

DE GREY  
MINING LTD

# ANNUAL GENERAL MEETING

19 November 2024

ersonal use only

# DISCLAIMERS

## Forward looking statements and forecasts

This presentation has been prepared by De Grey Mining Ltd and contains forward-looking statements. Forward-looking statements include those containing words such as “anticipate”, “estimates”, “forecasts”, “indicative”, “should”, “will”, “would”, “expects”, “plans” or similar expressions. Indications of, and guidance or outlook on, future earnings or financial position or performance, including forecast financial information derived from the production target and the DFS, are also forward-looking statements. You are cautioned not to place undue reliance on forward-looking statements. Forward-looking statements are provided as a general guide only.

Such forward-looking statements are based on information available as at the date of this presentation and are not guarantees of future performance and involve known and unknown risks, uncertainties, assumptions and other important factors, many of which are beyond the control of the Company, are preliminary views and are based on assumptions and contingencies subject to change without notice, and which could cause actual results or trends, projections, guidance and estimates to differ materially from those expressed in this presentation.

Relevant factors include risks associated with exploring for gold, project development and construction and the mining, processing and sale of gold, including without limitation, the ability to obtain debt finance on expected terms, obtaining environmental approvals and the time and conditions attached to the same, changes in commodity prices, foreign exchange fluctuations and general economic conditions, increased costs and demand for production inputs, the speculative nature of exploration and project development, including the risks of obtaining necessary licenses and permits and diminishing quantities or grades of reserves, political and social risks, changes to the regulatory framework within which the Company operates or may in the future operate, environmental conditions including extreme weather conditions, geological and geotechnical events, and environmental issues, recruitment and retention of personnel, industrial relations issues and litigation.

Readers of this presentation are cautioned not to place undue reliance on forward-looking statements included in it.

Forward looking statements in this presentation only apply at the date of issue. Subject to any continuing obligations under applicable law or any relevant securities exchange listing rules, in providing this information the Company does not undertake any obligation to publicly update or revise any of the forward-looking statements or to advise of any change in events, conditions or circumstances on which any such statement is based.

## Production Targets

The production targets and forecast financial information derived from them in this announcement were reported in the Scoping, Preliminary Feasibility and Definitive Feasibility Studies for the Hemi Gold Project (“Project” or “Hemi”) in the announcements titled “De Grey Mining Mallina Gold Project Scoping Study”, “Mallina Gold Project Preliminary Feasibility Study Outcomes”, “Hemi Gold Project Definitive Feasibility Study” and “Hemi Regional Scoping Study” dated 5 October 2021, 8 September 2022, 28 September 2023 and 11 July 2024, respectively. The total life of mine production of the Hemi Gold Project schedule is underpinned by 99% Probable Ore Reserves, with the remaining 1% being classified as Inferred Mineral Resources. The information in this presentation that related to the Regional Scoping Study and its outcomes for the Hemi Regional deposits (“Hemi Regional”) is extracted from the ASX announcement “Hemi Regional Scoping Study” dated 11 July 2024. The Hemi Regional life of mine production is underpinned by 84% Measured and Indicated Mineral Resources, with the remaining 16% being classified as Inferred Mineral Resources.

There is a low level of geological confidence associated with Inferred Mineral Resources and there is no certainty that further exploration work will result in the determination of Indicated Mineral Resources or that the production target itself will be realised. The stated production target is based on the Company's current expectations of future results or events and should not be solely relied upon by investors when making investment decisions. Further evaluation work and appropriate studies are required to establish sufficient confidence that this target will be met. De Grey confirms that the financial viability of the Hemi Gold Project and the Hemi Regionals is not dependent on the inclusion of Inferred Mineral Resources in the production schedule.

De Grey confirms that it is not aware of any new information or data that materially affects the information included in the latest of those announcements. All material assumptions and technical parameters underpinning the estimates or production targets or forecast financial information derived from a production target (as applicable) in the latest of those ASX announcements continue to apply and have not materially changed. De Grey confirms that the form and context in which the Competent Person's findings are presented have not been materially modified from the latest of those announcements.

# DISCLAIMERS

## Exploration Results

The information in this presentation that relates to the Company's Exploration Results is based on, and fairly represents, information and supporting documentation prepared by Mr Philip Tornatora, a Competent Person who is a member of the Australasian Institute of Mining and Metallurgy. Mr Tornatora is an employee of the Company and has sufficient experience that is relevant to the style of mineralisation and type of deposit under consideration and to the activity being undertaken to qualify as a Competent Person as defined in the 2012 Edition of the "Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves." Mr Tornatora consents to the inclusion in this announcement of the matters based on his information and supporting documentation in the form and context in which it appears.

## Mineral Resources and Ore Reserves

This announcement contains estimates of De Grey's Mineral Resources and Ore Reserves. The information in this presentation that relates to De Grey's Mineral Resources and Ore Reserves has been extracted from De Grey's previous ASX announcements including:

1. ASX announcement: "Hemi Gold Project Mineral Resource Estimate 2024" dated 14 November 2024
2. ASX announcement: "Hemi Gold Project Resource Update – November 2023" dated 21 November 2023
3. ASX Announcement "Hemi Gold Project Definitive Feasibility Study" dated 28 September 2023 ("DFS")
4. ASX Announcement "Mallina Gold Project Resource Statement – 2023" dated 15 June 2023
5. ASX Announcement "Mallina Gold Project Preliminary Feasibility Study Outcomes" dated 8 September 2022
6. ASX announcement "Mallina Gold Project Resource Statement" dated 31 May 2022
7. ASX announcement "Mallina Gold Project Scoping Study" dated 5 October 2021
8. ASX announcement "6.8Moz Hemi Maiden Mineral Resource drives MGP to 9.0Moz" dated 23 June 2021

Copies of these announcements are available at [www.asx.com.au](http://www.asx.com.au) or <https://degreymining.com.au/asx-releases/>. De Grey confirms that it is not aware of any new information or data that materially affects the information included in those announcements and, in relation to the estimates of De Grey's Mineral Resources and Ore Reserves, that all material assumptions and technical parameters underpinning the estimates in the announcements continue to apply and have not materially changed. De Grey confirms that the form and context in which the Competent Person's findings are presented have not been materially modified from those announcements.

## Disclaimer

This presentation is dated 19 November 2024 and is current as at that date; the Company disclaims any obligation to update this presentation. It has been prepared with due care, but no representation is made as to the accuracy, fairness or completeness of the information. It contains a summary of information about the Company, is general in nature and does not purport to be complete, or contain all the information an investor would require when evaluating a possible investment in the Company. To the maximum extent permitted by law, the Company, related bodies corporate and their directors, agents, officers and advisers disclaim all liabilities and make no representations regarding the presentation. This presentation does not constitute financial product or investment advice and has been prepared without taking into account the objectives, financial or tax situation or particular needs of any individual investor. Seek advice from your own financial, legal, tax and other independent advisers.

