

31 October 2024

QUARTERLY ACTIVITIES REPORT For period ending 30 September 2024

Highlights

Wiluna Uranium Project

- Re-estimation of the Lake Maitland uranium (as U_3O_8) and vanadium (as V_2O_5) resources completed within a lower grade U_3O_8 resource envelope (see details below) to allow for the resources of Lake Maitland to be stated at a 100ppm U_3O_8 and V_2O_5 cut-off grade.
 - As a result the Lake Maitland Uranium-Vanadium resource can now be stated at a 100ppm U_3O_8 and V_2O_5 cut-off grade in alignment with the other deposits of the Wiluna Uranium Project.
 - This expands the Lake Maitland stated U_3O_8 resource by approximately 12% or 3.2Mlbs to 29.6Mlbs contained U_3O_8 , with a reduction in average grade to 403ppm U_3O_8 (at a 100ppm U_3O_8 cut-off).
 - The stated Lake Maitland V_2O_5 resource expands by approximately 74% or 13.4Mlbs to 31.4Mlbs contained V_2O_5 , with a reduction in average grade to 285ppm V_2O_5 (at a 100ppm V_2O_5 cut-off).
 - All of the Wiluna Uranium Project resources can now be stated at a 100ppm cut-off, resulting in an approximate 17% expansion of the U_3O_8 resources for the Project to 73.6Mlbs from the previous 62.7Mlbs, with a reduction in average grade to 381ppm U_3O_8 .
- Design phase for pilot plant commissioned by Toro for the Wiluna Uranium project nearing completion, to test the improved beneficiation and hydrometallurgical circuit developed by Toro at closer to production scale.
- Pilot plant will test potential ore from all three uranium deposits (Lake Maitland, Lake Way and Centipede-Millipede) which could potentially underpin an expanded Lake Maitland operation.
- Integration of re-estimated Lake Maitland vanadium resource into Lake Maitland uranium resource block model commenced after the end of the quarter, which is the start of preparations for a new scoping study update for a stand-alone uranium-vanadium mining and processing operation at Lake Maitland.

Corporate

- Cash and liquid financial assets valued at approximately \$11.2 million as at the quarter end.

Toro Energy Limited (ASX: TOE) ('the **Company**' or '**Toro**') is pleased to provide the following review of activities for the three month period ended 30 September 2024.

URANIUM PORTFOLIO SUMMARY

Wiluna Uranium Project, Western Australia

Toro's 100%-owned **Wiluna Uranium Project** is located near Wiluna on the Goldfields Highway, some 750km NE of Perth in Western Australia.

The Wiluna Project consists of the **Lake Maitland, Lake Way**, and **Centipede- Millipede** Deposits (see **Figure 1**). Together, these deposits of the **Wiluna Uranium Project** contain some **87.8 Mt grading 381ppm U₃O₈ for 73.6 Mlbs of contained U₃O₈ at a 100ppm U₃O₈ cut-off** (JORC 2012 – refer to ASX announcements of 15 October 2015, 1 February 2016, 21 October 2019 and 30 November 2021).

This is in addition to the **vanadium resource of 141.8Mt grading 286ppm V₂O₅ for 89.3Mlbs of contained V₂O₅ at a 100ppm V₂O₅ cut-off (inside the U₃O₈ resource envelope)** as referred to above (JORC2012 – Inferred – refer to the Company's ASX announcement of 21 October 2019).

Figure 1: Location of the Wiluna Uranium Project

Resource Expansion

On 24 September 2024 the Company announced that it had completed a re-estimation of the Lake Maitland uranium (as U_3O_8) and vanadium (as V_2O_5) resources within a lower grade U_3O_8 resource envelope (see details below) to allow for the resources of Lake Maitland to be stated at a 100ppm U_3O_8 and V_2O_5 cut-off grade. This has allowed for an expansion of the stated resources of the Lake Maitland Deposit (see below) and because the stated resources are now aligned with those of the other Wiluna deposits, Centipede-Millipede and Lake Way, it has allowed for an expansion of Toro's stated resources for its entire 100% owned Wiluna Uranium Project. The decision to reduce the cut-off grade at Lake Maitland and the other Wiluna deposits is in response to the recent positive uranium market conditions and their effect on the potential economics for Toro's uranium resources.

