Risk factors Potential investors should be aware that subscribing for Quoted Options in the Company involves a number of risks. The key risk factors of which investors should be aware are set out in Section 4, including (but not limited to) risks in respect of: (a) Commercial operations risks: The Company has encountered challenges in relation to its financial performance, having incurred operating losses in the past, and there is no certainty that it will achieve or maintain profitability in the future. There are a number of risks to the	Section 4

Key Information	Further Information
<p>Company's commercial operations which, if any one or more of them occur, could adversely affect the Company's business, financial condition, and operating results. These risks include, but are not limited to:</p> <ul style="list-style-type: none"> (i) Failure of the Company's SphygmoCor technology-enabled products, from which the majority of the Company's revenue is currently derived, to gain market acceptance. (ii) The Company's limited operating history with certain products which are still in development makes it challenging to predict long-term performance based solely on historical financial results. (iii) Accurate demand forecasting for products and effective inventory management are crucial for the Company's financial success. Increases in component costs, supply shortages, and supply changes could disrupt the supply chain. (iv) The inability to anticipate appropriate pricing levels for its products, and economic downturns or uncertainties could reduce consumer discretionary spending and demand for its products and services. (v) Consolidation in the healthcare industry may result in demands for price concessions or the exclusion of existing market participants from certain markets. (vi) Inefficient management of growth and expansion, including cost-effective and timely scaling of operations. <p>(b) Product risks: The Company's success is closely tied to maintaining the value and reputation of its brands, which may not be as successful as anticipated. The Company's products and services may encounter design and manufacturing defects, whether real or perceived, which could have adverse effects on its business and damage its reputation. Major defects could make the Company's products and services unsafe and create a risk of environmental or property damage and/or personal injury. Quality problems could also adversely affect the user's experience, and result in harm to the Company's brand or reputation, loss of competitive advantage, poor market acceptance, reduced demand for its products, delay in new product introductions, and lost revenue.</p> <p>(c) Product liability: As with all products, there is no assurance that unforeseen adverse events or defects will not arise in the Company's products. The Company may be subject to warranty claims that result in significant direct or indirect costs, or it could experience more extensive product returns than expected, both of which could negatively affect its business, financial condition, and operating results.</p> <p>(d) Supply Chain: The Company relies on a limited number of global suppliers, contract manufacturers, and logistics partners to manufacture its products, and any loss of supply or supply interruption from these partners could negatively affect its operations. A large portion of the Company's contract manufacturers' primary facilities are located in China. Thus, its business could be adversely affected if one or more of its suppliers is impacted by a natural disaster, an epidemic such as the current COVID-19 pandemic, or other interruption at a particular location.</p>	

Key Information	Further Information
<p>(e) Cybersecurity risks: Expanding the company's solutions and capabilities that rely on network communications expose the Company to risks including cybersecurity threats, interruptions or delays in telecommunications systems, or data service losses, all of which could impair product and service delivery. Despite the Company's efforts and processes to prevent security breaches and incidents, its products and services, as well as its servers, computer systems, and those of third parties that it uses in its operations are vulnerable to cybersecurity risks, which could lead to interruptions, delays, loss, corruption, unavailability, and unauthorised processing of critical data, unauthorized access to or other processing of user health data, a negative impact on users' experience, and loss of consumer confidence.</p> <p>(f) Intellectual Property risks: The Company heavily relies on patent, intellectual property and other proprietary rights, and failing to protect these rights or succeed in litigation related to them could result in significant monetary damages and royalty payments, negatively impacting its ability to sell current or future products. Failure to protect the confidentiality of trade secrets could materially adversely affect the value of the Company's technology and harm its business. Infringement or perceived infringement of others' intellectual property rights by the Company's products could lead to costly patent and intellectual property litigation, substantial damages or royalties, limitations on technology essential to its products, or discontinuation of product sales.</p> <p>(g) Additional capital requirements: The Company may require capital in the future to execute its business plan and maintain ongoing operations in the future. Any additional equity financing may be dilutive to Shareholders, may be undertaken at lower prices than the then market price (or Offer Price) or may involve restrictive covenants which limit the Company's operations and business strategy. Debt financing, if available, may involve restrictions on financing and operating activities or the registering of security interests over the Company's assets. Although the Directors believe that additional capital can be obtained, no assurances can be made that appropriate capital or funding, if and when needed, will be available on terms favourable to the Company or at all.</p> <p>(h) Going concern: The Company's annual financial report for the year ended 30 June 2023 (Financial Report) includes a note in the independent auditor's report on the financial condition of the Company and existence of a material uncertainty about the Company's ability to continue as a going concern. Notwithstanding the 'going concern' emphasis of matter included in the Financial Report, the Directors believe the successful completion of the Company's most recent capital raising (as announced on ASX on 6 February 2024), the Company has sufficient funds to adequately meet the Company's current commitments and medium-term working capital requirements.</p> <p>(i) Regulatory risks: Extensive government regulation and oversight in the United States, Australia, and in other jurisdictions apply to the Company's products and operations, and non-compliance with these requirements could harm its business. Failure to comply with healthcare and other governmental regulations could result in substantial fines and penalties, adversely affecting the Company's business, results of operations, and financial condition.</p> <p>Misuse or off-label use of the Company's products may harm its reputation in the marketplace, result in injuries leading to product liability</p>	