# ACKNOWLEDGEMENT OF COUNTRY

At De Grey Mining, we acknowledge the Traditional Custodians of the land upon which we operate, the Kariyarra, Ngarluma, Nyamal, Ngarla, Mallina and Whadjuk Noongar peoples. We recognise their unique cultural heritage, beliefs and connection to these lands, waters and communities.

We pay our respects to all members of these Indigenous communities, and to Elders past, present and emerging. We also recognise the importance of continued protection and preservation of cultural, spiritual and educational practices.

As we value treating all people with respect, we are committed to building successful and mutually beneficial relationships with the Traditional Custodians throughout our areas of operation.

# CORPORATE OVERVIEW

## Corporate Structure

# THE PILBARA – A NEW GOLD PROVINCE

Advancing one of the world's premier gold development projects into production

- A +10Moz gold discovery at Hemi, located 85km by road from Port Hedland
- A 150km-long provincial scale tenement package
- Relatively limited drilling completed outside Hemi since its initial discovery in 2019
- Rapid growth in high confidence Mineral Resource and Ore Reserve:
  - Maiden resource growth of ~500koz per month
  - Hemi gold endowment ~25koz per vertical metre
  - Inferred Mineral Resource definition cost of ~\$11/oz
  - More 1 million metres of drilling
- Studies indicate Hemi will be a top five Australian gold mine
- Hemi's production potential has continued to grow throughout the studies phases as more exploration is completed
- A highly strategic regional asset for processing free milling and refractory gold ores and concentrates in the coming decades – e.g. Ashburton Option Agreement
- De Grey is aiming to deliver maximum shareholder returns through a future production re-rating and continued growth in production and mine life

# PROJECT HIGHLIGHTS IN THE LAST YEAR

## Building value and de-risking the Hemi Gold Project

**November 2023**

Major strike and depth extensions at Eagle and Diucon

**November 2023**

Hemi Mineral Resource Estimate updated to 10.5Moz  
Eagle cut-back adds ~700koz to DFS production profile

**February 2024**

Option to acquire the Ashburton gold project in the Pilbara

**March 2024**

Ivan Mullany appointed Chair of the Hemi Project Committee

**August 2024**

Resubmission of documents to Federal environmental regulators

**July 2024**

Geoff Fenton appointed General Manager Operations – Hemi

**June 2024**

Credit approved terms received for \$1,130M Hemi project financing

**May 2024**

Underwritten \$600M equity raising to fully fund Hemi equity component

**August 2024**

Approval for \$150M loan from the Northern Australia Infrastructure Facility (NAIF)

**October 2024**

Outstanding Brolga infill drill results

**October 2024**

Resubmission of documents to State environmental regulators

**November 2024**

Hemi Mineral Resource Estimate increases to 11.2Moz

# CONSISTENT GROWTH STRATEGY

Transitioning from studies to development

Becoming a Tier 1 gold producer and achieve a share price re-rating

Complete project implementation activities and progress Hemi towards FID

Continue to make new discoveries and extend resources to support increased production rates and mine life

Continue to grow organisational capability in people and systems to meet strategy

# MINERAL RESOURCE GROWTH

Hemi is a provincial scale gold system which continues to get bigger

The Hemi and Hemi Regional Mineral Resource Estimates include Inferred Mineral Resources which have a lower level of geological confidence associated with Inferred Mineral Resources and there is no certainty that further exploration work will result in the determination of Indicated Mineral Resources. Full details of the Hemi Mineral Resource Estimates are contained in the appendices.

# LARGE DEPOSITS ARE INCREASINGLY SCARCE

The value of a +10Moz deposit with provincial scale exploration upside is only growing

Source: S&P Global Intelligence data August 2024. A major gold discovery is defined by a minimum 2Moz of gold in Reserves, Resources and past production. A summary of the data can be found at: <https://www.spglobal.com/marketintelligence/en/news-insights/research/gold-from-major-discoveries-grows-3-although-recent-discoveries-remain-scarce>

# DFS OUTCOMES

# DEFINITIVE FEASIBILITY STUDY HIGHLIGHTS

Results of the DFS show high confidence physical metrics<sup>1</sup>

A future **top 5** Australian Gold Mine based on production

Total production<sup>2</sup> **5.7Moz** over **12 years**

**Mining physicals**  
**122Mt @ 1.5g/t Au**  
processed at 93.5% recovery

**Annual production**  
**553koz:** first 5 years<sup>2</sup>  
**530koz:** first 10 years<sup>2</sup>

Updated Ore Reserve  
**6.0Moz @ 1.5g/t Au**

**10Mtpa** plant with 800ktpa pressure oxidation circuit

Reserve contribution to the production profile **99%**

Production profile entirely sourced from **Hemi deposits**

1. Outcomes, forecasts and comparisons taken from the DFS dated 28 September 2023.  
2. The mine plan contains approximately 1% Inferred Mineral Resources. There is a low level of geological confidence associated with Inferred Mineral Resources and there is no certainty that further exploration work will result in the determination of Indicated Mineral Resources or that the Production Target itself will be realised.

# DEFINITIVE FEASIBILITY STUDY HIGHLIGHTS

Results of the DFS show outstanding financial metrics at a \$2,700/oz gold price

Outcomes, forecasts and comparisons taken from the DFS dated 28 September 2023. The mine plan contains approximately 1% Inferred Mineral Resources. There is a low level of geological confidence associated with Inferred Mineral Resources and there is no certainty that further exploration work will result in the determination of Indicated Mineral Resources or that the Production Target itself will be realised.  
1. As of 18 November 2024. Source: The Perth Mint

