Accordingly, your application for additional Shortfall Securities may be scaled-back. The Company's decision on the number of Shortfall Securities to be allocated to you will be final; or
- (D) if you do not wish to accept all or part of your Entitlement, you are not obliged to do anything.

(ii) Payment options

(A) BPAY®

For payment by BPAY®, please follow the instructions on the Entitlement and Acceptance Form. You can only make a payment via BPAY® if you are the holder of an account with an Australian financial institution that supports BPAY® transactions. Please note that should you choose to pay by BPAY®:

- (1) you do not need to submit the Entitlement and Acceptance Form but are taken to have made the declarations on that Entitlement and Acceptance Form; and
- (2) if you do not pay for your Entitlement in full, you are deemed to have taken up your Entitlement in respect of such whole number of Securities which is covered in full by your application monies.

If you have more than one holding of Securities and consequently receive more than one Entitlement and Acceptance Form, when taking up your Entitlement in respect of one of those holdings only use the unique customer reference number (**CRN**) specific to that holding as set out in the applicable Entitlement and Acceptance Form. Do not use the same CRN for more than one of your holdings. This can result in your application monies being applied to your Entitlement in respect of only one of your holdings (with the result that any application in respect of your remaining holdings will not be valid).

(B) Electronic Funds Transfer

For payment by EFT, please follow the instructions on the Entitlement and Acceptance Form. Multiple acceptances must be paid separately. You should be aware of your financial institution's cut-off time and any associated fees with processing an EFT. It is your responsibility to ensure funds are submitted correctly by the Closing Date and time. Please note that should you choose to pay by EFT:

- (1) you do not need to submit the Entitlement and Acceptance Form but are taken to have made the declarations on that Entitlement and Acceptance Form; and
- (2) if you do not pay for your Entitlement in full, you are deemed to have taken up your Entitlement in respect of such whole number of Securities which is covered in full by your application monies.

Please ensure you use your unique payment reference number located on the Entitlement and Acceptance Form. This will ensure your payment is processed correctly. Failure to do so may result in your funds not being allocated to your application and your Entitlement subsequently not being issued.

It is your responsibility to ensure that your completed Entitlement and Acceptance Form and payment of application monies is received by the share registry by no later than 5:00 pm (WST) on the Closing Date. You should be aware that your financial institution may implement earlier cut-off times with regards to electronic payment and you should therefore take this into consideration when making payment. Any application monies received for more

than your final allocation of Securities will be refunded. No interest will be paid on any application monies received or refunded.

Returning a completed Entitlement and Acceptance Form or paying any application monies by BPAY or EFT will be taken to constitute a representation by you that:

- (i) you have received a copy of this Prospectus and the accompanying Entitlement and Acceptance Form, and read them both in their entirety;
- (ii) you acknowledge that once the Entitlement and Acceptance Form is returned, or a BPAY® or EFT payment instruction is given in relation to any application monies, the application may not be varied or withdrawn except as required by law.

(b) **Shortfall Offer**

Any Entitlement not taken up pursuant to the Entitlement Issue Offer will form part of the Shortfall Offer. The Shortfall Offer is a separate offer made pursuant to this Prospectus and will remain open for up to three (3) months following the Closing Date of the Entitlement Issue Offer, although it is intended that the Shortfall Offer will close soon after the Closing Date for the Entitlement Issue Offer under the terms of the Underwriting Agreement.

The issue price for each New Share to be issued under the Shortfall Offer shall be \$0.0045 being the price at which New Shares have been offered under the Entitlement Issue Offer. New Options will be issued under the Shortfall Offer on the same terms and ratio as New Options offered under the Entitlement Issue Offer.

Eligible Shareholders who take up their Entitlement in full may, in addition to their Entitlement, apply for Shortfall Securities regardless of the size of their present holding by completing the accompanying Entitlement and Acceptance Form in accordance with the instructions set out on that form. Separate application forms may be provided, together with a copy of this Prospectus, to other investors who are not currently Shareholders who are invited to participate in the Shortfall Offer. It is possible that there may be few or no Shortfall Securities available for issue, depending on the level of take up of Entitlements by Eligible Shareholders. There is also no guarantee that in the event Shortfall Securities are available for issue, they will be allocated to all or any of the Eligible Shareholders who have applied for them.

