Corporate Governance Statement https://t92.com.au/corporate-governance/

1

The directors present their report, together with the financial statements, on the consolidated entity (referred to hereafter as the 'Group') consisting of Terra Uranium Limited (referred to hereafter as the 'Company' or 'parent entity') and the entities it controlled at the end of, or during, the year ended 30 June 2024.

Directors

The following persons were directors of Terra Uranium Limited during the whole of the financial year and up to the date of this report, unless otherwise stated:

Andrew Vigar Dr. Kylie Prendergast Doug Engdahl Haydn Lynch Troy Boisjoli Executive Chairman (appointed 13 October 2021)
Non-Executive Director (appointed 23 May 2022)
Non-Executive Director (appointed 7 July 2022)
Non-Executive Director (appointed 06 December 2023)
Non-Executive Director (appointed 24 June 2022, resigned 10 August 2023)

Principal activities

The Company was formed for the purpose of exploring and developing a portfolio of high-quality market sustaining uranium assets with a primary focus on Canada's premier Athabasca Basin. The Company is targeting discovery of tier one uranium deposits close to existing production infrastructure to play a role in a clean carbon free economy.

Dividends

There were no dividends paid, recommended or declared during the current or previous financial year.

Review of operations

The loss for the Group after providing for income tax amounted to \$971,986 (30 June 2023: \$1,832,719).

Terra Uranium Limited (ASX: T92) (the "Group") has completed its first full year listed on the ASX with consolidation of its project holdings in the Athabasca Basin, Canada, entered in transformational agreements with Atha Energy Corp to drill its core Pasfield project in 2025 and looking to complete the acquisition of the Amer Lake project in Nunavut. Over the last 12 months the company has:

- Streamlined its 100% owned subsidiary Terra Uranium Canada with corporate, legal, commercial, banking, provincial and national Canadian registration.
- Identified and pegged an additional three new 100% owned Uranium projects in the Athabasca Basin Rapid River, Engler and Yurkowski. These were virgin areas with little or no modern exploration work.
- Identified 18 targets across our 2 core projects of Parker, Pasfield and HawkRock.
- Reprocessed ANT geophysics across T4 target at Pasfield, which is now ready for drill testing.
- Received drill results from its first deep drill target at Parker T3 with indications of a fertile Uranium system at the target unconformity.
- Now in year 2 of a 3 year activity approval from the provincial government, including road access and drilling, across all Athabasca projects.
- Actively engaged with and projects are supported by First Nations hosts.
- Maintained our base camp at Pasfield Lake and road networks to our own and adjoining projects.
- Negotiated an LOI with Atha Energy Corp. to drill our Pasfield Targets T4 and possibly T3 in 2025. This also covers the addition of the Spire Horizon project at shallow depth to the eat of the Athabasca Basin.
- Entered a binding LOI to acquire the Amer Lake project further north in Nunavut with a Canadian NI43-101 resource of 15.3 Mlb of U3O8 at shallow depth.
- Entered agreements with leading services company Axiom Exploration Group to support field operations.

The Company holds a 100% interest in 31 Claims covering a total of 1,218 sq km, across two main focus areas - the Athabasca Basin, north-eastern Saskatchewan, Canada and the Amer Lake Uranium Belt in Nunavut. There are 6 projects forming the Athabasca Basin area of interest, located in the Cable Bay Shear Zone (CBSZ) on the eastern side of the Athabasca Basin. These are Engler Lake, HawkRock, Pasfield Lake, Parker Lake, Rapid River and Yurkowski Lake. These Projects are approximately 80 km to the west/northwest of multiple operating large uranium mills, mines and known deposits.

The Amer Lake area of interest composes of 2 claims currently in the Amer uranium belt in Nunavut, Canada. The Company is also in the process of acquiring a further 6 tenements at Amer Lake. A letter of intent has been signed by the Company to purchase the tenements, however it has not yet been finalised.

Significant changes in the state of affairs

There were no significant changes in the state of affairs of the Group during the financial year.

Matters subsequent to the end of the financial year

On 20 August 2024 Terra Uranium Limited and ATHA Energy Corps signed a Letter of Intent that sets out the material terms of a proposed definitive option and joint venture agreement that will allow ATHA to potentially acquire up to 60% of T92's Pasfield Lake Project and will allow T92 to potentially acquire up to 70% of ATHA's Spire and Horizon Projects.

On 2 September 2024 Terra Uranium Limited issued 9,688,466 fully paid ordinary shares at an issue price of \$0.07 cent each, raising \$678,193. An additional tranche of 1,740,105 shares is planned to be issued at the same issue price, subject to shareholder approval.

No other matter or circumstance has arisen since 30 June 2024 that has significantly affected, or may significantly affect the Group's operations, the results of those operations, or the Group's state of affairs in future financial years.

Likely developments and expected results of operations

Information on likely developments in the operations of the Group and the expected results of operations have not been included in this report because the directors believe it would be likely to result in unreasonable prejudice to the Group.

Risks and uncertainties

The consolidated entity is subject to general risks as well as risks that are specific to the consolidated entity and the consolidated entity's business activities. The following is a list of risks which the Directors believe are or potentially will be material to the consolidated entity's business, however, this is not a complete list of all risks that the consolidated entity is or may be subject to.

Company specific risks

Future funding requirements and the ability to access debt and equity markets

The Company's capital requirements depend on numerous factors and the Company may require additional debt or equity financing in the future to maintain or grow its business in addition to funds raised under the Offer. There can be no assurance that the Company will be able to secure additional capital from debt or equity financing on favourable terms or at all. The Company may also seek to raise funds through joint ventures, production sharing arrangements or other means. If the Company is unable to raise additional capital if and when required, this could delay, suspend or reduce the scope of the Company's business operations (including scaling back exploration programs) and could have a material adverse effect on the Company's operating and financial performance. Any additional equity financing may result in dilution for some or all Shareholders, and debt financing, if available, may involve restrictive covenants which limit operations and business strategy.

Exploration and operations

The Claims forming the Projects are at an early-stage of exploration, and prospective investors should understand that mineral exploration and

development are speculative and high-risk undertakings that may be impeded by circumstances beyond the control of the Company. Success in this process involves, among other things:

- * discovery and proving-up, or acquiring, an economically recoverable resource or reserve;
- * access to adequate capital throughout the discovery and project development phases;
- securing and maintaining title to mineral projects;
- * obtaining required development consents and approvals necessary for the mineral exploration, development and production phases; and
- accessing the necessary experienced operational staff, the applicable financial management and recruiting skilled contractors, consultants and employees.

There can be no assurance that future exploration and development of the Projects, or any other mineral projects that may be acquired in the future, will result in the discovery of an economic resource. Even if an apparently viable resource is identified, there is no guarantee that it can be economically exploited. The future exploration and development activities of the Company may be affected by a range of factors including geological conditions, limitations on activities due to seasonal weather patterns or adverse weather conditions, unanticipated operational and technical difficulties, difficulties in commissioning and operating plant and equipment, mechanical failure or plant breakdown, unanticipated metallurgical problems which may affect extraction costs, industrial and environmental accidents, industrial disputes, unexpected shortages and increases in the costs of consumables, spare parts, plant, equipment and staff, native title process and Aboriginal rights and title, including First Nations and Métis communities, and related consultation issues, changing government regulations and many other factors beyond the control of the Company. The success of the Company will also depend upon the Company being able to maintain title to the Claims forming the Projects, or any other mineral projects that may be acquired in the future, and obtaining all required approvals for their contemplated activities. In the event that exploration programs prove to be unsuccessful this could lead to a diminution in the value of the Projects, a reduction in the cash reserves of the Company and possible relinquishment of one or more of the Claims forming the Projects.

