Financial statements and Explanation of results

Revenue for the year ended 30 June 2024 was \$811,120, a 254% increase over FY23. The loss after income tax expense amounted to \$4,793,564. This loss includes non-cash, share-based payments expense of \$147,204 and non-cash amortisation charges of \$540,000.

The financial results and net cash outflow for Financial Year 2024 reflect the commercialisation activities undertaken by Linus. During the year, the Company continued to execute its strategy to expand commercial deals and launch products primarily in the Sports market segment. The Company made significant progress in new customer acquisition and market expansion, closing deals with Hockey Technology partners (working with the North American Hockey League, USA Hockey, and more), the Peach Belt Conference, and the Lone Star Conference. Importantly, the company entered the US market, the largest potential market for Linus solutions. Within the US market, the Company penetrated the US college sports market, onboarding two college conferences in a market with 1,100 NCAA universities, 150 NCAA conferences, and a total available market worth over \$70m for Linus.

During FY24, Linus completed major deployments of its Whizzard product with multiple customers. In Q1 FY24, Inverleigh Media launched Whizzard, embedded into its ENGINE media platform for customers New Zealand Rugby and SANZAAR (South Africa, New Zealand, Australia, and Argentina Rugby). In Q3 FY24, Whizzard went live with IMG, the world's leading sports and media company. Whizzard was incorporated within the IMG Video Archive service, providing advanced content search and curation capability to users including the world's leading sports federations, broadcasters, film makers, advertisers, and more. Through IMG, Linus is now working with content from some of the biggest sports federations including Premier League, PGA, Wimbledon, The Open, World Rugby, MotoGP and more. The deployment provides substantial visibility and credibility across Linus' key target markets and is a critical element to acceleration of Linus' growth.

The company expanded deployments with customers including Cricket Australia, Racing.com and Inverleigh Media and continued to work with and support existing customers under contract. Across all customers, Linus is now working with over 100,000 hours of content in 15 sports and across 40+ federations.

The increased commercial activity in FY24 resulted in record financial results including billings of \$760,300, an increase of 57% over FY23 and customer cash receipts of \$747,516, an increase of 51% over FY23.

During the year, the Company released significant additions to its product portfolio. The Linus Whizzard version 2.0 was launched in conjunction with deployment for IMG. Whizzard v2.0 added advanced natural language search and content-to-content recommendations driving greater value for users and rights holders. Additionally, Whizzard Highlights was released in Q1 FY24, enabling the automatic generation of highlight packages for publication of "mini-match"-style highlight videos from every game. This marked Linus' entry into the existing high-growth market for automated highlights. Whizzard Highlights was first deployed by Cricket Australia, and subsequently sold to Lone Star and Peach Belt Conferences. Through FY24, Whizzard Highlights has become a key component in customer acquisition and growth. Both Whizzard and Whizzard Highlights have been sold and deployed to multiple customers during the year, allowing Linus to increase the rate of new customer acquisition, rate of customer deployment, and speed to revenue, while reducing deployment effort and cost.

Following the market validation of Whizzard and Whizzard Highlights, Linus attracted the attention of several major technology companies, forging partnerships to expand the company's go-to-market activities. In April 2024, Linus signed a partnership agreement with Magnifi, the #2 and fastest growing provider of automated highlights. The partnership combines Magnifi's industry-leading AI-powered automated highlights and metadata generation with Linus' virtualised video and personalised video assembly. The combination creates a highly differentiated value proposition against leading incumbent providers of automated highlights solutions, positioning both companies to disrupt this large existing market. Magnifi will resell Linus Whizzard as their solution for video archives, and Linus Captivate as their fan engagement, personalized video, and monetisation product. Magnifi is taking these solutions to their large installed base of clients and including these solutions in new business opportunities. In March 2024, Linus signed an agreement with Avid, a leading provider of video editing software used by broadcasters and global sports federations. The agreement will see Whizzard integrated with Avid's Media Composer and made available to the large installed base of Avid customers. Lastly, Linus signed a partner agreement with Genius Sport, leading provider of data to top leagues and broadcasters and the exclusive provider of metadata to the entire NCAA for college sport. The partnership gives Linus access to valuable metadata and a large installed base of Genius' data customers.

The Company’s focused go-to-market strategy and completion of key product development activities have resulted significant momentum through FY24 and going into FY25. Increased customer deployments have provided critical validation of the Company’s strategy and products. The addition of key industry partnerships will drive significant scale for both revenue acceleration and deployment efficiencies the company enters FY25.

The financial statements for the period, further information and brief explanation of the financial results for the period and other information required under Appendix 4E are contained in this document.

APPENDIX 4E 2024

NOTE 1: STATEMENT OF SIGNIFICANT ACCOUNTING POLICIES

These preliminary financial statements and notes comprise the information required as Appendix 4E, under ASX listing rule 4.3A for Linius Technologies Limited (“the Company”) and its controlled entities (“the Group”), a listed Australian company incorporated in Australia. This report is based on financial statements that are in the process of being audited.

These general purpose financial statements comprise the financial report and notes of Linius Technologies Limited (the “Company”) and its controlled entities (the “Group”), a listed Australian company incorporated in Australia.

Basis of Preparation

The preliminary financial report does not include all of the notes of the type normally included in an annual financial report. Accordingly, it should be read in conjunction with the Annual Report for the period ended 30 June 2023 and the financial report for the six months ended 31 December 2023 and any public announcements made by the Company in accordance with the continual disclosure requirements of the Corporations Act 2001. This preliminary report has been prepared in accordance with the measurement and recognition requirements of the Australian Accounting Standards, Accounting Interpretations and the Corporations Act 2001.

