

QUARTERLY ACTIVITIES REPORT FOR THE PERIOD ENDED 30 JUNE 2024

HIGHLIGHTS

- Merger with Greenstone Resources Limited (formerly ASX: GSR) completed on 18 June 2024 with assets of 1.8 million ounces of gold resources with an extensive 939 km² land holding and exposure to multi-commodity assets in the eastern goldfields of WA ^{1,2}
- Integration of assets and dual track strategy implementation underway to bring in short term cashflow via a pipeline of development ready production assets through a contract mining / JV and toll milling scenario, in parallel with working on the larger cornerstone assets of Boorara and Burbanks which have a combined resource inventory of 894 koz at 1.7 g/t Au with potential to support a profitable long-life operation ^{1,2}
- Binding Ore Purchase Agreement (OPA) executed with Paddington Gold Pty Ltd, a wholly owned subsidiary of Norton Gold Fields Ltd to treat 1.24Mt of Boorara ore at the 3.8Mtpa Paddington Mill, located ~56km by road from Boorara ³
- Binding Toll Milling Agreement (TMA) executed with FMR Investments Pty Ltd (FMR) to treat 200kt of Horizon ore at the Greenfields Mill near Coolgardie ⁴
- Cannon dewatering continued, all tenders received from underground mining contractors and project being reviewed and reranked with other study work
- Prefeasibility work continued at the Pennys Find underground project, Ore Reserve studies initiated for Boorara and Kalpini open pits, and initial optimisation work on Phillips Find undertaken, with all projects showing strong cashflows at current gold prices
- Listed investment of 948,448 shares in Vox Royalty Corp. sold for A\$2.93 million in cash⁵
- Cash at bank of A\$4.5 million and listed investments totalling A\$6.0 million

SEPTEMBER QUARTER ACTIVITIES ¹

- Award contracts, employ management and technical team, and commence open pit mining at the Boorara Gold Project
- Review Cannon and continue study work on Kalpini, Pennys Find and progress Phillips Find to develop a high-level sequence of near to medium term gold production
- Allocate ore from Cannon or another project to fulfill the 200 kt TMA at Greenfields
- Commence review of Burbanks open pit and underground opportunities
- Commence review of drilling targets, programmes and budgets with impending cashflow from operations for new discovery and resource replenishment from mining depletion

¹ See Forward Looking and Cautionary Statements on Page 26. ² As announced to the ASX on 25 July 2024 and see tables and confirmations on page 23. ³ As announced to the ASX on 6 May and 29 July 2024. ⁴ As announced to the ASX on 13 May 2024. ⁵ As announced to the ASX on 29 April 2024.

ASX ANNOUNCEMENT

OVERVIEW

Horizon Minerals Limited (ASX: HRZ) (Horizon or the Company) is pleased to provide the June 2024 Quarterly Activities Report. Horizon is an exploration and production company within the Kalgoorlie and Coolgardie regions of Western Australia (Figure 1).

A key objective for the Company is on near term gold production and exploration upside within our large tenement package of 939 km². The Company holds numerous multi - commodity assets including 1.8 Moz of gold resources, the Nimbus Silver Zinc project, 50% of the Mt Thirsty Nickel Cobalt Manganese project in Western Australia, and listed investments including Richmond Vanadium Technology (ASX: RVT) which holds the world class 1.8Bt Richmond vanadium project in northwest Queensland (Figure 6).¹

