## DIRECTORS' REPORT

The directors present their report, together with the financial statements, on the consolidated entity (referred to hereafter as the 'Group') consisting of QMines Limited (referred to hereafter as the

'Company' or 'Parent Entity') and the entities it controlled at the end of, or during, the year ended 30 June 2024.

#### **Directors**

The following persons were Directors of QMines Limited during the whole of the financial year and up to the date of this report, unless otherwise stated.

- Mr. Andrew Sparke; Managing Director and appointed Executive Chairman on 23 November 2023
- Ms. Elissa Hansen; Non-Executive Director and Company Secretary
- Mr. Peter Caristo; Non-Executive Director
- Mr. Simon Kidston; Non-Executive Director, appointed 1 February 2023, resigned 23 November 2024

#### Principal Activities

During the year the continuing activities of the Group consisted of copper and gold exploration and development.

#### Dividends

There were no dividends paid, recommended or declared during the current or previous financial year.

## **Review of Operations**

The consolidated loss after income tax of the Group amounted to \$3,374,951 (30 June 2023: \$5,699,233).

During the period, QMines was focussed on its prospective copper, gold and base metals projects in Central Queensland (Figure 1). The Company's flagship project, Mt Chalmers is a high-grade historic mine that produced 1.2Mt @ 3.6g/t Au, 2.0% Cu and 19g/t Ag between 1898-1982. In

April 2024, the Company delivered its sixth Mineral Resource Estimate (MRE) followed by a project Pre-Feasibility Study (PFS) defining a Maiden Ore Reserve of 10.4Mt (Proved and Probable) with a 10.4 year mine life for a Net Present Value of \$373 million before tax.

In FY24, QMines acquired an initial 51% interest in the Develin Creek copper-zinc project from Zenith Minerals Limited and produced an additional MRE for a new combined total of 15.1Mt @ 1.3% copper equivalent (CuEq) for 195,800t of contained copper equivalent metal. Infill and extensional drilling is currently underway.

Mapping of VTEM geophysical anomalies at the Artillery Road prospect identified base metal gossans, leading to a maiden drilling program that successfully intersected semi-massive polymetallic sulphide skarn mineralisation including 23m @ 0.56% CuEq and 15m @ 1.01% CuEq.

The Company continued to explore and drill test several targets identified by its VTEM airborne geophysical survey conducted in early 2023.

4)(1)

QMines regularly reviews its historic exploration projects to determine the optimal growth strategy and allocation of capital. As a result, the Company divested its interest in southeast Queensland prospects Silverwood, Warroo and Herries Range post period end.

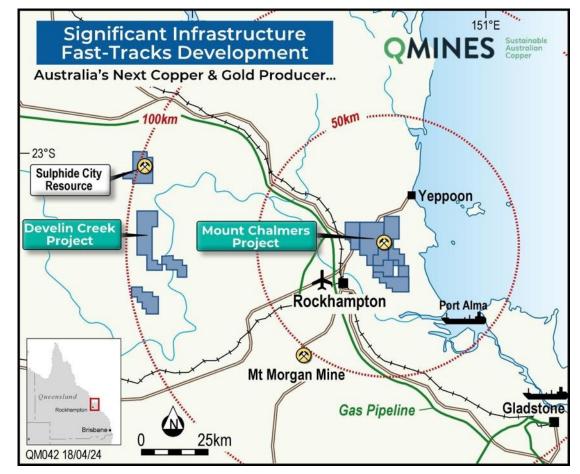

Figure 1: Location of QMines' Mt Chalmers and Develin Creek projects.

#### Mt Chalmers

The Mt Chalmers Project, situated 17km North-East of Rockhampton, consists of five Exploration Permits for Minerals and covers 334km<sup>2</sup>. The Mt Chalmers project hosts a high-grade historic mine that produced 1.2Mt @ 3.6g/t Au, 2.0% Cu and 19q/t Ag between 1898-1982. During FY-2023, OMines completed a PFS at Mt Chalmers that demonstrated that the project is commercially viable and technically achievable. The project also hosts several additional deposits at Woods Shaft, Botos and Mt Warminster that are not currently in the mine plan, demonstrating significant growth potential. The Mt Chalmers mine is recognised as being one of the highest gold grade volcanichosted massive-sulphide (VHMS) mineral systems in the world.

The Company drilled a total of 29 Reverse Circulation (**RC**) drillholes for 4,479 metres during the year with 16 situated at Mt Chalmers and 13 at the Artillery Road prospect. The Mt Chalmers drilling targeted the an extension of the deposit southwest of the West Lode between the Mt Chalmers and Woods Shaft deposits (holes MCRC057-059 & MCRC061-071). Hole locations are shown in Figure 2 with a cross section in Figure  $3^1$ .

This drilling identified a mineralised VHMS body measuring 100 metres long by 40 metres wide and 5 metres thick, dipping at 45 degrees towards the southeast. This body appears to be a faulted part of the Mt Chalmers West Lode and has been incorporated into the resource.

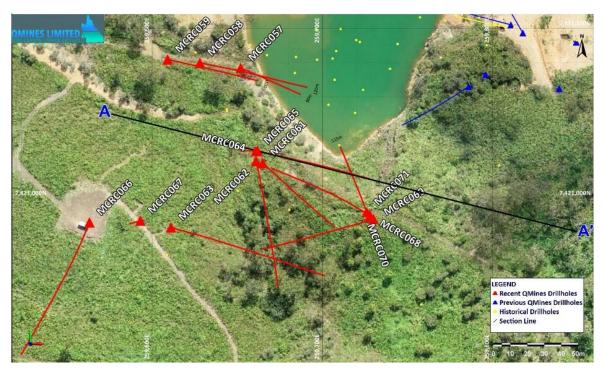

Figure 2: Mt Chalmers RC drill hole collar locations from Q3-2023 drilling.

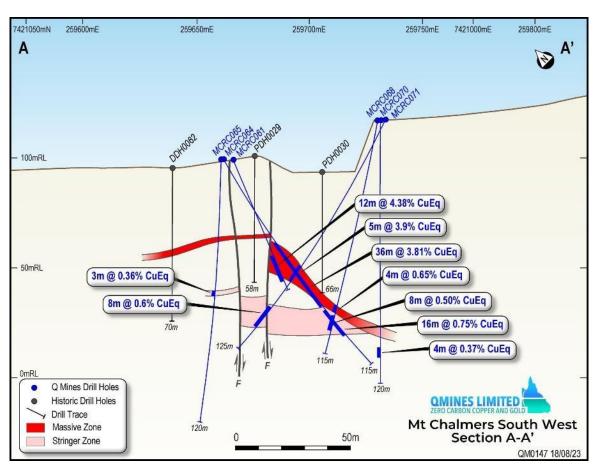

Figure 3: Mt Chalmers cross section AA' showing mineralised CuEq intersections.

In March 2024, the Company delivered its sixth mineral resource estimate<sup>2</sup> to include sulphur, a proxy for a potentially marketable pyrite concentrate. This MRE is based on a 0.3% Cu lower cut-off and contains a combined 11.3Mt @ 0.75% Cu, 0.42g/t Au, 4.6g/t Ag, 0.23% Zn and 4.3% S (Table 1). The MRE was determined by Hyland Geological and Mining Consultants (HGMC) and is reported in accordance with the JORC code (JORC

2012). It updates the MRE announced in November 2022, to include drilling undertaken in 2023<sup>3</sup> and also includes sulphur (**S**) results.

Importantly, 91% of the resource is now in the Measured and Indicated categories (JORC 2012). In addition, the Company's satellite Woods Shaft resource hosts an Inferred MRE of **0.54 Mt** @ **0.54% Cu and 0.95 g/t Au**.

**Table 1**: Mt Chalmers Deposit – Updated Mineral Resource Estimate as at March 2024 with sulphur (0.30% Cu lower cut-off).

	Mt Chalmers	Tonnes	Grade(s)					Contained Metal(s)				
	MRE	(Mt)	Cu (%)	Au (g/t)	Ag (g/t)	Zn (%)	S (%)	Cu (kt)	Au (koz)	Ag (koz)	Zn (kt)	S (kt)

	Total:	11.3	0.75	0.42	4.6	0.23	4.3	86	153	1,645	24	483

<sup>\*</sup>Resource Summary Notes:

Subsequent to this updated MRE, QMines completed the Mt Chalmers Pre-Feasibility Study (PFS)<sup>4</sup>. The Study assesses mining the mineral resources from a three-stage open pit operation and processing material onsite at Mt Chalmers. Como Engineers (Como) have designed a flow sheet and process facility to treat one million tonnes of ore per annum (1 Mtpa). The process plant design uses industry standard crushing, grinding and flotation circuits producing three concentrate types being copper/gold, zinc/silver and pyrite/gold.

It is the conclusion of the PFS that the Mt Chalmers project is technically achievable and commercially viable. The proposed development of Mt Chalmers presents an opportunity for QMines to establish and grow a mining and processing business within the strategic and critical metals sector with an attractive risk-return profile and clear potential to further enhance project returns through the expansion of production rates and the addition of other known deposits including Develin Creek and Woods Shaft, into the mine plan. Key project statistics are shown in Table 2.

<sup>\*5</sup> x 8 x 2.5m blocks within defined majority copper wireframes above a nominal ~0.15% Cu cut-off, from surface down to -240 mRL.

In late 2023 and early 2024, a site geotechnical study was conducted by PSM Geotechnical (**PSM**) to develop a geotechnical model and to undertake slope stability analysis and design recommendations. Three geotechnical diamond drillholes were completed for geotechnical, structural, geo-mechanical and hydrogeological studies.

As a result, slope design parameters were developed considering the geotechnical model, failure mechanisms, slope stability analyses, slope heights and engineering experience. The design has been developed for four slope design sectors, which have since been incorporated into the pit model.

The Mt Chalmers open pit has been designed as a three-stage mining operation with each stage of the mine schedule delivering between 2.8Mt and 3.9Mt to the proposed process plant located at site. The Mt Chalmers open pit was designed by Minecomp and factors Measured, Indicated and Inferred material in the design parameters for the production target inventory (Table 3).

Table 3: Mt Chalmers optimised pit shell 15 open pit design including Measured, Indicated and Inferred material.