Title to mineral properties

The acquisition of title to mineral properties is a very detailed and time-consuming process. The Claims and other mineral properties that may be acquired in the future and T92's ownership interests may be affected by prior unregistered agreements or interests or undetected defects in title, such as the reduction in size of the mineral titles and other third party claims. Mineral properties sometimes contain claims or transfer histories that examiners cannot verify.

A successful claim that T92 does not have title to any of its mineral properties could result in T92 losing any rights to explore, develop and mine any minerals on that property, without compensation for its prior expenditures relating to such property, or might require T92 to compensate other third-parties. In addition, in any such case, the investigation and resolution of title issues would likely divert management's time from ongoing exploration and development programs. Although the Company is satisfied that it has taken reasonable measures to ensure good and proper title to the Claims, this should not be construed as a guarantee of title or that title to the Claims or other mineral properties acquired in the future will not be challenged or impaired. Maintenance of the Company's interests in the Claims is subject to ongoing compliance with the terms of the Claims and the provisions of the applicable statutes and regulations governing the Claims. Under Saskatchewan law, the Company is required to make certain payments and take certain actions (including satisfying expenditure requirements (or rendering deficiency payments) and meeting work commitments requirements) in order to maintain the Claims in good standing. If the Company fails to comply with the terms of the Claims or a provision of the applicable statutes or regulations (including defaulting with respect to making payments or completing assessment work as required), there is a risk that the Claims may lapse or be cancelled by the Province of Saskatchewan and T92 may lose its rights to the properties underlying the Claims.

Permits, leases, licences and approvals

Permits, leases, licences and approvals are required from a variety of governmental and nongovernmental authorities at various stages of exploration and development. There can be no assurance that the various permits, leases, licences and approvals required for T92 to carry out exploration, development and mining operations on its Projects will be obtained on reasonable terms or at all or, if obtained, will not be cancelled or renewed upon expiry in the future. In addition, there is no assurance that such permits, leases, licences and approvals will not contain terms and provisions which may adversely affect T92's exploration and development activities. Delays may occur in obtaining necessary renewals or modifications of permits, leases, licences and approvals for existing or future operations and activities, or additional or amended permits, leases, licences and approvals associated with new legislation. Such permits, leases, licences and approvals are subject to changes in regulations and in various operating circumstances. Delay or a failure to obtain required permits, leases, licences and approvals may materially affect T92's business and prospects.

Renewal

The Claims are subject to periodic renewal. The renewal of the term of the Claims is subject to compliance with applicable mining legislation and regulations and the discretion of the relevant mining authority. Renewal conditions may include increased expenditure and work commitments or compulsory relinquishment of areas of the Claims. The imposition of new conditions or the inability to meet those conditions may adversely affect the operations, financial position and/or performance of the Company. The Company considers the likelihood of tenure forfeiture to be low given the laws and regulations governing exploration in Saskatchewan and the ongoing expenditure budgeted for by the Company. However, the consequence of forfeiture or involuntary surrender of a granted mineral claim for reasons beyond the control of the Company could be significant.

Industry specific risks

Alternative energy sources for uranium

The market price of T92's securities may be expected to exhibit some correlation with uranium price. Uranium is used primarily as a fuel source for electricity generation. Other sources of energy include oil, natural gas, coal and hydro-electricity. Factors that influence the decision of power producers to choose uranium rather than other fuels include political, technological, environmental and cost considerations (both locally and globally). While these factors, in the past, have impacted negatively on the growth of the uranium industry, recent concerns in relation to carbon-based emissions have strengthened the case for the use of uranium.

Environmental

The operations and proposed activities of the Company are subject to substantial laws and regulations (specifically, under Canadian federal, provincial and local laws) concerning environmental matters. As with most exploration projects and mining operations, the Company's activities are expected to have an impact on the environment, particularly if advanced exploration or mine development proceeds. The development of a project involving uranium is a sensitive activity. It is the Company's intention to conduct its activities to the highest standard of environmental obligation, including compliance with all environmental laws. Mining operations have inherent risks and liabilities associated with safety and damage to the environment and the disposal of waste products occurring as a result of mineral exploration and production. The occurrence of any such safety or environmental incident could delay production or increase production costs. Events, such as unpredictable rainfall or bushfires may impact on the Company's ongoing compliance with environmental legislation, regulations and licences. Significant liabilities could be imposed on the Company for damages, clean up costs or penalties in the event of certain discharges into the environment, environmental damage caused by previous operations or non-compliance with environmental laws or regulations. Approvals are required for land clearing and for ground disturbing activities. Delays in obtaining or failure to obtain such approvals can result in the delay to anticipated exploration programs or mining activities or could have a material adverse impact on the Company exploring and developing a project. The cost and complexity of complying with the applicable environmental laws and regulations and future permitting as may be required may limit the Company from being able to develop potentially economically viable mineral deposits.

Regulatory compliance

The company's operating activities are subject to extensive laws and regulations relating to numerous matters including resource licence consent, environmental compliance and rehabilitation, taxation, employee relations, health and worker safety, waste disposal, protection of the environment, native title and indigenous heritage matters, protection of endangered and protected species and other matters. The company requires permits from regulatory authorities to authorise the company's operations. These permits relate to exploration, development, production and rehabilitation activities. While the company believes that it will operate in substantial compliance with all material current laws and regulations, agreements or changes in their enforcement or regulatory interpretation could result in changes in legal requirements or in the terms of existing permits and agreements applicable to the company or its properties, which could have a material adverse impact on the company's current operations or planned activities. Obtaining necessary permits can be a time-consuming process and there is a risk that company will not obtain these permits on acceptable terms, in a timely manner or at all. The costs and delays associated with obtaining necessary permits and complying with these permits and applicable laws and regulations could materially delay or restrict the company from proceeding with the development of a project or the operation or development of a mine. Any failure to comply with applicable laws and regulations or permits, even if inadvertent, could result in material fines, penalties or other liabilities. In extreme cases, failure could result in suspension of the company's activities or forfeiture of one or more of the tenements, the subject of the Projects.

Climate

There are a number of climate-related factors that may affect the operations and proposed activities of the company. The climate change risks particularly attributable to the company include:

- (a) the emergence of new or expanded regulations associated with the transitioning to a lower-carbon economy and market changes related to climate change mitigation. The company may be impacted by changes to local or international compliance regulations related to climate change mitigation efforts, or by specific taxation or penalties for carbon emissions or environmental damage. These examples sit amongst an array of possible restraints on industry that may further impact the company and its business viability. While the company will endeavour to manage these risks and limit any consequential impacts, there can be no guarantee that the company will not be impacted by these occurrences; and
- (b) climate change may cause certain physical and environmental risks that cannot be predicted by the company, including events such as increased severity of weather patterns and incidence of extreme weather events and longer-term physical risks such as shifting climate patterns. All these risks associated with climate change may significantly change the industry in which the company operates.

Environmental regulation

The Group is aware of its environmental obligations with regards to its exploration activities and ensure that it complies with all regulations when carrying out any exploration work. The directors of the Group are not aware of any breach of environmental regulations for the year under review.