The Directors (with the assistance of CPS) reserve the right to issue Shortfall Securities at their absolute discretion, subject to any restrictions imposed by the Corporations Act and the Listing Rules. As such there is no guarantee that Applicants under the Shortfall Offer will receive any Shortfall Securities applied for under the Shortfall Offer.

The Directors reserve the right to issue to an Applicant a lesser number of Shortfall Securities than the number for which the Applicant applies, or to reject or scale back an Application for Shortfall Securities, or to not proceed with placing the Shortfall Securities. In that event, application Monies will be refunded by the Company (without interest) in accordance with the provisions of the Corporations Act. The Company and will have no liability to any Applicant who receives less than the number of Shortfall Securities they applied for under the Shortfall Offer.

All decisions regarding the allocation of Shortfall Securities will be made by the Directors in consultation with the Underwriter. It is presently intended that Shortfall Securities will be allocated as follows:

- (i) to Eligible Shareholders who apply for an excess of their full Entitlement;

- (ii) to other parties identified by the Directors in consultation with CPS; and then.
- (iii) to the Underwriter in accordance with the Underwriting Agreement.

No Securities will be issued to an applicant under this Prospectus or via the Shortfall Offer if the issue of Securities would contravene the takeover prohibition in section 606 of the Corporations Act. The Underwriter may enter into sub-underwriting agreements in respect of these Offers with various other unrelated sub-underwriters to take up shortfall Securities.

The Underwriter nor any of the sub-underwriters will increase their shareholding to above 19.99% as a direct result of the issue of Shares under the Offer.

1.11 Lead Managers

CPS has been appointed as Lead Manager to the Placement, Entitlement Issue Offer and the Priority Option Offer. The terms of the appointment of the Lead Manager are summarised in Section 5.5 of this Prospectus.

1.12 Effect on control of the Company

As at the date of this Prospectus, the Underwriter is not a shareholder of the Company and the extent to which New Shares are issued pursuant to the Underwriting Agreement will increase the Underwriter's voting power in the Company.

In accordance with the terms of the Underwriting Agreement, the Underwriter will partially underwrite the Entitlement Issue Offer and the Priority Option Offer such that neither the Underwriter, the sub-underwriter nor any of the Underwriter's clients individually, will have a voting power in the Company in excess of 19.99% after the issue of the Shortfall. The Underwriter's present relevant interest and change under several scenarios are set out in the table below (note that the below only factors in Shares to be issued to CPS for an underwriting of the Entitlement Issue Offer). It does not factor in any New Options being issued to CPS pursuant to the Offers or pursuant to the Underwriting Agreement).

Event	Shares held by Underwriter	Voting power of Underwriter
Date of Prospectus	0	0
Completion of Entitlement Issue		
Fully subscribed	0	0
75% subscribed	127,497,355	25%
50% subscribed	254,944,709	50%
25% subscribed	382,492,064	75%
0% subscribed	509,989,418	100%

The number of Shares held by the Underwriter and its voting power in the table above show the potential effect of the underwriting of the Entitlement Issue Offer. However, it is unlikely that no Shareholders will take up entitlements under the Entitlement Issue Offer. The underwriting obligations and therefore potential voting power of the Underwriter will reduce by a corresponding amount for the amount of entitlements under the Entitlement Issue Offer taken up by Shareholders. Furthermore, the voting power of the Underwriter will also be reduced to the extent that sub-underwriters take up any Shortfall. Note that CPS is also underwriting the Priority Option Offer and any exercise of these Options will increase the voting power of CPS. Any relevant interest acquired by the Underwriter or sub-underwriters will also be diluted if any Optionholders exercise and convert their Options to Shares.