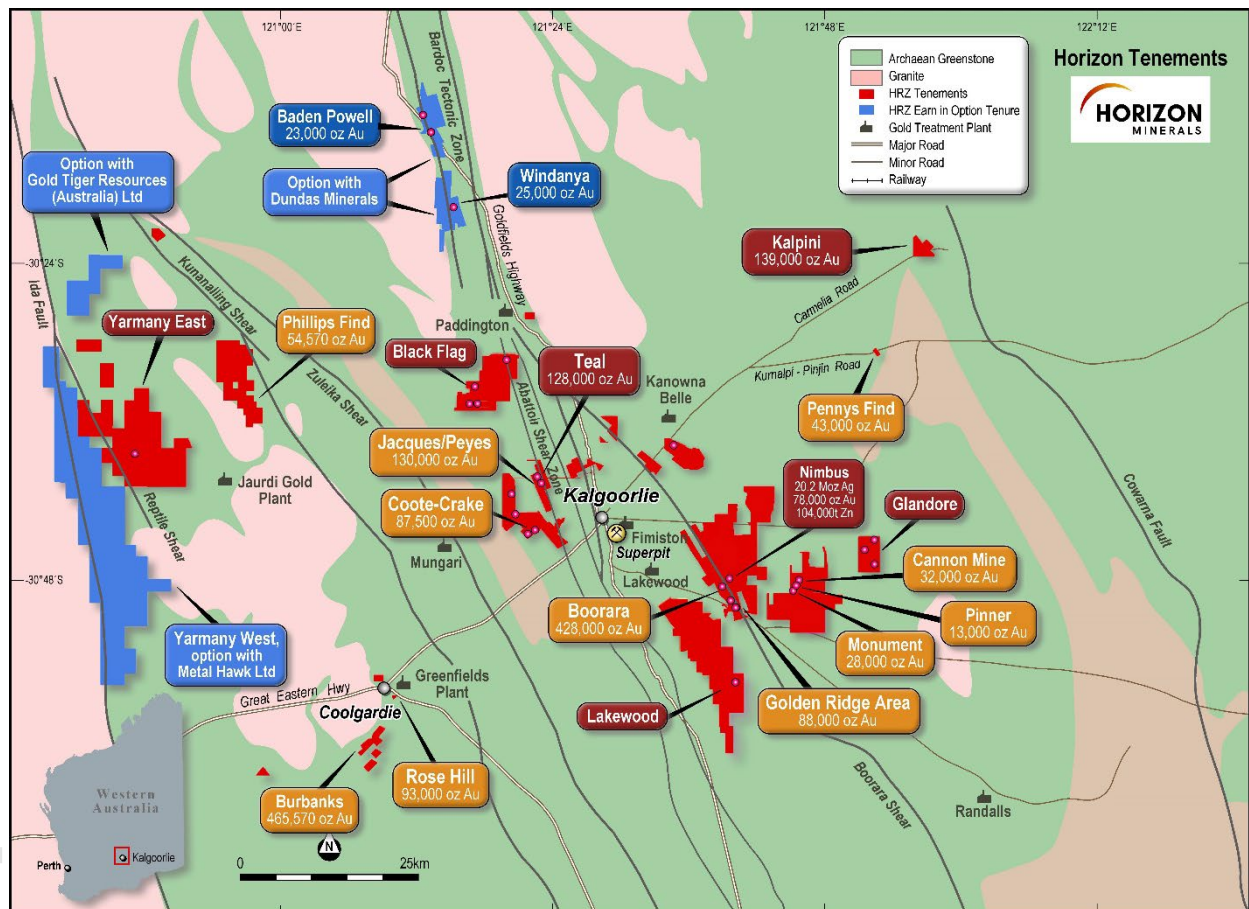

Figure 1: Horizon’s project locations, regional geology and surrounding infrastructure

Activities during the quarter focussed on completion of the merger with Greenstone Resources Limited (formerly ASX: GSR), conducted by way of schemes of arrangement under the Corporations Act 2001 (Cth), whereby Horizon acquired 100% of the fully paid ordinary shares and listed options in Greenstone, which completed on 18 June 2024.²

The merger is a logical combination of complimentary assets resulting in a mineral resource base of 1.8 million ounces Au in the eastern goldfields of WA. This endowment allows the enlarged Horizon to deploy a dual track strategy of near-term gold production and cashflow through toll milling and JV opportunities whilst also undertaking work on the cornerstone Boorara and Burbanks assets for a longer life production scenario.²

¹ See Summary of Gold and non-Gold Mineral Resources and Confirmation on pages 23-24. ² As announced to the ASX on 13 February 2024 and 25 July 2024, see also Cautionary and Forward-Looking Statements on Page 26. Page 2 of 26

ASX ANNOUNCEMENT

Following merger completion, integration of the assets and teams has been completed, and implementation of the strategy of near term cashflow from projects, culminating in the execution of an OPA for 1.24 Mt with Norton Goldfields to treat Boorara ore at their Paddington processing plant, and a TMA with FMR to treat ore at their Greenfields plant near Coolgardie. ¹

Multiple studies continued and were commenced during the quarter for Boorara, Kalpini, Pennys Find and Phillips Find. Preproduction activities continued for the Cannon Underground Gold Project with dewatering ongoing and all tenders received from underground contractors.

Resource development work continued in the Cannon project area with a resource update for Monument, and estimation of a maiden resource for Pinner. There was minimal emphasis on drilling during the quarter as resources and expenditure focussed on preproduction activities aimed at getting assets into production to generate near term cashflow for the Company.