Information on directors

Name: **Andrew Vigar** Title: **Executive Chairman**

Qualifications: BSc (App. Geo.), FAusIMM, MSEG

Experience and expertise: Andrew is a Geologist with over 40 years of experience in the minerals industry covering

> exploration to mining, finance, corporate and education. Andrew graduated from QUT, Brisbane in 1977 and held several company positions in exploration, development, and mining, including WMC and CRA. Andrew commenced consulting in 1996 and after several years with SRK founded Mining Associates in Brisbane, Australia in 2003 and Hong Kong in 2009. Andrew cofounded several public companies with a combined market capitalisation of \$2 billion, including DGO Gold Limited (ASX: DGO) 2007,

Alligator Energy Limited (ASX: AGE) 2010 and K92 Mining Inc (TSX: KNT) 2014.

Other current directorships:

Former directorships (last 3 years): Alligator Energy Limited (ASX: AGE) (retired 13 April 2023)

Interests in shares: 1,351,794 Interests in options: 1,575,000

Name: Dr. Kylie Prendergast Title: Non-Executive Director

Qualifications: PhD, BSc (Hon1), GradCert (AppFin), GAICD, MAIG, FSEG

Kylie is an experienced geologist and technical leader with over 25 years' experience Experience and expertise:

within the international mining and resource sector. She has worked across a range of different operating jurisdictions, including significant in-country assignments and expatriate roles. This has included substantial business development, project technical and economic evaluation, and commercial management, including direct interaction with

a range of stakeholders in global resource capital markets.

Other current directorships: Helix Resources Limited (ASX: HLX) (appointed 12 May 2022)

Former directorships (last 3 years): Felix Gold Limited (ASX: FXG) (resigned 25 March 2022)

Interests in shares: 75,000 Interests in options:

787,500

Name:

Doug Engdahl Title: Non-Executive Director (appointed 7 July 2022)

Qualifications:

B.Sc. from the University of Saskatchewan in Geological Sciences and a Citation Program in Applied Geostatistics with Clayton Deutsch from the University of Alberta. Professional Geoscientist registered with the Association of Professional Engineers and Geoscientists of Saskatchewan (APEGS), Engineers & Geoscientists British Columbia and Ordre des geologues du Quebec (OGQ).

Experience and expertise:

Doug is a professional geologist and the current President and CEO of Axiom Group. Doug has over 20 years managing various companies with 13 years of geological experience in both junior and major exploration and mining sectors across North America and in Africa. His extensive mineral exploration experience has been focused on data compilation and interpretation, drill target generation and drill program management, as well as resource and mine modelling with focus on structural geology and resource calculations. Doug was also a certified practicing member of the Saskatchewan Mine Rescue program, outside of the geological world he served for 7 years as a Gold Seal Volunteer Firefighter and First Responder with Warman Fire Department.

Other current directorships:

Former directorships (last 3 years):

Interests in shares: Interests in options: Atha Energy Corp (TSX: SASK) (appointed June 2023)

200,000 950,000

Name:

Haydn Lynch Title:

Experience and expertise:

Non-Executive Director (Appointed 6 December 2023) Haydn has a highly successful 30-year track record across many facets of global

investment banking with companies including Bankers Trust Australia, Zurich Capital Markets, Investec, and RBC Capital Markets. Experience across multi-commodity resource project development, including asset and corporate deal structuring, cross border project finance, project joint venture negotiation and representation. He is also a cofounder of Metamor Capital Partners Pty Ltd, a family office investor in emerging companies.

Haydn has worked across the spectrum from juniors just starting out right up to global majors in Australia, North America, Africa, North and SE Asia. He is Co-founder and Chief Operating Officer of Manuka Resources Ltd (ASX:MKR), a precious metals producer in NSW. Haydn has a Bachelor of Engineering (Mech) and Economics from the University of Queensland and a Master of Commerce from UNSW, Sydney.

Interests in options: 2,500

Nil Nil 37,000

Name:

Troy Boisjoli Title:

Qualifications:

Non-Executive Director (Resigned 10 August 2023) Bachelor of Science in Geology from St. Norbert College in De Pere, Wisconsin; Geoscience license with the Association of Professional Engineers and Geoscientists of Saskatchewan.

Experience and expertise:

Troy is currently the President and CEO of Murchison Minerals, a company actively engaged in mineral exploration in Quebec and Saskatchewan Canada. Previously held positions of Vice President Operations and Project Development and Vice President Exploration and Community for NexGen Energy Ltd. While at NexGen, Troy has led the project team through the development of the Arrow Deposit in northern Saskatchewan and was involved with major milestones such as multiple mineral resource estimates, the preliminary economic assessment, the prefeasibility study, the feasibility study, operations development, the environmental assessment work done to-date, and multiple discoveries along the Patterson Lake corridor. In addition, and foundational to mineral resource development, Troy maintained and established important local relationships with communities close to the Arrow project resulting in the successful signing of Impact Benefit Agreements with two Indigenous communities.

Prior to joining NexGen Energy in 2016, Troy worked as an exploration geologist for Cameco Corporation on projects throughout northern Saskatchewan and Australia. Troy was also the Chief Geologist at the underground Eagle Point uranium mine, where he led a team that increased the mineral resources threefold while reducing drilling and discovery costs. In addition, while at Eagle Point, Troy led a team that implemented innovative processes that led to improved grade control, production reconciliation and short-range and life of mine planning.

Other current directorships: Nil Former directorships (last 3 years): Nil

Interests in shares: 475,000 (As at date of resignation 10 August 2023) Interests in options: 987,500 (As at date of resignation 10 August 2023)

'Other current directorships' quoted above are current directorships for listed entities only and excludes directorships of all other types of entities, unless otherwise stated.

'Former directorships (last 3 years)' quoted above are directorships held in the last 3 years for listed entities only and excludes directorships of all other types of entities, unless otherwise stated.

Company secretary

Anthony Panther (appointed joint Company Secretary 9 August 2024)

Anthony is a Chartered Accountant with over 30 years' experience in a variety of fields. Following completion of university commerce and law degrees he worked as an external auditor with a major international chartered accounting firm and has progressed to a range of internal audit, compliance, senior finance, and company secretarial roles with a number of ASX-listed and unlisted public companies and professional services firms, covering financial services, utilities, biotech, IT services, mineral exploration and environmental technologies. He specialises in financial reporting and company secretarial practice.

Joel Farina (appointed joint Company Secretary 11 June 2024)

Joel is a solicitor with considerable experience in corporate fundraising, change of control transactions and with the provision of Corporations Act and Listing Rule related advice to ASX-listed companies.

Claire Newstead-Sinclair (appointed joint Company Secretary 11 June 2024, resigned 9 August 2024)

Claire has extensive ASX experience and has provided company secretarial and corporate advisory services to board and various committees across several industry sectors.

Hasaka Martin (appointed 11 October 2023, resigned 11 June 2024)

Mr Martin has over 20 years' experience working with listed companies in both internally and through corporate service providers and has work across a number of industries. He is an appointed Company Secretary for a number of listed and unlisted companies. Hasaka is a Chartered Secretary and a Fellow of the Governance Institute of Australia and holds a Graduate Diploma in Applied Corporate Governance and postgraduate qualifications in corporate and securities law.

Nova Taylor (resigned 11 October 2023)

Ms Taylor has completed a Bachelor of Laws from Deakin University. She has over six years' experience working as a company secretary for various ASX listed companies.

Meetings of directors

The number of meetings of the Company's Board of Directors ('the Board') held during the year ended 30 June 2024, and the number of meetings attended by each director were:

	Full Board			
	Attended	Held		
Andrew Vigar (appointed 13 October 2021)	9	9		
Dr. Kylie Prendergast (appointed 23 May 2022)	9	9		
Doug Engdahl (appointed 7 July 2022)	6	9		
Haydn Lynch (appointed 6 December 2023)	4	4		
Troy Boisjoli (appointed 24 June 2022, resigned 10 of August 2023)	1	1		

Held: represents the number of meetings held during the time the director held office.

