Operational summary

- Capital SMART continued to perform well in 1Q25 as the benefits of Project SHIFT and the additional vehicle repair capacity from site conversions were embedded within the business. Initiatives to optimise operations through insourcing additional repair processes and increasing non-OEM parts usage have also delivered improved margins.
- AMA Collision is continuing to focus on the key areas of capacity, volume efficiency, method of repair and customer service. Good progress has been made, however, there is significant room for further improvement which will drive improvement in financial performance. Areas of the network are performing strongly, and other key locations have underperformed. Further work will continue in these areas to improve underlying performance. Site refresh and rebranding works are underway or completed at 7 sites. In addition to investing in existing sites, the Group is actively looking at opportunities to grow the AMA Collision portfolio through targeted acquisitions of single sites.
- Wales continues to deliver strong results as the business experiences strong work provision and the benefits of the Adelaide site relocation and removal of bottlenecks are realised. Upgrades of the Western Australia site continue and are expected to be completed in 3Q25.
- Specialist Businesses continues to roll-out TechRight locations. The TrackRight Dandenong site transition was completed in October, which will deliver increased productive capacity to the site.
- 1Q25 closed with 452 apprentices and a total of 3,512 team members, representing a net increase of 145 team members (72 in 1Q25). Expecting 140+ international recruits in H125.
- ACM Parts sale process continues and is expected to complete in the coming months.
