

Quarterly Activities Report

Quarter Ending 30 June 2024

This is the quarterly report of Helios Energy Ltd (ASX Code: HE8) (**Helios** or **Company**) for its activities for the 3 month period ending on 30 June 2024.

Presidio Oil & Gas Project

Helios has a 70%WI in the Presidio Oil & Gas Project located in Presidio County, Texas, USA. This 70%WI is comprised of a 70%WI in a total of 8,670 gross acres (6,069 net acres) and a 70%WI in the 4 wells drilled by Helios in the Presidio Oil & Gas Project, namely, Presidio 52#1, Presidio 141#2, Quinn Creek 141#1 and Quinn Mesa 113.

Map above shows the location of Presidio County in Texas, USA, the general trend of the Eagle Ford Shale Formation in Texas and the location of Helios' drilling in the Presidio Oil & Gas Project.

Commercialization of the Presidio Oil & Gas Project

Helios' primary focus with the Presidio Oil & Gas Project is on phased-in gas commercialization along with oil production sales. The Presidio Oil & Gas Project comprised of a large wet gas resource and from the gas isotope analysis, it shows the wetness ratios are between 24-30% which correspond to oil associated gas in the genetic gas classification.

Farmout of the Presidio Oil & Gas Project

Commercialization options being assessed by Helios for the Presidio Oil and Gas Project also include bringing in a farmin joint venture partner to participate in the Presidio Oil and Gas Project. During the quarter, Helios commenced an active campaign to procure a joint venture farmin partner for the Presidio Oil & Gas Project.

Background to the Presidio 52#1 Well

The Presidio 52#1 well has been successfully drilled to a total depth (TD) of 8,806 feet. During drilling, the Presidio 52#1 well encountered the lower bench of the Ojinaga Formation (primary target) and the Eagle Ford Shale Formation (secondary target) as well as two older (deeper) Cretaceous units, being the Buda and Georgetown Formations (both secondary targets).

The lower bench of the Ojinaga Formation was encountered at the depth of 6,632 feet and is 793 feet thick. Helios has successfully tested and produced oil from all 4 wells it has drilled which have penetrated the Ojinaga Formation.

The oil analysis shows that the oil in the Ojinaga Formation is sourced from the Eagle Ford Shale Formation. The Eagle Ford Shale was encountered at a depth of 7,425 feet and is 836 feet thick with the deepest 235 feet also referred to as the Boquillas Formation (which is equivalent to the lower Eagle Ford Formation in Karnes County, Texas, USA).

Very good to excellent oil and gas shows in the Presidio 52#1 Well

Very good to excellent oil and gas shows were observed throughout the drilling of the entire lower bench of the Ojinaga Formation and throughout the drilling of the entire Eagle Ford Formation (which includes the 235 feet of the Boquillas Formation). Gas measurements were consistently high throughout the drilling through the entire lower bench of the Ojinaga Formation and throughout the drilling of the entire Eagle Ford Formation. From the gas isotope analysis, it shows the wetness ratios are between 24-30% which corresponds to oil associated gas in the genetic gas classification.

2,000 Foot Proven Oil and Gas Column Across Presidio Oil & Gas Project

Helios has successfully tested and produced oil from all 4 wells it has drilled. The oil and gas produced from the 4 wells drilled by Helios in the Presidio Oil & Gas Project, namely, Presidio 52#1, Presidio 141#2, Quinn Creek 141#1 and Quinn Mesa 113 along with the interpretation of the 2D and 3D seismic evidences an oil and gas column over the Presidio Oil & Gas Project which averages about 2,000 feet in thickness and has recovery potential of 5,000 to 10,000 barrels of oil equivalent (**boe**) per acre.

For personal use only

Above is a log of the Presidio 52#1 well. The oil and gas column in the Presidio 52#1 well from the commencement of the Ojinaga Formation (which is the Austin Chalk age equivalent formation overlying the Eagle Ford Shale) to the bottom (deepest) part of the Eagle Ford Shale Formation is 2,240 feet in thickness.

Presidio Oil & Gas Project – Infrastructure

Access to the 4 wells that constitute the Presidio Oil & Gas Project (Presidio 52#1, Presidio 141#2, Quinn Creek 141#1 and Quinn Mesa 113) is provided by a 25 mile unsealed, formed road constructed by Helios that branches off the sealed US-90 highway which carries heavy truck and passenger vehicle traffic. The 4 oil wells have access to ample supplies of fresh water provided by local water wells drilled into shallow water aquifers. The El Paso Oil Refinery located in El Paso, Texas has a processing capacity of 135,000 barrels of oil per day and is located 170 miles from the Presidio Oil & Gas Project. Crude oil is sold there by truck delivery.

The Presidio Oil & Gas Project is located 250 miles (or 5 hours by truck) from Midland, Texas which is the epicenter of the Permian Basin oil industry. All rigs, supplies and services required for the Presidio Oil &

For personal use only

Gas Project are sourced from Permian Region. Oil production in the Permian Region in May 2024 reached approximately 6,100,000 bopd.