# ECONOMIC AND SOCIAL CONTRIBUTION

Hemi creates substantial economic and social benefits in the Pilbara and WA

# CURRENT PROJECT ACTIVITIES

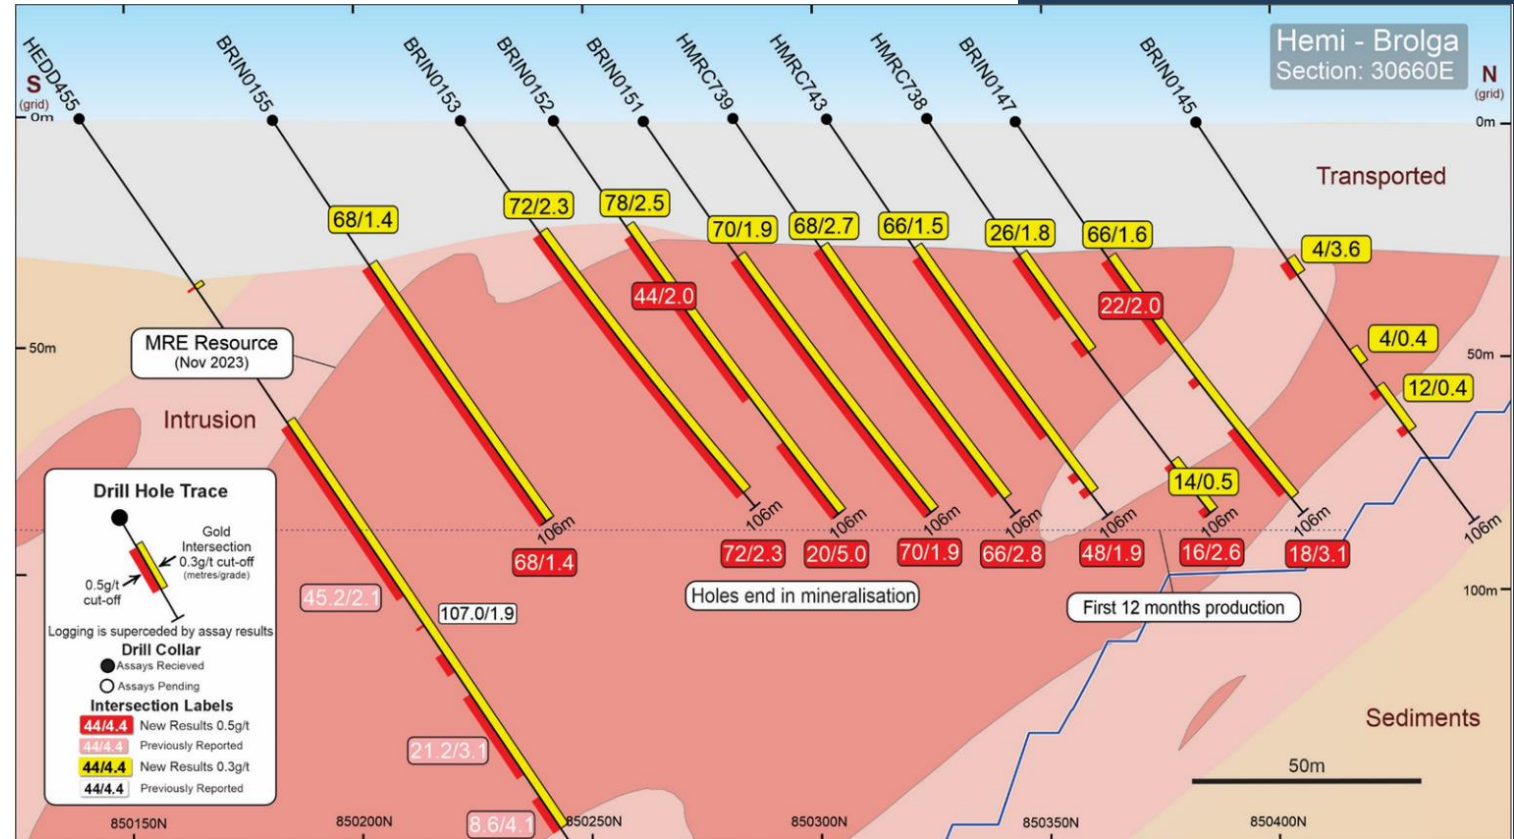

# DE-RISKING THE BROLGA STARTER PIT

Hemi's first mining area delivers rapid project payback of less than two years

- Brolga orebody ~250m to 300m wide and ~600m long mineralised intrusion
- Brolga starter pit contains ~1.42Moz gold at a strip ratio of 2.4:1 and operating cost of approximately \$965/oz
- Generates \$2,200M at a gold price of approximately \$2,700/oz Au delivering a payback period of less than two years
- Recently announced outstanding infill grade control drilling allows detailed mine planning, ROM pad design and processing schedule for the critical commissioning and ramp-up period
- Maiden Brolga JORC Measured MRE of 600koz corresponds with the first year of ore mining continues to derisk the Project

# CURRENT PROJECT STATUS

## A Tier 1 gold project rapidly de-risking and advancing towards production

- Project Financing nearing completion:
  - Equity financing secured with \$900M (before costs) raised in FY2024
  - Credit approved terms from leading lenders received for \$1B senior debt facility plus a \$130M overrun facility
  - Approval from Northern Australia Infrastructure Facility (NAIF) to contribute \$150M into the senior debt facility
  - Targeting completion of final documentation for senior debt facility in the current December half 2024
  - Expected to be fully funded to gold production at Hemi including a substantial liquidity buffer while maintaining exploration expenditure
- Project Approvals progressing:
  - Mining agreement in place with Kariyarra people since December 2022
  - Mining lease over Hemi granted in August 2023
  - Initial Federal approval documentation submitted in May 2023 and State documentation in June 2023
  - Levels of assessment received at Federal and State levels were as expected in the Hemi DFS
  - Resubmission of Federal documentation on requests for further information in August 2024 and State requests for further information in November 2024
  - Federal approval expected March quarter 2025 with State approval timing guidance expected to be provided in the December quarter, following engagement with State regulators

# PROJECT STATUS AND CAPABILITY GROWTH

## A Tier 1 gold project rapidly advancing and de-risking

- Project activities well underway:
  - Front end engineering and design completed to ~30% accuracy to facilitate tendering process
  - Ordering of major long lead plant equipment nearing completion
- Infrastructure taking shape:
  - Lease over Atlas Iron tenements 10km south of Hemi provides road access, communications and 200-person camp
  - Power purchase arrangements well advanced with multiple options under assessment
- Major contracts advancing:
  - EPCM and EPC tenders issued for plant construction
  - Contract mining tender will be issued in the December quarter
- Organisation capability growing
  - ~125 personnel employed
  - 25 key personnel in the Project group and 29 in Exploration
  - Remainder covering business services including IT, People and Capability, Risk Health Safety and Environment

# LONG LEAD ITEMS CAPITAL COSTS

## Order of long-lead time items progressively de-risking the capital cost estimate

- Orders for plant and infrastructure long-lead items to date is in line with the DFS capital cost estimate
- Total DFS capital cost estimate for plant and infrastructure excluding contingency was \$1,131M meaning the growth and contingency allowance of \$167M and project finance liquidity buffer of \$130M total ~\$300M relative to the remaining DFS plant and infrastructure capital cost estimate of \$962M
- Review of the capital cost of the Project in the March quarter 2025 following receipt of tenders for the plant construction and mining contracts in the December quarter 2024

