Quarterly Report – Q1 FY25

ASX Release

GREAT DIVIDE MINING LTD.

Great Divide Mining is a Gold, Antimony and critical metals explorer in Queensland, with four projects across eleven tenements. GDM's focus is on developing assets within areas of historical mining and past exploration with nearby infrastructure, thus enabling rapid development. Through a staged exploration and development programme, GDM intends to generate cash flow from its initial projects to support further exploration across its portfolio of highly prospective tenements.

Chief Executive Officer of Great Divide Mining, Justin Haines, commented:

We're pleased that we were able to undertake exploration activities at Coonambula and progress the Yellow Jack project. We have again held expenses tight, and been ready to head in-field as soon as weather allowed.

It has been a busy quarter for GDM, despite setbacks due to wet weather at a number of our sites.

Our primary focus has remained on Yellow Jack, finding the best ore processing solution at the nearby Big Rush Mine site which will define our mine optimisation studies.

Sampling was undertaken at the Banshee South prospect at Coonambula, with results expected next quarter.

We're also finalising exploration scheduling for Devils Mountain, which will kick off again once the new tenement acquisitions are completed next quarter".

Refer to Listing Rule Disclosures at end of document.

Recent Highlights

- 2 additional tenements acquired at Devils Mountain
- Rock chip sampling at Cape Project returned gold assays up to 3.2 g/t gold
- Strategic value of Antimony Prospect at Coonambula identified
- Financial report for Year ended 30 June 2024 released

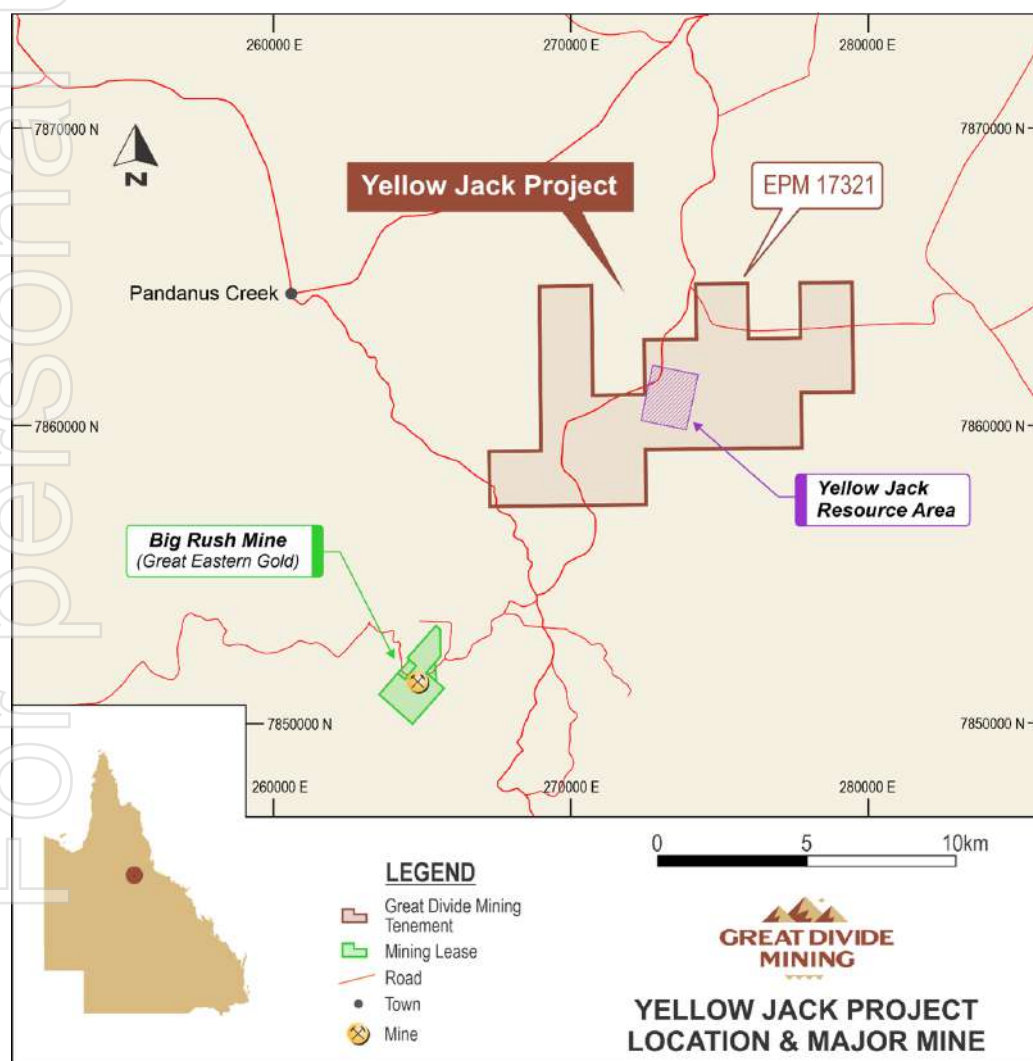

Project Overview and Updates

Yellow Jack

Announced on 20 June 2024, Great Eastern Gold Ltd (GEG) and GDM signed an MOU to explore toll treatment services for GDM's Yellow Jack ore at GEG's nearby Big Rush site approximately 14km from the Yellow Jack deposit. This has the potential to reduce CAPEX, provide schedule and cost benefits, and significantly reduce haulage costs compared to other potential processing options.

The MOU with GEG includes a six-month exclusivity provision and confidentiality.

GDM has continued working with GEG's technical team to develop a processing solution suitable for both parties with the intention of reaching a binding commercial Toll Treatment Agreement as soon as possible.

Cape Project

GDM completed rock chip sampling and an orientation ionic leach soil sampling program at New Goldfield during Q1FY25.