Key Information	Further Information																				
<p>suits, or result in costly investigations, fines, or sanctions by regulatory bodies, which could be costly to the Company.</p> <p>Changes in healthcare policies may also have a material adverse effect on the Company, including making it more difficult and costly for the Company to obtain regulatory clearances or approvals for its products or to manufacture, market, or distribute its products after clearance or approval is obtained. Further, healthcare providers and related facilities are generally reimbursed for their services through payment systems managed by various governmental agencies worldwide, private insurance companies, and managed care organisations. A decline in coverage and reimbursement from government and third-party payors could lead to reduced product usage and sales.</p> <p>Numerous laws and regulations, govern the collection, dissemination, security, use and confidentiality of patient-identifiable health information. Failure to comply with applicable laws and regulations could result in significant penalties, and may negatively affect profitability and cash flows.</p> <p>(j) Competition: The Company operates in a highly competitive market and may struggle to attract and retain users, hindering its business growth. As the health wearable market is relatively new, any failure of the general market or specific demand for the Company's products to meet expectations, or if growth slows, could adversely impact its business, financial condition, and operating results. There is no assurance that the Company will be able to successfully compete in this landscape.</p>																					
<p>Use of funds</p> <p>No funds will be raised from the issue of the Quoted Options pursuant to this Prospectus as:</p> <ul style="list-style-type: none">the C2V Options are effectively issued (by becoming exercisable after their initial issue) as free-attaching to conversion shares issued pursuant to the Conversion Agreement (as equity issued on the conversion of debt to equity); andthe Director Options are being issued to Charles Taylor and Randall Nelson King (or their nominees) for no cash cost. The C2V Options are offered to C2V on the terms of the Debt to Equity Conversion Agreement (**Conversion Agreement**).

A summary of the terms and conditions of the C2V Options is set out in Section 5.1, and in addition the restrictions on exercise as set out in the Conversion Agreement will apply to the C2V Options. Accordingly, no funds will be raised from the Director Options Offer.

1.4 Purpose of the Offer

The primary purpose of the Offer is to remove the need for an additional disclosure document to be issued upon the sale of any Shares that are issued upon conversion of any Quoted Options that are issued under the Offer, and to facilitate the quotation on ASX of the Quoted Options.

The Company will accept Application Forms from 18 June 2024 (**Opening Date**) until 5.00pm (AEST) on 25 June 2024 or such other date as the Directors in their absolute discretion determine, subject to the requirements of the Listing Rules (**Closing Date**).

It is the responsibility of Applicants to determine their allocation prior to trading in the Quoted Options. Applicants who sell Quoted Options before they receive their holding statements do so at their own risk.

