NZ:

NZ continues to show strong growth with 93% increase in sites under management.

Attractive market with limited competition and significant potential for growth.

Germany:

Germany continues to show strong growth with revenue up 519%.

Germany is the largest market SPZ currently operate in with a TAM of 90,000 sites.

Denmark:

It has a good regulatory structure.

Is early in the adoption of ANPR technology for parking management.

Highly attractive commercial operating environment.

Large addressable market adding 10,000 potential sites to the SPZ TAM taking us to over 150,000 sites.

Australia:

ANPR operations in Queensland remain on hold while the government consult on the operation of private car parks.

New territory - Denmark

- Through research we identified Denmark as a market where SPZ can leverage our market leading technology and deep industry knowledge
- SPZ established its Danish business in Jan of 2024 with the Managing Director starting on 1 Feb
- The SPZ technology has been utilised to access the Transport Authority (TA) Database via an API and is now operational in processing number plate data
- Through the accreditation we have with the TA we can send PBN's through the TA portal direct to the driver, this facilitates faster payments
- Since February the team has signed 11 contracts with 5 sites now live and operating
- With the sales team in place, technology live and operations team executing, we have a solid pipeline and bright future in Denmark

Regulatory update

UK regulatory update

Positive dialogue ongoing with the new Ministers and department responsible for parking

From July 1 the British Parking Association (BPA) and the International Parking Community (IPC) have come together to provide a Single Code of Practice – this is designed to raise standards and bring both industry associations into line

New Code of Practice has been received well by the Department and also attracted significant positive media

Queensland regulatory update

Round table meeting with the Minister, Transport & Main Roads department and the industry attended by SPZ on June 26

The department committed to a draft code of practice, based on the UK code, to be reviewed by the Minister in September

SPZ is committed to working with the Queensland Government and TMR to support the implementation of the code as soon as possible

FY25 priorities

Strong start to FY25, year has commenced with positive growth

01

SPZ is growing strongly, is profitable and cash flow positive, with progress towards and beyond the 1,500 site target.

02

FY25 will be another year of profitable growth and positive free cash flow, with continued expansion to build scale in key markets.

03

Expanding into large addressable markets with proprietary technology, excellent market knowledge and sound industry expertise.

04

\$7.2m of cash on hand to fund organic expansion, growth and disciplined acquisitions.

05

Continued focus on international expansion and complementary M&A strategy.

ANPR: How it works

| Automatic number / license plate recognition (ANPR) is a reliable, cost effective off-street parking management solution.

It is proven to serve a wide range of industries including supermarkets, retail, hotels, hospitals and leisure centres. Smart Parking's ANPR solution ensures greater compliance and increased parking revenue.

- Ticketless, barrier-free system, parking areas that are managed 24/7
- Automatically generated and issued parking charge notices
- Increased security, comprehensive reporting and account management

Smart Parking Technology - Smart Vision

Smart Parking continues to innovate in order to drive growth and efficiency in the business. In FY24 our R&D team delivered new products that will drive positive outcomes for both customer and business

ABC1234

```
{  
  
  "confidence": 0.98

```

Provides a revolutionary way to improve vehicle number plate recognition managed by Smart Parking - with a particular focus on optimising vehicle match rates and tailoring this technology to specific business regions UK, Germany, Denmark, Australia, New Zealand and USA

This AI driven innovation will allow an additional 8 million vehicles to be reviewed by SmartCloud Platform annually - this is just the current installation portfolio

As the software is driven with AI, the software model will continue to learn and evolve allowing more improvements to be achieved

This also allows Smart Parking to be camera "agnostic" as the real IP is in Smart Cloud and not the camera

Smart Parking Technology - Smart Cloud Hub

Smart Parking continues to innovate in order to drive growth and efficiency in the business. In FY24 our R&D team delivered new products that will drive positive outcomes for both customer and business

HUB is a customer portal that lets land owners and Smart Parking customers see what's really happening on their sites

A full reporting suite allows customers to view and have control over business decisions that impact their customers on a daily basis

In FY24 the team delivered further enhancements to HUB that have opened up new market verticals, in particular housing associations with the housing tenants able to add and exempt plates/ visitors via a phone app

This feature ensures the tenant's car park is managed effectively with a complete audit trail for the land owner of who has used the property and if enforcement action is required

This is particularly popular in Denmark and Germany with UK housing associations showing interest to manage inner city estate parking