The balance sheet was strengthened with the shares in TSX and NASDAQ listed Vox Royalty Corporation sold for A\$2.93 million (before broker commission and US withholding tax). ²

MINE DEVELOPMENT AND OPERATIONS

The Company has a clear strategy of bringing assets into production to bring cashflow into the business during current times of record high gold prices. During the quarter, the Company underpinned this strategy by securing ore treatment at two processing facilities over the course of the next 19 months. Development ready projects include the Cannon underground project and the Boorara open pit project. Multiple studies are advancing across the gold portfolio with the aim to be in sustainable production for the years to come. ³

Boorara Gold Project

The Boorara Gold Project is located 15 km east of Kalgoorlie-Boulder (Figure 1) adjacent to the Super Pit, and 1 km southwest of the Nimbus Silver-Zinc Project site where established offices are connected to mains power and existing water supplies.

The deposit is hosted in a quartz dolerite comprising a sheeted quartz vein array system with bounding shear zones and late-stage cross faults. Mineralisation occurs as northwest dipping sheeted and stockwork quartz-carbonate vein arrays within the quartz dolerite host rocks, and steeply dipping zones along sheared geological contacts trending to the north-northwest.

The Mineral Resource Estimate (JORC 2012) for Boorara is shown below ⁴:

Table 1: Boorara Mineral Resource Estimate

| Boorara at 0.5 g/t lower cut-off grade | | | |
|----------------------------------------|--------------|----------------|-----------------|
| Resource category | Tonnes (Mt) | Grade (g/t Au) | Gold Metal (Oz) |
| Measured | 1.12 | 1.22 | 44,000 |
| Indicated | 6.85 | 1.28 | 281,000 |
| Inferred | 2.56 | 1.26 | 103,000 |
| Total | 10.53 | 1.27 | 428,000 |

¹ As announced to the ASX on 6 and 13 May 2024. ² As announced to the ASX on 29 April 2024.

³ See Cautionary and Forward-Looking Statements on Page 26. ⁴ As announced to the ASX on 25 July 2024 and also see confirmations and tables on page 23.

ASX ANNOUNCEMENT

The Company engaged AMC Consultants to undertake an Ore Reserve study on open pit potential at its Kalpini and Boorara projects. During the quarter, the Company secured a 1.24 Mt OPA with Norton Goldfields to treat Boorara ore at the Paddington processing plant.

Optimisation work on the Boorara open pit project showed strong cashflows at \$3300/oz under a contract mining and toll mill scenario through the Paddington. Design and scheduling work was completed during the quarter and initial pricing received from reputable contractors to inform the economic model. Subsequent to the quarter end, the study was completed, contracts awarded and an Ore Reserve generated for Boorara open pit comprising the following:

Table 2: Boorara Ore Reserve¹

| Location | Reserve Category | Tonnes (kt) | Grade (g/t Au) | Gold Metal (kOz) |
|------------------|------------------|----------------|----------------|------------------|
| Boorara Open Pit | Proved | 636.8 | 1.25 | 25.7 |
| | Probable | 602.3 | 1.23 | 23.8 |
| | Total | 1,239.1 | 1.24 | 49.5 |

The Company also continued work on the larger Boorara development through both Heap Leach and Carbon in Leach (CIL) processing pathways, with initial work showing strong cashflows. This work shall take a lower priority as further near term cashflow opportunities have been prioritised.

Cannon Underground Project

The Cannon gold project is located 30 km east-southeast of Kalgoorlie-Boulder (Figure 1) via existing roads. The Mineral Resource Estimate (JORC 2012) for Cannon is shown below.²

Table 3: Cannon Mineral Resource Estimate

| Cannon at 1.0g/t Au lower cut-off grade | | | |
|-----------------------------------------|----------------|----------------|-----------------|
| Resource category | Tonnes (t) | Grade (g/t Au) | Gold Metal (Oz) |
| Indicated | 176,000 | 5.10 | 28,580 |
| Inferred | 51,000 | 2.30 | 3,750 |
| Total | 226,000 | 4.40 | 32,330 |

A Pre-Feasibility Study (PFS) comprising underground decline development from a portal within the historical open pit under a contract mining and toll milling model was undertaken. The key outcomes of the study are summarised in the table below:³

Table 4: Cannon PFS Results

| Measure | PFS Outcome |
|----------------------------------------------|-------------|
| Lateral Development (m) | 1,264 |
| Vertical Development (m) | 131 |
| Development Ore (kt) | 15.0 |
| Stoping Ore (kt) | 120 |
| Total Mined Ore (kt) | 135 |
| Gold grade (g/t) | 4.1 |
| Stope Mining Recovery | 95% |
| Milling Recovery (%) | 90% |
| Recovered Gold (oz) | 15,910 |
| Free Cashflow at A\$2,600/oz Au Price (A\$m) | 10.1 |

¹ As announced to the ASX on 26 July 2024, also see Tables and Confirmations on Pages 25. ² As announced to the ASX on 25 July 2024, also see Tables and Confirmations on Pages 23. ³ As announced to the ASX on 29 March 2022, also see Tables and Confirmations on Pages 25.