<sup>\*</sup> Rounding errors may occur

The Mt Chalmers Ore Reserve has been calculated by Minecomp using a diluted, payable copper equivalent (**CuEq**) grade of 0.32% CuEq. It should be noted that the MRE is reported at a copper cutoff grade of 0.30% Cu. The modifying effect of applying a CuEq grade draws material from the optimised pit shell grading below the MRE reporting cut-off grade of 0.30% and may form part of the Ore Reserve due to payable calculation for gold, zinc, silver and sulphur.

Open pit optimisations were carried out using modifying factors and estimated mining,

processing and administration costs. Figure 4 shows the resulting three-staged optimised pit shell.

The Mt Chalmers deposit is proposed to be mined as a three-stage open pit using conventional mining methods. The final pit is designed to a nominal vertical depth of 220m and incorporates 60-70° batter angles and 7m berm widths. Ramps are either 15m wide (single lane) or 24m wide (double lane) and have a gradient of 1 in 9. The PFS proposes a conventional drill and blast, load and haul open pit mining operation.

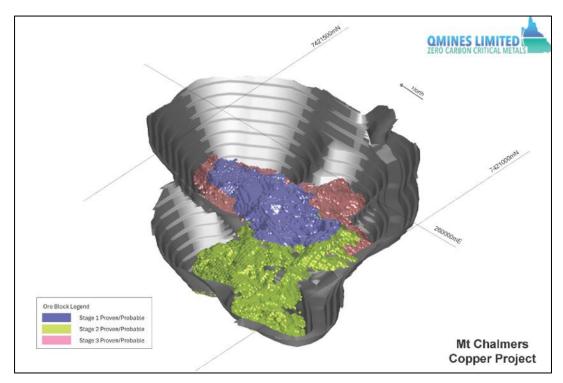

Figure 4: Isometric view of the three-staged open pit at Mt Chalmers.

Land & Marine Geological Services Pty Ltd was engaged by QMines to prepare a PFS Concept Design of the Tailings Storage Facility (**TSF**) and Water Storage Facility (**WSF**) for the Mt Chalmers project. The TSF comprises a valley storage which is to be constructed by downstream techniques. It is designed to accommodate pit dewatering as well as current and future tailings solids.

Topsoil materials, where present, will be removed and stockpiled for rehabilitation works with the underlying residual soil and weathered rock materials removed from the TSF footprint and mine waste and will be utilised in the construction of the TSF and WSF embankments. Preliminary water balance studies indicate that it is unlikely that external water resources will be required for the project.

Both the massive sulphide and stringer mineralisation are amenable to the proposed flotation concentrate flowsheet shown in Figure 3. Froth flotation recoveries of 100% Au, Ag, Cu and Zn from blends have now been consistently achieved from a 75-micron grind size. Copper recovery to rougher concentrate is consistently in the range of 90-95% for all samples tested.

Lead was found to be the only deleterious metal, reporting to the copper concentrate. Strategies have been designed to manage this via feed ratios and the use of a suppressant.

Production of a pyrite concentrate from the Cu-Zn flotation tailings is potentially economically viable with the sulphur concentration in the pyrite concentrate sufficiently high in sulphur to be regarded as an energy source, and a potential feedstock for sulphuric acid production. Tailings sulphur grades of consistently less than 1% sulphur demonstrating a low environmental risk in terms of potential acid mine drainage.

The project comprises a single site for the crushing and processing facilities with crushing, milling ore and concentrate production adjacent to the Mt Chalmers mine. The processing flowsheet (Figure 5) comprises three-stage crushing, ball milling, and separate copper, zinc and pyrite flotation to produce three concentrates for sale. To minimise noise levels and environmental emissions, the crushers, screen and mill will be located within buildings.

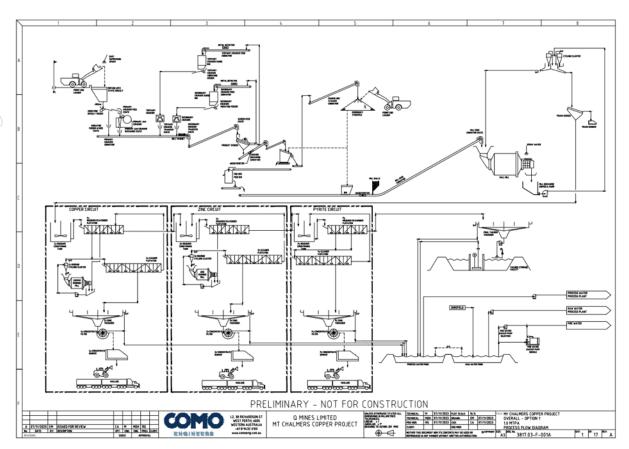

Figure 5: Mt Chalmers process plant flow sheet.

#### **Develin Creek**

In August 2023, QMines announced the acquisition of an initial 51% of the Develin Creek project from Zenith Minerals Limited (**Zenith**), with an option to acquire the remaining 49% interest<sup>5</sup>. This acquisition was followed by a JORC 2012 mineral resource estimate for Develin Creek by QMines consultant HGMC in September<sup>6</sup>. HGMC determined an Indicated and Inferred resource of 3.2Mt @ 1.61% CuEq for 51,360t contained copper equivalent metal at the Sulphide City and Scorpion deposits (Figure 6 and Table 5).

Mineralisation styles reported from the main prospect areas include massive and banded seafloor sulphide deposits; reworked, polymictic breccia deposits; distal, graded sedimentary sulphide deposits; massive, sub-seafloor replacement deposits and stringer zone quartz-sulphide vein deposits. These styles of mineralisation are characteristic of Volcanic Hosted Massive Sulphide (VHMS) deposits.

<sup>&</sup>lt;sup>5</sup> https://wcsecure.weblink.com.au/pdf/QML/02703204.pdf

<sup>&</sup>lt;sup>6</sup> https://wcsecure.weblink.com.au/pdf/QML/02712799.pdf

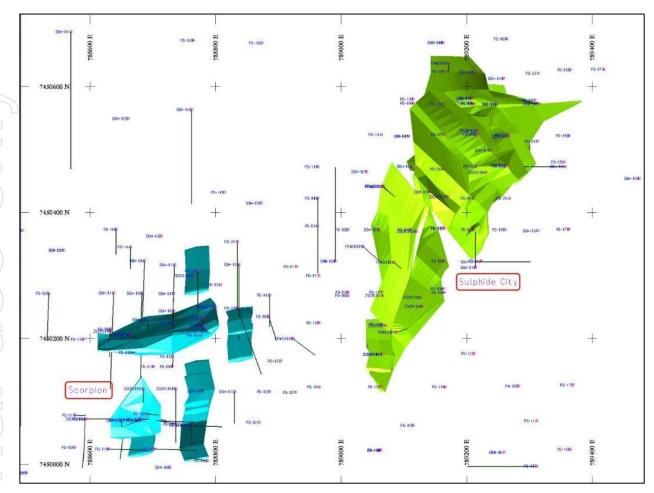

Figure 6: Develin Creek drilling and resource wireframes at Sulphide City (green) and Scorpion (blue).

**Table 5:** Develin Creek MRE at a 0.5% CuEq cut off. CuEq = (Cu + 0.45\*Zn) and is based on current rounded metal prices in June 2022 of A\$8,400/t Cu, A\$3,300/t Zn and preliminary recoveries of 72% for Cu and 82% for Zn.

Resource Category	Tonnes (Mt)	Grades						
Resource Category	Torines (wit)	Cu (%)	Zn (%)	Au (g/t)	Ag (g/t)			
Indicated	1.5	1.21	1.25	0.18	7.1			
Inferred	1.7	0.92	1.20	0.16	4.8			
Total	3.2	1.05	1.22	0.17	5.9			

In order to upgrade the mineral resource to the Indicated category or better, additional drilling was planned<sup>7</sup> and has commenced subsequent to this annual reporting period<sup>8</sup>.

The combined Mt Chalmers, Woods Shaft and Develin Creek deposits now have a combined Measured, Indicated and Inferred resources (JORC 2012) of **15.1Mt** @ **1.3% CuEq for 195,800t** of contained base and precious metal<sup>9</sup>.

<sup>&</sup>lt;sup>7</sup> https://wcsecure.weblink.com.au/pdf/QML/02816498.pdf

<sup>&</sup>lt;sup>8</sup> https://wcsecure.weblink.com.au/pdf/QML/02837994.pdf

<sup>&</sup>lt;sup>9</sup> https://wcsecure.weblink.com.au/pdf/QML/02712799.pdf

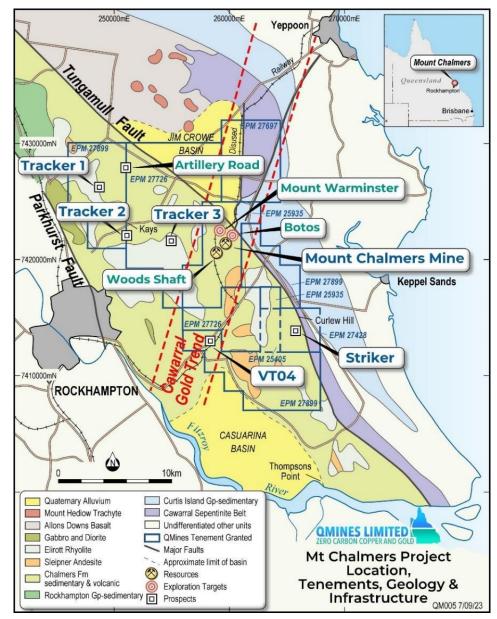

Figure 7: Mt Chalmers project location, tenements, geology and infrastructure.

#### **Artillery Road Prospect**

Regional exploration achieved significant success as the Company completed a first round of drilling operations at the Artillery Road prospect (Figure 7). The Artillery Road prospect was first discovered by the QMines 2023 airborne VTEM<sup>TM</sup> geophysical survey. Drilling and mapping identified a large sulphide skarn body measuring some 1.4km long by 0.5km wide with an average thickness of 15 metres<sup>10</sup>.

This drilling has delivered several intersections with copper equivalent grades up to **1.46% CuEq** in holes ARRC005 and ARRC013 with individual polymetallic grades up **2.43g/t Au**, >10g/t Ag, **1.02% Cu**, **0.12% Pb and 5.12% Zn** over one metre intervals.

