Company may, by resolution of the Directors, implement a dividend reinvestment plan on such terms and conditions as the Directors think fit and which provides for any dividend which the Directors may declare from time to time payable on Shares which are participating Shares in the dividend reinvestment plan, less any amount which the Company shall either pursuant to the Constitution or any law be entitled or obliged to retain, be applied by the Company to the payment of the subscription price of Shares.

(d) **Winding-up**

If the Company is wound up, the liquidator may, with the authority of a special resolution, divide among the Shareholders in kind the whole or any part of the property of the Company, and may for that purpose set such value as he considers fair upon any property to be so divided, and may determine how the division is to be carried out as between the Shareholders or different classes of Shareholders.

The liquidator may, with the authority of a special resolution, vest the whole or any part of any such property in trustees upon such trusts for the benefit of the contributories as the liquidator thinks fit, but so that no Shareholder is compelled to accept any shares or other securities in respect of which there is any liability.

(e) **Shareholder liability**

As the Shares issued on exercise of the Options will be fully paid shares, they will not be subject to any calls for money by the Directors and will therefore not become liable for forfeiture.

(f) **Transfer of shares**

Generally, shares in the Company are freely transferable, subject to formal requirements, the registration of the transfer not resulting in a contravention of or failure to observe the provisions of a law of Australia and the transfer not being in breach of the Corporations Act and the ASX Listing Rules.

(g) **Future increase in capital**

The issue of any new Shares is under the control of the Directors of the Company. Subject to restrictions on the issue or grant of securities contained in the ASX Listing Rules, the Constitution and the Corporations Act (and without affecting any special right previously conferred on the holder of an existing share or class of shares), the Directors may issue Shares as they shall, in their absolute discretion, determine.

(h) **Variation of rights**

Under section 246B of the Corporations Act, the Company may, with the sanction of a special resolution passed at a meeting of Shareholders vary or abrogate the rights attaching to Shares.

If at any time the share capital is divided into different classes of shares, the rights attached to any class (unless otherwise provided by the terms of issue of the shares of that class), whether or not the Company is being wound up, may be varied or abrogated with the consent in writing of the holders of three quarters of the issued shares of that class, or if authorised by a special resolution passed at a separate meeting of the holders of the shares of that class.

(i) **Alteration of constitution**

In accordance with the Corporations Act, the Constitution can only be amended by a special resolution passed by at least three quarters of Shareholders present and voting at the general meeting. In addition, at

least 28 days written notice specifying the intention to propose the resolution as a special resolution must be given.

6. RISK FACTORS

6.1 Introduction

The Options offered under this Prospectus are considered highly speculative. An investment in the Company is not risk free and the Directors strongly recommend potential investors to consider the risk factors described below, together with information contained elsewhere in this Prospectus and to consult their professional advisers before deciding whether to apply for Options pursuant to this Prospectus.

There are specific risks which relate directly to the Company's business. In addition, there are other general risks, many of which are largely beyond the control of the Company and the Directors. The risks identified in this section, or other risk factors, may have a material impact on the financial performance of the Company and the market price of the Options.

The following is not intended to be an exhaustive list of the risk factors to which the Company is exposed.

6.2 Company specific

Risk Category	Risk
Potential for dilution	<p>Assuming all Options under the Offers are exercised prior to the Expiry Date, the number of Shares in the Company will increase from 117,280,681 Shares on issue at the date of this Prospectus to 135,034,852 Shares. This means that each Share will represent a significantly lower proportion of the ownership of the Company.</p> <p>It is not possible to predict what the value of the Company or a Share will be following the completion of the Offers being implemented and the Directors do not make any representation as to such matters.</p>
Going concern risk	<p>The Company's half year financial report for the six months ended 31 December 2023 (Half Year Report) includes a note on the financial condition of the Company and the possible existence of a material uncertainty about the Company's ability to continue as a going concern.</p> <p>Notwithstanding the 'going concern' paragraph included in the Half Year Report, the Directors believe that the Company will have sufficient funds to adequately meet the Company's current expenditure commitments and short-term working capital requirements. However, it is highly likely that further funding will be required to meet the medium to long-term working capital costs of the Company.</p>
Additional requirements for capital	<p>The Company's capital requirements depend on numerous factors, including the successful take up of the Offers. Depending on the Company's ability to generate income from its operations, the Company may require further financing in addition to amounts raised under the Offers. Any additional equity financing will dilute shareholdings, and debt financing, if available, may involve restrictions on financing and operating activities. If</p>