Stratigraphy of the Presidio Oil & Gas Project located in Presidio County, Texas, USA

Gulf Coast		Presidio Oil Project Subsurface
Series	Division or Group	
Gulf Cretaceous	Austin	San Carlos (Olmos)
		Austin Chalk age equivalent formation (called the Ojinaga)
	Eagle Ford	Upper Eagle Ford Shale
		Boquillas
Comanche Cretaceous	Washita	Buda
		Eagle Mt SS
		George Town
	Fredericksburg	Kiamichi
		Edwards
Trinity	Glen Rose	
		Hosston/Travis Peak

Production Facilities Installed

Permanent production facilities have been installed at the well site location of the Presidio 141#2 well consisting of a 3-phase separator, two 500 barrel oil tanks, two 500 barrel water tanks, and a flare stack. The Quinn Creek 141#1 well has also been piped into and connected to flow to the shared field production facilities located at the Presidio 141#2 location.

Leases Acquired or Disposed of During the Quarter

Helios has a 70%WI in a total of 8,670 gross acres (6,069 net acres). A total of 9,180 gross acres of leases were allowed to expire during the last quarter. All 8,670 gross acres, the subject of the Presidio Oil and Gas Project, are located in the south-west portion of Presidio County, Texas and are the subject of oil and gas

For personal use only

lease agreements entered into with private oil and gas mineral rights owners.

Presidio 52#1 Well

During the quarter, a workover was undertaken on the Presidio 52#1 well. Production from the lowest two production zones had become impaired and a cleanup of the well was required. These two zones are the most productive zones in the Presidio 52#1 well. After completion of the workover oil and wet gas production recommenced.

Quinn Creek 141#1 Well

Quinn Creek 141#1 is now shut in with production tubing run in the well. Various artificial lift applications are being investigated to optimize sustainable production.

Presidio 141#2 Testing During the Quarter

Presidio 141#2 is currently shut in as various artificial lift applications are being investigated to optimize sustainable production.

Macaw Energies LLC

Helios has entered into an agreement with Macaw Energies LLC (**Macaw**) in regard to Helios' Presidio Oil and Gas Project located in Presidio County, Texas, USA.

Background

Macaw is a 100% owned subsidiary of Norwegian multinational Golar LNG, which is listed on Nasdaq (Nasdaq Listing Code: "GLNG") and has a market cap of circa US\$2.6 billion. Macaw was created by Golar LNG to develop LNG solutions that could avoid natural gas flaring in oil and gas onshore production fields. Macaw has developed a proprietary modular natural gas liquefaction facility (**Macaw LNG Module**) with the capability to process natural gas that otherwise would be flared or wasted.

The Presidio Oil and Gas Project owned by Helios is located in Presidio County, Texas which is remote and has no current connections to natural gas pipelines or natural gas processing facilities. The production of oil from Presidio County relies on a gas-offtaking solution that eliminates the flaring of natural gas (which is currently occurring).

Helios and Macaw each hold the view that the utilization of Macaw's LNG Module at Helios' Presidio Oil and Gas Project will enable the elimination of flaring and facilitate increased oil production by Helios from the Presidio Oil and Gas Project.

Sale Agreement for Natural Gas as well as Natural Gas Liquids (NGL)

Helios and Macaw have executed a gas sales agreement and agreed to deploy the first Macaw LNG Module to off-take otherwise to-be-flared natural gas from Helios. Under the Agreement, Macaw shall own, install, operate and maintain the Macaw LNG Module and be the buyer of the unprocessed natural gas delivered by Helios to the Macaw LNG Module. Macaw will own all LNG production generated from the Macaw LNG Module.

For personal use only

In addition, Macaw will own all of the natural gas liquids (NGL) separated by the Macaw LNG Module, sell the NGL on an arm's length basis to third party buyers and then split the profits with Helios. Furthermore, Helios and Macaw have agreed on a framework of a plan for the deployment of additional Macaw LNG Modules to support Helios' future drilling campaign for the Presidio Oil and Gas Project.

Corporate

On 30 June 2024, Mr Hui Ye resigned as the Non-Executive Chairman and as a Director of Helios. Helios has no debt and its cash at bank at the end of the quarter was \$464,000.

Related Party Payments – Item 6 of Appendix 5B

Payments to related parties listed in Item 6 of the Appendix 5B (which total to A\$40,000) are to Executive and Non-Executive Directors for personal exertion salary and directors fees.

This ASX announcement has been authorized for release by the Board of Helios.

Competent Person's Statement

The information in this ASX announcement is based on information compiled or reviewed by Mr Neville Henry. Mr Henry is a qualified petroleum geologist with over 49 years of Australian, USA and other international technical, operational and executive petroleum experience in both onshore and offshore environments. He has extensive experience of petroleum exploration, appraisal, strategy development and reserve/resource estimation, as well as new oil and gas ventures identification and evaluation. Mr Henry has a BA (Honours) in geology from Macquarie University.