-

14

<sup>10</sup> https://wcsecure.weblink.com.au/pdf/QML/02738738.pdf

#### Significant intersections include:

- 23m @ 0.56% CuEq from 205m including 5m @ 0.82% CuEq from 223m (Hole ARRC010);
- 15m @ 1.01% CuEq from 219m including 5m @ 1.46% CuEq from 220m (Hole ARRC013); and
- 4m @ 0.90% CuEq from 250m (ARRC013).

Figure 8: RC drilling at Mt Chalmers, 2023.

Drilling has revealed a stratiform, semi-massive sulphide body enveloped by an epidote-clinopyroxene-calcite-sulphide alteration zone at the contact between a black, fine-medium grained carbonaceous sandstone hanging wall and a pale green-grey medium grained greywacke footwall (Figure 9). This figure reveals copper grades improving towards the east while zinc grades improve towards the west.

Petrology of drill specimens has determined that the massive sulphides are not relic VHMS deposits but were produced by hydrothermal skarn alteration. Skarn minerals intersected include actinolite-epidote-clinopyroxene (diopside) along with chalcopyrite-sphalerite-pyrrhotite-pyrite.

Hole locations are shown in Figure 9 with a cross section in Figure 10.

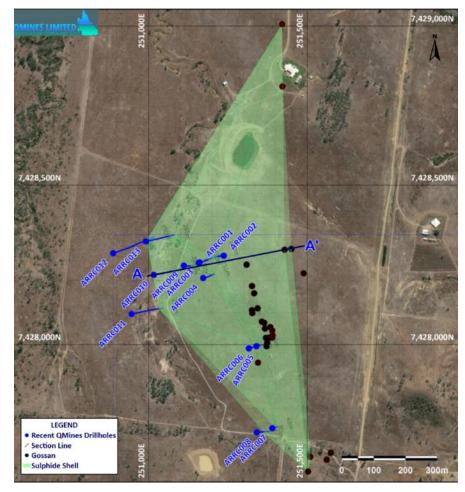

Figure 9: Artillery Road RC drill hole collar locations.

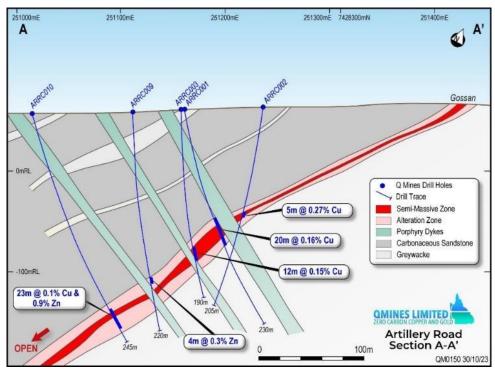

Figure 10: Artillery Road section AA' with mineralised intersections.

Drilling at the Artillery Road prospect targeted VTEM plate models constructed by Mitre Geophysics (Mitre) and these models successfully mapped part of the semi massive sulphide body (Figure 11). Helimagnetic data collected as part of

the VTEM survey also reflects the pyrrhotite content of this sulphide body. The success of the VTEM modelling encouraged further drilling of another top ranked Electromagnetic (EM) anomaly, VT04.

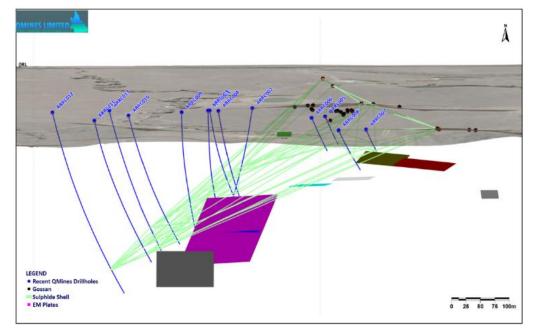

Figure 11: Artillery Road mineralisation shell oblique view with EM plates.

#### **Exploration**

Modelling by Mitre revealed multiple EM anomalies at the VT04 prospect. One set dips shallowly from 10-50 metres below surface and another set dip steeply north and south. Field mapping has shown the modelled EM plate anomalies are covered by colluvium, preventing on ground geological interpretation and a geochemical response.

Six RC drillholes subsequently tested the core of these anomalies with no significant results detected<sup>11</sup>. Drillholes largely intersected a monotonous unit of carbonaceous and graphitic siltstone which had been intruded by diorite and basalt. The basalt dyke as well as the diorite's margins were highly altered as well as pyritic suggesting the possibility of a gold target, however Au results were poor.

The target EM anomalies appear to reflect narrow, more highly graphitic and conductive horizons within the siltstone (shallow dipping plates) as well as increased graphite alteration formed by contact metamorphism along the intrusive margin.

Considered a technical success, it serves as a reminder that not all EM anomalies host massive sulphide mineralisation.

The Company's early 2023 VTEM<sup>™</sup> survey revealed that Mt Chalmers mineralisation is only weakly conductive. It is also commonly associated with a type of geological noise generated by polarisation of the ground (IP effects) which can have the effect of hiding the weak 'normal' EM responses. Queensland Government CEI funding allowed specialists EMergo SRL to use modern processing algorithms to model these IP effects and thus correct the VTEM<sup>™</sup> data so that it is more able to resolve deep conductors.

The EMergo model and 'cleaned' EM profile were reviewed by Mitre Geophysics, who identified six new anomalies<sup>12</sup>, bringing the total number of target anomalies from the 2023 survey to forty<sup>13</sup>. In addition, the processing has improved the strength

<sup>11</sup> https://wcsecure.weblink.com.au/pdf/QML/02751083.pdf

<sup>12</sup> https://wcsecure.weblink.com.au/pdf/QML/02751083.pdf

<sup>13</sup> https://wcsecure.weblink.com.au/pdf/QML/02814260.pdf

of several existing anomalies that were previously partly obscured by polarisation effects.

Of the new anomalies, highlights include a small, mapped granite porphyry, with a clear deep response over multiple survey lines, also observed on resistivity and chargeability models. This target is covered with transported colluvium and requires drill testing. At the Artillery Road prospect, a new broad and deep conductive zone has been discovered on the margins of the known skarn mineralisation which has been interpreted as a possible deeper extension of the same.

The Striker Cu-Zn soil anomaly has now been found to coincide with an excellent chargeability anomaly. As a result, an application for a new exploration permit (EPM) has been submitted to cover this strategic gap in the Company's tenement holdings.

Also during the year, the Company undertook a review of historical data, digitising open file report data compiled by Orr and Associates based on exploration work undertaken by previous explorers. Multiple bonanza gold grades of up to 256g/t Au from rock chip samples have been identified over a broad area from multiple locations around Cawarral within the Company's tenement package<sup>14</sup>. Historical RC drillhole MWC07 intersected 3m @ 154g/t Au. Forming part of the Cawarral Gold Trend, the Cawarral and Mount Wheeler Goldfields lie six kilometres to the north north-east of the historic Mt Chalmers copper and gold mine. The location of the Cawarral and Mount Wheeler gold prospects are shown in Figure 12. Overall, the Cawarral, Mount Wheeler and Constitution Goldfields have had little modern exploration.

ASX:QML

<sup>14</sup> https://wcsecure.weblink.com.au/pdf/QML/02829079.pdf

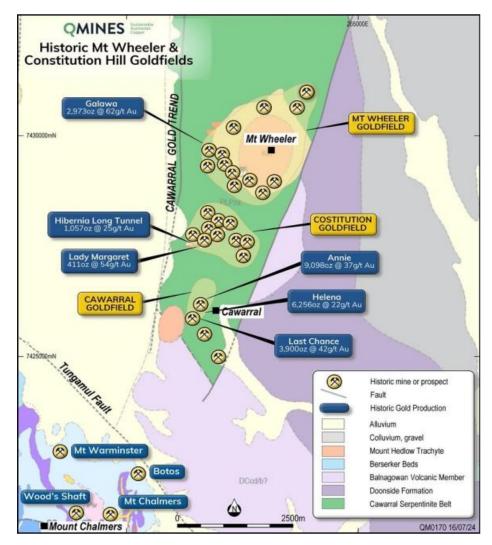

Figure 12: Mount Wheeler, Cawarral and Constitution Hill Goldfields.

QMines maintained its 244-acre freehold land holdings surrounding the Mt Chalmers mine site, to facilitate planned mine and plant construction. Environmental, Social and Governance (ESG) initiatives established in the preceding year were

continued including almost complete off-grid powering of the site, use of a renewable fuel blend, increased local procurement, and enhanced environmental monitoring with dust and noise detectors installed on site.

#### **Business Risks**

#### Mineral Reserves

Uncertainty in reserve estimation and the broad range of possible recovery scenarios from existing resources could have a material adverse effect on the carrying value and future financial performance of QMines.

Our resource estimates are prepared in accordance with the guidelines set forth in the 2012 Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves (JORC 2012). We engage independent experts periodically to update reserve estimates.

#### **Commodity Prices and Foreign Exchange**

QMines is exposed to commodity price variability both directly and also via input costs such as the use of crude oil and natural gas, both of which are impacted by broader economic factors beyond the Company's control.

#### **Climate Change**

Introduction of taxes or other charges associated with carbon emissions may have an adverse

impact on QMines financial performance and asset values.

In February 2022, QMines became only the third ASX listed Resources company to be certified carbon neutral under the Australian government backed Climate Active program.

As the Company transitions towards development, QMines intends to adopt a number of additional ESG strategies that demonstrate its ESG leadership in the mining sector.

Some of the initiatives adopted include the installation of renewable energy generation (solar and wind), securing long term renewable fuel supply, the monitoring and minimisation of noise and dust levels on site, achieved Climate Active certification and commitments to local employment and procurement.

#### **Environment**

Our operations by their nature have the potential to impact air quality, biodiversity, land and water resources and related ecosystems. A failure to manage these could adversely impact not just the environment, but our people, the communities in which we operate, our reputation and our licence to operate.

QMines continues to assess and develop our standards to prevent, monitor and limit the impact of our operations on the environment. We are currently developing robust rehabilitation plans and procedures in place to return sites to their exploration condition.

#### Mine development and operation

Mine development is subject to many risks including raw material and labour price fluctuations, environment damage, change in council approval processes and workplace hazards.

Mine yield is subject to subsurface uncertainty. The actual performance could vary from that forecasted, which may result in diminished production and/or additional development costs.