Long Lead Package	Awarded Scale
Primary Gyrotary Crusher	Sized for future expansion
Ball Mills	10Mtpa
High Pressure Grinding Roller	Sized for future expansion
Secondary Cone Crusher	10Mtpa
Cyclone Clusters	10Mtpa
Flotation Cells	Sized for future expansion (with modifications)
Intertank Screens	10Mtpa
Thickeners and CCD's	10Mtpa
Wet and Dry Vibrating Screens	Sized for future expansion
Permanent Accommodation	600 person camp
Total DFS Estimated Cost	\$168.6M
Total Committed Cost	\$169.3M
Cost Variance	+\$0.7M (+0.5%)

# MT DOVE LEASE AGREEMENT

**Strategic transaction to access a laydown area and infrastructure 10km south of Hemi**

- Lease signed with Atlas Iron for up to 15 years over Mt Dove
- Turn-off from Great Northern Highway connects the Mt Dove and Hemi access roads
- Infrastructure in place at Mt Dove:
  - Operating borefield
  - Pipeline
  - Power generation
  - Communication tower
  - Decommissioned camp
  - Gravel pit
  - Refurbished 200-person camp
- Provides laydown areas which will be used to locate equipment prior to receiving Hemi final approvals

# OPERATIONAL AND BUSINESS READINESS

## Preparing for an operational transition

- Brolga grade control drilling covering the first year of production complete
- Metallurgical testwork continuing with focus on early production areas
- Business teams for development in place and evolving for operations
- Commercial Systems implementation well advanced
- Data management and reporting systems developed and being refined for operations
- Communications infrastructure currently being upgraded suitable for future requirements of operations
- Appointment of Geoff Fenton as General Manager Operations, Hemi

# PRODUCTION AND GROWTH OPPORTUNITIES

# UPSIDE TO DFS METRICS

Preliminary assessment of provincial scale upside opportunities underway

Potential to increase the Diucon and Eagle pits based on significant extensions identified after the DFS mine design cut-off

Opportunity for the development of the Regional deposits including establishing a Regional concentrator at Withnell concurrently treating Regional deposits west of Hemi

Concept study of the underground mining opportunity of the 1.4Moz MRE below 390m, concurrent with open pit production at Hemi

Conservatism in the DFS design – potential to increase nameplate throughput and scalability built into the comminution and POx circuits

Further near surface success in the Greater Hemi area at similar grades to Hemi has the potential to increase mine life from open pits

Strong leverage to a rising gold price. For example, a ~10% increase from the DFS assumed gold price of A\$2,700/oz, would result in a ~A\$700m increase in post-tax NPV<sub>5%</sub>

# UPSIDE TO THE DFS PRODUCTION PROFILE

DFS + Eagle pit extension + Regionals production profile producing 7.4Moz

The Hemi production profile contains 1% Inferred Mineral Resources and the Hemi Regional production profile contains 16% Inferred Mineral Resources. The Eagle Extensions are 100% Inferred Mineral Resources. There is a low level of geological confidence associated with Inferred Mineral Resources and there is no certainty that further exploration work will result in the determination of Indicated Mineral Resources or that the production profile itself will be realised. Full details of the Hemi Mineral Resource Estimates are contained in the appendices.

