PURSUIT
MINERALS

ASX RELEASE

30 September 2024

Quarterly Report

Pursuit Minerals Limited (ASX:PUR) (Pursuit or the Company) is a mineral development company focused on the commercialisation of its flagship Rio Grande Sur Lithium Project in Salta, Argentina.

ASX: PUR

Pursuit is pleased to present its activities report for the quarterly period ended 30 September 2024.

Directors

Peter Wall	Non-Executive Chairman
Aaron Revelle	Managing Director & CEO
Tom Eadie	Non-Executive Director
Stephen Layton	Non-Executive Director

Senior Management

Vito Interlandi	Company Secretary
Alejandro Rodriguez	Chief Operating Officer

Issued Capital

3,635,399,992 Ordinary Shares
147,500,000 Listed / Unlisted Options
710,016,584 Performance Shares
120,000,000 Performance Rights

Shareholders

5,713 Shareholders
Top 20 Shareholders hold 33.79 %

Cash Balance

As at 30 September 2024, PUR's cash balance was approximately \$0.324 million AUD (however completed a subsequent raising of \$1m post quarter end)

Website

www.pursuitminerals.com.au

HIGHLIGHTS

1. High Grade Lithium Results

The latest drill results at the Rio Grande Sur Project demonstrated lithium concentrations exceeding 500mg/L, enhancing project value and supporting an anticipated resource upgrade. These results reinforce the project's significant potential

2. Pilot Plant Milestone On Track

The 250 tpa Lithium Carbonate Pilot Plant is set for initial production by late 2024, a key milestone that moves the project closer to generating revenue and showcases Pursuit's commitment to advancing value-creating phases.

3. Focused Resource and Feasibility Expansion

With recent drill data, Pursuit is targeting a resource upgrade and continues its feasibility study scheduled for delivery in H1, 2025. These developments pave the way for potential commercial scaling, aligning with value driven growth.

4. Offtake Discussions Ongoing

Advanced negotiations for offtake agreements for lithium carbonate from the Pilot Plant focus on securing product demand and building revenue streams, all whilst minimising cash burn and supporting continuous production targets.

5. Strategic Review of Commando Gold Project

The Commando Gold Project, with high grade intersections and renewed market interest, is being evaluated for review for potential exploration or partnerships, aligning with Pursuit's low-cost strategy to create shareholder value from underutilised assets.

PROJECT DEVELOPMENT

During the September 2024 quarter, Pursuit Minerals Ltd (“Pursuit” or “Company”) has continued to advance through numerous engineering and geological workstreams, permitting approval processes and stakeholder engagement activities at our flagship Rio Grande Sur Lithium Project in the Salta province of Argentina.

Rio Grande Sur (RGS) Lithium Project Argentina

The Rio Grande Sur Project comprises of 5 tenements prospective for lithium on the Rio Grande Salar in the Salta province of Argentina, in addition to a Lithium Carbonate Pilot Plant located in the city of Salta. The five tenements cover approximately 9,233 hectares (Table 1).

Table 1 - Rio Grande Sur Tenement Schedule

	Tenement	Hectares	File Number
1	Maria Magdalena	73.26	3571
2	Isabel Segunda	59.25	16626
3	Sal Rio 02	298.26	21942
4	Sal Rio 01	142.19	21941
5	Mito	8,660.00	23704
	Total	9,232.96	

Figure 2: RGS Project location in the ‘Lithium Triangle’ Region

Figure 1: Rio Grande Sur Tenement Map

Rio Grande Sur Stage 1 Drilling Campaign.

During the quarter, Pursuit announced the preliminary results of Drill Hole 2 / DDH-2 at the Sal Rio 02 tenement (announcement dated 29 August 2024) with full results announced following the end of the period (See announcement dated 30 October 2024.)

DDH-2 achieved a depth of 500m, with Pursuit's on-site geologists and drilling team having been extremely encouraged by the geological units encountered across the depths of the hole.