Embedded within our operational practices is a framework of controls which enable the management of these risks. We have in place asset integrity management processes, inspections, maintenance procedures and performance standards across all activities and infrastructure to maximise reliable and safe operations.

Insurance is maintained in line with industry practice considered sufficient to cover normal operational risks. However, not all risks can be insured cost effectively.

#### Reliance on Key Personnel

Failure to establish and develop sufficient capability and capacity to support our operations may impact achievement of our objectives. We are focussed on securing and developing the right people to support the operation and development of our portfolio of assets and opportunities.

We also proactively engage contractors to supplement any short-term gaps in capability and capacity to support the execution of our business plans.

#### **Mineral Resources and Reserves**

QMines Mineral Resources and Reserves as set out below were reviewed as at 1 August 2024. All reported Resources and Reserves were found to be valid and there were no material changes from those previously reported.

#### Significant Changes in the State of Affairs

There were no significant changes in the state of affairs of the Group during the financial year.

## Matters Subsequent to the end of the Financial Year

QMines is advancing the Mount Chalmers project and has completed the pre-lodgement of the Mining Lease Application. The Department of Resources has provided feedback on the application and was satisfied that the formal Mining Lease application could be made. A Mining Lease number of ML 100403 has now been allocated to the project.

In July 2024, the Company entered a Sale and Purchase Agreement with Critical Minerals Limited (**Critical Minerals**) for the sale of the Company's non-core exploration projects comprising Herries Range, Silverwood and Warroo, for \$10,000. Critical Minerals previously held an option to acquire the tenements which expired on 10<sup>th</sup> March 2024.

In August 2024, the Company received firm commitments to raise \$5M (before costs) by way of a two tranche placement from new and existing shareholders with proceeds earmarked for accelerating exploration and development at the Company's Mt Chalmers and Develin Creek projects and the remaining Develin Creek project acquisition. The second tranche of the placement (\$2.7 million) was subject to Shareholder approval.

Shareholders approved the issue on 23 September 2024.

Also in August 2024, QMines commenced RC drilling at its Develin Creek project. A 4,000m+ drilling program will infill the Scorpion deposit with the aim of upgrading the resource from Inferred to Indicated. Further drilling into the Sulphide City deposit is planned to follow.

In early September 2024, the metallurgical testwork program for Develin Creek was completed, with the results being detailed in QMines' announcement dated 6 September 2024.

Based on the results as they relate to the zinc concentrate grades, QMines will pay Zenith for the Additional Interest (49%) an adjusted cash payment of \$975,000 and an adjusted share-based payment of fully paid ordinary shares in QMines to the value of \$687,500 ("Adjusted Additional Shares").

No other matter or circumstance has arisen since 30 June 2024 that has significantly affected, or may significantly affect the Group's operations, the results of those operations, or the Group's state of affairs in future financial years.

#### Likely Developments and Expected Results of Operations

Information on likely developments in the operations of the Group and the expected results of operations have not been included in this report because the directors believe it would be likely to result in unreasonable prejudice to the Group.

#### **Environmental Regulation**

The Group is not subject to any significant environmental regulation under Australian Commonwealth or State law.

#### **Competent Person Statements**

#### Ore Reserve Estimate

The information in this Report that relates to the Open Pit Optimisation and Ore Reserve Estimate and is based on information compiled by Mr Gary McCrae, a competent Person who is a Member of the Australian Institute of Mining and Metallurgy. Mr McCrae is a full-time employee of Minecomp Pty Ltd. Mr McCrae has sufficient experience that is relevant to the style of mineralisation and type of deposit under consideration and to the activity being undertaken to qualify as a Competent Person as defined in the 2012 Edition of the "Australian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves". Mr McCrae consents to the inclusion in the report of the matters based on his information in the form and context in which it appears.

#### Mineral Resource Estimate

The information in this report that relates to mineral resource estimation is based on work completed by Mr. Stephen Hyland, a Competent Person and Fellow of the AuslMM. Mr. Hyland is Principal Consultant Geologist with Hyland Geological and Mining Consultants (HGMC), who is a Fellow of the Australian Institute of Mining and Metallurgy and holds relevant qualifications and

experience as a qualified person for public reporting according to the JORC Code in Australia. Mr Hyland is also a Qualified Person under the rules and requirements of the Canadian Reporting Instrument NI 43-101. Mr Hyland consents to the inclusion in this report of the information in the form and context in which it appears.

#### **Exploration**

The information in this document that relates to mineral exploration and exploration targets is based on work compiled under the supervision of Mr Glenn Whalan, a member of the Australian Institute of Geoscientists (AIG). Mr Whalan is QMines' principal geologist and has sufficient experience relevant to the style of mineralisation and type of deposit under consideration and to the activity that he is undertaking to qualify as a Competent Person as defined in the 2012 Edition of the 'Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves' (JORC 2012 Mineral Code). Mr Whalan consents to the inclusion in this document of the exploration information in the form and context in which it appears.

#### Information on Directors

Name: Mr Andrew Sparke

Title: Managing Director and Executive Chairman

**Qualifications:** B.Bus (Marketing) M.Fin, GAICD

**Experience:** Mr Sparke has over 20 years' experience that includes fund

management, corporate advisor and broker to a number of ASX listed resources companies. He has significant experience serving in Chairman, Executive Director and Non-Executive Director roles and has been involved in several successful corporate transactions including capital raisings, IPOs, back door listings and M&A

transactions.

Other current Directorships: Nil

Former Directorships (last 3 years): Alt Resources Ltd (Subject to takeover and now de-listed).

Interests in Shares: 32,493,083

Interests in Rights: 1,900,000

Name: Mr Peter Caristo

Title: Non-Executive Director

Qualifications: BSc Hons (Geol), MBA, FAIG, RPGeo, FSEG

**Experience:** Mr Caristo has over twenty-four years' experience as a geologist

working across project generation, assessment and management in both Australia and overseas covering greenfields and brownfields projects. Peter has covered a wide range of copper and gold projects within various geological terranes and mineralisation styles. He has worked for a number of successful resources companies including Newcrest Mining Limited (ASX:NCM) and OceanaGold Limited (ASX:OGC) and as a geological consultant based in Queensland.

Other current Directorships: Nil

Former Directorships (last 3 years): Nil

Interests in Shares: 392,244

Interests in Rights: 100,000

(24)

#### Information on Directors (cont.)

Name: Ms. Elissa Hansen

Title: Non-Executive Director and Company Secretary

**Qualifications:** B.Com, Grad. Dip. Applied Corporate Governance,

GAICD, FGIA, FCG (CS)

**Experience:** Ms Hansen is a Chartered Secretary with over 20 years' experience

as a company secretary and corporate governance professional. She has worked with boards and management on a range of ASX listed companies including assisting a number of organisations through the

IPO process and is experienced in the specific requirements of companies in industries including resources, information technology,

industrials and biotechnology.

Other current Directorships: Zoono Group Ltd (ASX:ZNO); Aeeris Ltd (ASX:AER)

Former Directorships (last 3 years): Nil

Interests in Shares: 4,833,802

Interests in Rights: 600,000

'Other current directorships' quoted above are current directorships for listed entities only and excludes directorships of all other types of entities, unless otherwise stated.

'Former directorships (last 3 years)' quoted above are directorships held in the last 3 years for listed entities only and excludes directorships of all other types of entities, unless otherwise stated.

#### **Remuneration Report (audited)**

The remuneration report details the key management personnel remuneration arrangements for the Group, in accordance with the requirements of the Corporations Act 2001 and its Regulations.

Key management personnel are those persons having authority and responsibility for planning, directing and controlling the activities of the entity, directly or indirectly, including all directors.

The remuneration report is set out under the following main headings.

- Principles used to determine the nature and amount of remuneration
- Details of remuneration
- Share-based compensation
- Additional disclosures relating to key management personnel

# Principles used to Determine the Nature and Amount of Remuneration

The objective of the Group's executive reward framework is to ensure reward for performance is competitive and appropriate for the results delivered. The framework aligns executive reward with the achievement of strategic objectives and the creation of value for shareholders, and it is considered to conform to the market best practice for the delivery of reward. The Board of Directors ('the Board') ensures that executive reward satisfies the following key criteria for good reward governance practices:

- competitiveness and reasonableness
- acceptability to shareholders
- performance linkage / alignment of executive compensation
- transparency

The Nomination and Remuneration Committee is responsible for determining and reviewing remuneration arrangements for its directors and executives. The performance of the Group depends on the quality of its directors and executives. The remuneration philosophy is to attract, motivate and retain high performance and high quality personnel.

In consultation with external remuneration consultants where required (refer to the section 'Use of remuneration consultants' below), the Nomination and Remuneration Committee has structured an executive remuneration framework that is market competitive and complementary to the reward strategy of the Group.

The reward framework is designed to align executive reward to shareholders' interests. The Board have considered that it should seek to enhance shareholders' interests by:

- having economic profit as a core component of plan design
- focusing on sustained growth in shareholder wealth, consisting of dividends and growth in share price, and delivering constant or increasing return on assets as well as focusing the executive on key non-financial drivers of value
- attracting and retaining high calibre executives

Additionally, the reward framework should seek to enhance executives' interests by:

- rewarding capability and experience
- reflecting competitive reward for contribution to growth in shareholder wealth
- providing a clear structure for earning rewards

In accordance with best practice corporate governance, the structure of non-executive director or executive director remuneration is separate.

#### Non-executive Directors' Remuneration

Fees and payments to non-executive directors reflect the demands and responsibilities of their role. Non-executive directors' fees and payments are reviewed by the Nomination and Remuneration Committee. The Nomination and Remuneration Committee may, from time to time, receive advice from independent remuneration consultants to ensure non-executive directors' fees and payments are appropriate and in line with the market. The chairman's fees are determined independently to the fees of other non-executive directors based on comparative roles in the external market. The chairman is not present at any discussions relating to the determination of his own remuneration. Nonexecutive directors do not receive share options or other incentives.

The total aggregate fixed sum per annum to be paid to Directors (excluding salaries of executive Directors) is \$300,000. In accordance with ASX Listing Rules and the Company's Constitution, this may be varied by ordinary resolution of Shareholders at a general meeting.