The Company and the Underwriter have confirmed that no sub-underwriter nor existing Shareholder will increase its voting power to above 20% as a result of the Offers.

The Company, in consultation with the Underwriter, will ensure that the Offers (including the equitable dispersion of any Shortfall Securities) complies with the provisions of Chapter 6 of the Corporations Act and are otherwise consistent with the policy guidelines contained in ASIC Regulatory Guide 6 and Takeovers Panel Guidance Note 17(**GN 17**).

There will be no change to any Shareholder's voting power as a result of the issue of the New Options. Where New Options are exercised into Shares, the voting power of the Shareholders who exercise the New Options will increase. The likelihood of New Options being exercised is dependent on the price of Shares from time to time until the New Options expire.

The Company considered GN 17 in seeking to put in place appropriate strategies to mitigate the potential control effects of the Offers. In the Board's opinion, in the current commercial environment and having explored all options, the underwriting by the Underwriter of a non-renounceable entitlement issue (and the Priority Option Offer) was the most commercially feasible option available to the Company in the context of the Company's current requirement for capital.

No Shares will be issued to an applicant under the Offers or via the Shortfall Offer if the issue of Shares would contravene the takeover prohibition in section 606 of the Corporations Act. To that end, in exercising their discretion regarding the shortfall, the Company will not do so in a manner which is likely to exacerbate a potential unacceptable control effect on the Company (having regard to paragraph 7(b)(iii) of GN 17).

By reference to paragraphs 8 and 9 of GN 17:

- (a) the Lead Managers have been appointed to assist with procuring applications for any Shortfall Securities;
- (b) the Underwriter may seek out sub-underwriters which will reduce the control impact;
- (c) sufficient time and detailed disclosure have been given to Shareholders and other investors to assess the Securities being offered; and
- (d) the acquisition of New Shares by the Underwriter is in its capacity as such pursuant to a negotiated Underwriting Agreement (i.e. it is not facilitation of a capital raising by a contract to subscribe for Shortfall before the Offer is made).

The Company has a clear need for funds which has not been contrived (noting paragraph 10 of GN 17), and having regard to all available options, the Company has considered that entering into the Underwriting Agreement with the Underwriter provides the Company with the highest degree of certainty in the time available that the Offers will be successful.

The Company did consider the issue of renounceability of the Entitlement Issue Offer and Priority Option Offer. Having regard to paragraphs 19-22 of GN 17, the fact that the Entitlement Issue Offer and Priority Option Offer is non-renounceable should not be considered a significant factor given the Company considers that a market for rights is unlikely (given low liquidity in trading of the New Shares) and the additional costs to make the Entitlement Issue Offer renounceable.

In light of the above, the Company considers that the structure of the Offers should not give rise to unacceptable circumstances.

1.13 Potential dilution

Shareholders should note that if they do not participate in the Entitlement Issue Offer, their holdings are likely to be diluted by approximately 16.67% (as compared to their holdings and number of Shares on issue as at the date of the Prospectus).

No immediate dilution will occur as a result of the issue of New Options under this Prospectus. However subsequent exercise of any or all of the New Options will result in dilution. Assuming all New Options offered pursuant to this Prospectus are issued and exercised into Shares (not including exercise of the GTRO Options), Shareholders who do not participate in the Offers, are likely to be diluted by an aggregate of approximately 34.43% (as compared to their holdings and number of Shares on issue as at the date of the Prospectus).

Examples of how the dilution may impact Shareholders is set out in the table below:

Holder	Holding as at Record Date	% at Record Date	Entitlement	% if full Entitlement taken up	% if no Entitlement taken up
Shareholder 1	85,000,000	3.33%	17,000,00	3.33%	2.78%
Shareholder 2	45,000,000	1.76%	9,000,000	1.76%	1.47%
Shareholder 3	20,000,000	0.78%	4,000,000	0.78%	0.65%

Shareholder 4	15,000,000	0.59%	3,000,000	0.59%	0.49%
Shareholder 5	10,000,000	0.39%	2,000,000	0.39%	0.33%

Note: The dilutionary effect shown in the table is the maximum percentage on the assumption that those Entitlements not accepted are placed under the Shortfall Offer. Percentages have been calculated on the basis of there being 2,549,947,091 Shares on issue at the date of this Prospectus and 3,059,936,509 Shares on issue on completion of the Entitlement Issue Offer. The table only shows the dilution effect of the Shares to be issued under the Entitlement Issue Offer and does not factor in the dilutionary effect upon the exercise of any New Options. Refer to Section 3.7 for further details of the Company's capital structure.