Throughout the progress of Drillhole 2, the on-site geologists and drilling team were extremely encouraged by the geological units encountered across the depths of the hole. Of particular interest were 2 sections, the first between 122 and 186 meters, where a sequence of porous sandstone, occasionally interbedded with anhydrite returned lithium grades up to 511 mg/L. A second significant interval was encountered between 240-300m formed by sandstone alternating with gravel, associated with grades up to 527 gm/L of lithium. Both sections returned highly positive results for RBRC (Relative Brine Release Capacity) and Specific Yield, important factors when taking into account locations of pumping well locations for production.

Sample Interval	Lithium Concentration (Mg/L)
63m - 65m	520
72m - 74m	504
121m - 123m	506
159m - 161m	511
167m - 169m	502
215m - 217m	499
240m - 242m	504
263m - 265m	527
298m - 300m	500
326m - 328m	497
359.8m - 361.8m	496
381m - 383m	494
482m - 484m	386

Drillhole	Latitude	Longitude	Elevation
DDH-2	25°07'20.7"S	68°11'12.2"W	3671m ASL

Table 1 - Lithium Assays, Interval Data and Drillhole Collar

Intercepts from DDH-2 have shown highly favourable geology in line with, and exceeding expectations from historical drilling (to depths of 50m) carried out on the Rio Grande Salar. Lithium brine sample grades from the sampling of the hole are averaging above 500mg/L against the average grade of 351mg/L used to develop the current Mineral Resource Estimate ("MRE"). Additionally, the mineralisation extended to a depth of ~480m also well below the depth used to develop the MRE.

Figure 3 - Lithological section showing the continued presence of good quality, porous and permeable units and high-grade Lithium concentrations.

Pursuit is targeting a material resource upgrade in the 2nd half of the 2024 calendar year which will build on the recent maiden resource defined at the Rio Grande Sur Project (Maiden JORC Code 2012 compliant Inferred Mineral Resource Estimate of 251.3kt LCE at 351mg/Li - see ASX announcement dated 25 October 2023).

Comparing the existing MRE data to the data from DDH-2 alongside DDH-1 at the Maria Magdalena tenement, the previous estimation was calculated to a depth of 400m, where DDH-1 reached a depth of 520m and DDH-2 550m. The lithium concentration in the previous estimation was 382 mg/l, where DDH-1 the range is 400 to 600 mg/l with majority of the intercepts above 600mg/L. The DDH-2 range is 495mg/l to 520mg/l with the majority of intercepts around 500mg/K. Additionally, the yield used in the previous estimation was 6% for sand and 5.3% for halite, and with DDH-1 the yield for halite is slightly smaller 4.8% however the yield for the sands is considerably higher at 25.5%.

Following completion of DDH-2, the onsite drilling crew has demobilised as the Company advances the drilling permits for the Mito tenement in the north of the Rio Grande Salar, which in turn significantly reduces the Company's cash burn. The permit process is expected to be completed in the second half of 2025.

Figure 4 - Completed dill hole locations of the Stage 1 Drilling program.

The anticipated increase to Rio Grande Sur mineral resource will allow for the support of a larger commercial operation to be anticipated in the project feasibility study which is scheduled for delivery in H1 2025.

The decision to drill DDH-3 will be made in 2025, following completion of the permitting process as well as the interpretation of DDH-1 and DDH-2 results into the resource model which is expected to yield a significant scale where future exploration expenditure may only be warranted in more favourable market conditions.

The Company is currently investigating the opportunity to advance drilling at Mito and incorporate this into the Stage 1 drilling program which will be evaluated at the completion of the environmental permitting process required from the Salta Mining Secretary.

Lithium Carbonate Pilot Plant

During the quarter, the Company continued the start-up works of the Lithium Carbonate Pilot Plant following its commissioning working toward first production of Lithium Carbonate of both battery and technical grade.