#### **Executive Remuneration**

The group aims to reward executives based on their position and responsibility, with a level and mix of remuneration which has both fixed and variable components.

The executive remuneration and reward framework has four components:

- base pay and non-monetary benefits
- short-term performance incentives
- share-based payments
- other remuneration such as superannuation and long service leave

The combination of these comprises the executive's total remuneration.

Fixed remuneration, consisting of base salary, superannuation and non-monetary benefits, are reviewed annually by the Nomination and Remuneration Committee based on individual and business unit performance, the overall performance of the Group and comparable market remunerations.

Executives may receive their fixed remuneration in the form of cash or other fringe benefits (for example motor vehicle benefits) where it does not create any additional costs to the Group and provides additional value to the executive.

The short-term incentives ('STI') program is designed to align the targets of the business units with the performance hurdles of executives. STI payments are granted to executives based on specific annual targets and key performance indicators ('KPI's') being achieved. KPI's include profit contribution, customer satisfaction, leadership contribution and product management.

The long-term incentives ('LTI') include long service leave and share-based payments. Shares are awarded to executives over a period of three years based on long-term incentive measures. These include increase in shareholders value relative to the entire market and the increase compared to the Group's direct competitors. The Nomination and Remuneration Committee reviewed the long-term equity-linked performance incentives specifically for executives during the year ended 30 June 2024.

Voting and Comments made at the Company's 2023 Annual General Meeting ('AGM')

At the 2023 AGM, 75.52% of the votes received supported the adoption of the remuneration report for the year ended 30 June 2023. The Company did not receive any specific feedback at the AGM regarding its remuneration practices.

 $(\uparrow)$ 

#### **Details of Remuneration**

#### Amounts of Remuneration

Details of the remuneration of key management personnel of the Group are set out in the following tables.

The key management personnel of the Group consisted of the following directors of QMines Limited:

- Andrew Sparke Managing Director
- Peter Caristo Non-Executive Director
- Elissa Hansen Non-Executive Director
- Simon Kidston Non-Executive Chairman

#### And the following person:

James Anderson - General Manager Operations

		Shor	t-term Ber	nefits	Post- employment benefits	Long- term benefits	Share- based payments	Tabel
	2024	Cash salary and fees	Cash bonus	Non- monetary	Superannuation	Long service leave	Equity- settled	Total

<sup>\*</sup> to date of resignation

This concludes the Remuneration Report, which has been audited.

#### **Shares Under Option**

Unissued ordinary shares of QMines Limited under option at the date of this report are as follows:

Grant Date	Expiry Date	Exercise price	Number under Option
08/08/2022	08/08/2025	\$0.375	3,750,000
21/06/2023	21/06/2026	\$0.375	1,500,000
13/09/2023	13/09/2026	\$0.375	500,000
			5,750,000

#### Shares Under Performance Rights

Unissued ordinary shares of QMines Limited under performance rights at the date of this report are as follows:

Grant Date	Expiry Date	Exercise price	Number under Option
19/06/2023	30/06/2026	\$0.00	7,350,000

No person entitled to exercise the performance rights had or has any right by virtue of the performance right to participate in any share issue of the Company or of any other body corporate.

#### Shares Issued on the Exercise of Options

There were no ordinary shares of QMines Limited issued on the exercise of options during the year ended 30 June 2024 and up to the date of this report.

#### Shares Issued on the Exercise of Performance Rights

The following ordinary shares of QMines Limited were issued during the year ended 30 June 2024 and up to the date of this report on the exercise of performance rights granted:

33

Date Performance Rights Granted	Exercise price	Number of Shares Issued
21/10/2021	\$0.000	3,740,786
19/06/2024	\$0.000	8,650,000
		12,390,786

#### Indemnity and Insurance of Officers

The Company has indemnified the directors and executives of the Company for costs incurred, in their capacity as a director or executive, for which they may be held personally liable, except where there is a lack of good faith.

During the financial year, the Company paid a premium in respect of a contract to insure the directors and executives of the Company against a liability to the extent permitted by the Corporations Act 2001. The contract of insurance prohibits disclosure of the nature of the liability and the amount of the premium.

#### Indemnity and Insurance of Auditor

The Company has not, during or since the end of the financial year, indemnified or agreed to indemnify the auditor of the Company or any related entity against a liability incurred by the auditor.

During the financial year, the Company has not paid a premium in respect of a contract to insure the auditor of the company or any related entity.

## Proceedings on Behalf of the Company

No person has applied to the Court under section 237 of the Corporations Act 2001 for leave to bring proceedings on behalf of the Company, or to intervene in any proceedings to which the Company is a party for the purpose of taking responsibility on behalf of the Company for all or part of those proceedings.

#### **Non-audit Services**

There was no non-audit services provided during the financial year by the auditor.

#### **Auditor's Independence Declaration**

A copy of the auditor's independence declaration as required under section 307C of the Corporations Act 2001 is set out immediately after this directors' report.

#### **Auditor**

RSM Australia Partners continues in office in accordance with section 327 of the Corporations Act 2001.

This report is made in accordance with a resolution of directors, pursuant to section 298(2)(a) of the Corporations Act 2001.

On behalf of the Directors.

Andrew Spuhre.

Andrew Sparke Executive Chairman

Dated: 27 September 2024

Net increase/(decrease) in cash and cash equivalents		(1,698,458)	1,255,9
Cash and cash equivalents at the beginning of the financial year		2,290,803	1,034,8
Cash and cash equivalents at the end of the financial year	7	592,345	2,290,8

The accounting policies that are material to the Group are set out below. The accounting policies adopted are consistent with those of the previous financial year, unless otherwise stated.

# New or Amended Accounting Standards and Interpretations Adopted

The Group has adopted all the new or amended Accounting Standards and Interpretations issued by the Australian Accounting Standards Board ('AASB') that are mandatory for the current reporting period.

Any new or amended Accounting Standards or Interpretations that are not yet mandatory have not been adopted.

# **Going Concern**

The Directors have prepared the financial report on a going concern basis, which contemplates the continuity of normal business activities and the realisation of assets and the settlement of liabilities in the ordinary course of business.

For the financial year ended 30 June 2024, the Group incurred a net loss after tax of \$3,374,951 (FY2023: \$5,699,233) and utilised cash from operating activities of \$4,571,328 (FY2023: \$4,485,441). At balance date, the Group had a net deficiency in current assets of \$2,622,369 (FY2023: Net assets of \$2,339,218)

The Directors believe that it is reasonably foreseeable that the Group will continue as a going concern and that it is appropriate to adopt the going concern basis in the preparation of the financial report after consideration of the following factors:

- The Group has cash resources of \$592,345 as at 30 June 2024;
- The Group has net assets of \$18,078,811 as at 30 June 2024;
- As stated in Note 26, in August 2024, the Group successfully completed a \$5M placement to existing and new shareholders:
- The Group has the ability to dispose some of its assets as and when required; and
- The Group has the ability to scale back its exploration activities should funding not be available to continue exploration at its current levels.

## **Basis of Preparation**

These general purpose financial statements have been prepared in accordance with Australian Accounting Standards and Interpretations issued by the Australian Accounting Standards Board ('AASB') and the Corporations Act 2001, as appropriate for for-profit oriented entities. These financial statements also comply with International Financial Reporting Standards as issued by the International Accounting Standards Board ('IASB').

#### Historical Cost Convention

The financial statements have been prepared under the historical cost convention, except for, where applicable, the revaluation of financial assets and liabilities at fair value through profit or loss, financial assets at fair value through other comprehensive income, investment properties, certain classes of property, plant and equipment and derivative financial instruments.

#### Critical Accounting Estimates

The preparation of the financial statements requires the use of certain critical accounting estimates. It also requires management to exercise its judgement in the process of applying the Group's accounting policies. The areas involving a higher degree of judgement or complexity, or areas where assumptions and estimates are significant to the financial statements, are disclosed in Note 2.

# Parent Entity Information

In accordance with the Corporations Act 2001, these financial statements present the results of the Group only. Supplementary information about the parent entity is disclosed in Note 24.

# Principles of Consolidation

The consolidated financial statements incorporate the assets and liabilities of all subsidiaries of QMines Limited ('company' or 'parent entity') as at 30 June 2024 and the results of all subsidiaries for the year then ended. QMines Limited and its subsidiaries together are referred to in these financial statements as the 'Group'.

Subsidiaries are all those entities over which the Group has control. The Group controls an entity when the Group is exposed to, or has rights to, variable returns from its involvement with the entity and has the ability to affect those returns through its power to direct the activities of the entity. Subsidiaries are fully consolidated from the date on which control is transferred to the Group. They are de-consolidated from the date that control ceases.

Intercompany transactions, balances and unrealised gains on transactions between entities in the Group are eliminated. Unrealised losses are also eliminated unless the transaction provides evidence of the impairment of the asset transferred. Accounting policies of subsidiaries have been changed where necessary to ensure consistency with the policies adopted by the Group.

The acquisition of subsidiaries is accounted for using the acquisition method of accounting. A change in ownership interest, without the loss of control, is accounted for as an equity transaction, where the difference between the consideration transferred and the book value of the share of the non-controlling interest acquired is recognised directly in equity attributable to the parent.

Where the Group loses control over a subsidiary, it derecognises the assets including goodwill, liabilities and non-controlling interest in the subsidiary together with any cumulative translation differences recognised in equity. The Group recognises the fair value of the consideration received and the fair value of any investment retained together with any gain or loss in profit or loss.

# **Operating Segments**

Operating segments are presented using the 'management approach', where the information presented is on the same basis as the internal reports provided to the Chief Operating Decision Makers ('CODM'). The CODM is responsible for the allocation of resources to operating segments and assessing their performance.

#### Interest

Interest revenue is recognised as interest and accrues using the effective interest method. This is a method of calculating the amortised cost of a financial asset and allocating the interest income over the relevant period using the effective interest rate, which is the rate that exactly discounts estimated future cash receipts through the expected life of the financial asset to the net carrying amount of the financial asset.

#### Other Revenue

Other revenue is recognised when it is received or when the right to receive payment is established.

#### Income Tax

The income tax expense or benefit for the period is the tax payable on that period's taxable income based on the applicable income tax rate for each jurisdiction, adjusted by the changes in deferred tax assets and liabilities attributable to temporary differences, unused tax losses and the adjustment recognised for prior periods, where applicable.