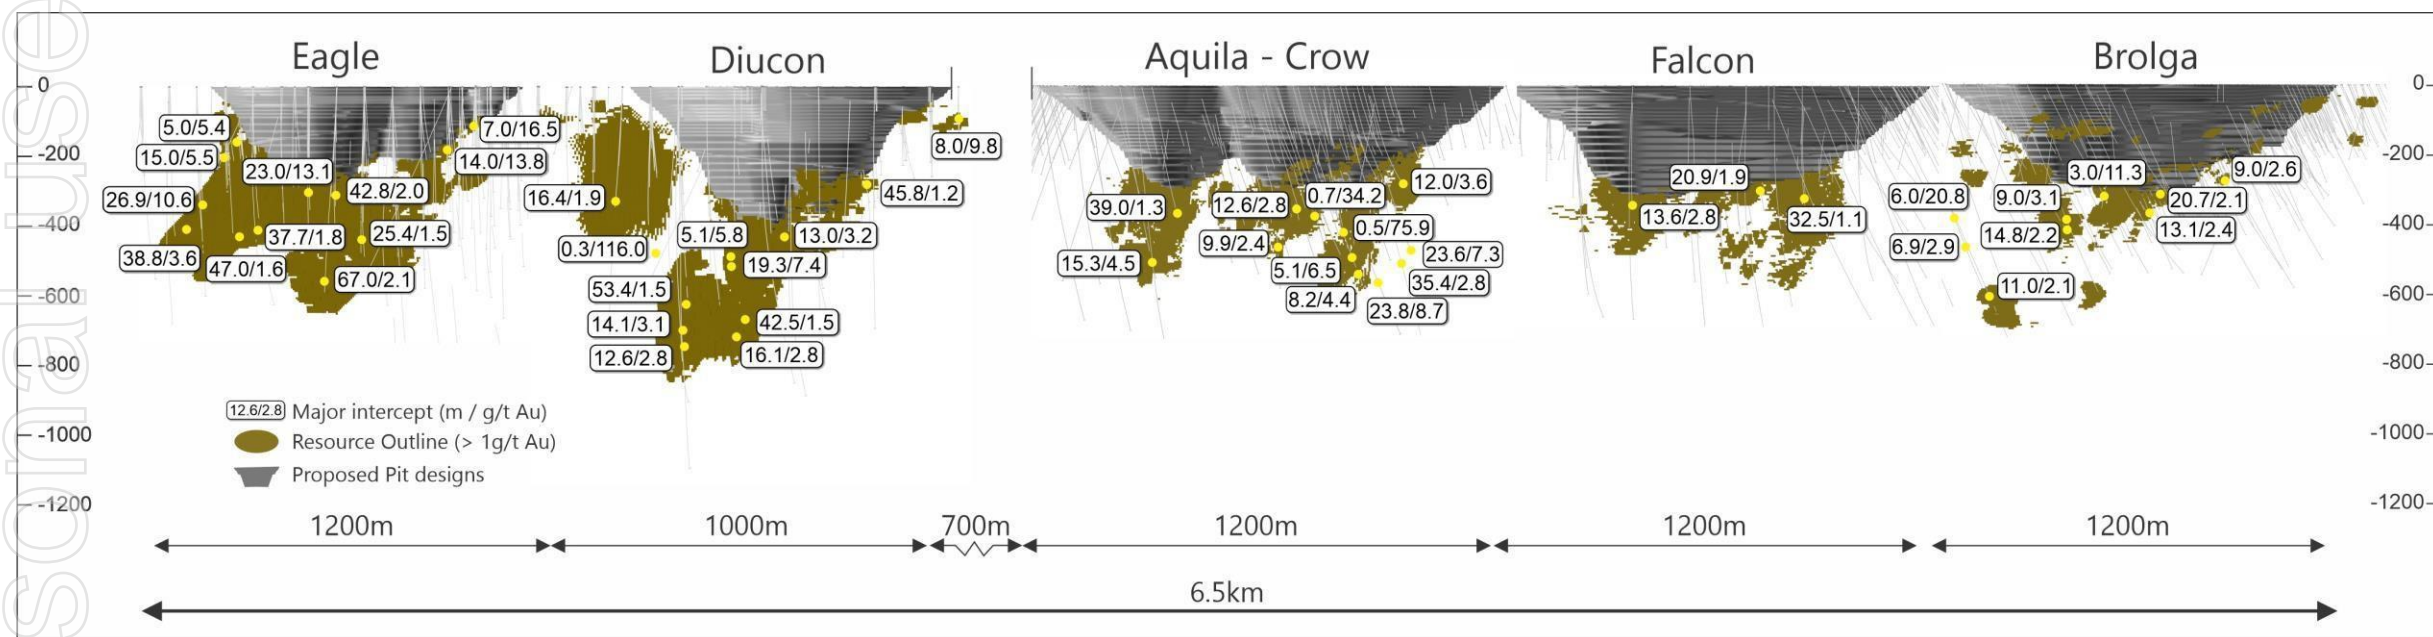

# HEMI UNDERGROUND PRODUCTION POTENTIAL

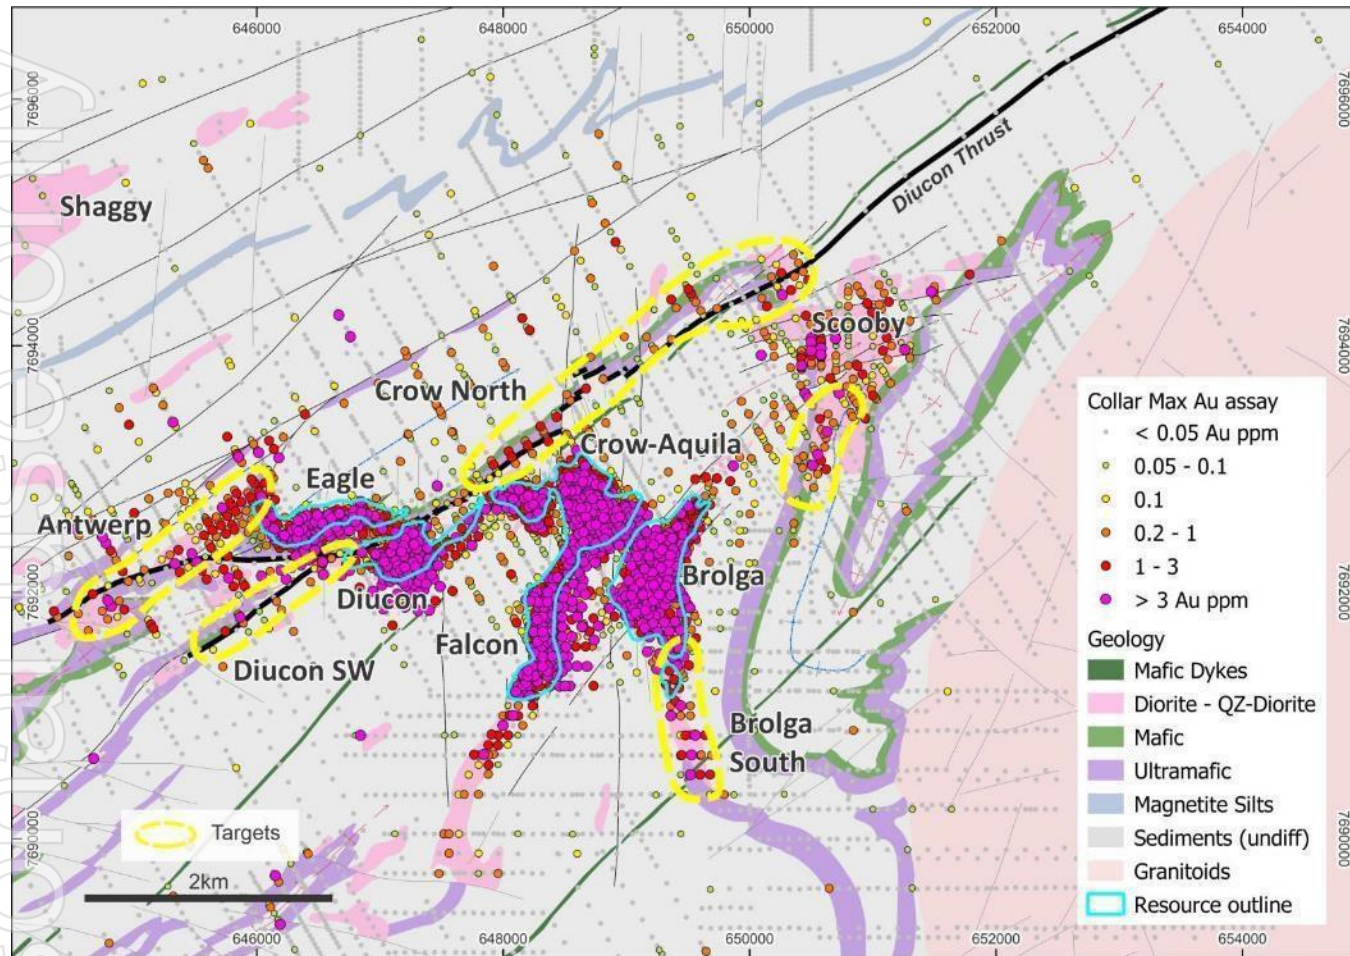

## MRE updates in November 2023 and 2024 demonstrate more areas with underground mining potential

- 25koz per vertical metre to 390m depth, remains open and with limited drilling at depth along ~6.5km combined strike
- Wide spaced drilling announced this year at Diucon, Eagle and Aquila/Crow continues to provide encouragement
- Infill drilling currently underway on a test area beneath Eagle in support of the conceptual underground mining study
- Conceptual assessment into the potential scale of underground mining at Hemi is nearing completion, targeting concurrent mining from underground with open pit production, and is expected to be released in the December quarter 2024