7. Financing facilities <i>Note: the term "facility" includes all forms of financing arrangements available to the entity. Add notes as necessary for an understanding of the sources of finance available to the entity.</i>	Total facility amount at quarter end \$A'000	Amount drawn at quarter end \$A'000
7.1 Loan facilities	-	-
7.2 Credit standby arrangements	-	-
7.3 Other (please specify)	-	-
7.4 Total financing facilities	-	-
7.5 Unused financing facilities available at quarter end		-
7.6 Include in the box below a description of each facility above, including the lender, interest rate, maturity date and whether it is secured or unsecured. If any additional financing facilities have been entered into or are proposed to be entered into after quarter end, include a note providing details of those facilities as well.		

8. Estimated cash available for future operating activities	\$A'000
8.1 Net cash from / (used in) operating activities (item 1.9)	(336)
8.2 (Payments for exploration & evaluation classified as investing activities) (item 2.1(d))	(271)
8.3 Total relevant outgoings (item 8.1 + item 8.2)	(607)
8.4 Cash and cash equivalents at quarter end (item 4.6)	464
8.5 Unused finance facilities available at quarter end (item 7.5)	-
8.6 Total available funding (item 8.4 + item 8.5)	464
8.7 Estimated quarters of funding available (item 8.6 divided by item 8.3)	0.76
<i>Note: if the entity has reported positive relevant outgoings (ie a net cash inflow) in item 8.3, answer item 8.7 as "N/A". Otherwise, a figure for the estimated quarters of funding available must be included in item 8.7.</i>	
8.8 If item 8.7 is less than 2 quarters, please provide answers to the following questions:	
8.8.1 Does the entity expect that it will continue to have the current level of net operating cash flows for the time being and, if not, why not?	
The Company expects the next quarter to have similar cashflows as the Company continues focusing on assessing exploration data and work programs with a view to planning future drill, exploration and operational activities. This may include seeking farmin joint venture partners for its Presidio Oil and Gas Project.	
8.8.2 Has the entity taken any steps, or does it propose to take any steps, to raise further cash to fund its operations and, if so, what are those steps and how likely does it believe that they will be successful?	
The Company is always considering its capital requirements and retains the ability to raise capital as required. The Company has a history of successfully raising funds and see no reason why it would not be able to do so again when required. An additional business option is to seek farmin joint venture partners for its Presidio Oil and Gas Project.	

Mining exploration entity or oil and gas exploration entity quarterly cash flow report

8.8.3 Does the entity expect to be able to continue its operations and to meet its business objectives and, if so, on what basis?

The Company will be able to continue normal business operations. The Company can reduce its discretionary expenditure until such stage as it finalises any fundraising options.

Note: where item 8.7 is less than 2 quarters, all of questions 8.8.1, 8.8.2 and 8.8.3 above must be answered.

Compliance statement

- 1 This statement has been prepared in accordance with accounting standards and policies which comply with Listing Rule 19.11A.
- 2 This statement gives a true and fair view of the matters disclosed.

Date: 31 July 2024

Authorised by: Board of Directors
(Name of body or officer authorising release – see note 4)

Notes

1. This quarterly cash flow report and the accompanying activity report provide a basis for informing the market about the entity's activities for the past quarter, how they have been financed and the effect this has had on its cash position. An entity that wishes to disclose additional information over and above the minimum required under the Listing Rules is encouraged to do so.
2. If this quarterly cash flow report has been prepared in accordance with Australian Accounting Standards, the definitions in, and provisions of, *AASB 6: Exploration for and Evaluation of Mineral Resources* and *AASB 107: Statement of Cash Flows* apply to this report. If this quarterly cash flow report has been prepared in accordance with other accounting standards agreed by ASX pursuant to Listing Rule 19.11A, the corresponding equivalent standards apply to this report.
3. Dividends received may be classified either as cash flows from operating activities or cash flows from investing activities, depending on the accounting policy of the entity.
4. If this report has been authorised for release to the market by your board of directors, you can insert here: "By the board". If it has been authorised for release to the market by a committee of your board of directors, you can insert here: "By the [name of board committee – eg Audit and Risk Committee]". If it has been authorised for release to the market by a disclosure committee, you can insert here: "By the Disclosure Committee".
5. If this report has been authorised for release to the market by your board of directors and you wish to hold yourself out as complying with recommendation 4.2 of the ASX Corporate Governance Council's *Corporate Governance Principles and Recommendations*, the board should have received a declaration from its CEO and CFO that, in their opinion, the financial records of the entity have been properly maintained, that this report complies with the appropriate accounting standards and gives a true and fair view of the cash flows of the entity, and that their opinion has been formed on the basis of a sound system of risk management and internal control which is operating effectively.
