

Firebird Executes Farm-Out Agreement with Macro Metals on Non-Core Manganese Tenements

HIGHLIGHTS

- Firebird executes farm-out agreement for Macro Metals Ltd (ASX:M4M) to acquire an 80% interest in the Wandanya, Disraeli and Midgengadge Manganese tenements
- Macro will invest an initial \$150,000 within the first 12 months and undertake a 10-hole RC drill program with a minimum of 100m to be drilled on each of the four tenements
- Firebird will retain a free-carried 20% interest in the Projects until decision to mine
- Firebird to earn 1% sales commission (based on FOB revenue)
- Agreement enables Firebird to focus on the development of the Oakover Project and the Company's Chinese manganese sulphate plant
- Agreement gives Firebird exposure to upside from future development of the tenements
- Macro has proven and strong management in the exploration and development of greenfield projects

Firebird Metals Limited (ASX: FRB, "Firebird" or "the Company") is pleased to announce that it has signed an agreement with Macro Metals Ltd ("Macro") regarding the development of Firebird's Wandanya, Disraeli and Midgengadge tenements.

This agreement will see Macro invest \$150,000 over 12 months at the Wandanya (E46/1456 and E46/1457), Disraeli (E46/1389) and Midgengadge (E45/5906) tenements and completion of at least 10 RC drill holes, with 100m to be drilled on each of the tenements, to earn an 80% interest.

Firebird Managing Director Mr Peter Allen commented: *"This agreement allows Firebird to continue its strategic focus on the Oakover Project and our Chinese LMFP strategy. By partnering with Macro, we leverage their expertise and resources to drive the development of these tenements, which not only ensures that they receive the necessary investment and development attention but also allows Firebird to benefit from potential production and value growth without immediate capital outlay.*

"We are confident that this collaboration will unlock value for our shareholders and look forward to a prosperous collaboration with Macro."

Key Agreement Terms

Firebird has signed a binding Heads of Agreement with Macro Metals Ltd (“**Macro**”), an unrelated party, whereby Macro has the exclusive right to earn 80% in four tenements (E46/1456, E46/1457, E46/1389 and E45/5906) (**Tenements**) by committing to spend \$150,000 in exploration and development expenditure on the Tenements within 12 months (**Agreement**). This expenditure must include at least 10 RC holes, for a minimum total of 100 metres drilled on each of the four tenements. Macro will assume full responsibility for the Tenements over this earn-in period.

Firebird’s 20% interest will be free carried until such time Macro makes a decision to mine, at which point Macro and Firebird will enter into an incorporated joint venture (“**SPV**”). The SPV will enter into a life of mine, mining services contract with Macro’s wholly owned, mining services subsidiary, Macro Mining Services Pty Ltd, for the provision of all services across the entire pit to customer supply chain on a commercial, arms’ length schedule of rates. Firebird retains the ability to transfer its 20% interest into a 1% royalty. The Agreement also allows for Firebird to earn 1% sales commission (based on Free on Board (FOB) revenue).

Completion of the transaction is conditional upon due diligence to the absolute satisfaction of Macro and any necessary regulatory or third-party consents or approvals required before close of business on 30 September 2024 (or such time as otherwise agreed).

The Agreement otherwise contains terms and conditions considered standard for agreements of this nature.

The Company notes that Mr Evan Cranston is a Director of both Firebird and Macro, however, this Transaction has been approved by the independent Directors of Firebird.

Firebird’s original agreement for the acquisition of the Wandanya tenements was established with Mining Equities Pty Ltd in 2022. Under this agreement, a total shipment milestone consideration of up to \$500,000 was to be paid to Mining Equities Pty Ltd in instalments based on export shipments or mine gate sales. Upon reaching the maximum milestone consideration, a 1% royalty would be payable on an FOB basis for export shipments or a mine gate basis for domestic sales. Mining Equities Pty Ltd has agreed to amend the original terms by removing the \$500,000 payable with the 1% royalty now payable on all export shipments and domestic sales.

This announce has been approved for release by the Board.

About Firebird Metals Limited

Firebird Metals is an advanced manganese developer focused on combining mining and downstream processing with a dedication to the advancement of the EV battery sector.

The Company is currently progressing its unique China-focused lithium manganese iron phosphate (LMFP) battery strategy, which will develop Firebird into a near-term producer of high-purity, battery-grade manganese sulphate, a key cathode material in LMFP batteries for electric vehicles.

Execution of this strategy will place Firebird at the forefront of manganese sulphate production, at a time when the use and demand for manganese in batteries continues to rapidly grow. Due to the low number of ASX-manganese developers and increasing use of LMFP by car manufacturers, Firebird is in a strong position to benefit from this growing market and deliver significant value to its shareholder base.

The Company also owns 100% of its project portfolio, located in the renowned East Pilbara manganese province of Western Australia, which boasts a total Resource of 234Mt^{1,2}, with exciting exploration and development growth upside. The portfolio is led by the flagship Oakover Project, which holds a Mineral Resource Estimate¹ of 176.7 Mt at 9.9% Mn, with 105.8 Mt at 10.1% Mn in an Indicated category.

The Company is committed to generating sustainable long-term value and growth for stakeholders, through the implementation of best practice exploration methods while prioritising the well-being, health and environmental protection of its employees and communities it operates in.

JORC Compliance Statement

This announcement contains references to Mineral Resource Estimates, which have been reported in compliance with Listing Rule 5.8 and extracted from previous ASX announcements as referenced.

The Company confirms that it is not aware of any new information or data that materially affects the information previously reported and that all material assumptions and technical parameters underpinning the Mineral Resource Estimates continue to apply and have not materially changed.

¹ See ASX announcement dated 23 March 2023: Indicated Resource of 105.8Mt at 10.1%; Inferred Resource of 70.9Mt at 9.6% for global Resource of 176.7 Mt at 9.9% Mn.

² See ASX announcement dated 1 December 2021: Inferred Resource of 57.5 Mt at 12.2% Mn.
