

AGM Presentation

14 November 2024

Disclaimer

The material contained in this document is a presentation of general information about the activities of 1414 Degrees Ltd and its related bodies, current as at the date of this presentation. It is provided in summary and does not purport to be complete. You should not rely upon it as advice for investment purposes, as it does not take into account your investment objectives, financial position or needs. These factors should be considered, with or without professional advice, when deciding if an investment is appropriate. To the extent permitted by law, no responsibility for any loss arising in any way (including by way of negligence) from anyone acting or refraining from acting as a result of this material is accepted by 1414 Degrees Ltd including any of its related bodies corporate.

This document may contain forward-looking statements with respect to the financial condition, results of operations, and business strategy of 1414 Degrees Ltd. These forward-looking statements are based on estimates, projections and assumptions made by 1414 Degrees Ltd about circumstances and events that have not yet taken place. Although 1414 Degrees Ltd believes the forward-looking statements to be reasonable, they are not certain. Forward-looking statements involve known and unknown risks, uncertainties and other factors that are in some cases beyond 1414 Degrees Ltd's control, and which may cause actual results, performance or achievements to differ materially from those expressed or implied by the forward-looking statements (and from past results). 1414 Degrees Ltd makes no representation or warranty as to the accuracy of any forward-looking statements in this presentation and undue reliance should not be placed upon such statements. Forward-looking statements may be identified by words such as "aim", "anticipate", "assume", "continue", "could", "estimate", "expect", "intend", "may", "plan", "predict", "should", "will", or "would" or the negative of such terms or other similar expressions that are predictions of or otherwise indicate future events or trends. The forward-looking statements included in this presentation speak only as of the date of this presentation. 1414 Degrees Ltd does not intend to update the forward-looking statements in this presentation in the future.

This presentation contains information which was reported in ASX announcements which can be viewed online at <https://1414degrees.com.au/>.

Certain statistical and other information included in this presentation is sourced from publicly available third-party sources and has not been independently verified.

1414 Degrees' mission is to aid energy-reliant industries to decarbonise with cost-effective thermal energy storage and low-carbon hydrogen.

This is how we do it

SiBox takes electricity and stores heat in SiBrick

Long duration thermal energy storage provides a hot air stream (300-900°C) to replace or supplement gas burning for industrial processes and electricity generation.

SiBox[®] Demonstration Module 8,000 hours continuous operation

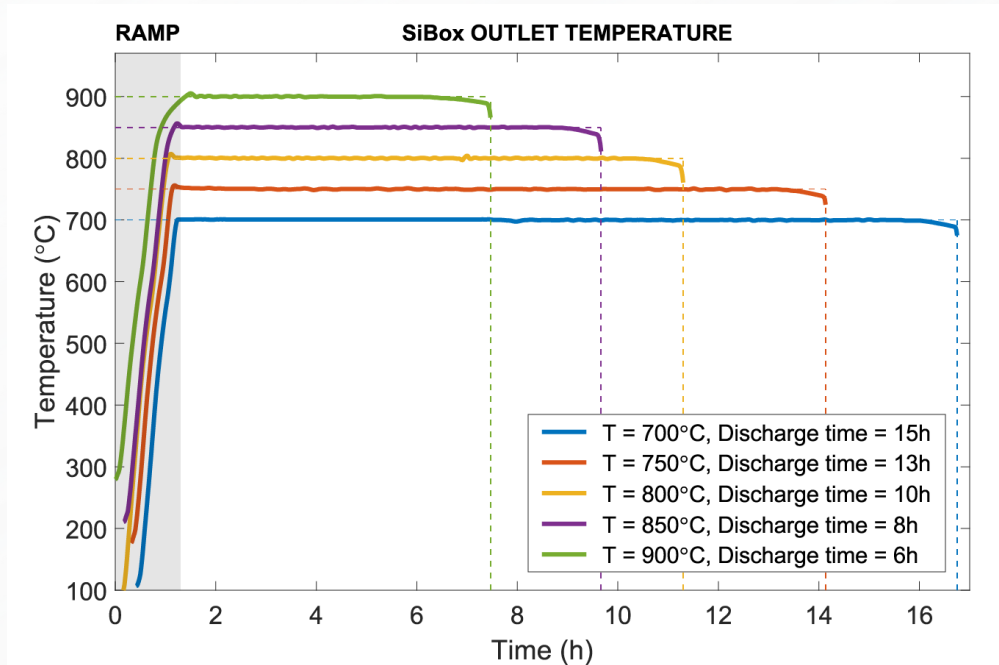

Robust and reliable technology for clean heat supply from variable electricity supply

Operational from March 2023

Proven **consistent** supply of clean hot air up to 900°C

Proven **scalability** – SiBrick modules can be replicated for GWh storage

Outlet air temperature to the process.