Deferred tax assets and liabilities are recognised for temporary differences at the tax rates expected to be applied when the assets are recovered or liabilities are settled, based on those tax rates that are enacted or substantively enacted, except for:

- When the deferred income tax asset or liability arises from the initial recognition of goodwill or an asset or liability in a transaction that is not a business combination and that, at the time of the transaction, affects neither the accounting nor taxable profits; or
- When the taxable temporary difference is associated with interests in subsidiaries, associates or joint ventures, and the timing of the reversal can be controlled and it is probable that the temporary difference will not reverse in the foreseeable future.

Deferred tax assets are recognised for deductible temporary differences and unused tax losses only if it is probable that future taxable amounts will be available to utilise those temporary differences and losses.

The carrying amount of recognised and unrecognised deferred tax assets are reviewed at each reporting date. Deferred tax assets recognised are reduced to the extent that it is no longer probable that future taxable profits will be available for the carrying amount to be recovered. Previously unrecognised deferred tax assets are recognised to the extent that it is probable that there are future taxable profits available to recover the asset.

Deferred tax assets and liabilities are offset only where there is a legally enforceable right to offset current tax assets against current tax liabilities and deferred tax assets against deferred tax liabilities; and they relate to the same taxable authority on either the same taxable entity or different taxable entities which intend to settle simultaneously.

#### **Current and Non-Current Classification**

Assets and liabilities are presented in the statement of financial position based on current and non-current classification.

An asset is classified as current when: it is either expected to be realised or intended to be sold or consumed in the Group's normal operating cycle; it is held primarily for the purpose of trading; it is expected to be realised within 12 months after the reporting period; or the asset is cash or cash equivalent unless restricted from being exchanged or used to settle a liability for at least 12 months after the reporting period. All other assets are classified as non-current.

A liability is classified as current when: it is either expected to be settled in the Group's normal operating cycle; it is held primarily for the purpose of trading; it is due to be settled within 12 months after the reporting period; or there is no unconditional right to defer the settlement of the liability for at least 12 months after the reporting period. All other liabilities are classified as non-current.

Deferred tax assets and liabilities are always classified as non-current.

# Cash and Cash Equivalents

Cash and cash equivalents includes cash on hand, deposits held at call with financial institutions, other short-term, highly liquid investments with original maturities of three months or less that are readily convertible to known amounts of cash and which are subject to an insignificant risk of changes in value.

#### Trade and Other Receivables

Other receivables are recognised at amortised cost, less any allowance for expected credit losses.

## Non-current Assets or Disposal Groups Classified as Held for Sale

Non-current assets and assets of disposal groups are classified as held for sale if their carrying amount will be recovered principally through a sale transaction rather than through continued use. They are measured at the lower of their carrying amount and fair value less costs of disposal. For non-current assets or assets of disposal groups to be classified as held for sale, they must be available for immediate sale in their present condition and their sale must be highly probable.

An impairment loss is recognised for any initial or subsequent write down of the non-current assets and assets of disposal groups to fair value less costs of disposal. A gain is recognised for any subsequent increases in fair value less costs of disposal of a non-current assets and assets of disposal groups, but not in excess of any cumulative impairment loss previously recognised.

Non-current assets are not depreciated or amortised while they are classified as held for sale. Interest and other expenses attributable to the liabilities of assets held for sale continue to be recognised.

Non-current assets classified as held for sale and the assets of disposal groups classified as held for sale are presented separately on the face of the statement of financial position, in current assets. The liabilities of disposal groups classified as held for sale are presented separately on the face of the statement of financial position, in current liabilities.

## Property, Plant and Equipment

Plant and equipment is stated at historical cost less accumulated depreciation and impairment. Historical cost includes expenditure that is directly attributable to the acquisition of the items.

Depreciation is calculated on a straight-line basis to write off the net cost of each item of property, plant and equipment (excluding land) over their expected useful lives as follows:

Office equipment 4-5 years

Computer equipment 4 years

Motor Vehicles 5 years

Exploration equipment 5-10 years

The residual values, useful lives and depreciation methods are reviewed, and adjusted if appropriate, at each reporting date.

Leasehold improvements are depreciated over the unexpired period of the lease or the estimated useful life of the assets, whichever is shorter.

An item of property, plant and equipment is derecognised upon disposal or when there is no future economic benefit to the Group. Gains and losses between the carrying amount and the disposal proceeds are taken to profit or loss.

# **Exploration and Evaluation Assets**

Exploration and evaluation assets are stated at cost less accumulated amortisation and impairment losses. Exploration and evaluation expenditure in relation to separate areas of interest for which rights of tenure are current is carried forward as an asset in the statement of financial position where it is expected that the expenditure will be recovered through the successful development and exploitation of an area of interest, or by its sale; or exploration activities are continuing in an area and activities have not reached a stage which permits a reasonable estimate of the existence or otherwise of economically recoverable reserves. Direct and indirect costs relating to exploration and evaluation areas of interest are capitalised in the year they are incurred. A regular review is undertaken for each area of interest to determine the appropriateness of continuing to carry forward costs. Where a project or an area of interest has been abandoned, the expenditure incurred thereon is written off in the year in which the decision is made.

An exploration and evaluation asset is only recognised in relation to an area of interest if the following conditions are satisfied:

- a. the rights to tenure of the area of interest are current; and
- b. at least one of the following conditions is also met:
  - i. the exploration and evaluation expenditures are expected to be recouped through successful development and exploitation of the area of interest, or alternatively, by its sale; and
  - ii. exploration and evaluation activities in the area of interest have not at the end of the reporting period reached a stage which permits a reasonable assessment of the existence or otherwise of economically recoverable reserves, and active and significant operations in, or in relation to, the area of interest are continuing.

Exploration and evaluation assets are assessed for impairment if sufficient data exists to determine technical feasibility and commercial viability and facts and circumstances suggest that the carrying amount exceeds the recoverable amount. For the purpose of impairment testing, exploration and evaluation assets are allocated to cash-generating units to which the exploration activity relates. The cash generating unit shall not be larger than the area of interest.

Once the technical feasibility and commercial viability of the extraction of mineral resources in an area of interest are demonstrable, exploration and evaluation assets attributable to that area of interest are first tested for impairment and then reclassified from exploration and revaluation expenditure to mining property and development assets within property, plant and equipment.

An area of interest refers to an individual geological area whereby the presence of a mineral deposit is considered favourable or has been proved to exist. It is common for an area of interest to contract in size progressively, as exploration and evaluation lead towards the identification of a mineral deposit, which may prove to contain economically recoverable reserves. When this happens during the exploration for and evaluation of mineral resources, exploration and evaluation expenditures are still included in the cost of the exploration and evaluation asset notwithstanding that the size of the area of interest may contract as the exploration and evaluation operations progress.

# Impairment of Non-Financial Assets

Non-financial assets are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. An impairment loss is recognised for the amount by which the asset's carrying amount exceeds its recoverable amount.

Recoverable amount is the higher of an asset's fair value less costs of disposal and value-in-use. The value-in-use is the present value of the estimated future cash flows relating to the asset using a pre-tax discount rate specific to the asset or cash-generating unit to which the asset belongs. Assets that do not have independent cash flows are grouped together to form a cash-generating unit.

# Trade and Other Payables

These amounts represent liabilities for goods and services provided to the Group prior to the end of the financial year and which are unpaid. Due to their short-term nature they are measured at amortised cost and are not discounted. The amounts are unsecured and are usually paid within 30 days of recognition.

#### **Finance Costs**

Finance costs attributable to qualifying assets are capitalised as part of the asset. All other finance costs are expensed in the period in which they are incurred.

# **Employee Benefits**

## Short-Term Employee Benefits

Liabilities for wages and salaries, including non-monetary benefits, annual leave and long service leave expected to be settled wholly within 12 months of the reporting date are measured at the amounts expected to be paid when the liabilities are settled.

#### Share-Based Payments

Equity-settled and cash-settled share-based compensation benefits are provided to employees.

Equity-settled transactions are awards of shares, or options over shares, that are provided to employees in exchange for the rendering of services. Cash-settled transactions are awards of cash for the exchange of services, where the amount of cash is determined by reference to the share price.

The cost of equity-settled transactions are measured at fair value on grant date. Fair value is independently determined using either the Binomial or Black-Scholes option pricing model that takes into account the exercise price, the term of the option, the impact of dilution, the share price at grant date and expected price volatility of the underlying share, the expected dividend yield and the risk free interest rate for the term of the option, together with non-vesting conditions that do not determine whether the Group receives the services that entitle the employees to receive payment. No account is taken of any other vesting conditions.

The cost of equity-settled transactions are recognised as an expense with a corresponding increase in equity over the vesting period. The cumulative charge to profit or loss is calculated based on the grant date fair value of the award, the best estimate of the number of awards that are likely to vest and the expired portion of the vesting period. The amount recognised in profit or loss for the period is the cumulative amount calculated at each reporting date less amounts already recognised in previous periods.

The cost of cash-settled transactions is initially, and at each reporting date until vested, determined by applying either the Binomial or Black-Scholes option pricing model, taking into consideration the terms and conditions on which the award was granted. The cumulative charge to profit or loss until settlement of the liability is calculated as follows:

- during the vesting period, the liability at each reporting date is the fair value of the award at that date multiplied by the expired portion of the vesting period.
- from the end of the vesting period until settlement of the award, the liability is the full fair value of the liability at the reporting date.

All changes in the liability are recognised in profit or loss. The ultimate cost of cash-settled transactions is the cash paid to settle the liability.

Market conditions are taken into consideration in determining fair value. Therefore, any awards subject to market conditions are considered to vest irrespective of whether or not that market condition has been met, provided all other conditions are satisfied.

If equity-settled awards are modified, as a minimum an expense is recognised as if the modification has not been made. An additional expense is recognised, over the remaining vesting period, for any modification that increases the total fair value of the share-based compensation benefit as at the date of modification.

If the non-vesting condition is within the control of the Group or employee, the failure to satisfy the condition is treated as a cancellation. If the condition is not within the control of the Group or employee and is not satisfied during the vesting period, any remaining expense for the award is recognised over the remaining vesting period, unless the award is forfeited.

If equity-settled awards are cancelled, it is treated as if it has vested on the date of cancellation, and any remaining expense is recognised immediately. If a new replacement award is substituted for the cancelled award, the cancelled and new award is treated as if they were a modification.