The Company has not established the Nomination and Remuneration committee and the Audit and Risk committee. The Board currently undertakes all nomination, remuneration, audit and risk functions.

Remuneration report (audited)

The remuneration report details the key management personnel remuneration arrangements for the Group, in accordance with the requirements of the Corporations Act 2001 and its Regulations.

Key management personnel are those persons having authority and responsibility for planning, directing and controlling the activities of the entity, directly or indirectly, including all directors.

The remuneration report is set out under the following main headings:

- Principles used to determine the nature and amount of remuneration
- Details of remuneration
- Service agreements
- Share-based compensation
- Additional disclosures relating to key management personnel

Principles used to determine the nature and amount of remuneration

The objective of the Group's executive reward framework is to ensure reward for performance is competitive and appropriate for the results delivered. The framework aligns executive reward with the achievement of strategic objectives and the creation of value for shareholders, and it is considered to conform to the market best practice for the delivery of reward. The Board of Directors ('the Board') ensures that executive reward satisfies the following key criteria for good reward governance practices:

- competitiveness and reasonableness
- acceptability to shareholders
- performance linkage / alignment of executive compensation
- transparency

The Board is responsible for determining and reviewing remuneration arrangements for its directors and executives. The performance of the Group depends on the quality of its directors and executives. The remuneration philosophy is to attract, motivate and retain high performance and high quality personnel.

The Board has structured an executive remuneration framework that is market competitive and complementary to the reward strategy of the Group.

The reward framework is designed to align executive reward to shareholders' interests. The Board have considered that it should seek to enhance shareholders' interests by:

- having economic profit as a core component of plan design
- focusing on sustained growth in shareholder wealth, consisting of dividends and growth in share price, and delivering constant or increasing return on assets as well as focusing the executive on key non-financial drivers of value
- attracting and retaining high calibre executives

Additionally, the reward framework should seek to enhance executives' interests by:

- rewarding capability and experience
- reflecting competitive reward for contribution to growth in shareholder wealth
- providing a clear structure for earning rewards

In accordance with best practice corporate governance, the structure of non-executive director and executive director remuneration is separate.

All remuneration paid to directors and executives is valued at the cost to the Company and expensed.

Non-executive directors remuneration

Fees and payments to non-executive directors reflect the demands and responsibilities of their role. Non-executive directors' fees and payments are reviewed annually by the Board. The Board may, from time to time, receive advice from independent remuneration consultants to ensure non-executive directors' fees and payments are appropriate and in line with the market. The chairman's fees are determined independently to the fees of other non-executive directors based on comparative roles in the external market. The chairman is not present at any discussions relating to the determination of his own remuneration.

The Company's constitution provides that the remuneration of non-executive Directors will be not more than the aggregate fixed sum determined by a general meeting. The aggregate remuneration for non-executive Directors is \$300,000 per annum although may be varied by ordinary resolution of the Shareholders in general meeting.

The remuneration of any executive director that may be appointed to the Board will be fixed by the Board and may be paid by way of fixed salary or consultancy fee.

Executive remuneration

The Group aims to reward executives based on their position and responsibility, with a level and mix of remuneration which has both fixed and variable components.

The executive remuneration and reward framework has four components:

- base pay and non-monetary benefits
- short-term performance incentives
- share-based payments
- other remuneration such as superannuation and long service leave

The combination of these comprises the executive's total remuneration.

Fixed remuneration, consisting of base salary, superannuation and non-monetary benefits, are reviewed annually by the Board based on individual and business unit performance, the overall performance of the Group and comparable market remunerations.

Executives may receive their fixed remuneration in the form of cash or other fringe benefits (for example motor vehicle benefits) where it does not create any additional costs to the Group and provides additional value to the executive.

The short-term incentives ('STI') program is designed to align the targets of the business units with the performance hurdles of executives. STI payments are granted to executives based on specific annual targets and key performance indicators ('KPI's') being achieved. KPI's include profit contribution, customer satisfaction, leadership contribution and product management.

The long-term incentives ('LTI') include long service leave and share-based payments. Shares are awarded to executives over a period of three years based on long-term incentive measures. These include increase in shareholders value relative to the entire market and the increase compared to the Group's direct competitors.

Use of remuneration consultants

No remuneration consultants were used during the financial year ended 30 June 2024 or for any of the preceding periods.

Details of remuneration

Amounts of remuneration

Details of the remuneration of key management personnel of the Group are set out in the following tables.

The key management personnel of the Group consisted of the following directors of Terra Uranium Limited:

- Andrew Vigar Executive Chairman (appointed 13 October 2021)
- Dr. Kylie Prendergast Non-Executive Director (appointed 23 May 2022)
- Doug Engdahl Non-Executive Director (appointed 7 July 2022)
- Haydn Lynch Non-Executive Director (appointed 6 December 2023)
- Troy Boisjoli Non-Executive Director (appointed 24 June 2022) (Resigned 10 August 2023)

And the following person:

Mike McClelland, President, Canada of Terra Uranium Canada Limited

	5,601,250	25,000		(987,500)	4,638,750

and/or their respective nominees.

** as at the date of his resignation (10 August 2023)

the free attaching options were issued to Haydn in his capacity as a regular shareholder on 2 February 2023 on a 1 option for each 2 shares held basis.

All options granted to key management personnel as part of remuneration in previous years vested upfront and were released from escrow in September 2024. As at the date of this report, these options are now exercisable.

Option	Grant Date	Expiry Date	Number	Fair Value	Vesting Conditions
Unlisted Director Options	07/09/2022	06/09/2025	5,000,000	\$0.110	None

Loans to key management personnel and their related parties

There were no loans to KMPs or related parties.

Payment for goods and services

CAD \$21,837 (\$24,710 AUD equivalent) (30 June 2023 CAD \$84,094 (\$93,323 AUD equivalent)) paid to Axiom Exploration Group, a company related to Doug Engdahl, for technical reports in relation to projects.

This concludes the remuneration report, which has been audited.

as at the date of his resignation (10 August 2023)

Shares under option

Unissued ordinary shares of Terra Uranium Limited under option at the date of this report are as follows:

Grant date	Expiry date	Exercise Number price under option
2 September 2022	6 September 2025	\$0.30 6,000,000
2 February 2023	6 September 2025	\$0.3032,896,332
		38.896.332

No person entitled to exercise the options had or has any right by virtue of the option to participate in any share issue of the Company or of any other body corporate.

Shares issued on the exercise of options

There were no ordinary shares of the company issued on the exercise of options during the period ended 30 June 2024 and up to the date of this report.

Indemnity and insurance of officers

The Company has indemnified the directors and executives of the Company for costs incurred, in their capacity as a director or executive, for which they may be held personally liable, except where there is a lack of good faith.

During the financial year, the Company paid a premium in respect of a contract to insure the directors and executives of the Company against a liability to the extent permitted by the Corporations Act 2001. The contract of insurance prohibits disclosure of the nature of the liability and the amount of the premium.

Indemnity and insurance of auditor

The Company has not, during or since the end of the financial year, indemnified or agreed to indemnify the auditor of the Company or any related entity against a liability incurred by the auditor.

During the financial year, the Company has not paid a premium in respect of a contract to insure the auditor of the Company or any related entity.

Proceedings on behalf of the Company

No person has applied to the Court under section 237 of the Corporations Act 2001 for leave to bring proceedings on behalf of the Company, or to intervene in any proceedings to which the Company is a party for the purpose of taking responsibility on behalf of the Company for all or part of those proceedings.

