Outlook

The past six and twelve months have seen a significant appreciation in the NTA per unit of the Fund, as we have been alluding to prior. This is despite interest rate cuts only just commencing in some locations, and yet to be cut in Australia. As rates decline we expect a further meaningful repositioning of the Fund net asset value given the fact that a. many REITs continue to trade at a discount to their asset values and b. REIT pricing has a long term correlation with rising prices when interest rates fall.

About Fat Prophets Global Property Fund (FPP.AX)

The Fat Prophets Global Property Fund is an investment trust listed on the Australian stock exchange and managed by Fat Prophets. It invests its capital into Real Estate Investment Trusts (REITs) listed on stock exchanges in developed markets around the world. REITs own real estate assets and generate the majority of their income from rents on their properties, and capital growth from the real estate investments results in increased NTA. FPP's investment weighting benchmark allocation to Australia REITs is around 30%, with the balance in international markets. FPP aims to generate capital growth and distribution income from its investments and has a value bias to its investment strategy.

One Managed Investment Funds Limited (ABN 47 117 400 987) (AFSL 297042) (OMIFL) is the responsible entity of the Fat Prophets Global Property Fund ARSN 619 970 786 (Fund).