The Company reported on 29 August 2024 that:

- Rock chip sampling by GDM at New Goldfield has returned anomalous gold assays up to 3.2 g/t Au.
- 50% of samples returned anomalous gold >0.5 g/t Au.
- Further exploration work is required to assess the true potential of the New Goldfield area.

Coonambula Project

The company continued its exploration program at the former Banshee Antimony Mine within the Coonambula Project during Q1FY25. Results from an orientation soil sampling program are expected to be released during Q2FY25 along with results from petrophysical assessment of drill core.

GDM expects to remediate historical workings during Q2FY25.

Banshee Antimony Mine Workings, last operated in 1983

Coarse Stibnite (antimony sulphide) in quartz vein from Banshee mine workings former run-of-mine ore stockpile. As its source location is unknown this sample has not been sent for analysis. The sample is included solely for geological context purposes and is not intended to demonstrate expected grades.

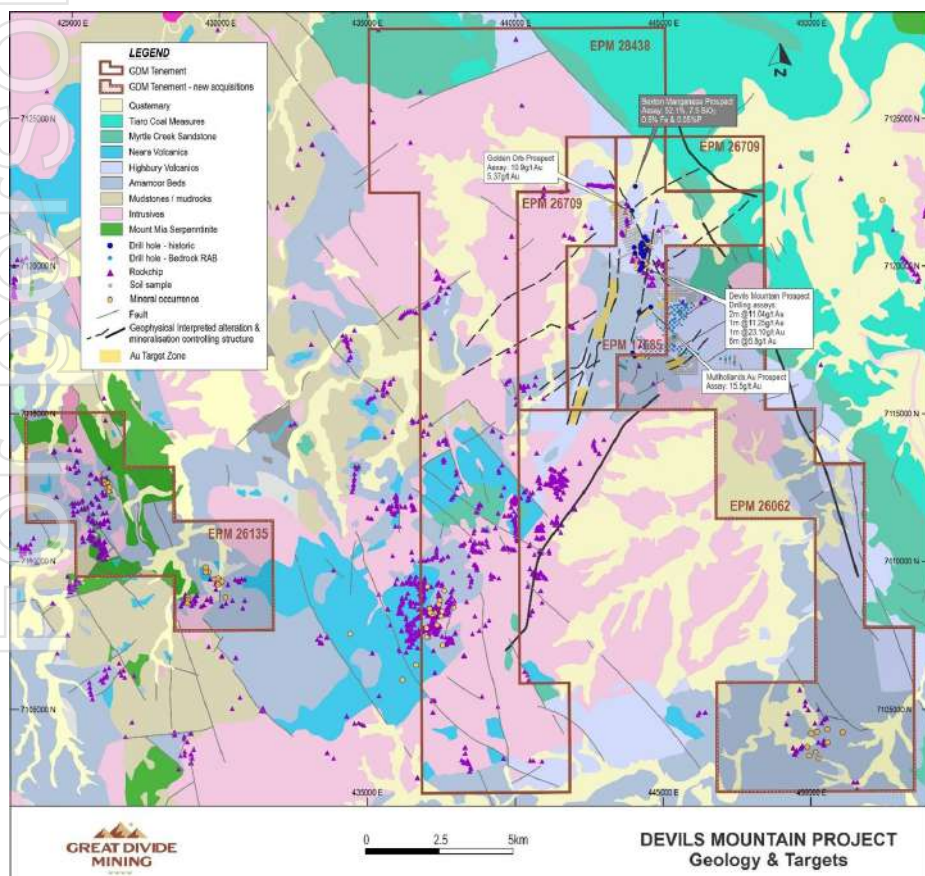

Devils Mountain

We were pleased to complete the agreements to acquire two additional tenements at Devils Mountain. GDM views these acquisitions as a significant regional consolidation of the Devils Mountain – Kilkivan historical gold and copper mineralisation and mines. The tenements are historically under explored with limited sampling and drilling; this presents a significant upside.

These additional tenements provide GDM with control over our mineralised prospects including:

- extending the Devils Mountain Gold Prospect from 4.5 km to approximately 7.5 km in length. There are historic workings along this entire length allowing targeted exploration.
- extending GDM's Project to cover the historic Glastonbury Goldfield which has a significant number of historic, high grade gold mines and more recent exploration drill holes and data; and,
- extensions over significant historic copper and gold mines in the Kilkivan field including the Long Tunnel prospect.

The Company updated exploration plans to include these new tenements.

GDM Exploration Results

The information in this announcement that relates to Exploration Results based on information compiled by Mr Justin Haines who is CEO of Great Divide Mining Ltd and a Fellow of the Australasian Institute of Mining and Metallurgy (AusIMM) and a Member of the Australian Institute of Geoscientists (AIG). Mr Haines has sufficient experience that is relevant to the styles of mineralisation and types of deposit under consideration, and to the activity that is being undertaking to qualify as a Competent Person, as defined in the 2012 Edition of the 'Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves.' Mr Haines is an employee of GDM, and consents to the inclusion in this report of the matters based on his information in the form and context in which it appears.

The Company notes that it has previously reported exploration results including in the following ASX releases, extracts of which may have been reported in this announcement:

29 August 2024: Gold @ 3.2 grams per tonne at New Goldfield, Cape Project

3 September 2024: GDM Fast-tracks Strategic Antimony-Gold Prospects at Coonambula

(together, the Previous Announcements)

In respect of each of those Previous Announcements, the Company confirms that it is not aware of any new information or data that materially affects the exploration results included in any of the Previous Announcements. The Company also confirms that the form and context in which the Competent Persons findings are presented have not been materially modified from the Previous Announcements.