Risk Category	Risk
	<p>the Company is unable to obtain additional financing as needed, it may be required to reduce the scope of its operations and scale back its technology development and exploration programs as the case may be. There is however no guarantee that the Company will be able to secure any additional funding or be able to secure funding on terms favourable to the Company.</p> <p>Additionally, the Company is currently in early stage discussions with a third-party lender for the advance of loan funds to be secured against, and repaid by, a future research and development tax refund payable to the Company under the Federal Government of Australia's Research and Development Tax Incentive. The funds (if provided) will help fund the Company's short-term working capital requirements. No assurance can be given that the Company will secure an advance of these loan funds.</p>
Contractual risk	<p>The Company has entered into a mineral rights agreement with Pirie Resources Pty Ltd (Pirie) under which the Company has agreed to grant Pirie mineral rights and allow Pirie the right to explore for and if warranted, develop mining operations on the Company's tenements exclusively for graphite.</p> <p>The ability of the Company to achieve its stated objectives will depend on the performance by the parties of their obligations under these (and other) agreements.</p> <p>If the Company is unable to satisfy its undertakings under these agreements the Company's interest in their subject matter may be jeopardised.</p> <p>If any party defaults in the performance of their obligations, it may be necessary for the Company to approach a court to seek a legal remedy, which can be costly.</p>
HPA Pilot Plant	<p>The HiPurA®HPA Technology has been developed to a stage of confirming its ability to produce HPA at a small scale. The HiPurA®HPA Technology has not been proven at a commercial scale. Any proposed development will be subject to risks usual with this type of development including but not limited to scale up risk, cost increases, delays in milestones being reached and commissioning risk.</p> <p>The HPA Pilot Plant under construction required to confirm that the process can be upscaled to a larger scale and produce HPA within the required specifications at an economically viable cost of production is unclear. There is a risk that the proposed test work program does not produce the anticipated results to justify further development.</p> <p>Furthermore, there is a risk that delays in construction, cost increases and other commercial variables may result in further funding requirements to complete the HPA Pilot Plant.</p>

Risk Category	Risk
Exploration and operating	<p>The mineral exploration licences comprising the Company's Eyre Peninsula Project in South Australia (Eyre Peninsula Project), are at various stages of exploration, and potential investors should understand that mineral exploration and development are high-risk undertakings.</p> <p>There can be no assurance that future exploration of these licences, or any other mineral licences that may be acquired in the future, will result in the discovery of an economic resource. Even if an apparently viable resource is identified, there is no guarantee that it can be economically exploited.</p> <p>The future exploration activities of the Company may be affected by a range of factors including geological conditions, limitations on activities due to seasonal weather patterns or adverse weather conditions, unanticipated operational and technical difficulties, difficulties in commissioning and operating plant and equipment, mechanical failure or plant breakdown, unanticipated metallurgical problems which may affect extraction costs, industrial and environmental accidents, industrial disputes, unexpected shortages and increases in the costs of consumables, spare parts, plant, equipment and staff, native title process, changing government regulations and many other factors beyond the control of the Company.</p> <p>The success of the Company will also depend upon the Company being able to maintain title to the mineral exploration licences comprising the Eyre Peninsula Project and obtaining all required approvals for their contemplated activities. In the event that exploration programmes prove to be unsuccessful this could lead to a diminution in the value of the Eyre Peninsula Project, a reduction in the cash reserves of the Company and possible relinquishment of one or more of the mineral exploration licences comprising the Eyre Peninsula Project.</p>
Tenure, access and grant applications of	<p>Tenure and Renewal</p> <p>Mining and exploration tenements are subject to periodic renewal. The renewal of the term of granted tenements is subject to compliance with the applicable mining legislation and regulations and the discretion of the relevant mining authority. Renewal conditions may include increased expenditure and work commitments or compulsory relinquishment of areas of the tenements. The imposition of new conditions or the inability to meet those conditions may adversely affect the operations, financial position and/or performance of the Company.</p> <p>The Company considers the likelihood of tenure forfeiture to be low given the laws and regulations governing exploration in South Australia and the ongoing expenditure budgeted for by the Company. However, the consequence of forfeiture or involuntary surrender of a granted tenement for reasons beyond the control of the Company could be significant.</p>