For personal use only

ASX ANNOUNCEMENT

The company is not aware of any new information or data that materially affects the information presented and that the material assumptions and technical parameters underpinning the Cannon PFS continue to apply and have not materially changed.

There exists significant potential for resource growth down plunge and along strike to the North of the Cannon shear zone. Further drilling is planned from surface and underground during the mining sequence to assess these opportunities.¹

All development approvals have been received for Cannon. Dewatering continued during the quarter, with minor periods of down time due to pump failure and replacement. Approximately 65% of the planned water extraction from the Cannon open pit has been completed (Figure 2). All tenders were received from underground mining contractors and are under review. Pre-production activities will continue at Cannon, however the project is under review in light of potential other projects that may offer better near term opportunities to the Company.

Figure 2: The Cannon open pit looking northeast showing dewatering progress.

EXPLORATION AND EVALUATION

Penny's Find Gold Project

The 100% owned Penny's Find gold project is located 50 km northeast of Kalgoorlie-Boulder in the heart of the Western Australian goldfields (Figure 1). The project presents an early underground development and production opportunity to generate cash under a toll milling and underground contractor / JV arrangement. ¹

¹ See forward Looking and Cautionary Statements on Page 26.

The Pennys Find MRE was updated in the December 2023 quarter from recent drilling, which extended the resource at depth and added some peripheral lodes, primarily to the North. The deposit also remains open at depth and will be tested from underground drilling positions.^{1,2}

The additional drilling was included in a Resource update completed during the March 2024 quarter which estimated a 63,000 ounce underground resource for Pennys Find (Table 1).

Table 5: Pennys Find Minerals Resource Estimate (JORC 2012)³

| Pennys Find underground (<260m RL) at 1.5g/t Au cut-off grade | | | |
|---------------------------------------------------------------|----------------|----------------|-----------------|
| Resource category | Tonnes (t) | Grade (g/t Au) | Gold metal (oz) |
| Indicated | 305,000 | 5.19 | 51,000 |
| Inferred | 123,000 | 3.02 | 12,000 |
| Total | 429,000 | 4.57 | 63,000 |

A prefeasibility study using underground mining methods continued during the quarter. Mine stope optimisation, updated geotechnical work and final mine design was completed during the quarter. In line with the current inflationary environment, the Company sought updated input pricing for the financial analysis from a reputable underground mining contractor to increase the robustness of the economic analysis for the study.¹

Cannon Project Area

The Cannon project consists of the Cannon underground project, and also the Monument, Pinner and Homerton prospects located within 1 km of Cannon. During the quarter, the Company continued work on the maiden MRE for Pinner, and updated the MRE for Monument.

Kalpini gold project

During the Quarter, AMC Consultants were engaged to undertake an Ore Reserves Study on Kalpini using open pit mining methods cutting back the existing Gambia and Camelia open pits, and with a potential new pit in the Atlas area. Input costs were based on recent contract pricing received for Boorara, and AMC reviewed Horizon’s data in relation to the modifying parameters for the reserve, inclusive of the resource model and estimate, hydrogeological and geotechnical studies. Initial optimisation work during the quarter showed strong cashflows at the current gold price. The competent person signing off on the Ore reserves for Kalpini conducted a site visit with Horizon during May 2024. Work shall continue next quarter on finalising optimisations, and carrying out detailed design and scheduling to feed into the financial model for reporting of an ore reserve for Kalpini.

¹ See forward Looking and Cautionary Statements on Page 26. ² As announced to the ASX on 31 May 2023 and 5 December 2023 ³ As announced to the ASX on 25 July 2024 and see Tables and Confirmations on Page 23. Page 6 of 26

For personal use only

Figure 3: Existing Camelia Open Pit, part of the Kalpini project area

Burbanks Project

Numerous zones within previously drilled holes have been identified as potentially intercepting unmodelled ore lodes. Of the 75 holes identified sampling results have been returned for 18 holes as reported in the March 2024 quarter by GSR. The remaining samples shall be submitted in the September 2024 quarter to the laboratory for assay to assist evaluating geological continuity, grade and resource confidence. Work is ongoing to assess the potential for medium-term cashflows from near surface resources, potentially adding to the pipeline of projects Horizon currently has underway.