Non-audit services

Details of the amounts paid or payable to the auditor for non-audit services provided during the financial year by the auditor are outlined in note 15 to the financial statements.

The directors are satisfied that the provision of non-audit services during the financial year, by the auditor (or by another person or firm on the auditor's behalf), is compatible with the general standard of independence for auditors imposed by the Corporations Act 2001.

The directors are of the opinion that the services as disclosed in note 15 to the financial statements do not compromise the external auditor's independence requirements of the Corporations Act 2001 for the following reasons:

- all non-audit services have been reviewed and approved to ensure that they do not impact the integrity and objectivity of the auditor; and
- none of the services undermine the general principles relating to auditor independence as set out in APES 110 Code of Ethics for Professional Accountants issued by the Accounting Professional and Ethical Standards Board, including reviewing or auditing the auditor's own work, acting in a management or decision-making capacity for the Company, acting as advocate for the Company or jointly sharing economic risks and rewards.

Officers of the Company who are former partners of BDO Audit Pty Ltd

There are no officers of the Company who are former partners of BDO Audit Pty Ltd.

Rounding of amounts

The Company is of a kind referred to in Corporations Instrument 2016/191, issued by the Australian Securities and Investments Commission, relating to 'rounding-off'. Amounts in this report have been rounded off in accordance with that Corporations Instrument to the nearest dollar.

Auditor's independence declaration

A copy of the auditor's independence declaration as required under section 307C of the Corporations Act 2001 is set out immediately after this directors' report.

Auditor

BDO Audit Pty Ltd continues in office in accordance with section 327 of the Corporations Act 2001.

This report is made in accordance with a resolution of directors.

On behalf of the directors

Andrew Vigar
Executive Chairman

27 September 2024

DECLARATION OF INDEPENDENCE BY JARRAD PRUE TO THE DIRECTORS OF TERRA URANIUM LIMITED

As lead auditor of Terra Uranium Limited for the year ended 30 June 2024, I declare that, to the best of my knowledge and belief, there have been:

- 1. No contraventions of the auditor independence requirements of the *Corporations Act 2001* in relation to the audit; and
- 2. No contraventions of any applicable code of professional conduct in relation to the audit.

This declaration is in respect of Terra Uranium Limited and the entity it controlled during the period.

Jarrad Prue

Director

BDO Audit Pty Ltd

Perth

Note 1. Material accounting policy information

The accounting policies that are material to the Group are set out either in the respective notes or below. The accounting policies adopted are consistent with those of the previous financial year, unless otherwise stated.

New or amended Accounting Standards and Interpretations adopted

The Group has adopted all of the new or amended Accounting Standards and Interpretations issued by the Australian Accounting Standards Board ('AASB') that are mandatory for the current reporting period.

Any new or amended Accounting Standards or Interpretations that are not yet mandatory have not been early adopted.

Going concern

As at 30 June 2024, the Group had cash or cash equivalents of \$317,453 (30 June 2023:\$1,602,374) and had net working capital of \$56,234 (30 June 2023:\$768,580). The Group incurred a net loss for the year ended 30 June 2024 of \$971,986 (30 June 2023:\$1,832,719) and net cash outflows used in operating activities of \$1,318,912 (30 June 2023:\$1,131,859) and net cash outflows used in investing activities of \$955,397 (30 June 2023: \$6,842,354)

The ability of the Group to continue as a going concern is principally dependent upon the ability of the Group to secure funds by raising capital from equity markets and managing cash flows in line with available funds. These factors indicate a material uncertainty which may cast significant doubt as to whether the Group will continue as a going concern and therefore whether it will realise its assets and extinguish its liabilities in the normal course of business and at amounts stated in the financial report.

The financial statements have been prepared on the basis that the Group is a going concern, which contemplates the continuity of normal business activity, realisation of assets and settlement of liabilities in the normal course of business for the following reasons:

- The Group has the ability to issue additional equity securities under the Corporation Act 2001 to raise further working capital;
- The Group has the ability to curtail administrative, discretionary, exploration and overhead cash outflows as and when required.
- The Group raised an additional \$800,000 before costs post year-end from sophisticated and professional investors.

The ability of the Group to continue as a going concern and to fund its operational activities is dependent on the above. Should the Group not be able to continue as a going concern, it may be required to realise its assets and discharge its liabilities other than in the ordinary course of business, and at amounts that differ from those stated in the financial statements. The financial statements do not include any adjustments relating to the recoverability and classification of recorded asset amounts or liabilities that might be necessary should the Group not continue as a going concern.

Basis of preparation

These general purpose financial statements have been prepared in accordance with Australian Accounting Standards and Interpretations issued by the Australian Accounting Standards Board ('AASB'), as appropriate for for-profit oriented entities. These financial statements also comply with International Financial Reporting Standards as issued by the International Accounting Standards Board ('IASB').

Historical cost convention

The financial statements have been prepared under the historical cost convention.

Critical accounting estimates

The preparation of the financial statements requires the use of certain critical accounting estimates. It also requires management to exercise its judgement in the process of applying the Group's accounting policies. The areas involving a higher degree of judgement or complexity, or areas where assumptions and estimates are significant to the financial statements, are disclosed in note 2.

Flow through shares

The Company may issue flow through shares to fund a portion of its capital expenditure program. Pursuant to the terms of the flow through share agreements, the tax deductions associated with the expenditures are renounced to the subscribers. The difference between the value ascribed to flow through shares issued and the value that would have been received for shares with no tax attributes is initially recognised as a liability. When the expenditures are incurred, the liability is drawn down and recognised as other income through the profit or loss.

Note 1. Material accounting policy information (continued)

Exploration and evaluation assets

Exploration and evaluation expenditure in relation to separate areas of interest for which rights of tenure are current is carried forward as an asset in the statement of financial position where it is expected that the expenditure will be recovered through the successful development and exploitation of an area of interest, or by its sale; or exploration activities are continuing in an area and activities have not reached a stage which permits a reasonable estimate of the existence or otherwise of economically recoverable reserves.

Exploration and evaluation costs are capitalised as incurred. However, exploration and evaluation assets shall be assessed for impairment when facts and circumstances suggest that the carrying amount of an exploration and evaluation asset may exceed its recoverable amount. When facts and circumstances suggest that the carrying amount exceeds the recoverable amount, an entity shall measure, present and disclose any resulting impairment loss in accordance with AASB 136.

Where a project or an area of interest has been abandoned, the expenditure incurred thereon is written off in the year in which the decision is made.

Note 2. Critical accounting judgements, estimates and assumptions

The preparation of the financial statements requires management to make judgements, estimates and assumptions that affect the reported amounts in the financial statements. Management continually evaluates its judgements and estimates in relation to assets, liabilities, contingent liabilities, revenue and expenses. Management bases its judgements, estimates and assumptions on historical experience and on other various factors, including expectations of future events, management believes to be reasonable under the circumstances. The resulting accounting judgements and estimates will seldom equal the related actual results. The judgements, estimates and assumptions that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities (refer to the respective notes) within the next financial year are discussed below.

Share-based payment transactions

The Group measures the cost of equity-settled transactions with employees by reference to the fair value of the equity instruments at the date at which they are granted. The fair value is determined by using the Black-Scholes model taking into account the terms and conditions upon which the instruments were granted. The accounting estimates and assumptions relating to equity-settled share-based payments would have no impact on the carrying amounts of assets and liabilities within the next annual reporting period but may impact profit or loss and equity.