1.14 ASX Listing

Application for Official Quotation of the New Shares offered pursuant to this Prospectus will be made in accordance with the Timetable set out at the commencement of this Prospectus. If ASX does not grant Official Quotation of the New Shares offered pursuant to this Prospectus before the expiration of three (3) months after the date of issue of the Prospectus, (or such period as varied by the ASIC), the Company will not issue any New Shares and will repay all application monies for the New Shares within the time prescribed under the Corporations Act, without interest.

The fact that ASX may grant Official Quotation to the New Shares is not to be taken in any way as an indication of the merits of the Company or the New Shares offered for subscription under this Prospectus.

The Company will also apply for Official Quotation of the New Options issue pursuant to this Prospectus in accordance with the Timetable set out at the commencement of this Prospectus. If ASX does not grant Official Quotation of the New Options offered pursuant to this Prospectus, or if the Company does not meet the minimum requirements to be granted Official Quotation of the New Options, then those Options will still be issued, however will not be quoted on ASX.

1.15 Issue of Securities

The Securities issued pursuant to the Offers will be allotted in accordance with the ASX Listing Rules and Timetable set out at the commencement of this Prospectus. Shortfall Securities issued pursuant to the Shortfall Offer will be allotted pursuant to the terms of the Underwriting Agreement.

Where the number of Securities issued is less than the number applied for, or where no allotment is made surplus application monies will be refunded without an interest to the Applicant as soon as practicable.

Pending the allotment and issue of the Securities or payment of refunds pursuant to this Prospectus, all application monies will be held by the Company in trust for the Applicants in a separate bank account as required by the Corporations Act. The Company, however, will be entitled to retain all interest that accrues on the bank account and each Applicant waives the right to claim interest.

Holding statements for the Securities issued under the Offers will be mailed in accordance with the ASX Listing Rules and timetable set out at the commencement of this Prospectus and for Shortfall Securities issued under the Shortfall Offer (if any) as soon as practicable after their issue.

1.16 CHESS and Issuer Sponsorship

The Company is a participant in Clearing House Electronic Sub-Register System (**CHESS**), for those investors who have, or wish to have, a sponsoring stockbroker. Investors who do

not wish to participate through CHESS will be issuer sponsored by the Company. Because the sub-registers are electronic, ownership of securities can be transferred without having to rely upon paper documentation.

Electronic registers mean that the Company will not be issuing certificates to investors. Instead, investors will be provided with a statement (similar to a bank account statement) that sets out the number of Securities allotted to them under this Prospectus. The notice will also advise holders of their Holder Identification Number or Security Holder Reference Number and explain, for future reference, the sale and purchase procedures under CHESS and issuer sponsorship.

Further monthly statements will be provided to holders if there have been any changes in their security holding in the Company during the preceding month.

1.17 Risks

As with any securities investment, there are risks associated with investing in the Company. The principal risks that could affect the financial and market performance of the Company are detailed in Section 0 of this Prospectus. The Securities on offer under this Prospectus should be considered speculative. Accordingly, before deciding to invest in the Company, investors should read this Prospectus in its entirety and should consider all factors in light of their individual circumstances and seek appropriate professional advice.

1.18 Overseas Shareholders

The Offers and Shortfall Offer do not, and are not intended to, constitute an offer in any place or jurisdiction in which, or to any person to whom, it would not be lawful to make such an offer or to issue this Prospectus.