Figure 5: 250tpa Lithium Carbonate Plant at Pursuit's purpose facility in Salta, Argentina

The Pilot Plant operation at the facility in Salta and later at site at Rio Grande is the first significant step in the development of a larger commercial scale operation where Pursuit is targeting continuous production at the Rio Grande Salar at a small scale prior to expanding to a larger size facility.

The Pilot Plant allows for the testing of the circuit chemistry in a real time environment seeking to minimise both scalability and quality control issues.

The Pilot Plant will look to produce an initial sample batch using synthetic brine of approximately 50kg of product before the end of 2024, with initial testing and circuit evaluation well underway.

Figure 6: 250tpa Lithium Carbonate Plant at Pursuit's purpose facility in Salta, Argentina

Pursuit's engineering team is developing the final pond layout and design for the 250tpa plant for the environmental permit applications for construction of the evaporation ponds with a preliminary design shown at Figure 7.

The construction of the ponds is anticipated to occur in 2025 subject to environmental approvals from discussions with the Salta Mining Secretary, other relevant government stakeholders, lithium market conditions and Pursuit's board approval. The ponds and plant are intended to be located on the Sal Rio O2 tenement where first production of Lithium Carbonate at site could occur in 2025.

Figure 7 - Proposed Pond Location and Layout at Rio Grande Sur

Relocation of the plant to site is expected to occur following completion of the initial circuit testing at the facility in Salta. The relocation of the plant is expected to be straightforward with the equipment packed down and transported to site, where it will be installed in the exact same layout at Rio Grande, in a facility constructed in a similar manner as the facility in Salta which is expected to produce product for preliminary quality testing by end users.

In conjunction with these engineering and construction works, Pursuit is advancing several off-take discussions with a target of executing off-take and counterpart agreements to support continuous production from the 250 tonne per annum plant at the Rio Grande Salar.

WA Project Portfolio

With record gold prices of ~\$2,750 USD per ounce, Pursuit has received renewed interest in its Commando Gold Project in Western Australia where the Company is currently evaluating a strategic review of this project to identify any areas of value creation for shareholders.

The Commando Project has seen sporadic exploration completed over the last 25 years with no overall focus on the discovery of a major gold deposit.

Pursuit acquired the tenements with the understanding that there are several significant gold drilling intersections that require follow up. Some of the intersections for follow up include:

- 10m @ 4.15g/t Au from 41m, incl. 2m @ 14.6g/t Au from 41m
- 8m @ 4.78g/t Au from 3m, incl. 3m @ 11.4g/t Au from 3m

