Commentary

The Company generated a return of negative 3.44% (post-tax) during August 2024. Some commodities were particularly weak, with coking coal down 13%, lithium hydroxide and uranium down 8%, and crude oil off 4%. Perversely, both aluminium and alumina were up 9% during the month, and yet portfolio stocks such as Alcoa were down. Gold, on the other hand, continued its buoyant move up 2% to more than US\$2,500/oz, leading to Precious Metals exposures adding 0.72% to portfolio performance. The largest impact on performance was Uranium, detracting 2.86%.

August saw significant volatility across the market as a sizeable sell-off was seen in the first week, followed by somewhat of a recovery as the month went on. While not new, concerns around a possible US recession along with worries about the Chinese property market persisted. Despite these ongoing concerns, it is clear that the market is trading more on fear than fundamentals in the short term. For example, the sell-off in Uranium stocks simply does not reflect a market that is in a supply deficit today and is expected to remain so for years to come. It is for this reason that we are using this sell-off as a buying opportunity.

As we look into the final quarter of the year, a number of commodities appear to have pulled back sufficiently to encourage supply to be removed from the market. These include oil, iron ore, coking coal, and lithium; and are areas of increasing interest for us. We have also seen encouraging signs of demand recovery in the copper market after the spike earlier in the year led to some marginal buyers pulling back from the market. Given copper remains above US\$4/lb, it would appear the longer term bullish thesis around copper remains intact – the thesis being that a structural increase in copper demand driven by ongoing electrification is occurring, while supply is set to see increasing shortfalls as there is simply not enough production growth coming. This is why our key base metal exposure remains copper and short term weakness is an opportunity.