It is not practicable for the Company to comply with the securities laws of overseas jurisdictions having regard to the number of overseas Shareholders, the number and value of Securities these Shareholders would be offered and the cost of complying with regulatory requirements in each relevant jurisdiction. Accordingly, the Offers are not being extended and Securities will not be issued to Shareholders with a registered address which is outside Australia or New Zealand.

In relation to the Shortfall Offer, the distribution of this Prospectus in jurisdictions outside Australia may be restricted by law and persons who come into possession of this Prospectus should seek advice on and observe any of these restrictions. Failure to comply with these restrictions may violate securities laws. Applicants who are residents in countries other than Australia should consult their professional advisers as to whether any governmental or other consents are required or whether any other formalities need to be considered and followed. No action has been taken to register or qualify the Shortfall Offer or the Shortfall Options, or to otherwise permit a public offering of the Shortfall Options under the Shortfall Offer in any jurisdiction outside Australia.

New Zealand

The Offers (and Shortfall Offer) are not being made to the public in New Zealand other than to existing Shareholders with registered addresses in New Zealand to whom the Offers are being made in reliance on the *Financial Markets Conduct Act 2013* and the *Financial Markets Conduct (Incidental Offers) Exemption Notice 2021*.

2. RISK FACTORS

2.1 Introduction

The Securities offered under this Prospectus should be considered speculative because of the nature of the Company's business.

Whilst the Directors recommend that Eligible Participants subscribe for Securities, there are however numerous risk factors involved. Some of these risks can be mitigated by the use of safeguards and appropriate systems and controls, but some are outside the control of the Company and cannot be mitigated. Accordingly, an investment in the Company carries no guarantee with respect to the payment of dividends, return of capital or price at which the Securities will trade.

The following is a summary of the more material matters to be considered and should be read in conjunction with specific matters referred to in the Company's announcements and reports. However, the summary is not exhaustive and potential investors should examine the contents of this Prospectus in its entirety and consult their professional advisors before deciding whether to apply for the Securities.

2.2 Company specific

2.2.1 Changes in Legislation and Government Regulation

Changes to legislation or government policy in Australia and the United States, including changes to the taxation system, may affect future earnings and the relative attractiveness of investing in the Company.

2.2.2 Economic Conditions

Economic conditions in Australia, the United States and globally, may affect the performance of the Company. Factors such as currency fluctuations, inflation, interest rates, supply and demand and industrial disruption may have an impact on operating costs and share market prices. The Company's future possible revenue and securities' price can be affected by these factors all of which are beyond the control of the Company or its Directors. Neither the Company nor the Directors warrant the future performance of the Company or any return on an investment in the Company. In addition, the Company's ability to raise additional capital, should it be required, may be affected.

2.2.3 Foreign Exchange Risk

The Company has substantial business undertakings based in the United States. The business undertakings are primarily denominated in United States dollar. The Company functional and presentational currency is Australian Dollars. This will result in the income, expenditure, assets, liabilities and cash flows of the Company being exposed to the fluctuations and volatility of the price of uranium and the exchange rates, as determined in international markets.

2.2.4 Uranium Price Volatility - United States Market

The demand for, and price of, uranium is dependent on a variety of factors, including supply and demand, the level of consumer product demand, weather conditions, the price and availability of alternative fuels, actions taken by governments and international cartels, and global economic political developments.

2.2.5 Competition

The uranium exploration and mining industry is highly competitive, and the Company competes with other companies that have greater resources. Many of these companies not only explore for and produce uranium, but also market uranium and other products on a regional, national, or worldwide basis. These companies may be able to pay more for productive uranium properties and exploratory prospects or define, evaluate, bid for and purchase a greater number of properties and prospects than our financial or human resources permit. In addition, these companies have a greater ability to continue exploration activities during periods of low uranium market prices. The larger competitors may be able to absorb the burden of present and future federal, state, local or other laws and regulations more easily than the Company can, which adversely affects the Company's competitive position. The Company's ability to acquire additional properties and to discover productive prospects in the future depend upon its ability to evaluate and select suitable properties and to consummate transactions in a highly competitive environment. In addition, because the Company has fewer financial and human resources than many companies in this industry, it may be at a disadvantage in bidding for exploratory prospects and producing uranium properties.