1.9 ASX quotation

An initial application has been made to the ASX for Official Quotation of the Quoted Options offered under this Prospectus by the way of an Appendix 3B announced on the ASX market announcements platform 17 June 2024. The Company intends to submit an Appendix 2A for Official Quotation of the Quoted Options as soon as the Quoted Options are issued.

The fact that ASX may grant Official Quotation is not to be taken in any way as an indication of the merits of the Company or the Quoted Options offered pursuant to this Prospectus. ASX takes no responsibility for the contents of this Prospectus.

An investment in Securities should be regarded as speculative. In addition to the general risks applicable to all investments in listed securities, there are certain specific risks associated with an investment in the Company which are detailed in Section 4.

1.13 Taxation implications

The Directors do not consider it appropriate to give Applicants advice regarding the taxation consequences of subscribing for Quoted Options.

The Company, its advisers and its officers do not accept any responsibility or liability for any such taxation consequences to Applicants. As a result, Applicants should consult their professional tax adviser in connection with subscribing for Quoted Options.

1.14 Major activities and financial information

Access requests can be made in accordance with Principle 12 of the Australian Privacy Principles and may be made in writing to the Company's registered office.

Collection, maintenance and disclosure of certain personal information is governed by legislation including the *Privacy Act 1988* (Cth) (as amended), the Corporations Act and certain rules such as the ASX Settlement Operating Rules.

3.2 Use of funds

No funds will be raised from the issue of the Quoted Options pursuant to this Prospectus as all the Quoted Options will be issued at no cost.

The Company will receive \$0.20 for each Quoted Option exercised. If all Quoted Options are issued and exercised, the Company will receive approximately \$5,400,000 (before costs). There is no certainty that any of the Quoted Option will be exercised, and the market price of the Company's Shares is currently below the exercise price. The application of funds from exercise (if any) will depend on if and when Quoted Options are exercised and the status of the Company's projects and requirements at the relevant time.

The above is a statement of current intentions at the date of this Prospectus. Intervening events and new circumstances have the potential to affect the manner in which the funds are ultimately applied. The Board reserves the right to alter the way the funds are applied on this basis.

3.3 Substantial Shareholders

Based on available information as at the date of this Prospectus, those persons which together with their associates have a voting power in 5% or more of the Shares on issue are set out below:¹

Substantial Shareholders	Number of shares	Voting power ³

Mr John Charles Plummer	17,843,316	6.07%
Citicorp Nominees Pty Limited	17,609,289	5.99%

Notes:

1. The shareholdings listed above are as disclosed to the Company by shareholders. Information regarding substantial holdings that arise, change or cease after the date of the substantial holding notices disclosed to the Company, or in respect of which the relevant announcement is not available on the ASX's website (www.asx.com.au), is not included above.
2. Comprising the interests of Niall Cairns and Craig Cooper, and C2V's associates.
3. Assumes 294,174,568 Shares on issue as at the date of this Prospectus.

The Offer will not have an effect on the quantity of Shares held by existing Shareholders as only Quoted Options are being offered under this Prospectus.

3.4 Effect of the Offer on control of the Company

The Company is of the view that the Offer will not affect the control (as defined by section 50AA of the Corporations Act) of the Company, because Quoted Options do not have voting rights. No new investor or existing Shareholder will gain or increase a voting power greater than 20% as a result of the completion of the Offer.

The potential overall effect on control upon the exercise of the Quoted Options was disclosed in detail in the Notice of Meeting which was lodged on ASX on 26 April 2024 together with an Independent Expert Report, and investors are directed to that document for further detail.

3.5 Financial effect of the Offer

The Company does not consider that the Offer will have a material effect on the financial position of the Company as the Quoted Options will be issued at no cost.

The expenses of the Offer will be met from the Company's existing cash reserves. The Offer will have an effect on the Company's financial position of reducing the cash balance by approximately \$10,000.

Please refer to Section 5.10 for further details on the estimated expenses of the Offer.

4. Risk Factors

Activities in the Company and its controlled entities, as in any business, are subject to risks, which may impact on the Company's future performance. The Company and its controlled entities have implemented appropriate strategies, actions, systems and safeguards for known risks, however, some are outside its control.

