CORPORATE RELEASE

## IMPACT RECEIVES \$354,000 FROM RESEARCH AND DEVELOPMENT REBATE

Impact Minerals Limited (ASX:IPT) is pleased to announce that it has received a rebate of \$354,000 after costs from the Research and Development Tax Incentive scheme for the financial year ending June 2023.

These funds add to the \$3.725 million raised from a recent placement and exercise of options (ASX Releases May 17<sup>th</sup> and June 5<sup>th</sup> 2024). The funds further bolster the company's financial position, ensuring that Impact is fully funded to complete the Pre-Feasibility Study on the Lake Hope High Purity Alumina Project as well as continuing exploration of its other projects.

Impact's Managing Director, Dr Mike Jones, said, *"The unique mineralogy and patented and proprietary processing techniques for the Lake Hope High Purity Alumina project have allowed us to claim back a significant proportion of our expenditures on the Lake Hope Project through the R and D Tax Incentive programme. Although this rebate covers all of our projects, we had only had the Lake Hope project for three months of the 2023 financial year. We anticipate being able to claim an increasing amount of our expenditures on Lake Hope as we continue to develop this exciting project"*.

The company would like to thank Ernst and Young and Kate Griffiths and Robin Parsons in particular for their help preparing the R and D applications over the past 8 years.

Authorised for release by Impact Minerals Limited.

Dr Michael G Jones