This was especially the case at Lake Maitland, where recent re-optimisations of the potential mining pit based on the updated market conditions and potential new operating cost structure had placed pit boundaries with U_3O_8 cut-off grades at 109ppm U_3O_8 , far lower than the 200ppm U_3O_8 cut-off grade of the stated resource (refer to ASX announcement of 22 October 2022). However, the reduction in the stated resource cut-off grade also allows for a better comparison of Toro's total resource base to that of its uranium peers, many of whom also report stated resources at a 100ppm U_3O_8 cut-off.

The new Lake Maitland U_3O_8 resource envelope cut-off is 70ppm U_3O_8 , which is now similar to the other Wiluna Uranium Project deposits of Centipede-Millipede, which has a resource envelope cut-off of 70ppm U_3O_8 , and Lake Way, which has a resource envelope cut-off of 80ppm U_3O_8 .

The new expanded resources are as follows:

Lake Maitland

URANIUM

Contained U_3O_8 increases by approximately 12% or 3.2Mlbs to **33.3Mt at 403ppm for 29.6Mlbs at a 100ppm U_3O_8 cut-off**. Average grade decreased from the previous 545ppm U_3O_8 .

VANADIUM

Contained V_2O_5 increases by approximately 74% or 13.4Mlbs to **50Mt at 285ppm for 31.4Mlbs at a 100ppm V_2O_5 cut-off**. Average grade decreased from the previous 303ppm V_2O_5 .

Total Wiluna Uranium Project

URANIUM

Contained U_3O_8 increases by approximately 17% or 10.9Mlbs to **87.8Mt at 381ppm for 73.6Mlbs at a 100ppm U_3O_8 cut-off**. Average grade decreased from the previous 548ppm U_3O_8 .

VANADIUM

Contained V_2O_5 increases by approximately 31% or 21Mlbs to **141.8Mt at 286ppm for 89.3Mlbs at a 100ppm V_2O_5 cut-off**. Average grade decreased from the previous 322ppm V_2O_5 .

The new table of resources is presented in **Appendix 4**. Details about the data, estimation methods and parameters used in the re-estimation of the Lake Maitland resource to JORC 2012 compliancy and drill hole details for all drill holes utilised for the new Lake Maitland resource estimate contained in the Company's release of 24 July 2024 together with information required for the purposes of ASX Listing Rule 5.8.

The re-estimated Lake Maitland U₃O₈ resource has been categorised as Indicated according to JORC 2012 criteria, as it was previously (refer to ASX announcement of 1 February 2016), and the V₂O₅ resource has been categorised as Inferred status only (JORC 2012). The difference in status results from the fact that there is a smaller amount of available data for vanadium than there is in respect of uranium. This is due to the ability to use cost effective down-hole gamma probing to obtain uranium concentrations during drilling with limited laboratory assays needed to confirm/calibrate the gamma probe results.

After the end of the quarter on 21 October 2024, the Company announced that integration of the re-estimated Lake Maitland vanadium resource into the Lake Maitland uranium resource block model had commenced, which is the start of preparations for a new scoping study update for a stand-alone uranium-vanadium mining and processing operation at the Lake Maitland deposit. The new scoping study update will include a re-optimisation of the proposed Lake Maitland mining pit using the new Lake Maitland resource estimation results to assess an increase in mining volume and therefore potential production.

Pilot Plant

As announced by the Company on 24 July 2024, the Company is close to finalising the design phase of a proposed research pilot plant for the Wiluna Uranium Project, with the first draft of the engineer's drawings being completed. These drawings will be refined for a final design, which will in turn be used to construct the pilot plant for operation at a designated site in Perth, Western Australia.

The pilot plant design has assumed an extended mining operation, beyond a Lake Maitland stand-alone, to a larger Wiluna Uranium Project where potential ore from the **Lake Way** and **Centipede-Millipede** deposits are included (see **Figure 1**). So, in addition to potential bulk ore from Lake Maitland, the plant will be testing Toro's new processing technique on potential bulk ore from Centipede-Millipede as well as Lake Way.

To supply the pilot plant with potential ore material Toro has chosen a low impact technique of sampling large diameter sonic drill core instead of trenching or digging into the deposits. This technique will also allow for an overall more representative sample of ore types across all three of the Wiluna Uranium Project deposits, Lake Maitland, Centipede-Millipede and Lake Way.