- 4m @ 8.11g/t Au from 18m, incl. 2m @ 15.1g/t from 18m

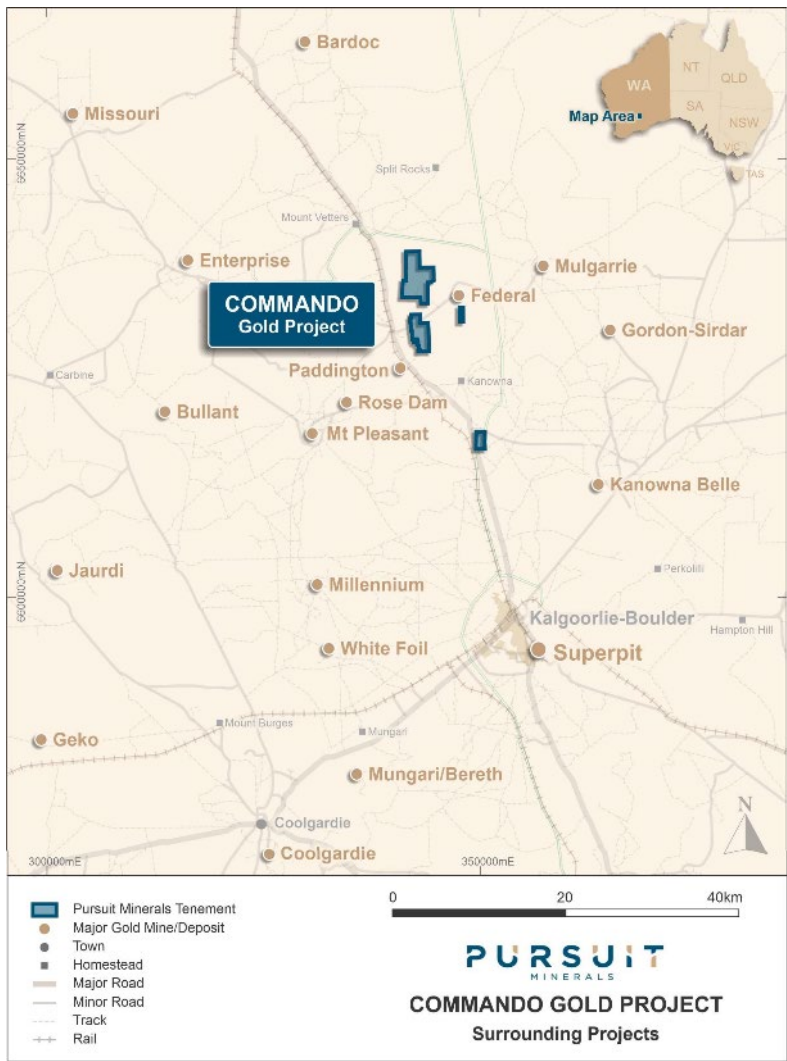

Figure 8 - Commando Gold Project Map

By virtue of its location and geological setting, the Commando Project has an arguably high potential for the discovery of a significant gold deposit. However, exploration to date has been relatively piecemeal and limited in the depth of exploration drilling.

At the time of acquisition, it was noted that the previous exploration had been of high quality but drilling across the area is very shallow with an average depth of 41m and no drillholes have been drilled to depths greater than 100m.

Only 8 drillholes have been drilled at the project since the 1990s. In addition, much of the past work was focussed on narrow greenstones in the Paddington North block with the Federal West tenement block almost completely unexplored. This area of granite along strike from Golden Cities is highly prospective for shear hosted gold mineralisation. Several phases of surface geochemistry have been completed and have generated coherent gold anomalies requiring follow-up work.

The Commando Project tenements are prospective for gold mineralisation in the greenstone sequences as well as in the adjacent granitic rocks.

Following early discussions with external consultants, both the Federal West/ Oriental Block and Paddington North Block are prime candidates for an aggressive exploration campaign, bearing in mind the very different local structural/ stratigraphic settings, but focussed on exploration at depth beneath surface and near-surface mineralisation indicators.

The regional structural review has provided important clues to the structural setting and would benefit from further local structural analysis to relate known mineralisation to interpreted structural features.