# GREATER HEMI EXPLORATION

Targeting additional large scale, near surface, intrusion hosted discoveries and resource extensions

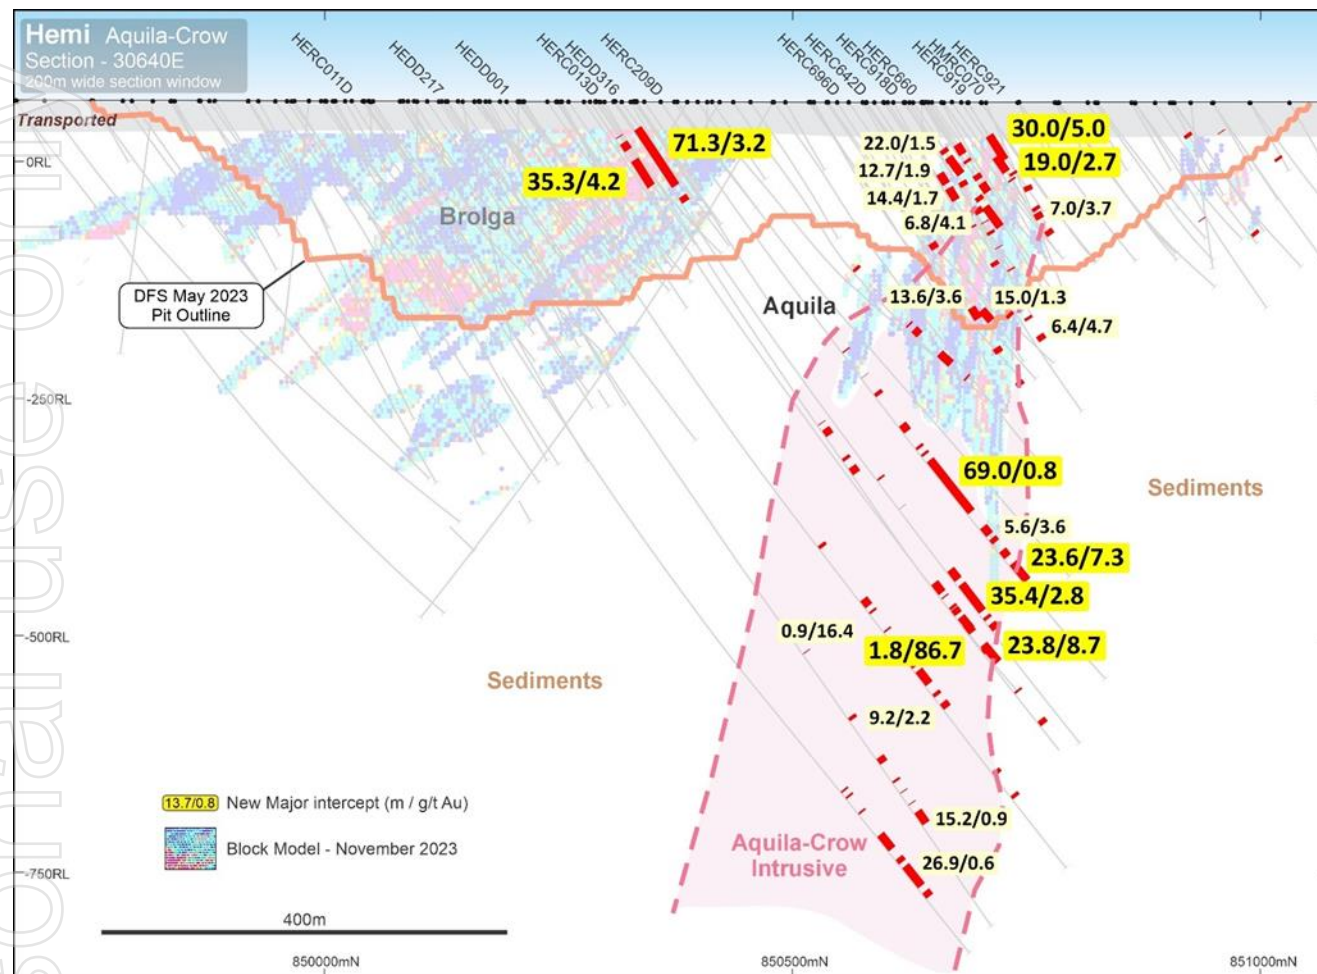

- Hemi mineralisation extended in RC and diamond drilling at Antwerp
- Extensional drilling results recently announced at Crow and Aquila
- ~1.1Moz Mineral Resource extensions achieved at Diucon and Eagle since the Hemi DFS
- AC drilling nearing completion at Brolga South and moving to Regional targets
- Drilling continues along the Diucon Thrust, currently with RC drilling in progress at Scooby
- Diamond drilling currently underway beneath Eagle to support UG conceptual study and will then move to Scooby