Additionally, to ensure the pilot plant feed is representative of any proposed mining and processing operation, a detailed reworking of the geometallurgical models for all three deposits has also been initiated. This work will give further confidence that the final drill plan for the proposed sonic core drilling will provide an 'as realistic as possible' test of the newly derived processing circuit on Wiluna Uranium Project potential ore. Whilst the detail of the drill planning is continuing, the work programs for the drilling have been approved by the West Australian Government Department of Energy, Mines, Industry Regulation and Safety (**DEMIRS**) for all three of the Wiluna Uranium Project deposits.

Communication with representatives for the native title groups at Lake Way and Centipede-Millipede, and Lake Maitland, for the planned drilling activities over the respective potential ore bodies, are ongoing.

EXPLORATION SUMMARY

The Company's expenditure on evaluation and exploration activities detailed above for the quarter totalled \$920,000.

URANIUM DEVELOPMENT STRATEGY

Toro remains focussed on the long-term feasibility of uranium production for its shareholders from the Wiluna Uranium Project, and continues to be encouraged by strengthening uranium market conditions that are aligning with the recent technical and development improvements delivered at the Wiluna Uranium Project.

Given the Lake Maitland Uranium Deposit represents a significant proportion of the Wiluna Uranium Project's resources of both uranium and vanadium, improvements at Lake Maitland will have the greatest potential for improving the economics of the Project as a whole.

As previously advised, the date for the substantial commencement condition contained in the State environmental approval for the Wiluna Uranium Project, granted pursuant to Ministerial Statement 1051 (**MS 1051**), has passed. Toro considers, and has sought advice to confirm, that the environmental approval granted by MS 1051 will remain valid notwithstanding that substantial commencement did not occur by the date specified in MS 1051, and that it will be open to the Company to apply under the *Environmental Protection Act 1986 (WA)* for an extension of time for that condition at a later time during the life of the approval. It is also envisaged that favourable results from the studies detailed in this announcement may also necessitate an amendment to the proposal the subject of each environmental approval received. Please see the Competent Person's Statements at the end of this release for information about the reporting of the resource.

CORPORATE

The Company held approximately \$11.2 million in cash and securities at the quarter end.

The Company confirms that the amount disclosed in Appendix 5B under section 6 – Payments to related parties of the entity and their associates – relates to payments made during the quarter of remuneration to and for services provided by Directors in the amount of \$248,000.

TENEMENT INFORMATION AS REQUIRED BY LISTING RULE 5.3.3

The tenements held by the Company at the end of the quarter are set out in **Appendix 1**. The Company did not vary or dispose of any interests in any joint ventures or farm out arrangements during the quarter.

A tenement map is attached at **Appendix 2** and **Appendix 3**. Attached at **Appendix 4** is the Wiluna Uranium Project resource table.

MINERAL RESOURCE ESTIMATE

The Mineral Resource Estimates in this announcement were reported by the Company in accordance with Listing Rule 5.8 via announcements dated 1 February 2015, 1 February 2016, 21 October 2019 and 14 December 2021. The Company confirms it is not aware of any new information or data that materially affects the information included in the previous announcements and that all material assumptions and technical parameters underpinning the estimates in the previous announcements continue to apply and have not materially changed.

ASX LISTING RULE 5.19.2

The Company confirms that all material assumptions underpinning the production target and the derived forecast financial information disclosed in the updated Lake Maitland Scoping Study announced by the Company on 18 June 2024 continue to apply and have not materially changed.

COMPETENT PERSONS' STATEMENTS

Competent Person's Statement

Exploration

The information in this document that relates to geology and exploration was authorised by Dr Greg Shirliff, who is a full time employee of Toro Energy Limited. Dr Shirliff is a Member of the Australian Institute of Mining and Metallurgy and has sufficient experience of relevance to the tasks with which they were employed to qualify as a Competent Person as defined in the 2012 Edition of the Joint Ore reserves Committee (JORC) Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves. Dr Shirliff consents to the inclusion in the report of matters based on information in the form and context in which it appears.

Competent Persons' Statement

Wiluna Project Mineral Resources – 2012 JORC Code Compliant Resource Estimates – U_3O_8 and V_2O_5 for Centipede-Millipede, Lake Way and Lake Maitland.