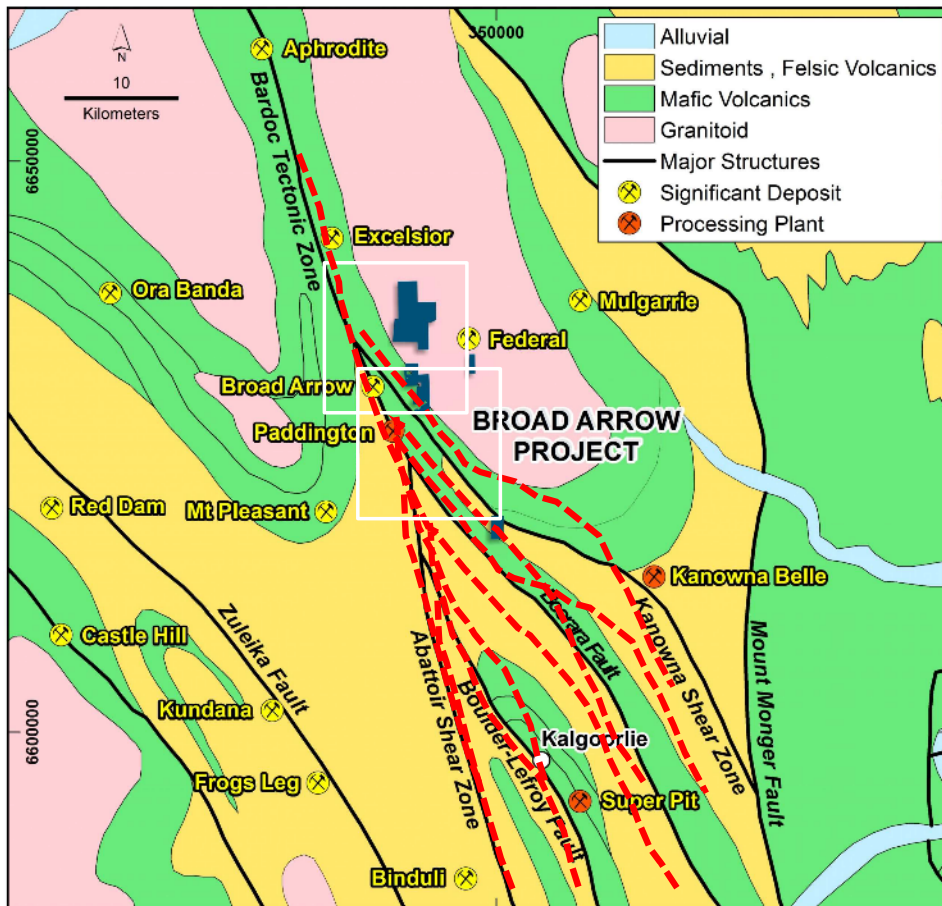

Figure 9 - Commando Project Regional Geological Map

The Company will continue to evaluate the potential of a strategic review of the Commando Gold Project in line with expressions of interest received by the Company. Given the Kalgoorlie District is one of the most prolific gold producing regions in the world, a strategic review may be conducted to assess benefit to further exploration programs at the project given the current prices of Gold at all-time highs.

During the period, Mr. Stephen Layton was appointed to the board of directors as a Non-Executive Director.

Mr Layton has over 35 years of experience in Equity Capital Markets in the UK and Australia. Since migrating to Australia in 1986, Mr Layton has worked with various stockbroking firms and/or AFSL-regulated Corporate Advisory firms. Mr Layton has specialised in capital raising services and opportunities, corporate advisory and facilitation of ASX listings. In his advisory career, Mr Layton has held both Principal and Director roles. His professional associations include Master Practitioner Member of the Stockbrokers and Investment Advisers Association (MSIAA). Mr Layton is currently a Non-Executive Director of ASX listed Mithril Silver and Gold Limited (ASX:MTH) and EQ Resources Limited (ASX:EQR).

The Company did not present at or attend any conferences during the quarter with a focus on exploration program advancement. Any interviews regarding results or significant announcements can be found on the Company's website and social media channels.

Financial and Cashflow Update for the Quarter

The Company had a cash and equivalents position of \$0.324 million as of 30 September 2024. The Company also completed a convertible loan note capital raising of \$1.0 million (before costs) after the end of the quarter.

In line with its obligations under ASX Listing Rule 4.7C.1, as outlined in the attached Appendix 5B (section 6.1) for the three months ended 30 September 2024, the Company recognised \$121,844 in payments were made to related parties and their associates for director salaries, superannuation, legal services and consultancy fees associated with services provided from 1 July 2024 to 30 September 2024.

Shareholder Communications

We encourage all shareholders and other interested parties to sign up to our email database to receive updates and announcements direct from the Company. This can be done via the Contact Us page on our website.