Shows 5 runs at various outlet temperature setpoints

Pillars of 14D's Commercialisation Strategy

Product Development

- Scaling SiBox technology to meet industrial decarbonisation needs
- Forming manufacturing partnerships to produce SiBrick at scale and ensure consistent quality

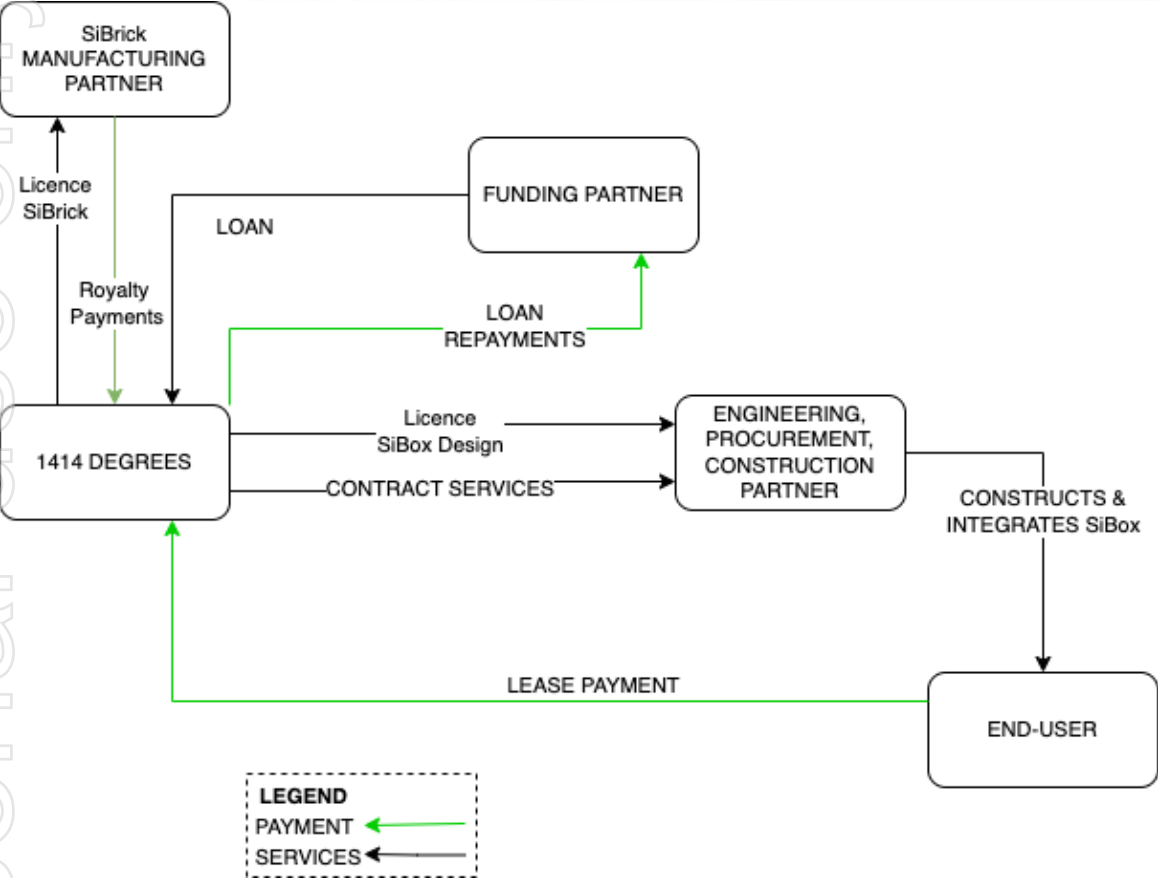

Integration Solution Partners

- Collaborating with top tier engineering and integration firms to provide complete solutions
- Enhancing competitiveness with tailored solutions for diverse industrial applications

Project Finance: Securing Strategic Funding

- Project finance partnerships of government grants and private finance to support large scale deployment
- Mitigate risk and capital demands through collaborative financial solutions

How will we make money?

14D markets and sells energy storage and generation solutions.

Working with partners, we manufacture and deliver a complete solution to industrial customers through finance agreements.

We're positioned to out-perform our competitors

We have many years of experience building energy storage solutions.

We have very credible and experienced manufacturing partners.

We are backed by large multinational energy companies.

We have demonstrated the ability to safely deliver solutions on time and at scale.

SiPHyR™ low-carbon hydrogen from natural gas

Combining SiBrick and a bubble column reactor to deliver decarbonised natural gas for industries & homes

Low-emissions H₂ could supply 25% of world's energy needs and become a **EUR 10 trillion market** if <US\$2/kg price point is achieved.

Turquoise H₂ – lower cost and more attractive alternative to blue or green H₂. Leveraging existing infrastructure to scale up means a faster path to implementation.

GAS-TESS

Capturing, storing, and regenerating waste heat energy

SA Water

Government of
South Australia

Since 2008, we have been pioneers in thermal energy storage with a strong history of safety, innovation, research and development.

GAS-TESS technology uses regenerative burners to capture flare gas, storing the energy as heat that can be returned to industrial processes, supporting efficient and sustainable energy use.