Phillips Find Project

Optimisation and design work on Phillips Find was undertaken with a third party in relation to a potential JV opportunity to mine cutbacks at Newminster and New Haven. Following this work a schedule and financial model was developed and is currently under review. In parallel, preparation of soil, waste and ore characterisation work to provide baseline information to support environmental approvals of the project commenced.

Rose Hill gold project

Additional archaeological and ethnographic surveys were conducted in April with knowledge holders from the Marlinyu Ghoorlie Native Title claimants over both the Rose Hill and nearby Brilliant North tenements. No major issues were noted. The heritage survey clearance will allow for drilling at the Brilliant North Prospect on M15/1204 in the future, and the future development of Rose Hill.

There is the potential to develop the Brilliant North deposit as an open pit.¹ There is no quoted resource at present and further drilling is required to test historical drilling results. The area is complicated due to the Coolgardie State Battery which requires remediation of the tailings and

¹ See forward Looking and Cautionary Statements on Page 26.

ASX ANNOUNCEMENT

relocation of the historically significant battery. Liaison with the Perth Mint, who is responsible for the battery and tailings, is ongoing with the aim of working through a mutual solution to exploit this potential resource.

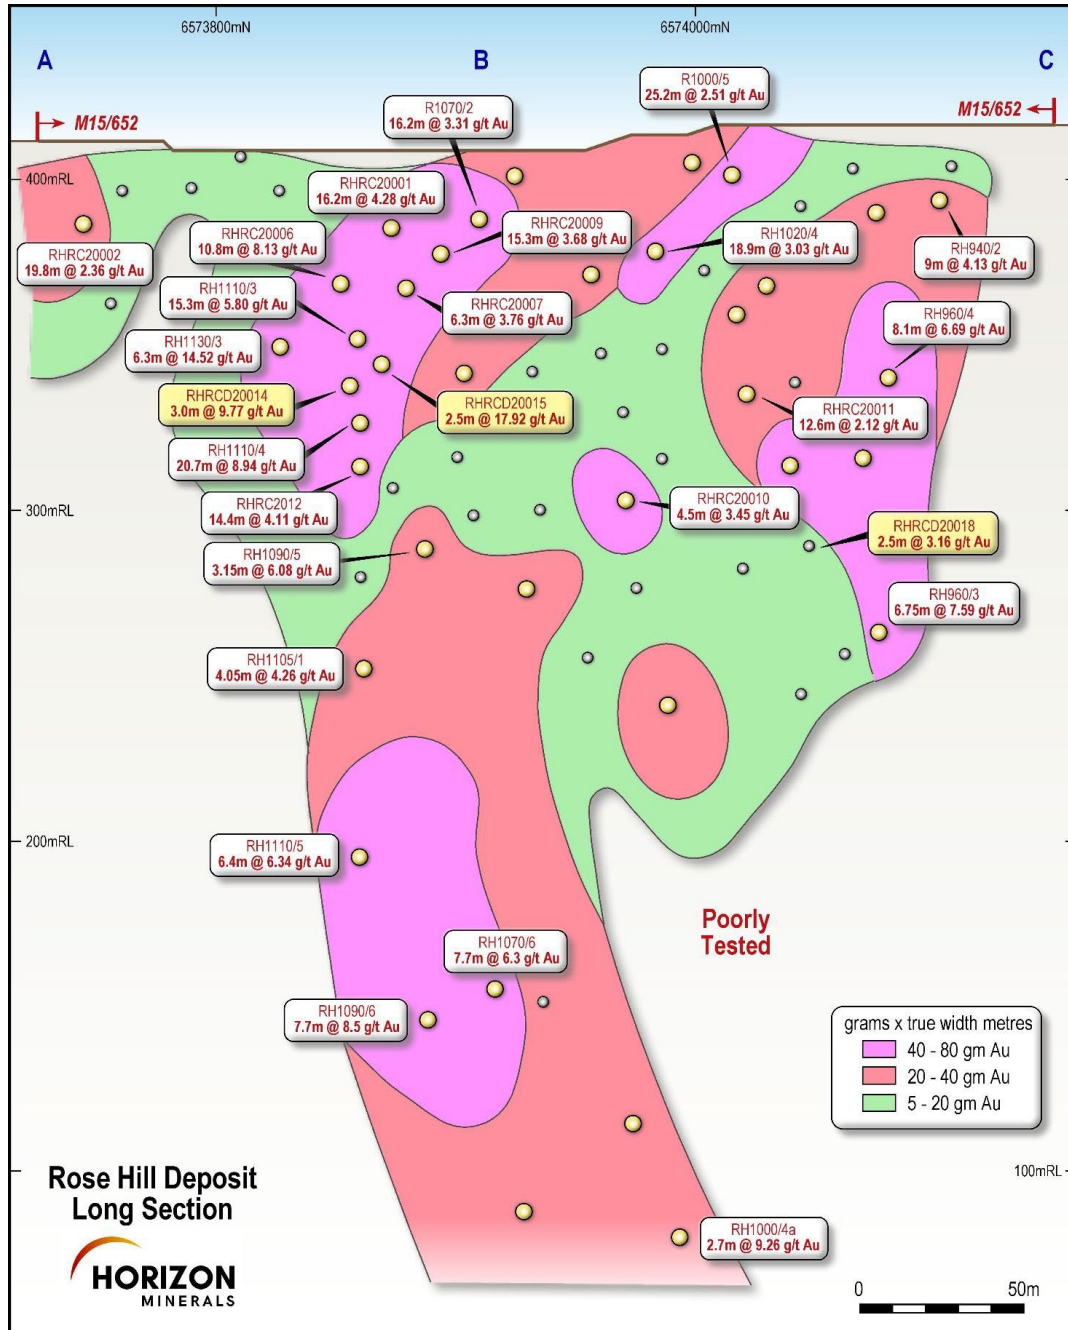

Figure 4: Rose Hill block model ¹

Applications for two miscellaneous licences have been submitted to link the Rose Hill and Brilliant North leases for infrastructure and access purposes, enabling a combined project approach in the area.

¹ As announced to the ASX on 9 December 2020, see also Tables and Confirmations on Page 23.

For personal use only

ASX ANNOUNCEMENT

Figure 5: Rose Hill and Brilliant North Location Plan

The current strategy for Rose Hill is to develop an open pit (box cut) mining out the oxide and transitional material to establish a portal location within fresh rock. Underground development and mining would then commence to extract the underground resource and drill test depth extensions from underground caddy locations.