December 2024 Quarter Outlook & Focus

Pursuit's key focus for the September 2024 Quarter is:

- Commencement of operations at the Lithium Carbonate Pilot Plant with current plans to produce 5-50kg of Lithium Carbonate product by the end of 2024.
- Evaluation of the DDH-1 and DDH-2 results in the current geological resource estimate model targeting an upgrade in size and grade of the current resource.
- Submissions of advanced environmental permits to the Salta Mining Secretary for the DDH-3 at the Mito tenement with permits expected in H2, 2025.
- Progression of off-take discussions seeking off-take agreement for product produced from the Pilot Plant.
- Continuation of engineering and geological works for project feasibility study targeting release in H1, 2025
- Evaluation of a strategic review of the Commando Gold Project identifying any potential areas of value creation for shareholders.

INTEREST IN MINING TENEMENTS AT QUARTER END

This section provides information required under ASX listing rule 5.3.3 for mineral exploration entities.

Competent Person's Statement and Listing Rule 5.23 Disclosure

Statements contained in this announcement regarding exploration results are based on, and fairly represent, information compiled by Mr. Leandro Sastre Salim, BSc (Geology) from the National University of Salta, Argentina, and a Graduate Degree in Mineral Economics from the University of Chile. Mr. Sastre has also completed the Management Development Program at the University of Miami's Herbert Business School and has extensive experience in the mining industry across Latin America and Asia-Pacific. Mr. Sastre is a General Manager of Andes Exploration LLC and a Consultant to the Company. Mr. Sastre has sufficient relevant experience in relation to the mineralisation style being reported on to qualify as a Competent Person for reporting exploration results, as defined in the Australian Code for Reporting of Identified Mineral Resources and Ore Reserves (JORC) Code 2012. Mr. Sastre consents to the inclusion of this information in this announcement in the form and context presented, confirming it meets listing rules 5.12.2 to 5.12.7 as an accurate representation of the available data and studies for the referenced mining project.

The detailed information relating to the Mineral Resources and Ore Reserves reported in this announcement were announced in the Company's ASX announcement dated 25 October 2023 and for which Competent Persons' consents were obtained. The Competent Persons' consents remain in place for subsequent releases by the Company of the same information in the same form and context, until a consent is withdrawn or replaced by a subsequent report and accompanying consent. The Company confirms that it is not aware of any new information or data that materially affects the information included in the ASX announcements dated 25 October 2023 and all material assumptions and technical parameters underpinning the estimates in the relevant market announcement continues to apply and has not materially changed. The Company confirms that the form and context in which the Competent Persons' findings are presented have not materially changed from previous market announcements.

Statements contained in this announcement relating to exploration results, are based on, and fairly represents, information and supporting documentation prepared by Dr. Brian Luinstra, BSc honours (Geology), PhD (Earth Sciences), MAIG, PGeo (Ontario). Dr Luinstra is a Principal Consultant of SRK Consulting (Australasia) Pty Ltd and a consultant to the Company. Dr. Luinstra has sufficient relevant experience in relation to the mineralisation style being reported on to qualify as a Competent Person for reporting exploration results, as defined in the Australian Code for Reporting of Identified Mineral Resources and Ore Reserves (JORC) Code 2012. Mr Luinstra consents to the use of this information in this announcement in the form and context in which it appears. Mr Luinstra confirms that the information in this announcement provided under listing rules 5.12.2 to 5.12.7 is an accurate presentation of the available data and studies for the material mining project.

Forward looking statements

Statements relating to the estimated or expected future production, operating results, cash flows and costs and financial condition of Pursuit Minerals Limited's planned work at the Company's projects and the expected results of such work are forward-looking statements. Forward-looking statements are statements that are not historical facts and are generally, but not always, identified by words such as the following: expects, plans, anticipates, forecasts, believes, intends, estimates, projects, assumes, potential and similar expressions. Forward-looking statements also include reference to events or conditions that will, would, may, could or should occur. Information concerning exploration results and mineral reserve and resource estimates may also be deemed to be forward-looking statements, as it constitutes a prediction of what might be found to be present when and if a project is actually developed.