# HEMI – CROW AND AQUILA

Wide mineralised system continues with continued potential for Resource growth

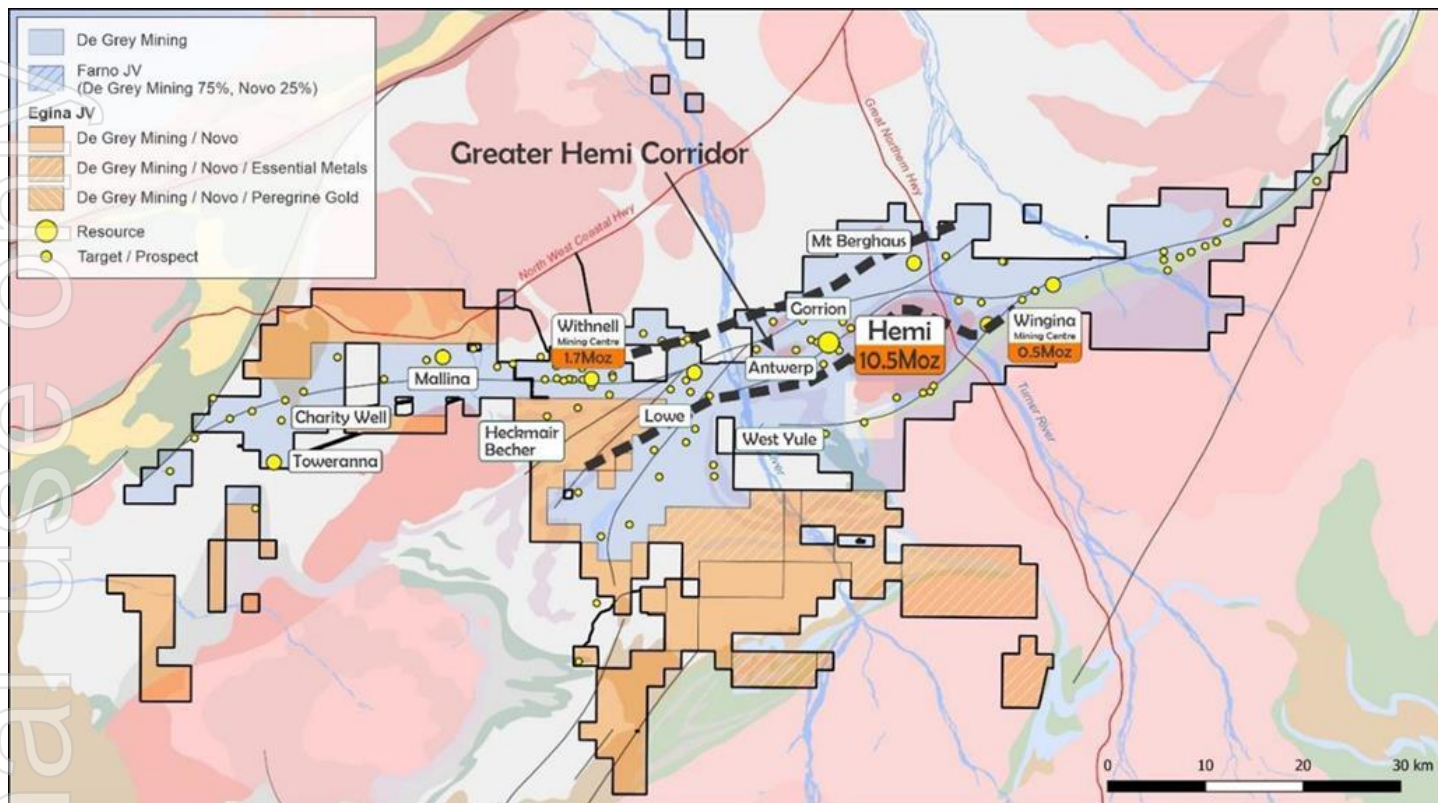

- Thick, high-grade intervals (McLeod lodes) intersected in Crow associated with quartz veining
- Confirmation of quality of Brolga in RC “pre-collars” for deeper drilling into Aquila
- Wide, mineralised intrusion continues at depth at Aquila
- Thick, high-grade zones in Aquila footwall
- Recent Mineral Resource extensional drilling Eagle, Antwerp and Aquila-Crow
- Extensional drilling added ~0.5Moz to the Mineral Resource at Crow and Aquila in November 2024
- Drilling continues to support conceptual underground mining studies

# PROVINCIAL SCALE EXPLORATION UPSIDE

## Mineralised structural corridor along 150km strike tenement package

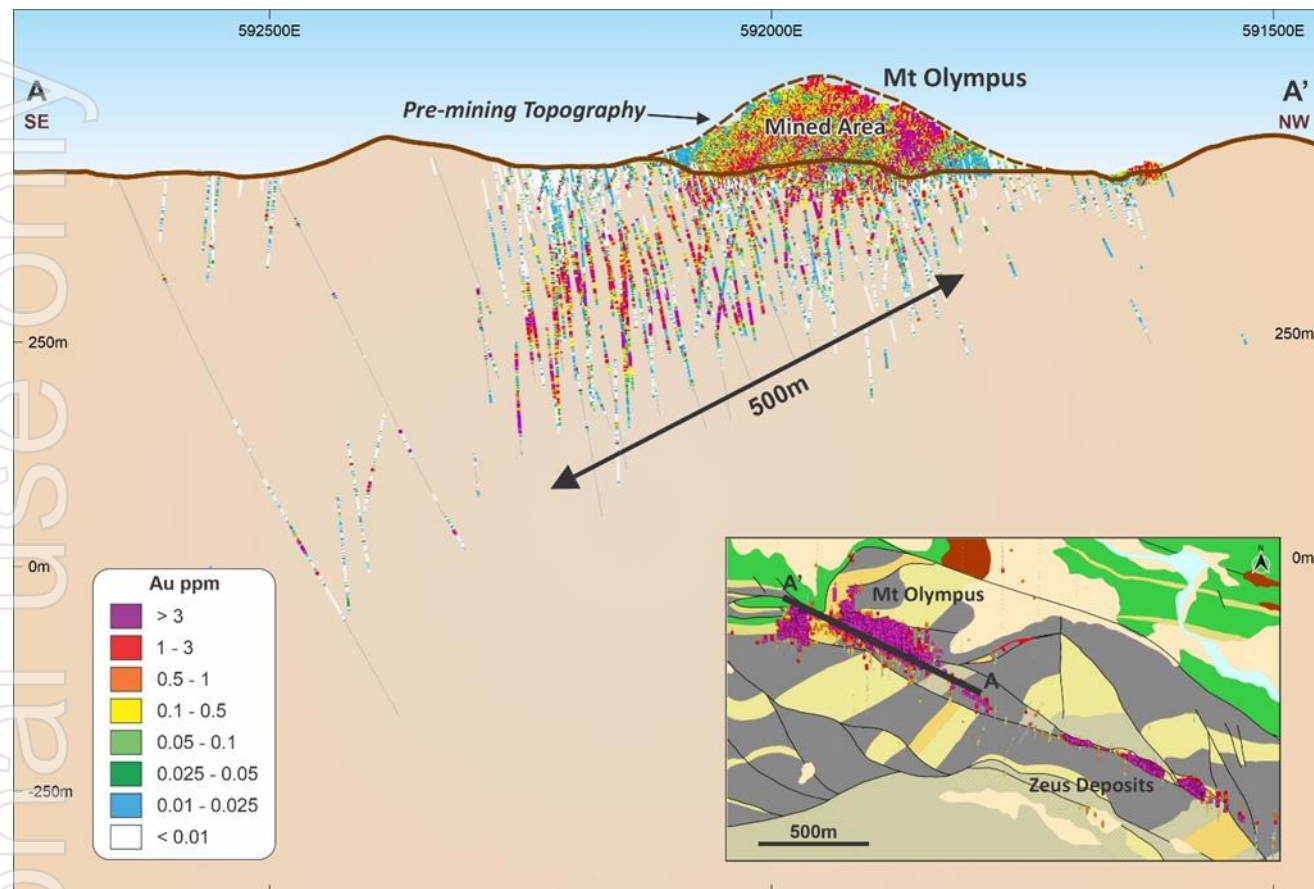

- Anomalous gold intersected and multiple deposits over 150km tenement package
- Targeting +1Moz near surface new discoveries
- Current aircore drilling at Mt Berghaus testing ~10km structural setting
- \$7M minimum expenditure commitment achieved on the Egina JV\* with Novo increasing De Grey exposure to ~2,500km<sup>2</sup>
- Results from West Yule (6m @ 3.4g/t, 20m @ 1.2g/t Au) and Egina JV (Lowe - 8m at 4.7g/t Au, Irvine - 4m @ 2.1g/t Au, Heckmair - 6m @ 1.2g/t Au)