The Mineral Resource estimate (JORC 2012) for Rose Hill open pit is shown below: ¹

Table 6: Rose Hill Mineral Resource Estimate – Open Pit

| Rose Hill Open Pit at 0.5 g/t Au lower cut-off grade | | | |
|------------------------------------------------------|-------------|----------------|-----------------|
| Resource category | Tonnes (Mt) | Grade (g/t Au) | Gold metal (oz) |
| Measured | 0.19 | 2.00 | 12,300 |
| Indicated | 0.09 | 2.00 | 6,100 |
| Inferred | | | |
| Total | 0.29 | 2.00 | 18,400 |

The Mineral Resource estimate (JORC 2012) for Rose Hill underground is shown below: ¹

Table 7: Rose Hill Mineral Resource Estimate – Underground

| Rose Hill Underground at 2.0 g/t Au lower cut-off grade | | | |
|---------------------------------------------------------|-------------|----------------|-----------------|
| Resource category | Tonnes (Mt) | Grade (g/t Au) | Gold metal (oz) |
| Indicated | 0.33 | 4.50 | 47,100 |
| Inferred | 0.18 | 4.80 | 27,800 |
| Total | 0.51 | 4.60 | 74,900 |

¹ As announced to the ASX on 9 December 2020, see also Tables and Confirmations on Page 23.

ASX ANNOUNCEMENT

ACQUISITIONS AND DIVESTMENTS

The Company announced on 13 February 2024 of its proposed merger with Greenstone Resources Limited (ASX: GSR) to be conducted by way of schemes of arrangement under the Corporations Act 2001 (Cth), whereby Horizon will acquire 100% of the fully paid ordinary shares in Greenstone (Share Scheme) and 100% of the listed Greenstone options (Options Scheme). The merger was overwhelmingly supported by Greenstone shareholders with the completion of the transaction and the scheme implemented on 18 June 2024.

The Company entered into separate option and sale agreements with Metal Hawk Limited (ASX: MHK) over its Yarmany West tenure as announced to the ASX on 5 July 2023, and Dundas Minerals Limited (ASX: DUN) over its Baden Powell and Windanya tenements as announced to the ASX on 30 August 2023. Both options are for a term of 24 months and should either or both parties exercise their respective options, there is potential for Horizon to receive additional revenue via cash and/or shares. For further information please refer to the respective announcements.