#### Fair Value Measurement

When an asset or liability, financial or non-financial, is measured at fair value for recognition or disclosure purposes, the fair value is based on the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date; and assumes that the transaction will take place either: in the principal market; or in the absence of a principal market, in the most advantageous market.

Fair value is measured using the assumptions that market participants would use when pricing the asset or liability, assuming they act in their economic best interests. For non-financial assets, the fair value measurement is based on its highest and best use. Valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, are used, maximising the use of relevant observable inputs and minimising the use of unobservable inputs.

### **Issued Capital**

Ordinary shares are classified as equity.

Incremental costs directly attributable to the issue of new shares or options are shown in equity as a deduction, net of tax, from the proceeds.

# **Earnings Per Share**

## Basic Earnings Per Share

Basic earnings per share is calculated by dividing the profit attributable to the owners of QMines Limited, excluding any costs of servicing equity other than ordinary shares, by the weighted average number of ordinary shares outstanding during the financial year, adjusted for bonus elements in ordinary shares issued during the financial year.

## Diluted Earnings Per Share

Diluted earnings per share adjusts the figures used in the determination of basic earnings per share to take into account the after income tax effect of interest and other financing costs associated with dilutive potential ordinary shares and the weighted average number of shares assumed to have been issued for no consideration in relation to dilutive potential ordinary shares.

Goods and Services Tax ('GST') and other similar taxes

Revenues, expenses and assets are recognised net of the amount of associated GST, unless the GST incurred is not recoverable from the tax authority. In this case it is recognised as part of the cost of the acquisition of the asset or as part of the expense.

Receivables and payables are stated inclusive of the amount of GST receivable or payable. The net amount of GST recoverable from, or payable to, the tax authority is included in other receivables or other payables in the statement of financial position.

Cash flows are presented on a gross basis. The GST components of cash flows arising from investing or financing activities which are recoverable from, or payable to the tax authority, are presented as operating cash flows

Commitments and contingencies are disclosed net of the amount of GST recoverable from, or payable to, the tax authority.

# New Accounting Standards and Interpretations not yet Mandatory or Early Adopted

Australian Accounting Standards and Interpretations that have recently been issued or amended but are not yet mandatory, have not been early adopted by the Group for the annual reporting period ended 30 June 2024. The Group has not yet assessed the impact of these new or amended Accounting Standards and Interpretations.

# Note 2. Critical Accounting Judgements, Estimates and Assumptions

The preparation of the financial statements requires management to make judgements, estimates and assumptions that affect the reported amounts in the financial statements. Management continually evaluates its judgements and estimates in relation to assets, liabilities, contingent liabilities, revenue and expenses. Management bases its judgements, estimates and assumptions on historical experience and on other various factors, including expectations of future events, management believes to be reasonable under the circumstances. The resulting accounting judgements and estimates will seldom equal the related actual results. The judgements, estimates and assumptions that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities (refer to the respective Notes) within the next financial year are discussed below.

# **Share-Based Payment Transactions**

The Group measures the cost of equity-settled transactions with employees by reference to the fair value of the equity instruments at the date at which they are granted. The fair value is determined by using either the Binomial or Black-Scholes model, taking into account the terms and conditions upon which the instruments were granted. Included within the performance rights are non-market vesting conditions where significant judgement and estimation uncertainty is required to determine the probability of the performance hurdles being met. Changes to accounting estimates and assumptions relating to equity-settled share-based payments would have no impact on the carrying amounts of assets and liabilities within the next annual reporting period but may have a significant impact profit or loss and equity.

# **Exploration and Evaluation Expenditure**

The Group capitalises expenditure relating to exploration and evaluation where it is considered likely to be recoverable or where the activities have not reached a stage that permits a reasonable assessment of the existence of reserves. There is significant judgement required on the part of the Management and the Board in determining whether exploration assets are impaired. To this extent they have considered the exploration activities, the current market conditions, the political climate in the jurisdiction in which the assets exist, as well as numerous other factors in their determination that the assets are not impaired. In addition, there is significant judgment and estimation uncertainty with regards to the allocation of costs to the various tenement assets.

# Note 3. Operating Segments

## **Identification of Reportable Operating Segments**

The Group operates in one segment, being exploration and development of copper and gold assets in Queensland. There has been no change in the current period.

# Note 4. Other Income

	Consolidated

Exploration assets held for sale,	under option	10,000	321,355	

As stated in Note 27, subsequent to year end, Queensland Critical Minerals Limited (QCML) exercised its option to acquire the Herries Range, Silverwood and Warroo tenements from QMines. These tenements did not form part of QMine's core portfolio of assets and their divestment allows QMines to focus on the Mt Chalmers and Develin Creek developments. A sale and purchase agreement was executed on 2 July 2024 for QCML to acquire these tenements for \$10,000, which resulted in an impairment being recognised at 30 June 2024 for \$311,355.

# **Ordinary Shares**

Ordinary shares entitle the holder to participate in dividends and the proceeds on the winding up of the company in proportion to the number of and amounts paid on the shares held. The fully paid ordinary shares have no par value and the company does not have a limited amount of authorised capital.

## **Capital Risk Management**

The Group's objectives when managing capital is to safeguard its ability to continue as a going concern, so that it can provide returns for shareholders and benefits for other stakeholders and to maintain an optimum capital structure to reduce the cost of capital.

Capital is regarded as total equity, as recognised in the statement of financial position, plus net debt. Net debt is calculated as total borrowings less cash and cash equivalents.

# Note 18. Equity - Issued Capital (Cont.)

The Group would look to raise capital when an opportunity to invest in a business or company was seen as value adding relative to the current company's share price at the time of the investment. The Group is not actively pursuing additional investments in the short term as it continues to integrate and grow its existing businesses in order to maximise synergies.

# Note 22. Commitments

As at 30 June 2024, the Group had \$271,647 in commitments relating to its exploration tenements (2023: \$542,300) for the following year.

# **Note 23. Related Party Transactions**

# Parent entity

QMines Limited is the parent entity.

#### Subsidiaries

Interests in subsidiaries are set out in Note 25.

# Key management personnel

Disclosures relating to key management personnel are set out in the remuneration report included in the directors' report.

# Transactions with related parties

There were no transactions with related parties during the current and previous financial year other than the loans entered into in Note 14 of the financial statements.

## Receivable from and payable to related parties

There were no trade receivables from or trade payables to related parties at the current and previous reporting date.

## Loans to/from related parties

The Group entered into two new loan arrangements with related parties as reflected in Note 14 of the financial statements. There were no loans to or from related parties in the previous reporting date. The Directors consider the terms of these loans to be arm's length.

# **Note 24 - Parent Entity Information**

Set out below is the supplementary information about the parent entity.

•	Par	ent
	2024 \$	2023 \$

# Capital commitments - Property, plant and equipment

## Material accounting policy information

The accounting policies of the parent entity are consistent with those of the Group, as disclosed in Note 1, except for the following:

Investments in subsidiaries are accounted for at cost, less any impairment, in the parent entity.

# Note 25. Interests in subsidiaries

The consolidated financial statements incorporated the assets, liabilities and results of the following subsidiaries in accordance with the accounting policy described in Note 1:

•		Ownership interest			
Name	Principal place of business / Country of incorporation	2024 %	2023 %		
Traprock Resources Pty Ltd	Australia	100	100		
Dynasty Gold Pty Ltd	Australia	100	100		
Rocky Copper Pty Ltd	Australia	100	100		
QDrilling Pty Ltd	Australia	100	100		
RLG Holdings Pty Ltd	Australia	100	100		

# Note 26. Events after the reporting period

QMines is advancing the Mount Chalmers project and has completed the pre-lodgement of the Mining Lease Application. The Department of Resources has provided feedback on the application and was satisfied that the formal Mining Lease application could be made. A Mining Lease number of ML 100403 has now been allocated to the project.

In July 2024, the Company entered a Sale and Purchase Agreement with Critical Minerals Limited for the sale of the Company's non-core exploration projects comprising Herries Range, Silverwood and Warroo, for \$10,000. Critical Minerals previously held an option to acquire the tenements which expired on 10<sup>th</sup> March 2024.

In August 2024, the Company received firm commitments to raise \$5M (before costs) by way of a two tranche placement from new and existing shareholders with proceeds earmarked for accelerating exploration and development at the Company's Mt Chalmers and Develin Creek projects and the remaining Develin Creek project acquisition. The second tranche of the placement (\$2.7million) is subject to Shareholder approval. Shareholders approved the issue on 23 September 2024.

Also in August 2024, QMines has commenced RC drilling at its Develin Creek project. A 4000m+ drilling program will infill the Scorpion deposit with the aim of upgrading the resource from Inferred to Indicated. Further drilling into the Sulphide City deposit is planned to follow.

In early September 2024, the metallurgical testwork program for Develin Creek was completed, with the results being detailed in QMines' announcement dated 6 September 2024.

Based on the results as they relate to the zinc concentrate grades, QMines will pay Zenith for the Additional Interest an adjusted cash payment of \$975,000 and an adjusted share-based payment of fully paid ordinary shares in QMines to the value of \$687,500 ("Adjusted Additional Shares").

No other matter or circumstance has arisen since 30 June 2024 that has significantly affected, or may significantly affect the Group's operations, the results of those operations, or the Group's state of affairs in future financial years.

# DIRECTORS' DECLARATION

# In the directors' opinion:

- the attached financial statements and notes comply with the Corporations Act 2001, the Accounting Standards, the Corporations Regulations 2001 and other mandatory professional reporting requirements;
- the attached financial statements and notes comply with International Financial Reporting Standards as issued by the International Accounting Standards Board as described in Note 1 to the financial statements;
- the attached financial statements and notes give a true and fair view of the Group's financial position as at 30 June 2024 and of its performance for the financial year ended on that date;
- there are reasonable grounds to believe that the company will be able to pay its debts as and when they become due and payable; and
- the information disclosed in the attached consolidated entity disclosure statement is true and correct.

The directors have been given the declarations required by section 295A of the Corporations Act 2001.

Signed in accordance with a resolution of directors made pursuant to section 295(5)(a) of the Corporations Act 2001.

On behalf of the directors

Andrew Effecte.