2.2.6 Uranium Exploration and Mining Operations in the United States

Mineral Operations on State and Federal Lands; Mineral titles are issued either by the Schools and Institutional Trust Land Administration of the States of Utah or Wyoming or the Bureau of Land Management, an agency of the federal United States Department of the Interior. These agencies each have exclusive authority over minerals on state and federal lands. Under existing law, metalliferous mineral leases in Utah do not provide exclusive access to the area within the lease. Other co-existing leases, including surface grazing rights, issued by the same agencies may exist, for example for coal, oil and gas, industrial minerals, bituminous sands and for surface rights. Presently, oil and gas leases issued by the United States Bureau of Land Management cover the majority of lands subject to unpatented mining claims owned by the Company. Both the Company and entities with rights to develop other minerals or use the land surface may be limited to the extent their activities interfere with operations of the other parties. The Lo Herma Project area is partially covered by existing surface grazing rights and therefore access to and the conduct of, exploration, development and mining operations on parts of the Lo Herma Project are subject to successful negotiations with the holders of these surface grazing rights.

2.2.7 Regulation in the United States – General

Uranium mining operations are subject to comprehensive regulation in the United States, which may cause substantial delays or require capital outlays in excess of those anticipated, causing an adverse effect on the Company.

If economic quantities of uranium are found on any permit owned by the Company in sufficient quantities to warrant uranium mining operations, such mining operations are subject to federal, state, and local laws relating to the protection of the environment, including laws regulating removal of natural resources from the ground and the discharge of materials into the environment. Uranium mining operations are also subject to federal, state, and local laws and regulations which seek to maintain health and safety standards by regulating the design and use of mining methods and equipment. Various permits from government bodies are required for mining operations to be conducted; no assurance can be given that such permits will be received. Environmental standards imposed by federal, state, or local authorities may be changed, and any such changes may have material adverse effects on the Company's activities. Moreover, compliance with such laws may cause substantial delays or require capital outlays in excess of those anticipated, thus resulting in an adverse effect on the Company. Additionally, the Company may be subject to liability for pollution or other environmental damages which it may elect not to insure against due to prohibitive premium costs and other reasons. To date the Company has not been required to spend material amounts on compliance with environmental regulations.

However, it may be required to do so in future, and this may affect its ability to expand or maintain its operations.

Permits are required by the state for drilling operations, drilling bonds and the filing of reports concerning operations and they impose other requirements relating to the exploration and production uranium.

The Company is required to comply with various federal and state regulations regarding rehabilitation and abandonment of uranium exploration and mining works, which impose a substantial rehabilitation obligation on the Company, which may have a material adverse effect on the Company's financial performance.

2.2.8 Environmental Regulation of Mining Operations in Particular

Uranium minerals exploration and development and mining activities are subject to certain environmental regulations which may prevent or delay the commencement or continuance of the Company's operations.

Uranium minerals exploration and development and future potential uranium mining operations are or will be subject to stringent federal, state, and local laws and regulations relating to improving or maintaining environmental quality. The Company's operations are also subject to many environmental protection laws. Environmental laws often require parties to pay for remedial action or to pay damages regardless of fault. Environmental laws also often impose liability with respect to divested or terminated operations, even if the operations were terminated or divested of many years ago.

Many of these problems are compounded by the fact that many former mining operations were not rehabilitated upon mine closure. This has meant that the Federal and State governments were left with the responsibility for the cleanup and rehabilitation of many former mine and processing sites. Whilst the authorities have implemented a rehabilitation program for several sites, there are still many others which remain in a disturbed state. As a result, there are several environmental factions who strongly oppose the recommencement of uranium mining and processing operations. Costs associated with environmental liabilities and compliance are expected to increase with the increasing scale and scope of operations and the Company expects these costs may increase in the future.