The Company announced on 29 March 2021 that it had entered into a binding royalty sale and purchase agreement with Vox Royalty Corporation (TSX: VOX) (Vox) to divest its 100% interest in two royalties covering the Janet Ivy and Otto Bore gold projects in the Western Australian goldfields for \$7 million on the following terms:

- A\$4 million in cash upon completion; and
- A\$3 million in cash or Vox shares at Vox's election (priced on a 30-day VWAP basis) upon Vox receiving cumulative payments of A\$750,000 from the transaction royalties.

The deferred cumulative tonnage trigger was met in the September 2023 quarter with the payment trigger met on 12 November 2023. Payment was made to Horizon of A\$3 million in Vox shares which were escrowed for a period of four months. The escrow period lapsed during the quarter and the shares sold on the NASDAQ for A\$2.93 million (before broker commission and US withholding tax).

RICHMOND VANADIUM PROJECT

The Richmond Vanadium Project is located 650 km west of Townsville and 250 km east of Mt Isa in NW Queensland (Figure 8) and is owned 100% by RVT with Horizon owning 8.94% of RVT. The project tenements cover ~1,400 km² of Cretaceous Toolebuc Formation and the advanced Lilyvale deposit north of Richmond.

As announced to the ASX on the 13 December 2022, RVT (ASX: RVT) completed its IPO raising \$25 million (before costs) and listed on the ASX. As part of the IPO, eligible Horizon shareholders were issued 20 million RVT shares via an in-specie distribution with 19.8 million RVT shares retained by the Company representing 8.94% of RVT's issued capital. The current value of the Company's holding in RVT can be seen in the Corporate / Finance section below.

Figure 6: Richmond Vanadium Project location and surrounding infrastructure

For more information on Richmond Vanadium Technology and the project, we refer you to their website at www.richmondvanadium.com.au or the ASX under ticker code RVT.

WHITE RANGE GOLD PROJECT (Divested)

Horizon has divested the White Range gold project in the Northern Territory to Red Dingo Corporation Pty Ltd. The Company is currently attending to some remediation issues at the site prior to making application for return of environmental bonds held by the Northern Territory Department of Primary Industry and Resources.

ENVIRONMENTAL, SOCIAL AND GOVERNANCE

The Company recognises the importance of Environment, Social and Governance (ESG) factors and is committed to continuous improvement in this regard. During the quarter, a review continued of all internal policies, procedures, and governance principles to identify improvements and opportunities to ensure we meet or exceed our corporate license to operate.

The Company previously worked with BDO Global to conduct an analysis of the business to identify opportunities to improve the Company’s ESG performance. Materiality surveys were completed for both internal and external stakeholders and completed a workshop to map the opportunities and generate an initial sustainability report. The aim of the process is to develop systems and processes to ensure we meet or exceed our social license to operate and adopt the sustainability report covering current and future activities.

The Company engaged with traditional owners with follow up ethnographical and archaeological surveys conducted at Rose Hill near Coolgardie by knowledge holders of Marlinyu Ghoorlie.

Waste rock, soil and ore samples were collected for Phillips Find during the quarter for characterisation work as part of the baseline data required for environmental approvals. The samples are due to be submitted and results received in the September 2024 quarter. Waste characterisation results for Monument were received and this work completed during the quarter.

For personal use only

ASX ANNOUNCEMENT

CORPORATE / FINANCE

During the quarter and following the merger, Mr Glenn Poole tendered his resignation from the company and is currently working his three month notice period. It is with pleasure we welcome Mr Stephen Guy who shall join the company in the senior leadership role as Chief Geologist in late August. Stephen has a wealth of experience in exploration, resource development, development and operations including start ups across multiple commodities and strong gold experience.

Total cash at bank as at 30 June 2024 was A\$4.5 million. In addition, the Company holds investments in ASX listed companies with a current value of approximately A\$6.0 million (See Table below).

As previously announced to the ASX on 19 October 2022 and 23 November 2022, the Company executed financial agreements with Nebari LLC for a US\$5 million Convertible Loan Facility in two tranches of US\$2 million and US\$3 million respectively to pay for and advance the Cannon gold project. Both tranches have been drawdown. For further information and terms of the Loan Agreement, we refer you to the ASX announcement dated 19 October 2022.