Risk Category	Risk
	<p>Access</p> <p>A number of the Company's tenements overlap certain third party interests that may limit the Company's ability to conduct exploration and mining activities including private land, public land and areas on which native title is determined to exist.</p> <p>The key kaolin and manganese deposits located within the Eyre Peninsula Project are located on freehold farmland. As such, there are periods in the cropping cycle when access is limited. The Company will work with the landowners to reduce the impact of exploration activities on farm activities.</p>
<p>Reliance on key personnel</p>	<p>The responsibility of overseeing the day-to-day operations and the strategic management of the Company depends substantially on its senior management and its key personnel. There can be no assurance given that there will be no detrimental impact on the Company if one or more of these employees cease their employment.</p> <p>The Company's future depends, in part, on its ability to attract and retain key personnel. It may not be able to hire and retain such personnel at compensation levels consistent with its existing compensation and salary structure. Its future also depends on the continued contributions of its executive management team and other key management and technical personnel, the loss of whose services would be difficult to replace. In addition, the inability to continue to attract appropriately qualified personnel could have a material adverse effect on the Company's business.</p>
<p>Climate risk</p>	<p>There are a number of climate-related factors that may affect the operations and proposed activities of the Company. The climate change risks particularly attributable to the Company include:</p> <ul style="list-style-type: none"> (a) the emergence of new or expanded regulations associated with the transitioning to a lower-carbon economy and market changes related to climate change mitigation. The Company may be impacted by changes to local or international compliance regulations related to climate change mitigation efforts, or by specific taxation or penalties for carbon emissions or environmental damage. These examples sit amongst an array of possible restraints on industry that may further impact the Company and its profitability. While the Company will endeavour to manage these risks and limit any consequential impacts, there can be no guarantee that the Company will not be impacted by these occurrences; and (b) climate change may cause certain physical and environmental risks that cannot be predicted by the Company, including events such as increased severity of weather patterns and incidence of extreme weather events and longer-term physical

Risk Category	Risk
	risks such as shifting climate patterns. All these risks associated with climate change may significantly change the industry in which the Company operates.
COVID-19 risk	<p>The outbreak of the coronavirus disease (SARS-CoV-2 (severe acute respiratory syndrome coronavirus 2), coronavirus disease 2019 or COVID 19, including any future resurgence or evolutions or mutations thereof or any related or associated epidemic, pandemic or disease outbreak) (COVID-19) may continue to impact global economic markets. While COVID-19 is not currently materially affecting the Company's operations, with the potential for further outbreaks and new strains of the virus, the ongoing nature and extent of the effect of the outbreak on the performance of the Company remains unknown.</p> <p>The Company's Share price may be adversely affected in the short to medium term by the economic uncertainty caused by further outbreaks and new strains of COVID-19. Further, any new governmental or industry measures taken in response to COVID-19 may adversely impact the Company's operations and are likely to be beyond the control of the Company.</p> <p>In addition, the effects of COVID-19 on the market price of the Shares and global financial markets generally may also affect the Company's ability to raise equity or debt if and when required or require the Company to issue capital at a discount, which may result in dilution for some or all Shareholders.</p>

6.3 Industry specific

Risk Category	Risk
Native title and Aboriginal Heritage	<p>In relation to tenements which the Company has an interest in or will in the future acquire such an interest, there may be areas over which legitimate common law native title rights of Aboriginal Australians exist. If native title rights do exist, the ability of the Company to gain access to tenements (through obtaining consent of any relevant landowner), or to progress from the exploration phase to the development and mining phases of operations may be adversely affected.</p> <p>Both of the Company's tenements comprising the Eyre Peninsula Project are within the external boundaries of one Native Title determination.</p> <p>The Directors will closely monitor the potential effect of native title claims or Aboriginal heritage matters involving tenements in which the Company has or may have an interest.</p>
Exploration costs	The exploration costs of the Company are based on certain assumptions with respect to the method and timing of exploration. By their nature, these estimates and