The financial statements comprise the consolidated financial statements for the Group. For the purposes of preparing the consolidated financial statements, the Company is a for-profit entity.

Australian Accounting Standards set out accounting policies that the Australian Accounting Standards Board has concluded would result in a financial report containing relevant and reliable information about transactions, events and conditions to which they apply. Compliance with AIFRS ensures that the financial report and notes also comply with International Financial Reporting Standards. Material accounting policies adopted in the preparation of this financial report are presented below. They have been consistently applied unless otherwise stated.

The Appendix 4E was authorised for issue on 30 August 2024.

The financial report has been prepared on an accruals basis and is based on historical costs, modified, where applicable, by the measurement at fair value of selected non-current assets, financial assets and financial liabilities.

Going Concern

The financial statements have been prepared under the historical cost convention, applying the going concern basis of accounting. The directors are confident in the continuing support from the existing shareholders and the ability to attract new investors to fund the Group’s future finance requirements. Further details of the going concern basis of accounting will be provided in the Group’s annual report for the year ended 30 June 2024.

Temporary differences not recognised	21,765	22,742
Total	13,724,767	12,564,155

Potential deferred tax assets attributable to tax losses carried forward have not been brought to account at 30 June 2024 because the Directors do not believe it is appropriate to regard realisation of the deferred tax assets as probable at this current point in time. These benefits will only be obtained if:

- The Group derives future assessable income of a nature and of an amount sufficient to enable the benefit from the deductions for the loss to be realised;
- The Group continues to comply with conditions for deductibility imposed by law; and
- No changes in tax legislation adversely affect the Group in realising the benefit from the deductions for the losses.

NOTE 10: INTELLECTUAL PROPERTY

The Group acquired the intellectual property associated with the Linius technology from an unrelated party in the financial period ended 30 June 2016. The intellectual property includes patents, copyright, confidential information and trademarks. In accordance with accounting standards and the Group accounting policies this asset is treated as having a finite life and is being amortised over 10 years.

	Group

The directors have assessed the value and useful life of the intellectual property at balance date.

The cost of the intellectual property was established upon the purchase of the intellectual property through a third party transaction during the financial period ended 30 June 2016. The value of the intellectual property was further validated through the reverse takeover process and capital raising undertaken by Linius Technologies Limited (Linius) in April/May 2016. During this process an independent report was commissioned, which gave the directors comfort that the intellectual property purchased was covered by valid patents, trademarks and copyright.

LINIUS TECHNOLOGIES LIMITED

APPENDIX 4E 2024

NOTE 10: INTELLECTUAL PROPERTY (CONTINUED)

The directors note that the intellectual property is at an early stage in its commercial life, with the associated technology recently commencing commercialisation. The value and lifespan of the owned intellectual property continues to be enhanced by further patent registrations in new jurisdictions across the world and through continued development of the technology associated with the intellectual property.

The directors have currently assessed the useful life of the intellectual property as being 10 years. The directors consider that a 10 year useful life is reasonable and appropriate and have amortised the value of intellectual property at balance date on that basis.

Further details regarding impairment testing will be provided in the Group's annual report for the year ended 30 June 2024.

NATURE AND PURPOSE OF RESERVES

Share-Based Payments Reserve

This reserve is used to record the equity value of share based payment expenses incurred as consideration for employee and consultant services.

Capital risk management

The Group's objectives when managing capital are to safeguard its ability to continue as a going concern, so that it may continue to provide returns for shareholders and benefits for other stakeholders.

Due to the nature of the Group's activities, being an early stage technology company, the Group does not have ready access to credit facilities, with the primary source of funding being equity raisings. Therefore, the focus of the Group's capital risk management is the current working capital position against the requirements of the Group to meet research and development of software, early stage business commercialisation initiatives and corporate overheads. The Group's strategy is to ensure appropriate liquidity is maintained to meet anticipated operating requirements, with a view to initiating appropriate capital raisings as required. The working capital position of the Group at 30 June 2024 is as follows:

	Group	
	2024 \$	2023 \$
Cash and cash equivalents	201,011	481,037

NOTE 16: OPERATING SEGMENTS

Segment Information

Operating segments are identified on the basis of internal reports about components of the Group that are regularly reviewed by the chief operating decision maker in order to allocate resources to the segment and to assess its performance.

The Group's operating segments have been determined with reference to the monthly management accounts used by the Chief Operating Decision Maker to make decisions regarding the Group's operations and allocation of working capital. Due to the size and nature of the Group, the Board as a whole has been determined as the Chief Operating Decision Maker.

There is only one reportable segment, being the development of computer software.

The revenues and results of this segment are those of the Group as a whole and are set out in the consolidated statement of profit or loss and other comprehensive income. The segment assets and liabilities of this segment are those of the Group and are set out in the consolidated statement of financial position.

(i) Investments in subsidiaries, associates and joint venture entities

Investments in subsidiaries, associates and joint venture entities are accounted for at cost in the parent entity's financial statements. The investment amounts are assessed for recoverability and an impairment is recorded where the recoverable amount is lower than cost. The recoverable amount is determined by taking into account the market capitalisation of the Group at balance date.

Dividends received from associates are recognised in the parent entity's profit or loss, rather than being deducted from the carrying amount of these investments.

(ii) Receivables from subsidiaries

These receivables are subsequently measured at amortised cost using the effective interest method. The amortised cost is reduced by impairment losses.