In accordance with ASX Listing Rule 5.3.5, A\$75,425 was paid to related parties or their associates during the quarter, comprising Non-executive and Executive Director fees and superannuation.

Table 8: Issued Share Capital

Notes

- (1) Royalty of A\$1 per tonne of ore mined and treated from M26/616 is payable to Pamela Jean Buchhorn.
- (2) On 18 June 2024, Horizon implemented the merger with Greenstone Resources Limited. The transaction brought Greenstone's complementary assets over to Horizon as listed in the above tenement schedule.
- (3) Hayes Mining Pty Ltd own 15% interest in P16/3084 to P16/3087.
- (4) An earn-in JV whereby Gold Tiger Resources (Australia) Limited can earn 90% over 4 stages (4 years) by spending A\$300,000 and paying Horizon A\$120,000 non-refundable cash amounts. Gold Tiger Resources (AUS) Limited has earned a 75% interest, leaving Horizon with a 25% interest.
- (5) The Mt Thirsty Cobalt-Nickel-Manganese Project is a large laterite hosted resource, held in a 50:50 joint venture by Horizon (formerly Greenstone Resources) and Conico Ltd (ASX:CNJ). Conico Ltd is the Joint Venture manager. The Project is located 16km from the historic mining town of Norseman, Western Australia. 150km to the north lies Kalgoorlie, the epicentre of the West Australian mining industry and 195km to the south is the port of Esperance. Access to the site is primarily via the sealed Coolgardie–Esperance Highway, which runs north-south from Esperance to Kalgoorlie.

| | Probable | 135.0 | 4.1 | 17.68 |
| | Total | 135.0 | 4.1 | 17.68 |
| Total Ore Reserves | TOTAL | 1,374.1 | 1.52 | 67.18 |

Confirmation

The information in this report that relates to Horizon's Mineral Ore Reserves is extracted from and was originally reported in Horizon's ASX announcements "Positive Results for Cannon Underground Gold Project and Feasibility Study Update", (ASX:HRZ) (Cannon) dated 29 March 2022, "Boorara Ore Reserve Supports Development" (Boorara) dated 26 July 2024.

The Company confirms that it is not aware of any new information or data that materially affects the information included in the original market announcements and that all material assumptions and technical parameters underpinning the estimates in those announcements continue to apply and have not materially changed. The Company confirms that the form and context of the Competent Person's findings in relation to those Mineral Resources estimates or Ore Reserves estimates have not been materially modified from the original market announcements.

ASX ANNOUNCEMENT

Forward Looking and Cautionary Statements

Some statements in this report regarding estimates or future events are forward looking statements. They include indications of, and guidance on, future earnings, cash flow, costs and financial performance. Forward looking statements include, but are not limited to, statements preceded by words such as “planned”, “expected”, “projected”, “estimated”, “may”, “scheduled”, “intends”, “anticipates”, “believes”, “potential”, “could”, “nominal”, “conceptual” and similar expressions. Forward looking statements, opinions and estimates included in this announcement are based on assumptions and contingencies which are subject to change without notice, as are statements about market and industry trends, which are based on interpretations of current market conditions. Forward looking statements are provided as a general guide only and should not be relied on as a guarantee of future performance. Forward looking statements may be affected by a range of variables that could cause actual results to differ from estimated results and may cause the Company’s actual performance and financial results in future periods to materially differ from any projections of future performance or results expressed or implied by such forward looking statements. These risks and uncertainties include but are not limited to liabilities inherent in mine development and production, geological, mining and processing technical problems, the inability to obtain any additional mine licenses, permits and other regulatory approvals required in connection with mining and third party processing operations, competition for among other things, capital, acquisition of reserves, undeveloped lands and skilled personnel, incorrect assessments of the value of acquisitions, changes in commodity prices and exchange rate, currency and interest fluctuations, various events which could disrupt operations and/or the transportation of mineral products, including labour stoppages and severe weather conditions, the demand for and availability of transportation services, the ability to secure adequate financing and management’s ability to anticipate and manage the foregoing factors and risks. There can be no assurance that forward looking statements will prove to be correct.

Statements regarding plans with respect to the Company’s mineral properties may contain forward looking statements in relation to future matters that can only be made where the Company has a reasonable basis for making those statements.

This announcement has been prepared in compliance with the JORC Code (2012) and the current ASX Listing Rules.

The Company believes that it has a reasonable basis for making the forward-looking statements in the announcement, including with respect to any production targets and financial estimates, based on the information contained in this and previous ASX announcements.