Exploration and evaluation costs

Exploration and evaluation costs have been capitalised on the basis that the Group will commence commercial production in the future, from which time the costs will be amortised in proportion to the depletion of the mineral resources. Key judgements are applied in considering costs to be capitalised which includes determining expenditures directly related to these activities and allocating overheads between those that are expensed and capitalised. In addition, costs are only capitalised that are expected to be recovered either through successful development or sale of the relevant mining interest. Factors that could impact the future commercial production at the mine include the level of reserves and resources, future technology changes, which could impact the cost of mining, future legal changes and changes in commodity prices. To the extent that capitalised costs are determined not to be recoverable in the future, they will be written off in the period in which this determination is made.

Note 3. Operating segments

Identification of reportable operating segments

The Group is organised into one operating segment: mineral exploration in Canada. This operating segment is based on the internal reports that are reviewed and used by the Board of Directors (who are identified as the Chief Operating Decision Makers ('CODM')) in assessing performance and in determining the allocation of resources. Accordingly under the management approach outlined only one operating segment has been identified and no further disclosures are required.

The CODM reviews EBITDA (earnings before interest, tax, depreciation and amortisation). The accounting policies adopted for internal reporting to the CODM are consistent with those adopted in the financial statements.

The information reported to the CODM is on a monthly basis.

Note 3. Operating segments (continued)

Accounting policy for operating segments

Operating segments are presented using the 'management approach', where the information presented is on the same basis as the internal reports provided to the Chief Operating Decision Makers ('CODM'). The CODM is responsible for the allocation of resources to operating segments and assessing their performance.

Note 4. Other income

	Consolic	Consolidated

Note 8. Exploration and evaluation (continued)

Acquisition of Amer Lake tenements

During the year the company announced it had entered into a binding letter of intent (LOI) for the acquisition of the Amer Lake Uranium Deposit, located in Nunavut, Canada. This project consists of 6 claims totalling 1,190 ha, with a resource estimate of 17,827,000 tonnes of Uranium.

Subsequent to year end the acquisition deal had not yet closed and as such the conditions precedents have not been met so no liability has been recorded. The details of the acquisition have been disclosed in the Commitments note - see note 16.

Accounting policy for exploration and evaluation assets

Exploration and evaluation expenditure in relation to separate areas of interest for which rights of tenure are current is carried forward as an asset in the statement of financial position where it is expected that the expenditure will be recovered through the successful development and exploitation of an area of interest, or by its sale; or exploration activities are continuing in an area and activities have not reached a stage which permits a reasonable estimate of the existence or otherwise of economically recoverable reserves. Where a project or an area of interest has been abandoned, the expenditure incurred thereon is written off in the year in which the decision is made.

Ordinary shares

Ordinary shares entitle the holder to participate in dividends and the proceeds on the winding up of the Company in proportion to the number of and amounts paid on the shares held. The fully paid ordinary shares have no par value and the Company does not have a limited amount of authorised capital.

On a show of hands every member present at a meeting in person or by proxy shall have one vote and upon a poll each share shall have one vote.

Share buy-back

There is no current on-market share buy-back.

Capital risk management

The Group's objectives when managing capital is to safeguard its ability to continue as a going concern, so that it can provide returns for shareholders and benefits for other stakeholders and to maintain an optimum capital structure to reduce the cost of capital.

Capital is regarded as total equity, as recognised in the statement of financial position, plus net debt. Net debt is calculated as total borrowings less cash and cash equivalents.

In order to maintain or adjust the capital structure, the company may adjust the return capital to shareholders, issue new shares or sell assets to reduce debt.

The Group would look to raise capital when an opportunity to invest in a business or company was seen as value adding relative to the current Company's share price at the time of the investment. The Group is not actively pursuing additional investments in the short term as it continues to integrate and grow its existing businesses in order to maximise synergies.

Accounting policy for issued capital

Ordinary shares are classified as equity.

Incremental costs directly attributable to the issue of new shares or options are shown in equity as a deduction, net of tax, from the proceeds.

Note 11. Accumulated losses

	Consolidated	
	2024 \$	2023 \$
Accumulated losses at the beginning of the financial year Loss after income tax expense for the year	(2,431,138) (971,986)	(598,419) (1,832,719)
Accumulated losses at the end of the financial year	(3,403,124)	(2,431,138)

Note 12. Dividends

There were no dividends paid, recommended or declared during the current or previous financial year.

Note 13. Financial instruments

Financial risk management objectives

The company's activities may expose it to a variety of financial risks: market risk (including foreign currency risk and price risk) and liquidity risk. The company's overall risk management program focuses on the unpredictability of financial markets and seeks to minimise potential adverse effects on the financial performance of the company.

Risk management is carried out by senior finance executives ('finance') under policies approved by the Board of Directors ('the Board'). These policies include identification and analysis of the risk exposure of the Group and appropriate procedures, controls and risk limits. Finance identifies, evaluates and hedges financial risks within the Group's operating units. Finance reports to the Board on a monthly basis.

Market risk

Foreign currency risk

The Group undertakes certain transactions denominated in foreign currency and is exposed to foreign currency risk through foreign exchange rate fluctuations.

The Group is exposed to foreign exchange fluctuations with respect to Australian Dollars ('A\$') and Canadian Dollars ('CAD\$'). The Group's financial results are reported in A\$. Salaries for certain local employees in Canada may be paid in CAD. The Group's operations are in Canada and some of its payment commitments and exploration expenditures under the various agreements governing its rights are denominated in CAD\$. As a result, the Group's financial position and results are impacted by the exchange rate fluctuations among A\$ and CAD\$. Such fluctuations may materially affect the Group's financial position and results.

The carrying amount of the Group's foreign currency denominated financial assets and financial liabilities at the reporting date were as follows:

			Assets		Liabilities	
Consolidated			2024 \$	2023 \$	2024 \$	2023 \$
Canadian dollars		=	67,692	1,058,212	135,662	226,564

A\$/CAD\$	10%	105,821	105,821	(10%)	(105,821)	(105,821)

Price risk

The Group is not exposed to any significant price risk.

Remaining contractual maturities

The following tables detail the Group's remaining contractual maturity for its financial instrument liabilities. The tables have been drawn up based on the undiscounted cash flows of financial liabilities based on the earliest date on which the financial liabilities are required to be paid. The tables include both interest and principal cash flows disclosed as remaining contractual maturities and therefore these totals may differ from their carrying amount in the statement of financial position.

Consolidated - 2024	Weighted average interest rate %	1 year or less \$	Between 1 and 2 years \$	Between 2 and 5 years \$	Over 5 years	Remaining contractual maturities \$

Note 14. Key management personnel disclosures

Key management personnel ('KMP'): Any persons having authority and responsibility for planning, directing and controlling the activities of the Company, directly or indirectly, including any director (whether executive or otherwise) of that Company are considered key management personnel.