Risk Category	Risk
	assumptions are subject to significant uncertainty, and accordingly, the actual costs may materially differ from the processes and assumptions. Accordingly, no assurance can be given that the cost estimates and the underlying assumptions will be realised in practice, which may materially and adversely impact the Company's viability.
Resource reserves and exploration	<p>The Company has identified a number of exploration opportunities based on geological interpretations and limited geophysical data, geochemical sampling and historical drilling. As announced to ASX on 20 September 2023, the Company has defined a manganese Resource at the Eyre Peninsula Project. Further work is required to provide certainty over the extent of the mineralisation. Whilst the Company intends to undertake additional exploratory work with the aim of defining a larger resource, no assurances can be given that additional exploration will result in the determination of an improved resource on any of the exploration opportunities identified. Even if a resource is identified no assurance can be provided that this can be economically extracted.</p> <p>Reserve and resource estimates are expressions of judgement based on knowledge, experience and industry practice. Estimates which were valid when initially calculated may alter significantly when new information or techniques become available. In addition, by their very nature resource and reserve estimates are imprecise and depend to some extent on interpretations which may prove to be inaccurate.</p>
Grant of future authorisations to explore and mine	If the Company discovers an economically viable mineral deposit that it then intends to develop, it will, among other things, require various approvals, licence and permits before it will be able to mine the deposit. There is no guarantee that the Company will be able to obtain all required approvals, licenses and permits. To the extent that required authorisations are not obtained or are delayed, the Company's operational and financial performance may be materially adversely affected.
Mine development	<p>Possible future development of mining operations at the Eyre Peninsula Project is dependent on a number of factors including, but not limited to, the delineation of economically recoverable mineralisation, favourable geological conditions, receiving the necessary approvals from all relevant authorities and parties, seasonal weather patterns, unanticipated technical and operational difficulties encountered in extraction and production activities, mechanical failure of operating plant and equipment, shortages or increases in the price of consumables, spare parts and plant and equipment, cost overruns, access to the required level of funding and contracting risk from third parties providing essential services.</p> <p>If the Company commences production on one of the</p>

Risk Category	Risk
	<p>Eyre Peninsula Project deposits, its operations may be disrupted by a variety of risks and hazards which are beyond the control of the Company. No assurance can be given that the Company will achieve commercial viability through the development of the Eyre Peninsula Project.</p> <p>The risks associated with the development of a mine will be considered in full should the Eyre Peninsula Project reach that stage and will be managed with ongoing consideration of stakeholder interests.</p>
Environmental	<p>The operations and proposed activities of the Company are subject to State and Federal laws and regulations concerning the environment. As with most exploration projects and mining operations, the Company's activities are expected to have an impact on the environment, particularly if advanced exploration or mine development proceeds. It is the Company's intention to conduct its activities to the highest standard of environmental obligation, including compliance with all environmental laws.</p> <p>Mining operations have inherent risks and liabilities associated with safety and damage to the environment and the disposal of waste products occurring as a result of mineral exploration and production. The occurrence of any such safety or environmental incident could delay production or increase production costs. Events, such as unpredictable rainfall or bushfires may impact on the Company's ongoing compliance with environmental legislation, regulations and licences. Significant liabilities could be imposed on the Company for damages, clean up costs or penalties in the event of certain discharges into the environment, environmental damage caused by previous operations or non-compliance with environmental laws or regulations.</p> <p>The disposal of mining and process waste and mine water discharge are under constant legislative scrutiny and regulation. There is a risk that environmental laws and regulations become more onerous making the Company's operations more expensive.</p> <p>Approvals are required for land clearing and for ground disturbing activities. Delays in obtaining such approvals can result in the delay to anticipated exploration programmes or mining activities.</p>
Regulatory Compliance	<p>The Company's operating activities are subject to extensive laws and regulations relating to numerous matters including resource licence consent, environmental compliance and rehabilitation, taxation, employee relations, health and worker safety, waste disposal, protection of the environment, native title and heritage matters, protection of endangered and protected species and other matters. The Company requires permits from regulatory authorities to authorise the Company's operations. These permits relate to</p>

Risk Category	Risk
	<p>exploration, development, production and rehabilitation activities.</p> <p>While the Company believes that it is in substantial compliance with all material current laws and regulations, agreements or changes in their enforcement or regulatory interpretation could result in changes in legal requirements or in the terms of existing permits and agreements applicable to the Company or its properties, which could have a material adverse impact on the Company's current operations or planned development projects.</p> <p>Obtaining necessary permits can be a time-consuming process and there is a risk that the Company will not obtain these permits on acceptable terms, in a timely manner or at all. The costs and delays associated with obtaining necessary permits and complying with these permits and applicable laws and regulations could materially delay or restrict the Company from proceeding with the development of a project or the operation or development of a mine. Any failure to comply with applicable laws and regulations or permits, even if inadvertent, could result in material fines, penalties or other liabilities. In extreme cases, failure could result in suspension of the Company's activities or forfeiture of one or more of the Company's tenements.</p>
Research and Development	The Company intends to undertake research and development activities in relation to the Projects, which may or may not result in any commercially viable outcome within the expected timeframe or not at all.
Production Risk	The Company intends to construct production facilities to produce its materials. The facilities are likely to be unique in process and design. There is no guarantee that a facility will operate as expected or that construction and/or operating costs do not exceed budgeted costs potentially making production unprofitable.
Marketing Risk	<p>The Company must locate buyers for its production. There is a risk that the Company may not be able to enter into arrangements with sufficient buyers to enable production to become profitable.</p> <p>The nature of the industrial materials that are the focus of the Company may require them to meet buyer specific specification. There is a risk that any production by the Company does not meet the required specifications and may not be accepted by the intended buyer.</p>