The Directors consider that the following summary, which is not exhaustive, represents some of the major risk factors which Shareholders need to be aware of in evaluating the Company's business and risks of increasing your investment in the Company. You should carefully consider the following factors in addition to the other information presented in this Prospectus. You should also consider publicly available information on the Company, and consult their financial, tax and other professional advisers before making an investment decision.

The principal risks include, but are not limited to, the following:

4.1 Risks specific to the Company

(a) Commercial operations risks

The Company has encountered challenges in relation to its financial performance, having incurred operating losses in the past, and there is no certainty that it will achieve or maintain profitability in the future. There are a number of risks to the Company's commercial operations which, if any one or more of them occur, could adversely affect the Company's business, financial condition, and operating results. These risks include, but are not limited to:

- (i) Failure of the Company's SphygmoCor technology-enabled products, from which the majority of the Company's revenue is currently derived, to gain market acceptance.
- (ii) The Company's limited operating history with certain products which are still in development makes it challenging to predict long-term performance based solely on historical financial results.
- (iii) Accurate demand forecasting for products and effective inventory management are crucial for the Company's financial success. Increases in component costs, supply shortages, and supply changes could disrupt the supply chain.
- (iv) The inability to anticipate appropriate pricing levels for its products, and economic downturns or uncertainties could reduce consumer discretionary spending and demand for its products and services.
- (v) Consolidation in the healthcare industry may result in demands for price concessions or the exclusion of existing market participants from certain markets.
- (vi) Inefficient management of growth and expansion, including cost-effective and timely scaling of operations.

The Company's business can also be significantly impacted by political events, international disputes, natural disasters, public health issues, industrial accidents, and other interruptions. Unforeseen accidents, safety incidents, or workforce disruptions may also adversely affect the Company's business, while certain segments of the business may be influenced by seasonality.

(b) **Product Risks**

The Company's success is closely tied to maintaining the value and reputation of its brands, which may not be as successful as anticipated.

The Company's products and services may encounter design and manufacturing defects, whether real or perceived, which could have adverse effects on its business and damage its reputation. The Company offers, and will offer, complex hardware and software products and services that can be affected by design and manufacturing defects. Sophisticated applications, such as the CONNEQT Portal, CONNEQT App and other products, often have issues that can unexpectedly interfere with the intended operation of hardware or software products. Defects may also exist in components and products that we source from third parties, or may arise from upgrades or changes to hardware that the Company or its third party manufacturing partners may make in the ordinary course of a product's lifecycle. Major defects could make the Company's products and services unsafe and create a risk of environmental or property damage and/or personal injury. Quality problems could also adversely affect the user's experience, and result in harm to the Company's brand or reputation, loss of competitive advantage, poor market acceptance, reduced demand for its products, delay in new product introductions, and lost revenue.

Users may rely on CONNEQT products and companion digital solutions to track and record health data accurately. Any failure to provide accurate metrics and data could harm the Company's brand and reputation, making it challenging to retain users.

Unsuccessful clinical trials related to products under development could adversely affect the Company's ability to obtain necessary clearance or approval of its new products and have a material adverse effect on the Company's future prospects. Such clinical trials are inherently uncertain and there can be no assurance that any clinical trial we conduct or sponsor will be completed in a timely or cost-effective manner or result in a commercially viable product.

(c) **Product liability**

As with all products, there is no assurance that unforeseen adverse events or defects will not arise in the Company's products. The Company may be subject to warranty claims that result in significant direct or indirect costs, or it could experience more extensive product returns than expected, both of which could negatively affect its business, financial condition, and operating results. Adverse events could also expose the Company to product liability claims or litigation, resulting in the removal of regulatory approval for the relevant products and/or monetary damages being awarded against the Company. In such event, the Company's liability may exceed the Company's insurance coverage, if any.

(d) **Supply Chain**

The Company relies on a limited number of global suppliers, contract manufacturers, and logistics partners to manufacture its products, and any loss of supply or supply interruption from these partners could negatively affect its operations.