\*Refer to the Company's ASX announcement titled: "De Grey reaches minimum spend at Novo's Egina" dated 10 October 2024

# REGIONAL PRODUCTION UPSIDE

## Option over Kalamazoo's Ashburton Project

- 12 to 18 month Option (commenced February 2023) over Kalamazoo's Ashburton Project\* located ~290km southwest of Hemi
- Existing Mineral Resource 1.44Moz @ 2.8g/t Au and remains open
- Company has completed diamond drilling to obtain metallurgical test samples, confirm geology and mineralisation
- Assaying to be completed shortly, followed by metallurgical testwork to confirm suitability with Hemi flowsheet
- Potential for Regional concentrator providing concentrate to Hemi's back-end POx circuit

\* Refer to the Company's ASX announcement titled: "Option to Acquire the Ashburton Gold Project" dated 6 February 2024

# OBJECTIVES FOR 2025

ersonal use only

# OBJECTIVES FOR 2025

Commencing construction of Australia's next Tier 1 gold project

**Complete Project Financing** process to fund construction

Secure Federal and State **environmental approvals** to allow a Final Investment Decision

**Award major contracts** including for mining and plant construction

**Final Investment Decision** on the construction of Hemi

Continue **project de-risking** and **operational readiness** activities

**Exploration** across the project area to grow resources and test for large, open pit deposits

## Relevant Exploration Results and Updates – Greater Hemi and Regional

- Acquisition of Indee Gold - scale and development momentum, 9 February 2017
- Toweranna A High Grade Gold System, 31 August 2017
- Significant High-Grade Gold intersected -Toweranna Prospect, 19 December 2017
- Drilling Update - Toweranna 1M confirm High grade gold lodes, 2 February 2018
- Toweranna drilling expands high-grade gold footprint, 3 July 2018
- Ongoing High Grade Gold hits at Mallina and Toweranna, 15 October 2018
- Further high grade hits beneath Withnell, 5 November 2018
- Further high grade drilling results achieved at Withnell, 20 March 2019
- 136m@ 2.0g/t & Further High Grade Drill Results at Toweranna, 15 April 2019
- Multiple High Grade Intercepts continue at Toweranna, 21 May 2019
- Ongoing High Grade Intercepts at Toweranna, 11 June 2019
- Toweranna High Gold recoveries - Conventional CIL Processing, 13 June 2019
- Withnell drilling continues to delineate high grade Au lodes, 11 July 2019
- High grade gold veins at Toweranna, 3 October 2019
- Positive drill results extend Withnell potential, 25 November 2019
- High grade gold veins at Toweranna, 26 November 2019
- New Gold Discoveries at Hemi and Antwerp, 17 December 2019
- Hemi confirms potential for major discovery, 6 February 2020
- Further impressive thick and high grade gold at Hemi, 11 February 2020
- Major extension of sulphide mineralisation at Hemi, 26 February 2020
- RC drilling confirms large scale gold system at Hemi, 5 March 2020
- Further extensive sulphide mineralisation intersected - Hemi, 10 March 2020
- Hemi continues to Grow, 17 March 2020
- Major Gold Extensions defined at BROLGA, 25 March 2020
- Mallina Update, 1 April 2020
- BROLGA Continues to Grow, 9 April 2020
- Aircore drilling defines third large gold zone at Hemi, 17 April 2020
- Brolga and Aquila drilling update, 22 April 2020
- Large gold system defined at Crow, 1 May 2020
- Significant Extension at HEMI- Aquila, 27 May 2020
- HEMI – Major extension, 5 June 2020
- HEMI – Broad high grade extensions at Aquila, 9 June 2020
- Further High Grade & Expanded Footprint at Hemi, 22 June 2020
- High gold recoveries achieved at Hemi, 9 July 2020
- Further extensions confirmed at Brolga, 10 July 2020
- Hemi scale grows with Aquila new extensions, 22 July 2020
- Strong results boost Aquila westerly extension, 5 August 2020
- Aquila mineralisation extends 400m vertical & New Crow Lode, 13 August 2020
- Brolga mineralisation extends north towards Aquila and Scooby Zones, 21 August 2020
- Exceptional high grade gold intercept at Crow, 27 August 2020
- Falcon Major new gold discovery at Hemi, 2 September 2020
- Falcon – Drilling Update, 15 September 2020
- Strong Brolga infill and extensions, 25 September 2020
- Encouraging Extensional & Infill Drilling Results at Aquila and Crow, 7 October 2020
- Thick High Grade near surface hits continue at Falcon, 12 October 2020
- Further positive results extend Aquila and Crow, 29 October 2020
- Further high-grade extensions at Crow and Aquila, 12 November 2020
- High Grade Depth Extensions and Visible Gold at Falcon , 30 November 2020
- Mallina Gold Project Exploration Update, 4 December 2020
- Strong infill & extensional results at Brolga, 21 December 2020
- Consistent extensive gold endowment at Falcon, 13 January 2021
- Diucon & Eagle-Two new Hemi intrusion Au discoveries, 29 January 2021
- Greater Hemi - Gold targets light up at Scooby & Antwerp, 4 February 2021
- Further metallurgical testwork confirms high gold recoveries, 16 February 2021
- Major depth extensions and new footwall lodes emerge at Falcon, 23 February 2021
- Crow/Aquila gold system continue to expand, 4 March 2021
- Rapid growth at Diucon and Eagle, 9 March 2021
- Extensional results show Brolga plunge potential, 16 March 2021
- Depth and strike extensions at Falcon, 8 April 2021
- Impressive resource definition drilling at Brolga, 13 April 2021
- Strong extension to Diucon and Eagle, 15 April 2021
- Strong mineralisation intersected in Crow and Aquila, 23 April 2021
- Large mineralised system confirmed at Diucon – Eagle, 4 May 2021
- High gold recoveries achieved at Aquila, 10 May 2021
- Significant Falcon extensional & resource definition results, 27 May 2021
- Diucon depth, width and strike extensions, 1 September 2021
- Eagle extensions to the west and at depth, 9 September 2021
- High gold recoveries also achieved at Falcon and Crow, 21 September 2021
- Greater Hemi Corridor Update, 30 September 2021
- Positive Regional Results at Withnell Calvert and Gillies, 13 October 2021