These forward-looking statements are necessarily based upon a number of estimates and assumptions that, while considered reasonable at the time they are made, are inherently subject to a variety of risks and uncertainties which could cause actual events or results to differ materially from those reflected in the forward-looking statements, including, without limitation: uncertainties related to raising sufficient financing to fund the planned work in a timely manner and on acceptable terms; changes in planned work resulting from logistical, technical or other factors; the

possibility that results of work will not fulfil projections/expectations and realize the perceived potential of the Company's projects; uncertainties involved in the interpretation of drilling results and other tests and the estimation of gold reserves and resources; risk of accidents, equipment breakdowns and labour disputes or other unanticipated difficulties or interruptions; the possibility of environmental issues at the Company's projects; the possibility of cost overruns or unanticipated expenses in work programs; the need to obtain permits and comply with environmental laws and regulations and other government requirements; fluctuations in the price of gold and other risks and uncertainties.

This release was approved by the Board of Directors of Pursuit Minerals Limited

1. Does the entity expect that it will continue to have the current level of net operating cash flows for the time being and, if not, why not?

Answer: The Company expects the current level of net operating cash flows to continue for the time being. Net operating cash flows are primarily comprised of exploration expenditure, staff costs and administration expenses.

2. Has the entity taken any steps, or does it propose to take any steps, to raise further cash to fund its operations and, if so, what are those steps and how likely does it believe that they will be successful?

Answer: The Company has entered into convertible loan note deeds with various sophisticated and professional investors unrelated to the Company pursuant to which the Company issued convertible loan notes to the value of up to \$2,000,000 in aggregate. Conversion of this convertible loan is subject to Shareholder approval, as contained in the Notice of Meeting for the forthcoming Annual General Meeting.

3. Does the entity expect to be able to continue its operations and to meet its business objectives and, if so, on what basis?

Answer: The Company expects to be able to continue operations and meet business objectives. This is on the basis the Directors are confident in the Company's ability to raise capital and manage discretionary spending to ensure that cash is available to meet debts as and when they fall due.

Compliance statement

- 1 This statement has been prepared in accordance with accounting standards and policies which comply with Listing Rule 19.11A.
- 2 This statement gives a true and fair view of the matters disclosed.

Date: Wednesday, 30 October 2024

Authorised by: The Board of Directors

 (Name of body or officer authorising release – see note 4)

Notes

- 1 This quarterly cash flow report and the accompanying activity report provide a basis for informing the market about the entity's activities for the past quarter, how they have been financed and the effect this has had on its cash position. An entity that wishes to disclose additional information over and above the minimum required under the Listing Rules is encouraged to do so.
- 2 If this quarterly cash flow report has been prepared in accordance with Australian Accounting Standards, the definitions in, and provisions of *AASB 6: Exploration for and Evaluation of Mineral Resources* and *AASB 107: Statement of Cash Flows* apply to this report. If this quarterly cash flow report has been prepared in accordance with other accounting standards agreed by ASX pursuant to Listing Rule 19.11A, the corresponding equivalent standards apply to this report.
- 3 Dividends received may be classified either as cash flows from operating activities or cash flows from investing activities, depending on the accounting policy of the entity.
- 4 If this report has been authorised for release to the market by your board of directors, you can insert here: "By the board". If it has been authorised for release to the market by committee of your board of directors, you can insert here: "By the *name of board committee – eg Audit and Risk Committee*". If it has been authorised for release to the market by a disclosure committee, you can insert here: "By the Disclosure Committee".
- 5 If this report has been authorised for release to the market by your board of directors and you wish to hold yourself out as complying with recommendation 4.2 of the ASX Corporate Governance Council's *Corporate Governance Principles and Recommendations*, the board should have received a declaration from its CEO and CFO that, in their opinion, the financial records of the entity have been properly maintained, that this report complies with the appropriate accounting standards and gives a true and fair view of the cash flows of the entity, and that their opinion has been formed on the basis of a sound system of risk management and internal control which is operating effectively.