A large portion of the Company's contract manufacturers' primary facilities are located in Australia and for the Company's new products in China. Thus, its business could be adversely affected if one or more of its suppliers is impacted by a natural disaster, an epidemic such as the current COVID-19 pandemic, or other interruption at a particular location. Certain interruptions may be due to, among other things:

- For personal use only
- (i) temporary closures of the Company's facilities or those of its manufacturers, and other vendors in the supply chain;
 - (ii) restrictions on or delays surrounding travel or the import/export of goods and services from certain ports used by the Company; and
 - (iii) local quarantines or other public safety measures.

Furthermore, the Company has limited control over suppliers, contract manufacturers and logistics partners, which may result in production delays or insufficient product quantities being available to the Company. If any of these suppliers, contract managers or logistics partners do not perform their obligations or meet the Company's and users' expectations, the Company's brand, reputation and business could suffer.

(e) **Cybersecurity risks**

Expanding the company's solutions and capabilities that rely on network communications expose the Company to risks including cybersecurity threats, interruptions or delays in telecommunications systems, or data service losses, all of which could impair product and service delivery.

Despite the Company's efforts and processes to prevent security breaches and incidents, its products and services, as well as its servers, computer systems, and those of third parties that it uses in its operations are vulnerable to cybersecurity risks, which could lead to interruptions, delays, loss, corruption, unavailability, and unauthorized processing of critical data, unauthorized access to or other processing of user health data, a negative impact on users' experience, and loss of consumer confidence. In the event of a breach or incident, the Company could be required to expend additional significant capital and other resources in an effort to prevent further breaches or incidents. In addition, the Company's insurance applicable to these matters may not be adequate to cover a potential claim and may be subject to exclusions.

(f) **Intellectual Property Risks**

The Company heavily relies on patent, intellectual property and other proprietary rights, and failing to protect these rights or succeed in litigation related to them could result in significant monetary damages and royalty payments, negatively impacting its ability to sell current or future products. Protecting intellectual property rights worldwide may present challenges, and issued patents covering the Company's products and technologies could be found invalid or unenforceable if challenged. Failure to protect the confidentiality of trade secrets could materially adversely affect the value of the Company's technology and harm its business.

The value of the Company's products and brand is closely tied to its intellectual property rights. Infringement or perceived infringement of others' intellectual property rights by the Company's products could lead to costly patent and intellectual property litigation, substantial damages or royalties, limitations on technology essential to its products, or discontinuation of product sales. Obtaining and maintaining patent protection relies on compliance with various required procedures, document submissions, fee payments, and other requirements imposed by governmental patent agencies, and non-compliance with these requirements could reduce or eliminate patent protection.

The Company's use of open-source software and failure to comply with the terms of underlying open-source software licenses could impose limitations on

commercialising its products and providing third parties access to its proprietary software.

(g) **Additional capital requirements**

The Company may require capital to execute its business plan and maintain ongoing operations in the future. It is also possible that further capital may be required at an earlier stage if any risks, including those described in this Section 5 materialise. Any additional equity financing may be dilutive to Shareholders, may be undertaken at lower prices than the then market price (or Offer Price) or may involve restrictive covenants which limit the Company's operations and business strategy.

Debt financing, if available, may involve restrictions on financing and operating activities or the registering of security interests over the Company's assets. Although the Directors believe that additional capital can be obtained, no assurances can be made that appropriate capital or funding, if and when needed, will be available on terms favourable to the Company or at all. The Company may undertake additional offerings of Securities in the future. The increase in the number of Shares issued and outstanding and the possibility of sales of such Shares may have a depressive effect on the price of Shares. In addition, as a result of the offering of such additional Shares, the voting power of the Company's existing Shareholders will be diluted.

(h) **Going concern risk**

The Company's annual financial report for the year ended 30 June 2023 (**Financial Report**) includes a note in the independent auditor's report on the financial condition of the Company and existence of a material uncertainty about the Company's ability to continue as a going concern.

Notwithstanding the 'going concern' emphasis of matter included in the Financial Report, the Directors believe the successful completion of the Company's most recent capital raising (the results of which were announced on ASX on 6 February 2024) and, with the support of the Conversion Agreement and associated funding commitment agreement, the Company will have sufficient funds to adequately meet the Company's current commitments and medium-term working capital requirements.