Any change to government regulation/administrative practices may have a negative impact on the Company's ability to operate and its profitability. The laws, regulations, policies or current administrative practices of any government body, organization or regulatory agency in the United States may be changed, applied or interpreted in a manner which will fundamentally alter the Company's ability to carry on business. The actions, policies or regulations, or changes thereto, of any government body or regulatory agency, or other special interest groups, may have a detrimental effect on the Company. Any or all of these situations may have a negative impact on the Company's ability to operate and/or its profitability.

2.2.9 Regulation in the United States- Sale of Uranium

Sales of uranium are not regulated and are generally made at market prices. The price received from the sale of these products is affected by the cost of transporting the products to market.

2.2.10 Exploration and Development Risks

Uranium exploration involves significant risk. There is no assurance that exploration and development of the prospects in the Company's properties in the United States, or any other projects that may be acquired in the future, will result in the discovery of an economic

uranium deposit. Even if an apparently viable deposit is identified, there is no guarantee that it can be profitably exploited.

Furthermore, the Company may only proceed to the next stage of exploration or development when data supports the existence of an economically viable uranium deposit. Should the empirical data not support the existence of economically viable uranium deposit, the Company may not proceed to the next stage of exploration.

2.2.11 Drilling and Operating Risks

Uranium drilling activities are subject to numerous risks, many of which are beyond the Company's control. The Company's operations may be curtailed, delayed or cancelled as a result of such risks. Hazards incident to the exploration and development of uranium properties such as unusual or unexpected geological formation, ground conditions or other factors are inherent in drilling and operating mines and may be encountered by the Company. Success in mining uranium is also impacted by the ground and water conditions present on the properties and adverse conditions or adverse claims to water rights would likely have a material adverse effect in the Company and the financial results of operations.

Industry operating risks include the risk of fire, explosions, equipment failure, environmental and geological hazards, the occurrence of any of which could result in substantial losses to the Company. Although the Company believes that it or the operator will carry adequate insurance with respect to its operations in accordance with industry practice, in certain circumstances the Company's or the operator's insurance may not cover or be adequate to cover the consequence of such events. In addition, the Company may be subject to liability for pollution or other hazards against which the Company or the operator does not insure or against which it may elect not to insure because of high premium costs or other reasons.

Poor weather conditions over a prolonged period may adversely affect mining and exploration activities and the timing of earning revenues. Exploration is costly and involves exacting techniques which must be applied over extended periods of time. The Company's projects are at an exploration stage and the Company cannot foresee whether the planned exploration programmes will generate positive results. Furthermore, there is no guarantee that the Company's exploration activities will succeed in the discovery of a commercially viable ore deposit.

2.2.12 Ability to Exploit Successful Discoveries

It may not always be possible for the Company to participate in the exploitation of successful discoveries made in any areas in which the Company has an interest. Such exploitation will involve the need to obtain the necessary licenses or clearances from the relevant authorities, which may require conditions to be satisfied and/or the exercise of discretions by such authorities. It may or may not be possible for such conditions to be satisfied. The decision to proceed to further exploitation may require the participation of other companies whose interests and objectives may not be the same as those of the Company. As described above, such further work may require the Company to meet or commit to financing obligations for which it may not have planned. Rig or equipment availability may also affect the timing of further development.

2.2.13 Contractors and Joint Venturers

The Company may also be exposed to risks associated with the financial or performance failure, default or litigation (actual or potential) by a participant in any joint ventures or other contractual relationships to which the Company is, or may become, a party.

2.2.14 Title Risk

(a) Filing Requirements

The Company owns unpatented mining claims in a majority of the lands in which it intends to acquire interests. The United States of America owns mineral rights in these lands. Under United States federal law maintenance fees must be paid every year and documents must be filed with the United States Bureau of Land Management and in the records of the county where the mining claims are located. Failure to timely pay the fees or file these documents results in the claims becoming null and void. The Company also holds (or will hold) state lease land which is the subject of annual rental fees which must be paid to the respective offices of state revenue in Utah and Wyoming.