Directors

The following persons were directors of Terra Uranium Limited during the financial year:

Andrew Vigar
Dr. Kylie Prendergast
Doug Engdahl
Haydn Lynch
Troy Boisjoli

Executive Chairman (appointed 13 October 2021)
Non-Executive Director (appointed 23 May 2022)
Non-Executive Director (appointed 7 July 2022)
Non-Executive Director (appointed 06 December 2023)
Non-Executive Director (appointed 24 June 2022, Resigned 10 August 2023)

Other key management personnel

The following person also had the authority and responsibility for planning, directing and controlling the major activities of the Group, directly or indirectly, during the financial year:

Mike McClelland

President, Canada of Terra Uranium Canada Limited

Note 14. Key management personnel disclosures (continued)

Compensation

The aggregate compensation made to directors and other members of key management personnel of the Group is set out below:

	Consolid	lated
	2024 \$	2023 \$
Short-term employee benefits Post-employment benefits Share-based payments	518,850 20,993 	474,237 17,409 550,000
	539,843	1,041,646

Note 15. Remuneration of auditors

During the financial year the following fees were paid or payable for services provided by BDO Audit Pty Ltd, the auditor of the Company, and its network firms:

	Conso	lidated
	2024 \$	2023 \$
Audit services - BDO Audit Pty Ltd Audit or review of the financial statements	47,925	49,846
Other services - network firms Preparation of the tax return	7,816	8,374

During the period BDO Audit Pty Ltd was appointed as auditor of the Company following the resignation of BDO Audit (WA) Pty Ltd. The change of auditor arose as a result of BDO Audit (WA) Pty Ltd restructuring its audit practice, whereby audits will be conducted by BDO Audit Pty Ltd, an authorised audit company, rather than BDO Audit (WA) Pty Ltd.

Note 16. Commitments and contingencies

Acquisition of Amer Lake tenements

During the year the company announced it had entered into a binding letter of intent (LOI) for the acquisition of the Amer Lake Uranium Deposit, located in Nunavut, Canada. This project consists of 6 claims totalling 1,190 ha, with a resource estimate of 17,827,000 tonnes of Uranium.

The purchase agreement consists of the following elements:

Immediate settlement

- An initial non-refundable fee of CAD \$10,000 payable to the vendor.

Deferred consideration

- A fee of CAD \$120,000 payable to the vendor, subject to the closing of the acquisition.
- Terra Uranium issuing ordinary share capital worth an aggregate of CAD \$200K (based on the 5 day WVAP of the T92 shares on the ASX for the period ending on the date immediately preceding the date of closing) to the vendor.
- -A payment of CAD \$200k to be settled on the earlier of i) the date that is 12 months from the date of Closing ("12 Month Anniversary Date"), or ii) the Acquiror increasing the MRE for the Properties contained in the Maiden JORC Report by a minimum of 25% through exploration or by acquisition or access to adjoining claims which comprise uranium resources and can be incorporated into a JORC (2012) compliant report.
- A payment of CAD \$200k to be settled on the earlier of i) the date that is 18 months from the date of Closing ("18 Month Anniversary Date"), or ii) the Acquiror increasing the MRE for the Properties contained in the Maiden JORC Report by a minimum of 25% through exploration or by acquisition or access to adjoining claims which comprise uranium resources and can be incorporated into a JORC (2012) compliant report.
- A payment of CAD \$300k to be settled on the earlier of i) the date that is 2.5 years from the date of Closing ("2.5 Year Anniversary Date") or ii) the Acquiror entering a Crown Mining Lease with the Territory of Nunavut that is comprised of some or all of the Properties.

The above payments can be settled via cash, the issuance of shares, or a combination of both provided that at least 50% of the payment is settled via cash.

The agreement has not yet closed and as such the conditions precedents have not been met so no liability has been recorded.

There were no other commitments or contingent liabilities which would require disclosure at the end of the year.

Note 17. Related party transactions

Parent entity

Terra Uranium Limited is the parent entity.

Subsidiaries

Interests in subsidiaries are set out in note 19.

Contingent liabilities

The parent entity had no contingent liabilities as at 30 June 2024 and 30 June 2023.

Capital commitments - Property, plant and equipment

The parent entity had no capital commitments for property, plant and equipment as at as at 30 June 2024 and 30 June 2023.

Material accounting policy information

The accounting policies of the parent entity are consistent with those of the Group, as disclosed in note 1, except for the following:

- Investments in subsidiaries are accounted for at cost, less any impairment, in the parent entity.
- Dividends received from subsidiaries are recognised as other income by the parent entity and its receipt may be an indicator of an impairment of the investment.

Note 19. Interests in subsidiaries

The consolidated financial statements incorporate the assets, liabilities and results of the following subsidiary in accordance with the accounting policy described in note 1:

		Ownership	interest
Name	Principal place of business	2024 %	2023 %
Terra Uranium Canada Limited (incorporated 12 November 2021)	Canada	100.00%	100.00%

Note 20. Events after the reporting period

On 20 August 2024 Terra Uranium Limited and ATHA Energy Corps signed a Letter of Intent that sets out the material terms of a proposed definitive option and joint venture agreement that will allow ATHA to potentially acquire up to 60% of T92's Pasfield Lake Project and will allow T92 to potentially acquire up to 70% of ATHA's Spire and Horizon Projects.

On 2 September 2024 Terra Uranium Limited issued 9,688,466 fully paid ordinary shares at an issue price of \$0.07 cent each, raising \$678,193. An additional tranche of 1,740,105 shares is planned to be issued at the same issue price, subject to shareholder approval.

No other matter or circumstance has arisen since 30 June 2024 that has significantly affected, or may significantly affect the Group's operations, the results of those operations, or the Group's state of affairs in future financial years.

Accounting policy for earnings per share

Basic earnings per share

Basic earnings per share is calculated by dividing the profit attributable to the owners of Terra Uranium Limited, excluding any costs of servicing equity other than ordinary shares, by the weighted average number of ordinary shares outstanding during the financial year, adjusted for bonus elements in ordinary shares issued during the financial year.

Diluted earnings per share

Diluted earnings per share adjusts the figures used in the determination of basic earnings per share to take into account the after income tax effect of interest and other financing costs associated with dilutive potential ordinary shares and the weighted average number of shares assumed to have been issued for no consideration in relation to dilutive potential ordinary shares.

Note 23. Share-based payments

A share option plan has been established by the Group and approved by shareholders at a general meeting, whereby the Group may, at the discretion of the Board of Directors, grant options over ordinary shares in the Company to certain key management personnel of the Group. The options are issued for nil consideration and are granted in accordance with performance guidelines established by the Board of Directors.

The table below details the options outstanding at the end of the year:

Note 23. Share-based payments (continued)

The weighted average remaining contractual life of options outstanding at the end of the financial year was 1.19 years (30 June 2023: 2.19 years).

Separate to the above share option plan for key management personnel, the company can grant options to service providers in exchange for services. During the year 2,000,000 options were granted to the lead manager as part of the Placement Management Fee and Capital Raising Fees. These were capitalised to share issue costs.

For the options granted during the current financial year, the valuation model inputs used to determine the fair value at the grant date, are as follows:

Grant date	Expiry date	Share price at grant date	Exercise price	Expected volatility	Dividend yield	Risk-free interest rate	Fair value at grant date
03/11/2023	06/09/2025	\$0.13	\$0.30	100.00%	-	4.25%	\$0.040

Accounting policy for share-based payments

Equity-settled and cash-settled share-based compensation benefits are provided to directors and employees as part of their fees and remuneration, and external service providers for goods and services provided.

Equity-settled transactions are awards of shares, or options over shares, that are provided to directors and employees in exchange for the rendering of services. Cash-settled transactions are awards of cash for the exchange of services, where the amount of cash is determined by reference to the share price.

The cost of equity-settled transactions are measured at fair value on grant date. Fair value is independently determined using either the Binomial or Black-Scholes option pricing model that takes into account the exercise price, the term of the option, the impact of dilution, the share price at grant date and expected price volatility of the underlying share, the expected dividend yield and the risk free interest rate for the term of the option, together with non-vesting conditions that do not determine whether the Group receives the services that entitle the employees to receive payment. No account is taken of any other vesting conditions.

Note 23. Share-based payments (continued)

The cost of equity-settled transactions are recognised as an expense with a corresponding increase in equity over the vesting period. The cumulative charge to profit or loss is calculated based on the grant date fair value of the award, the best estimate of the number of awards that are likely to vest and the expired portion of the vesting period. The amount recognised in profit or loss for the period is the cumulative amount calculated at each reporting date less amounts already recognised in previous periods.