(i) **Potential acquisitions**

The Company may in the future pursue strategic investments or acquisitions to add new products and technologies, acquire talent, gain new sales channels, or enter into new markets or sales territories. Growth through investment and acquisitions entails numerous operational and financial risks. These include, but are not limited to, execution risk, poor integration of the acquired business, entry into market segments with more risk than existing operations and loss of managerial focus on existing business. These risks may have an adverse effect on the Company's financial performance.

(j) **Unforeseen expenses**

The Company's cost estimates and financial forecasts include what are believed to be appropriate provisions for material risks and uncertainties and are considered to be fit for purpose for the proposed activities of the Company. If risks and uncertainties prove to be greater than expected, or if new currently unforeseen material risks and uncertainties arise, the expenditure proposals of the Company are likely to be adversely affected.

4.2 Industry risks

(a) Regulatory Risks

Extensive government regulation and oversight in the United States, Australia, and in other jurisdictions apply to the Company's products and operations, and non-compliance with these requirements could harm its business. Regulatory clearances, approvals, and certifications are vital for marketing and commercial distribution, and the revocation or revision of such authorisations by agencies such as the U.S. Food and Drug Administration or the Australian Therapeutic Goods Administration could harm the Company's commercial operations. Failure to comply with healthcare and other governmental regulations could result in substantial fines and penalties, adversely affecting the Company's business, results of operations, and financial condition.

Misuse or off-label use of the Company's products may harm its reputation in the marketplace, result in injuries leading to product liability suits, or result in costly investigations, fines, or sanctions by regulatory bodies, which could be costly to the Company. Misconduct or improper activities by employees, consultants, and commercial partners, including non-compliance with regulatory standards and requirements, pose further risks.

Changes in healthcare policies may also have a material adverse effect on the Company, including making it more difficult and costly for the Company to obtain regulatory clearances or approvals for its products or to manufacture, market, or distribute its products after clearance or approval is obtained. Further, healthcare providers and related facilities are generally reimbursed for their services through payment systems managed by various governmental agencies worldwide, private insurance companies, and managed care organisations. A decline in coverage and reimbursement from government and third-party payors could lead to reduced product usage and sales.

Failure to comply with anti-corruption and anti-money laundering laws, including the Australian Anti-Money Laundering and Counter-Terrorism Financing Act 2006 and the Financial Transactions Reports Act 1988 in Australia, the U.S. Foreign Corrupt Practices Act (FCPA) and similar laws related to activities in other jurisdictions, could materially adversely affect the Company's business and result in civil and/or criminal sanctions.

Numerous laws and regulations, including the U.S. Health Insurance Portability and Accountability Act (HIPAA) and the U.S. Health Information Technology for Economic and Clinical Health Act (HITECH Act), govern the collection, dissemination, security, use and confidentiality of patient-identifiable health information. Failure to comply with HIPAA, the HITECH Act, and similar laws and regulations in Australia and other jurisdictions and implementing those regulations could result in significant penalties, and regulations requiring the use of "standard transactions" for healthcare services under HIPAA (and other regulations in Australia and other jurisdictions) may negatively affect profitability and cash flows. Enforcement of laws and regulations regarding privacy and security of patient information may adversely affect the Company's business, financial condition, or operations.

(b) Competition

The Company operates in a highly competitive market and may struggle to attract and retain users, hindering its business growth. As the health wearable market is relatively new, any failure of the general market or specific demand for the Company's products to meet expectations, or if growth slows, could adversely impact its business, financial condition, and operating results. There is no assurance that the

Company will be able to successfully compete in this landscape. Some of these competing companies may possess or develop technologies that are superior to the Company's, or have substantially greater financial, technical, and human resources. As a result, the Company's services, expertise, or products could be rendered obsolete, less attractive, or uneconomical due to advances in technology or alternative approaches developed by the Company's competitors.