6.4 General risks

Risk Category	Risk
Economic	General economic conditions, introduction of tax reform, new legislation, movements in interest and inflation rates and currency exchange rates may have an adverse

Risk Category	Risk
	effect on the Company's exploration, development and production activities, as well as on its ability to fund those activities. If activities cannot be funded, there is a risk that the Company's tenements may have to be surrendered or not proceeded with. General economic conditions may also affect the value of the Company and its valuation regardless of its actual performance.
Competition risk	The industry in which the Company will be involved is subject to domestic and global competition. Although the Company will undertake all reasonable due diligence in its business decisions and operations, the Company will have no influence or control over the activities or actions of its competitors, which activities or actions may, positively or negatively, affect the operating and financial performance of the Company's projects and business.
Market conditions	<p>Share market conditions may affect the value of the Company's Shares regardless of the Company's operating performance. Share market conditions are affected by many factors such as:</p> <ul style="list-style-type: none"> (a) general economic outlook; (b) introduction of tax reform or other new legislation; (c) interest rates and inflation rates; (d) changes in investor sentiment toward particular market sectors; (e) the demand for, and supply of, capital; and (f) terrorism or other hostilities. <p>The market price of Shares can fall as well as rise and may be subject to varied and unpredictable influences on the market for equities in general and resource exploration stocks in particular. Neither the Company nor the Directors warrant the future performance of the Company or any return on an investment in the Company.</p> <p>Applicants should be aware that there are risks associated with any securities investment. Securities listed on the stock market, and in particular securities of small cap companies experience extreme price and volume fluctuations that have often been unrelated to the operating performance of such companies. These factors may materially affect the market price of the shares regardless of the Company's performance.</p> <p>Further, after the end of the relevant escrow periods affecting Shares in the Company, a significant sale of then tradeable Shares (or the market perception that such a sale might occur) could have an adverse effect on the Company's Share price.</p>
Commodity price volatility and exchange rate risks	If the Company achieves HiPurA® HPA Technology test work and/or exploration and/or research and development success leading to production, the revenue it will derive through the sale of product exposes the potential income of the Company to commodity price and exchange rate risks. Commodity prices fluctuate and

Risk Category	Risk
	<p>are impacted by many factors beyond the control of the Company. Such factors include supply and demand fluctuations for precious and base metals, technological advancements, forward selling activities and other macro-economic factors.</p> <p>Furthermore, international prices of various commodities are denominated in United States dollars, whereas the income and expenditure of the Company will be taken into account in Australian currency, exposing the Company to the fluctuations and volatility of the rate of exchange between the United States dollar and the Australian dollar as determined in international markets.</p> <p>The Company may also develop production facilities in other countries. If this were to happen, the Company would be potentially exposed to currencies and the resultant risk of changes relative to the Australian dollar.</p>
Government policy changes	<p>Adverse changes in government policies or legislation may affect ownership of mineral interests, taxation, royalties, land access, labour relations, and mining and exploration activities of the Company. It is possible that the current system of exploration and mine permitting in South Australia may change, resulting in impairment of rights and possibly expropriation of the Company's properties without adequate compensation.</p> <p>The Company is also planning to sell into foreign markets. Changes to laws relating to market access, tariffs and other taxes, process and procedures required to access these markets may impact the viability of the Company.</p>
Insurance	<p>The Company intends to insure its operations in accordance with industry practice. However, in certain circumstances the Company's insurance may not be of a nature or level to provide adequate insurance cover. The occurrence of an event that is not covered or fully covered by insurance could have a material adverse effect on the business, financial condition and results of the Company.</p> <p>Insurance of all risks associated with mineral exploration and production is not always available and where available the costs can be prohibitive.</p>
Force Majeure	<p>The Company's projects now or in the future may be adversely affected by risks outside the control of the Company including labour unrest, civil disorder, war, subversive activities or sabotage, fires, floods, explosions or other catastrophes, epidemics or quarantine restrictions.</p>
Taxation	<p>The acquisition and disposal of Shares will have tax consequences, which will differ depending on the individual financial affairs of each investor. All potential investors in the Company are urged to obtain independent financial advice about the consequences of acquiring Shares from a taxation viewpoint and generally.</p>