(b) Possessory Rights and Exploration Obligations

Until the Company discovers minerals in commercial quantities, it must diligently search for minerals and exclude rival claimants from the unpatented mining claims. There is no guarantee that the Company will find minerals and be able to retain rights to the unpatented mining claims.

2.2.15 Exploration and Development Capital

Exploration reduces the cash reserves of the Company. The Company may be dependent on seeking development capital elsewhere, through equity raisings, debt, spin offs or joint venture financing, to support long term exploration and evaluation of its projects. In the event that an economic deposit is discovered, the ability to exploit such a deposit is likely to be subject to the Company's ability to raise the necessary development finance through equity raisings, debt, spin offs or joint venture financings. The Company cannot provide any guarantees that such finance for exploration, or for mining will be available to the Company at such time in the future as it may be required and this could lead to the loss of tenements.

2.2.16 Investment Risk

The price of the Company's securities quoted on the ASX is influenced by international and domestic factors or even on a day to day basis by individual investor's decisions to buy or sell the Company's securities. Should these produce a negative effect on the securities' price, this may also affect the Company's ability to raise additional development capital.

There can be no guarantee that an active market in securities will develop or that the price of the securities will increase. Moreover, there may be relatively few buyers or a relatively high number of sellers of the securities on the ASX at any given time, which may increase not only the volatility of the market price of the securities but also the prevailing price at which the Shareholders can sell their securities. This may result in holders of securities receiving a market price for their securities that is less than the price paid for their securities.

The Company's projects were principally selected on the basis of their prospectivity for uranium as perceived by the Company. Therefore, it would be reasonable to expect that the Company's market appeal and in the event, it produces uranium, its revenues will be affected by the price of uranium. Uranium prices may fluctuate widely and are affected by numerous industry factors beyond the Company's control. These factors may include currency exchange rates and global and regional demand and supply and political and economic factors. Also, the value of international investors' shareholdings could diminish due to currency exchange rate fluctuations.

General economic conditions may affect inflation and interest rates, which in turn may impact upon the Company's operating costs and financing. Other factors that may adversely affect the Company's activities in Australia, the United States or elsewhere include changes in government policies, natural disasters, industrial disputes and social unrest or war on a local or global scale.

Changes to tax legislation and regulation or their interpretation may adversely affect the value of an investment in Shares and may affect Shareholders differently.

Changes in accounting standards or the interpretation of those accounting standards that occur after the date of this Prospectus may impact adversely on the Company's reported financial performance.

2.2.17 Acts of Terrorism or an Outbreak of International Hostilities

Acts of terrorism or an outbreak of international hostilities may adversely affect the demand for the Company's products. These, or an associated adverse change in sentiment with respect to the share market, could negatively impact on the value of an investment in the Company.

Acts of terrorism may also directly impact the Company's projects in the United States.

2.2.18 Reliance on key personnel

The Company is reliant on a number of key personnel and consultants. The Company has a small management team and the loss of one or more of these key contributors could have a material adverse impact on the business and operational performance of the Company. The Company may be unable to retain key employees or consultants or recruit additional qualified personnel. Whilst the Board has sought to and will continue to ensure the Directors and any key employees are appropriately incentivised, their services cannot be guaranteed. The Company may be required to spend significant sums of money to locate and train new employees in the event any of its employees resign or terminate their employment with the Company for any reason.

2.2.19 Other Risks

The future viability and profitability of the Company is also dependent on a number of other factors affecting performance of all industries and not just the exploration and mining industries, including, but not limited to, the following:

- (a) currency exchange rate fluctuations;
- (b) the strength of the equity and share markets in Australia and throughout the world;
- (c) general economic conditions in Australia and its major trading partners and, in particular, inflation rates, interest rates, commodity supply and demand factors and industrial disruptions;
- (d) financial failure or default by a participant in any of the joint ventures or other contractual relationship to which the Company is, or may become, a party; and
- (e) industrial disputation in Australia, the United States and elsewhere.

2.3 General risks

2.3.1 Economic and government risks