(c) **Data security and privacy**

The collection, storage, processing, and use of personal data subject the Company to legal obligations and regulations related to security and privacy. Failure to meet these obligations, whether actual or perceived, could harm the Company's reputation and business. Data collection is further governed by restrictive regulations regarding the use, processing, and cross-border transfer of personal information.

(d) **Foreign exchange**

The Company operates in a variety of jurisdictions, including Australia, the United States, Europe and China, and as such, expects to generate revenue and incur costs and expenses in AUD, USD, EUR and CNY.

Consequently, movements in currency exchange rates may adversely or beneficially affect the Company's results or operations and cash flows. For example, the appreciation or depreciation of the US dollar relative to the Australian dollar would result in a foreign currency loss or gain. Any depreciation of currencies in foreign jurisdictions in which the Company operates may result in lower than anticipated revenue, profit and earnings of the Company.

4.3 Risks relevant to the Offers

(a) **Quotation risk**

The Company will apply for quotation of the Quoted Options. The Company makes no guarantee that any such application for quotation will be successful.

(b) **Option risk and dilution**

Options are, by their nature, only of value at times when the exercise price is lower than the price of the underlying Shares. There is no guarantee that the Quoted Options offered under this Prospectus will, at any particular time, have an exercise price which is lower than the price of the Shares. There is a risk that the Quoted Options may expire at a time when they have little or no value.

If exercised, the Quoted Options will be converted into Shares, thereby causing substantial dilution to the shareholdings of Shareholders. There is no certainty that Quoted Options, if issued, will be exercised in full, or at all.

4.4 General risks

(a) **Economic risks**

General economic conditions, introduction of tax reform, new legislation, movements in interest and inflation rates and currency exchange rates may have an adverse effect on the Company's business activities and potential exploration and development programs, as well as on its ability to fund those activities.

(b) **Force majeure**

The Company's projects now or in the future may be adversely affected by risks outside the control of the Company, including labour unrest, civil disorder, war, subversive activities or sabotage, fires, floods, explosions or other catastrophes, pandemics or epidemics or quarantine restrictions.

(c) **Infectious diseases**

The Company's share price may be adversely affected by the economic uncertainty caused by COVID-19 or other infectious diseases. Measures to limit the transmission of the virus or other infectious diseases implemented by governments around the world (such as travel bans and quarantining) may adversely impact the Company's operations. It could interrupt the Company carrying out its contractual obligations, cause disruptions to supply chains or interrupt the Company's ability to access capital.

(d) **Market conditions**

Share market conditions may affect the value of the Company's Shares regardless of the Company's operating performance. Share market conditions are affected by many factors such as:

- (i) general economic outlook;
- (ii) introduction of tax reform or other new legislation;
- (iii) interest rates and inflation rates;
- (iv) changes in investor sentiment toward particular market sectors;
- (v) the demand for, and supply of, capital; and
- (vi) terrorism or other hostilities.

The market price of securities can fall as well as rise and may be subject to varied and unpredictable influences on the market for equities in general and resources stocks in particular. Neither the Company nor the Directors warrant the future performance of the Company or any return to Shareholders.

(e) **Government and legal risk**

Changes in government, monetary policies, taxation and other laws can have a significant impact on the Company's assets, operations and ultimately the financial performance of the Company and its Shares. Such changes are likely to be beyond the control of the Company and may affect industry profitability as well as the Company's capacity to explore and mine.

The Company is not aware of any reviews or changes that would affect its permits. However, changes in community attitudes on matters such as taxation, competition policy and environmental issues may bring about reviews and possibly changes in government policies. There is a risk that such changes may affect the Company's development plans or its rights and obligations in respect of its permits. Any such government action may also require increased capital or operating expenditures and could prevent or delay certain operations by the Company.

(f) **Taxation**

The acquisition and disposal of Securities will have tax consequences, which will differ depending on the individual financial affairs of each investor. All potential investors in the Company are urged to obtain independent financial advice about the consequences of acquiring Securities from a taxation point of view and generally. To the maximum extent permitted by law, the Company, its officers and each of their respective advisers accept no liability and responsibility with respect to the taxation consequences of applying for Securities under this Prospectus.