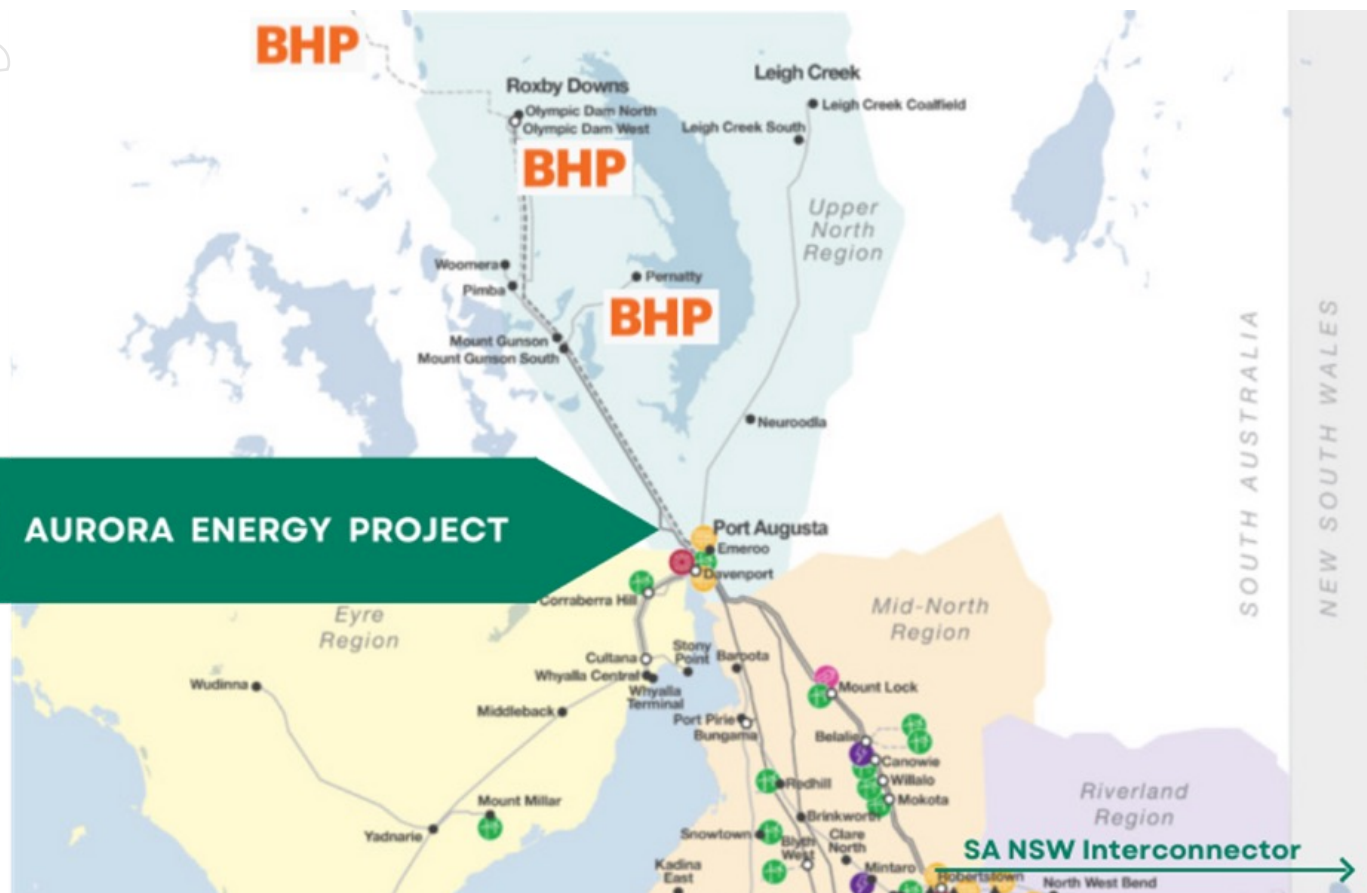

Aurora Energy Precinct

Access to high voltage
transmission assets in the
National Electricity Market

140MW 2-hour Li-ion Battery Energy Storage System

Strategic position in zone with excess renewable generation to drive revenue from National Electricity Market

Our path to commercial success

1. Mission-Driven Innovation

- a. Developing cost-effective thermal energy storage solutions for industrial decarbonisation and low-carbon hydrogen production.

2. SiBox® Technology

- a. Proven high-temperature storage solution with 8,000+ hours of continuous operation.
- b. Positioned to replace fossil fuel-based heat in industrial processes.

3. Strategic Commercialisation

- a. Partnering with manufacturers, engineering firms, and financiers to scale SiBox production and deployment.
- b. Securing project financing and government support to drive adoption.

4. Market Opportunity

- a. 40% of industrial boilers in Australia require replacement in the next 5 years.
- b. Strong demand for decarbonisation solutions as industries commit to 2030 carbon reduction goals.

5. Revenue Potential & Growth Strategy

- a. Leveraging experience in energy storage and robust partnerships to deliver end-to-end solutions.
- b. Positioned to outperform competitors with a combination of unique technology, reliable supply chain partners, and strategic financing.

Thank you.
