

QUARTERLY ACTIVITIES REPORT – For Period Ended 30 September 2024

30 October 2024

September 2024 Quarter Activities

- Licence Application lodged and granted for southern tenement (213km²) contiguous to the Ulytau Uranium Project
- Licence Application lodged and granted for the northern tenement (39km²), which sits immediately north of the historic Bota Burum Uranium mine
- The new tenements are interpreted to contain the same mineralised uranium trend to that of the existing Ulytau Project area
- Received Category four (4) exploration works approval to enable the immediate commencement of geophysical and soil sampling programs, further reinforcing the positive operating environment and Government support in Kazakhstan
- Progressed Category two (2) drilling approval and commenced site based activities in preparation for drilling commencement

C29 Metals Limited (**ASX:C29**) (**C29**, or the **Company**) is pleased to provide an overview of activities for the period ending 30 September 2024 (the **"Quarter"**, the **"Reporting Period"**) to accompany the Appendix 5b.

Commenting on the Quarter, C29 Metals Managing Director, Shannon Green, stated: *"We are excited with the rapid progress made during the Quarter in both advancing our drilling permit and expanding our highly prospective Ulytau Uranium Project, with both the northern and southern tenement applications successfully granted thereby expanding the Project area to 276km². This achievement underscores the efficiency and support of the local Government, allowing us to advance our exploration efforts swiftly. The Ulytau region continues to demonstrate significant potential, and with strong local support and community engagement, we are excited to further explore this mineralised trend and enhance our growth strategy in Kazakhstan."*

Exploration Program – Ulytau Uranium Project

The Company commenced initial exploration activities on its Ulytau Uranium Project in August 2024 after receiving Category four (4) exploration approval. The initial geological program consisted of tenement wide mapping and some initial soil sampling to assist with finalising drill hole locations.

The geology team utilised a handheld X-ray fluorescence (**"XRF"**) unit to provide real time geological information to the team and valuable geological data that will assist with the initial drill hole targeting and methodology.

Post Quarter end on 16 October 2024, the Company announced that it had received official notification from the Natural Resources and Environmental Management Department the company has met all regulatory requirements for the issue of the drill permit, enabling the commencement of mobilisation for the initial drilling at its Ulytau Uranium project.

License Applications for Project Expansion

The Company expanded its footprint at the Ulytau Uranium Project with the lodgement of two new applications for tenements in July 2024, the tenements, located to the North and to the South and South-East have a combined size of ~252km² (Figure 1). Both applications were reviewed and granted by the Ministry during the Quarter, increasing the total footprint of the Ulytau Uranium Project to ~276km².

Interpreted mineralised trend and granted licences

- Granted tenure
- Interpreted mineralised trend
- Bota Burum open pit

Figure 1 – The interpreted mineralised uranium trend with new licence applications

The two granted areas have been interpreted as having a similar mineralised trend to that of the existing Ulytau Uranium Project area. Pleaserefer to ASX Announcement "License Applications Lodged around Ulytau Uranium Project" dated 24 July 2024 and the further clarification on 25 July 2024.

Project Location and History

The Ulytau Uranium Project is located in the Almaty Region of Southern Kazakhstan approximately 15 km southwest of the Bota-Burum mine, one of the largest uranium deposits mined in the former Soviet Union. Exploration for uranium has been carried out in the area since 1953. Production of Uranium at the Bota Burum mine next to the village of Aksuyek commenced in 1956 and continued until 1991².

Total mined reserves of Bota Burum are quoted at 20,000 tonnes of Uranium (44 million pounds)^{1,2}.

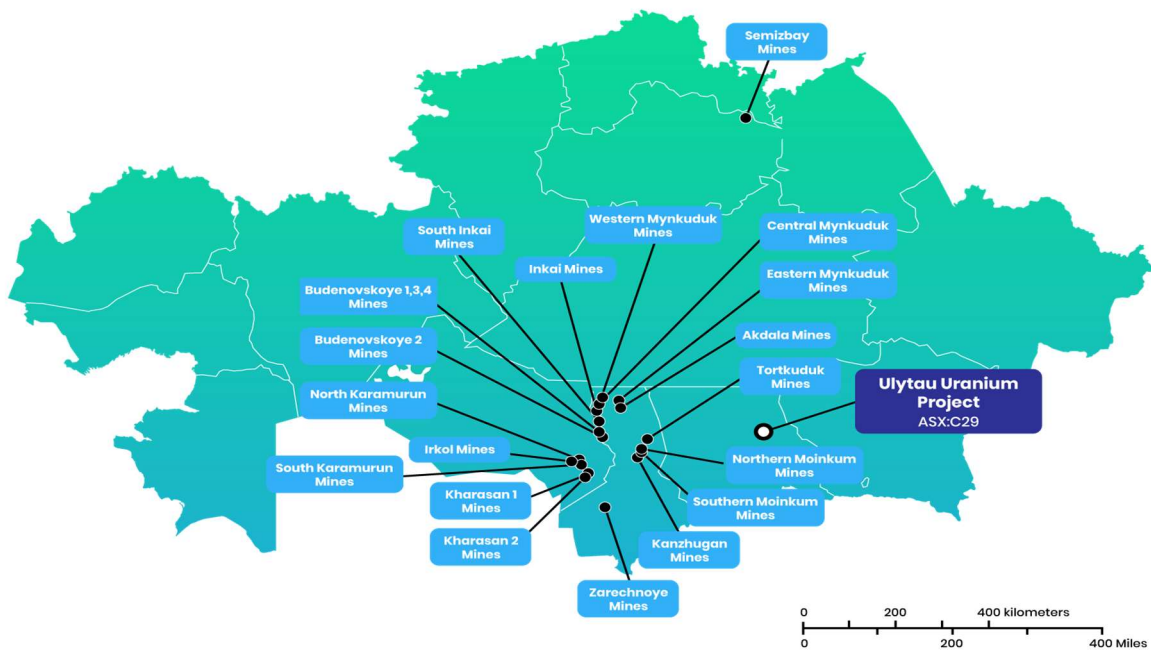

Figure 1 – Ulytau Project location in relation to other Kazakhstan Uranium mines.

Local Community Support

The Company has held two (2) community consultation days at the local community of Aksuyek, population ~700 people, located ~20km from Ulytau project area. The local community of Aksuyek have shown their strong support for the Company’s planned exploration programs. Aksuyek will provide an operations base for the work programs and can also provide many of the required support services to the Company.

A social support agreement has been signed with the district Government providing the framework for the Company to assist the village of Aksuyek with projects aligned to the social development of the community. The signing of this important agreement demonstrates the commitment by both parties to work together to ensure mutually beneficial outcomes are sustainably delivered into the future.