(g) **Unforeseen risk**

There may be other risks which the Directors are unaware of at the time of issuing this Prospectus which may impact on the Company, its operations and/or the valuation and performance of its Shares.

4.5 **Investment speculative**

The above list of risk factors ought not to be taken as exhaustive of the risks faced by the Company or by investors in the Company. The above factors, and others not specifically referred to above, may in the future materially affect the financial performance of the Company and the value of the Quoted Options offered under this Prospectus.

Therefore, the Quoted Options to be issued pursuant to this Prospectus carry no guarantee with respect to the payment of dividends, returns of capital or the market value of those Quoted.

Potential investors should consider that the investment in the Company is highly speculative and should consult their professional advisers before deciding whether to apply for Securities pursuant to this Prospectus.

(ii) no change will be made to the Exercise Price.

5.2 Rights and liabilities attaching to Shares

A summary of the rights attaching to Shares in the Company is below. This summary is qualified by the full terms of the Constitution (a full copy of the Constitution is available from the Company on request free of charge) and does not purport to be exhaustive or to constitute a definitive statement of the rights and liabilities of Shareholders. These rights and liabilities can involve complex questions of law arising from an interaction of the Constitution with statutory and common law requirements. For a Shareholder to obtain a definitive assessment of the rights and liabilities which attach to Shares in any specific circumstances, the Shareholder should seek legal advice.

(a) General meetings

 - (A) one vote for each fully paid share held by that Shareholder; and
 - (B) a fraction of a vote for each partly paid share, equivalent to the proportion which the amount paid (not credited) is of the total amounts paid and payable (excluding amounts credited) for that share (or, where applicable, a fraction of a Share), ignoring any amounts paid in advance of a call.

(c) **Issue of further Shares**

The Directors control the allotment and issue of Shares. Subject to the Corporations Act and the Listing Rules, the Directors may allot, issue, grant options over, cancel or otherwise dispose of Shares to any persons, on any terms and conditions terms, with the rights, at the issue price and at the times that the Directors decide.

(d) **Variation of rights**

At present, the Company has on issue one class of Shares only, namely ordinary Shares. Subject to the Corporations Act and the Listing Rules, all or any of the rights and privileges attached to any class of shares (unless otherwise provided by the terms of issue of the Shares of that class) may be varied or cancelled, including by converting or reclassifying Shares from one class to another, by special resolution of the Company and with the written consent of the holders of at least 75% of the shares issued in the affected class, or by special resolution passed at a separate meeting of the holders of the shares issued in the affected class.

(e) **Transfer of Shares**

Generally, Shares in the Company are freely transferable, subject to formal requirements, the registration of the transfer not resulting in a contravention of or failure to observe the provisions of a law of Australia and the transfer not being in breach of the Corporations Act or the Listing Rules.

(f) **Dividends**

Subject to the Constitution, the Corporations Act, the Listing Rules and the rights of Shareholders entitled to Shares with preferential, special or qualified rights as to dividends, the Directors may from time to time determine that a dividend (including an interim dividend) is payable to Shareholders in proportion to the amounts paid up (not credited) on the Shares held by them. as paid on Shares. Any amount paid on a Share in advance of a call will be ignored when calculating the relevant proportion. Interest is not payable by the Company in respect of any dividend or other distribution.

Before determining payment of any dividends, the Directors may set aside out of the Company's profits any sums they think proper as reserves to be applied to meet contingencies, to equalise dividends, to pay special dividends, to repair, improve or maintain any Company property, or for any other purpose the Directors in their absolute discretion consider to be in the Company's interests.

The Directors may implement and in their discretion maintain, on terms and conditions determined by the Directors from time to time, dividend reinvestment plans for cash dividends paid by the Company in relation to shares to be reinvested by way of subscription for shares or other securities to be issued and allotted by the Company.

(g) **Winding up**

Subject to the Constitution, the Corporations Act, the Listing Rules and the rights of holders of shares issued on special terms and conditions (at present there are none), on a winding-up of the Company, the liquidator may, with the approval of a special resolution of the Company, divide among the contributories in specie or kind any part