The cost of cash-settled transactions is initially, and at each reporting date until vested, determined by applying the Black-Scholes option pricing model, taking into consideration the terms and conditions on which the award was granted. The cumulative charge to profit or loss until settlement of the liability is calculated as follows:

- during the vesting period, the liability at each reporting date is the fair value of the award at that date multiplied by the expired portion of the vesting period.
- from the end of the vesting period until settlement of the award, the liability is the full fair value of the liability at the reporting date.

All changes in the liability are recognised in profit or loss. The ultimate cost of cash-settled transactions is the cash paid to settle the liability.

Market conditions are taken into consideration in determining fair value. Therefore any awards subject to market conditions are considered to vest irrespective of whether or not that market condition has been met, provided all other conditions are satisfied.

If equity-settled awards are modified, as a minimum an expense is recognised as if the modification has not been made. An additional expense is recognised, over the remaining vesting period, for any modification that increases the total fair value of the share-based compensation benefit as at the date of modification.

If the non-vesting condition is within the control of the Group or employee, the failure to satisfy the condition is treated as a cancellation. If the condition is not within the control of the Group or employee and is not satisfied during the vesting period, any remaining expense for the award is recognised over the remaining vesting period, unless the award is forfeited.

If equity-settled awards are cancelled, it is treated as if it has vested on the date of cancellation, and any remaining expense is recognised immediately. If a new replacement award is substituted for the cancelled award, the cancelled and new award is treated as if they were a modification.

Terra Uranium Limited Directors' declaration 30 June 2024

In the directors' opinion:

- the attached financial statements and notes comply with the Accounting Standards and other mandatory professional reporting requirements;
- the attached financial statements and notes comply with International Financial Reporting Standards as issued by the International Accounting Standards Board as described in note 1 to the financial statements;
- the attached financial statements and notes give a true and fair view of the Group's financial position as at 30 June 2024 and of its performance for the financial year ended on that date;
- there are reasonable grounds to believe that the Company will be able to pay its debts as and when they become due and payable; and
- The information disclosed in the attached consolidated entity disclosure statement is true and correct.

The directors have been given the declarations required by section 295A of the Corporations Act 2001.

Signed in accordance with a resolution of directors made pursuant to section 295(5)(a) of the Corporations Act 2001.

On behalf of the directors

INDEPENDENT AUDITOR'S REPORT

To the members of Terra Uranium Limited

Report on the Audit of the Financial Report

Opinion

We have audited the financial report of Terra Uranium Limited (the Company) and its subsidiary (the Group), which comprises the consolidated statement of financial position as at 30 June 2024, the consolidated statement of profit or loss and other comprehensive income, the consolidated statement of changes in equity and the consolidated statement of cash flows for the year then ended, and notes to the financial report, including material accounting policy information, the consolidated entity disclosure statement and the directors' declaration.

In our opinion the accompanying financial report of the Group, is in accordance with the *Corporations Act 2001*, including:

- (i) Giving a true and fair view of the Group's financial position as at 30 June 2024 and of its financial performance for the year ended on that date; and
- (ii) Complying with Australian Accounting Standards and the Corporations Regulations 2001.

Basis for opinion

We conducted our audit in accordance with Australian Auditing Standards. Our responsibilities under those standards are further described in the *Auditor's responsibilities for the audit of the Financial Report* section of our report. We are independent of the Group in accordance with the *Corporations Act 2001* and the ethical requirements of the Accounting Professional and Ethical Standards Board's APES 110 *Code of Ethics for Professional Accountants (including Independence Standards)* (the Code) that are relevant to our audit of the financial report in Australia. We have also fulfilled our other ethical responsibilities in accordance with the Code.

We confirm that the independence declaration required by the *Corporations Act 2001*, which has been given to the directors of the Company, would be in the same terms if given to the directors as at the time of this auditor's report.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Material uncertainty related to going concern

We draw attention to Note 1 in the financial report which describes the events and/or conditions which give rise to the existence of a material uncertainty that may cast significant doubt about the group's ability to continue as a going concern and therefore the group may be unable to realise its assets and discharge its liabilities in the normal course of business. Our opinion is not modified in respect of this matter.

Key audit matters

Key audit matters are those matters that, in our professional judgement, were of most significance in our audit of the financial report of the current period. These matters were addressed in the context of our audit of the financial report as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters. In addition to the matter described in the Material uncertainty related to going concern section, we have determined the matters described below to be the key audit matters to be communicated in our report.

Carrying Value of Exploration and Evaluation Expenditure

Key audit matter How the matter was addressed in our audit As disclosed in Note 8, the carrying value of the Our procedures included, but were not limited to: exploration and evaluation asset represent a Obtaining a schedule of tenements held by the significant asset of the Group. As a result, this is considered a key audit matter. Reviewed and assessed management's position paper on impairment of evaluation and exploration assets; and Assessing the adequacy of the relates disclosures in

Notes 1, 2 and 8 to the financial report.

Other information

The directors are responsible for the other information. The other information comprises the information contained in the director's report for the year ended 30 June 2024, but does not include the financial report and our auditor's report thereon, which we obtained prior to the date of this auditor's report, and the annual report, which is expected to be made available to us after that date.

Our opinion on the financial report does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial report, our responsibility is to read the other information identified above and, in doing so, consider whether the other information is materially inconsistent with the financial report or our knowledge obtained in the audit or otherwise appears to be materially misstated.

If, based on the work we have performed on the other information that we obtained prior to the date of this auditor's report, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

When we read the annual report, if we conclude that there is a material misstatement therein, we are required to communicate the matter to the directors and will request that it is corrected. If it is not corrected, we will seek to have the matter appropriately brought to the attention of users for whom our report is prepared.

Responsibilities of the directors for the Financial Report

The directors of the Company are responsible for the preparation of:

- a) the financial report that gives a true and fair view in accordance with Australian Accounting Standards and the Corporations Act 2001 and
- b) the consolidated entity disclosure statement that is true and correct in accordance with the Corporations Act 2001, and

for such internal control as the directors determine is necessary to enable the preparation of:

- i) the financial report that gives a true and fair view and is free from material misstatement, whether due to fraud or error; and
- ii) the consolidated entity disclosure statement that is true and correct and is free of misstatement, whether due to fraud or error.

In preparing the financial report, the directors are responsible for assessing the ability of the group to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the directors either intend to liquidate the Group or to cease operations, or has no realistic alternative but to do so.

Auditor's responsibilities for the audit of the Financial Report

Our objectives are to obtain reasonable assurance about whether the financial report as a whole is free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with the Australian Auditing Standards will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of this financial report.

A further description of our responsibilities for the audit of the financial report is located at the Auditing and Assurance Standards Board website at:

https://www.auasb.gov.au/admin/file/content102/c3/ar1_2020.pdf

This description forms part of our auditor's report.

Report on the Remuneration Report

Opinion on the Remuneration Report

We have audited the Remuneration Report included in pages 10 to 17 of the directors' report for the year ended 30 June 2024.

In our opinion, the Remuneration Report of Terra Uranium Limited, for the year ended 30 June 2024, complies with section 300A of the *Corporations Act 2001*.

Responsibilities

The directors of the Company are responsible for the preparation and presentation of the Remuneration Report in accordance with section 300A of the *Corporations Act 2001*. Our responsibility is to express an opinion on the Remuneration Report, based on our audit conducted in accordance with Australian Auditing Standards.