The information presented here that relates to U_3O_8 and V_2O_5 Mineral Resources of the Centipede-Millipede, Lake Way and Lake Maitland deposits is based on information compiled by Dr Greg Shirliff of Toro Energy Limited and Mr Daniel Guibal of Condor Geostats Services Pty Ltd. Mr Guibal takes overall responsibility for the Resource Estimate, and Dr Shirliff takes responsibility for the integrity of the data supplied for the estimation. Dr Shirliff is a Member of the Australasian Institute of Mining and Metallurgy (AusIMM) and Mr Guibal is a Fellow of the AusIMM and they have sufficient experience which is relevant to the style of mineralisation and type of deposit under consideration and to the activity they are undertaking to qualify as Competent Persons as defined in the 2012 Edition of the 'Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves (JORC Code 2012)'. The Competent Persons consent to the inclusion in this release of the matters based on the information in the form and context in which it appears.

APPENDIX 1 – TENEMENT INFORMATION AS REQUIRED BY LISTING RULE 5.3.3

The following tenements were held by the Company at the end of the quarter:

Tenement	Owner	Project	Status	Consolidated Entity Interest
M53/113	Nova Energy Pty Ltd	Centipede, Wiluna Uranium Project (Western Australia)	Granted	100%
M53/224	Nova Energy Pty Ltd	Centipede, Wiluna Uranium Project (Western Australia)	Granted	100%

8.3 Total relevant outgoings (item 8.1 + item 8.2)	(1,630)
8.4 Cash and cash equivalents at quarter end (item 4.6)	10,171
8.5 Unused finance facilities available at quarter end (item 7.5)	-
8.6 Total available funding (item 8.4 + item 8.5)	10,171
8.7 Estimated quarters of funding available (item 8.6 divided by item 8.3)	6.2
<i>Note: if the entity has reported positive relevant outgoings (ie a net cash inflow) in item 8.3, answer item 8.7 as "N/A". Otherwise, a figure for the estimated quarters of funding available must be included in item 8.7.</i>	
8.8 If item 8.7 is less than 2 quarters, please provide answers to the following questions:	
8.8.1 Does the entity expect that it will continue to have the current level of net operating cash flows for the time being and, if not, why not?	
Answer: N/A	
8.8.2 Has the entity taken any steps, or does it propose to take any steps, to raise further cash to fund its operations and, if so, what are those steps and how likely does it believe that they will be successful?	
Answer: N/A	

Mining exploration entity or oil and gas exploration entity quarterly cash flow report

8.8.3 Does the entity expect to be able to continue its operations and to meet its business objectives and, if so, on what basis?

Answer: N/A

Note: where item 8.7 is less than 2 quarters, all of questions 8.8.1, 8.8.2 and 8.8.3 above must be answered.

Compliance statement

- 1 This statement has been prepared in accordance with accounting standards and policies which comply with Listing Rule 19.11A.
- 2 This statement gives a true and fair view of the matters disclosed.

Date: 31 October 2024

Authorised by: The Board of Directors, Toro Energy Ltd
(Name of body or officer authorising release – see note 4)

Notes

1. This quarterly cash flow report and the accompanying activity report provide a basis for informing the market about the entity's activities for the past quarter, how they have been financed and the effect this has had on its cash position. An entity that wishes to disclose additional information over and above the minimum required under the Listing Rules is encouraged to do so.
2. If this quarterly cash flow report has been prepared in accordance with Australian Accounting Standards, the definitions in, and provisions of, *AASB 6: Exploration for and Evaluation of Mineral Resources* and *AASB 107: Statement of Cash Flows* apply to this report. If this quarterly cash flow report has been prepared in accordance with other accounting standards agreed by ASX pursuant to Listing Rule 19.11A, the corresponding equivalent standards apply to this report.
3. Dividends received may be classified either as cash flows from operating activities or cash flows from investing activities, depending on the accounting policy of the entity.
4. If this report has been authorised for release to the market by your board of directors, you can insert here: "By the board". If it has been authorised for release to the market by a committee of your board of directors, you can insert here: "By the [name of board committee – eg Audit and Risk Committee]". If it has been authorised for release to the market by a disclosure committee, you can insert here: "By the Disclosure Committee".
5. If this report has been authorised for release to the market by your board of directors and you wish to hold yourself out as complying with recommendation 4.2 of the ASX Corporate Governance Council's *Corporate Governance Principles and Recommendations*, the board should have received a declaration from its CEO and CFO that, in their opinion, the financial records of the entity have been properly maintained, that this report complies with the appropriate accounting standards and gives a true and fair view of the cash flows of the entity, and that their opinion has been formed on the basis of a sound system of risk management and internal control which is operating effectively.