Risk Category	Risk
	To the maximum extent permitted by law, the Company, its officers and each of their respective advisors accept no liability and responsibility with respect to the taxation consequences of subscribing for Shares under this Prospectus.
Litigation Risks	The Company is exposed to possible litigation risks including native title claims, tenure disputes, environmental claims, occupational health and safety claims, intellectual property disputes and employee claims. Further, the Company may be involved in disputes with other parties in the future which may result in litigation. Any such claim or dispute if proven, may impact adversely on the Company's operations, reputation, financial performance and financial position. The Company is not currently engaged in any litigation.
Economic conditions and other global or national issues	<p>General economic conditions, laws relating to taxation, new legislation, trade barriers, movements in interest and inflation rates, currency exchange controls and rates, national and international political circumstances (including outbreaks in international hostilities, wars, terrorist acts, sabotage, subversive activities, security operations, labour unrest, civil disorder, and states of emergency), natural disasters (including fires, earthquakes and floods), and quarantine restrictions, epidemics and pandemics, may have an adverse effect on the Company's operations and financial performance, including the Company's exploration, development and production activities, as well as on its ability to fund those activities.</p> <p>Specifically, it should be noted that the current evolving conflict between Ukraine and Russia is impacting global macroeconomics and markets generally. The nature and extent of the effect of this conflict on the performance of the Company and the value of its Securities remains unknown. The Company's Share price may be adversely affected in the short to medium term by the economic uncertainty caused by the conflict between Ukraine and Russia and overall impacts on global macroeconomics. Given the situation is continually evolving, the outcomes and consequences are inevitably uncertain.</p>

6.5 Speculative investment

The above list of risk factors ought not to be taken as exhaustive of the risks faced by the Company or by investors in the Company. The above factors, and others not specifically referred to above, may in the future materially affect the financial performance of the Company and the value of the Options offered under this Prospectus.

Therefore, the Options to be issued pursuant to this Prospectus carry no guarantee with respect to the payment of dividends, returns of capital or the market value of those Options.

7. ADDITIONAL INFORMATION

7.1 Litigation

As at the date of this Prospectus, the Company is not involved in any legal proceedings and the Directors are not aware of any legal proceedings pending or threatened against the Company.

7.2 Continuous disclosure obligations

The Company is a "disclosing entity" (as defined in section 111AC of the Corporations Act) for the purposes of section 713 of the Corporations Act and, as such, is subject to regular reporting and disclosure obligations. Specifically, like all listed companies, the Company is required to continuously disclose any information it has to the market which a reasonable person would expect to have a material effect on the price or the value of the Company's securities.

This Prospectus is a "transaction specific prospectus". In general terms a "transaction specific prospectus" is only required to contain information in relation to the effect of the issue of securities on the Company and the rights attaching to the securities. It is not necessary to include general information in relation to all of the assets and liabilities, financial position, profits and losses or prospects of the issuing company.

This Prospectus is intended to be read in conjunction with the publicly available information in relation to the Company which has been notified to ASX and does not include all of the information that would be included in a prospectus for an initial public offering of securities in an entity that is not already listed on a stock exchange. Investors should therefore have regard to the other publicly available information in relation to the Company before making a decision whether or not to invest.

Having taken such precautions and having made such enquires as are reasonable, the Company believes that it has complied with the general and specific requirements of ASX as applicable from time to time throughout the 3 months before the issue of this Prospectus which required the Company to notify ASX of information about specified events or matters as they arise for the purpose of ASX making that information available to the stock market conducted by ASX.

Information that is already in the public domain has not been reported in this Prospectus other than that which is considered necessary to make this Prospectus complete.

The Company, as a disclosing entity under the Corporations Act states that:

- (a) it is subject to regular reporting and disclosure obligations;
- (b) copies of documents lodged with the ASIC in relation to the Company (not being documents referred to in section 1274(2)(a) of the Corporations Act) may be obtained from, or inspected at, the offices of the ASIC; and