#### INDEPENDENT AUDITOR'S REPORT

To the Members of Qmines Limited

#### **Opinion**

We have audited the financial report of QMines Limited (the Company) and its subsidiaries (the Group), which comprises the consolidated statement of financial position as at 30 June 2024, the consolidated statement of comprehensive income, the consolidated statement of changes in equity and the consolidated statement of cash flows for the year then ended, and notes to the financial statements, including material accounting policy information, the consolidated entity disclosure statement and the directors' declaration.

In our opinion the accompanying financial report of the Group is in accordance with the Corporations Act 2001, including:

- (i) giving a true and fair view of the Group's financial position as at 30 June 2024 and of its financial performance for the year then ended; and
- (ii) complying with Australian Accounting Standards and the Corporations Regulations 2001.

#### **Basis for Opinion**

We conducted our audit in accordance with Australian Auditing Standards. Our responsibilities under those standards are further described in the *Auditor's Responsibilities for the Audit of the Financial Report* section of our report. We are independent of the Group in accordance with the auditor independence requirements of the Corporations Act 2001 and the ethical requirements of the Accounting Professional and Ethical Standards Board's APES 110 *Code of Ethics for Professional Accountants (including independence standards)* (the Code) that are relevant to our audit of the financial report in Australia. We have also fulfilled our other ethical responsibilities in accordance with the Code.

We confirm that the independence declaration required by the Corporations Act 2001, which has been given to the directors of the Company, would be in the same terms if given to the directors as at the time of this auditor's report.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

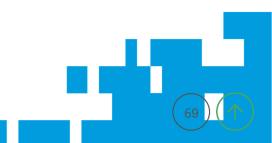

#### **Key Audit Matters**

Key audit matters are those matters that, in our professional judgement, were of most significance in our audit of the financial report of the current period. These matters were addressed in the context of our audit of the financial report as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

# **Key Audit Matter**

## How our audit addressed this matter

#### **Exploration and Evaluation Assets**

Refer to Note 11 in the financial statements

At 30 June 2024 the Group had capitalised exploration and evaluation assets with a carrying value of \$17,230,088. This represents approximately 80% the total assets of the Group at that date.

We consider the carrying amount of these assets under AASB 6 Exploration for and Evaluation of Mineral Resources to be a key audit matter due to the significant management judgments involved, including:

- whether the exploration and evaluation spend can be associated with finding specific mineral resources, and the basis on which that expenditure is allocated to an area of interest;
- the Group's ability and intention to continue to explore the area;
- which costs should be capitalised;
- the existence of any impairment indicators (such as the potential that mineral reserves and resources may not be commercially viable for extraction, or that the carrying value of the assets may not be recovered through sale or successful development) - and if so, those applied to determine and quantify any impairment loss;
- whether exploration activities have reached the stage at which the existence of an economically recoverable reserve may be determined.

Our audit procedures included, among others:

- Obtaining a listing of client tenements held by the Group and testing ownership on a sample basis;
- Obtaining evidence that the Group has valid rights to explore in each area in relation to which expenditure has been recorded;
- Testing of expenditure on a sample basis, agreeing items selected to supporting documentation to ensure they were properly incurred in the development of the assets;
- Performing substantive testing on the expenditure on a sample basis, to confirm entries had been recorded accurately (considering both nature and quantum of the items selected), completely, in the correct period, and had been appropriately classified in accordance with AASB 6, Exploration for and Evaluation of Mineral Resources;
- Assess if any facts and circumstances suggest that the carrying amount of an exploration and evaluation asset may exceed its recoverable amount. as contemplated in AASB 6, Exploration for and Evaluation of Mineral Resources;
- Assessing whether the Group's accounting policy for exploration expenditure is in compliance with Australian Accounting Standard; and
- Assessing the adequacy of the disclosures in the financial statements.

# **Key Audit Matter**

# How our audit addressed this matter

#### **Deferred Consideration**

Refer to Note 16 in the financial statements

On the 22nd of August 2023, QML acquired 51% of the Develin Creek Copper-Zinc Project from Zenith Minerals 'Zenith'. The remaining 49% is payable in 12 months when the metallurgical study is completed.

We consider this to be a key audit matter because of the following reasons:

- There is judgement required in determining of the acquisition is an asset acquisition, or a business combination.
- There transaction is non-routine and somewhat complex from an accounting perspective.
- There is a contingent consideration payable based on the outcome of future metallurgical studies. The results of which could not be determined at the acquisition date. Management have exercised their judgment in determining the most likely outcome, and the resulting liability.
- The agreement contain a number of other obligation and commitments that need to be considered in the context of the Australian Accounting Standards.

Our audit procedures included, among others:

- Discuss the transaction with management and obtain an understanding on the key commercial terms of the arrangement.
- Critically evaluate management's determination that the acquisition is an asset acquisition rather than a business combination.
- Review the binding terms sheet in relation to the acquisition and other related documents including ASX announcements and the like.
- Review the accounting entries in relation to the acquisition are consistent with the binding terms sheet and related documents.
- Obtaining evidence that the Group has valid rights to explore to ascertain the completion of acquisition:
- Evaluate the key terms in the agreement in relation to the deferred consideration evaluating the proposed accounting treatment in the context of the requirements of the Australian Accounting Standards.
- Critically evaluate managements
   assumptions in relation to the probability of
   the potential settlement outcomes having
   consideration of the various information in
   relation to the available project metallurgical
   studies.
- Reviewing the adequacy of the relevant disclosures in relation to this transaction.

#### How our audit addressed this matter **Key Audit Matter** Share-Based Payments Refer to Note 21 in the financial statements During the year, QMines Limited entered into the Our audit procedures included, among others: following share-based payment arrangements: Making enquiries of management, about the 1,733,332 shares issued to staff as shortnature of and the rationale behind the term incentive; instruments issued; 500,000 options issued for marketing and Reviewing the terms and conditions of the consulting services; instruments issued; 8,603,361 shares issued as consideration Review the valuation methodology and for purchase of Develin Creek and for inputs into the models to ensure it is in compliance with AASB 2; tenement access; 3,000,000 shares issued in payment of Verifying the mathematical accuracy of the interests on loans; and underlying model; 1,083,636 shares issued as Critically evaluating the key assumptions compensation for promotional activities. used, considering the market, the grant-date share price and current-date share price, Management have accounted for these the expected volatility in the share price, the arrangements in accordance with AASB 2 Sharevesting period, and the number of Based Payments. instruments expected to vest; We consider this to be a key audit matter because Review the accounting treatment applied on of: vested options and change in probability of the complexity of the accounting required unvested options; and management's key to value the instruments; assumptions used in determining the probability of unvested options to ensure it the judgmental nature of inputs into the is in compliance with AASB 2; valuation models, including the likelihood of vesting conditions being met, and the Recalculating the value of the share-based appropriate valuation methodology to payment expense to be recognised and the apply; reserve balance, for accuracy, factoring in any cancellations, modifications, expiry, or the variety of conditions associated with vesting; and each instrument: and Reviewing the adequacy of the relevant the non-routine nature of the transactions. disclosures, including the disclosures in

respect of judgments made, in the financial

statements.

#### How our audit addressed this matter **Key Audit Matter** Share Capital Refer to Note 19 in the financial statements The Company has share capital of \$31,317,633 as Our audit procedures included, among others: at 30 June 2024 which includes additional share Obtained the share register, the related capital of \$6,658,325 raised in the year under reconciliations, and the ASIC records and inspected the balance in the share capital We consider this to be a key audit matter for the was supported by the underlying supporting following reasons: records; The materiality of the share capital Where applicable, tested the share issued relative to the net assets in the Statement were received in cash by inspection of the of Financial Position. banking records; The Company raised significant equity in Evaluated the appropriateness of the the year under review which in turn is a accounting treatment for shares issued via significant factor in relation to the ability to share-based payments and inspected the continue as a going concern as well as related agreements; develop its exploration assets. Verified the share issues through ASX announcements; Performed ASIC search and verified the number of shares and the value of shares as at 30 June 2024; and

Assessed the adequacy of the disclosures

in the financial statements.

#### **Other Information**

The directors are responsible for the other information. The other information comprises the information included in the Group's annual report for the year ended 30 June 2024 but does not include the financial report and the auditor's report thereon.

Our opinion on the financial report does not cover the other information and accordingly we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial report, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial report or our knowledge obtained in the audit or otherwise appears to be materially misstated.

If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

### Responsibilities of the Directors for the Financial Report

The directors of the Company are responsible for the preparation of:

- a. the financial report (other than the consolidated entity disclosure statement) that gives a true and fair view in accordance with Australian Accounting Standards and the Corporations Act 2001; and
- b. the consolidated entity disclosure statement that is true and correct in accordance with the *Corporations Act 2001*, and

for such internal control as the directors determine is necessary to enable the preparation of:

- i. the financial report (other than the consolidated entity disclosure statement) that gives a true and fair view and is free from material misstatement, whether due to fraud or error; and
- ii. the consolidated entity disclosure statement that is true and correct and is free of misstatement, whether due to fraud or error.

In preparing the financial report, the directors are responsible for assessing the ability of the Group to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the directors either intend to liquidate the Group or to cease operations, or have no realistic alternative but to do so.

### Auditor's Responsibilities for the Audit of the Financial Report

Our objectives are to obtain reasonable assurance about whether the financial report as a whole is free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with the Australian Auditing Standards will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of this financial report.

A further description of our responsibilities for the audit of the financial report is located at the Auditing and Assurance Standards Board website at: <a href="https://www.auasb.gov.au/admin/file/content102/c3/ar2\_2020.pdf">https://www.auasb.gov.au/admin/file/content102/c3/ar2\_2020.pdf</a>

This description forms part of our auditor's report.

## Report on the Remuneration Report

Opinion on the Remuneration Report

We have audited the Remuneration Report included in pages 6 to 15 of the directors' report for the year ended 30 June 2024.

In our opinion, the Remuneration Report of Qmines Limited., for the year ended 30 June 2024, complies with section 300A of the Corporations Act 2001.

Responsibilities

The directors of the Company are responsible for the preparation and presentation of the Remuneration Report in accordance with section 300A of the Corporations Act 2001. Our responsibility is to express an opinion on the Remuneration Report, based on our audit conducted in accordance with Australian Auditing Standards.
