

BTC completes partnership agreement with Corcym

Melbourne, Australia: BTC Health (ASX: BTC) (BTC or the Company) is pleased to announce that, following the announcement on 9 December 2024, its wholly-owned investee company, BTC Cardio Pty Ltd (BTC Cardio), has completed the exclusive distribution and supply partnership with multinational group Corcym. All conditions have been met, and the agreement has taken effect on 1 January 2025.

The Corcym employees, TGA product sponsorships and inventory have been transferred to BTC Cardio, ensuring complete continuity with healthcare professionals and hospital accounts.

Authorisation

This announcement was authorised for release to the ASX by the board of directors of BTC Health Limited, Level 1, 10 Oxley Rd, Hawthorn, VIC 3122.

About BTC Health

BTC Health is a registered Pooled Development Fund and has investments in three core medical companies:

- **BTC Speciality Health**, which is responsible for the commercialisation and distribution of medical devices and medical consumables in the therapeutic categories of acute pain management and neuro-spinal surgery.
- **BTC Pharma**, which undertakes the registration, development, sales and marketing of specialised pharmaceutical medicines, that serve niche markets and rare diseases.
- **BTC Cardio**, which is dedicated to the marketing and distribution of highly specialised cardiovascular medical equipment and single-use consumable products used by cardiac surgeons and critical care experts.

About Corcym

Corcym is a global medical device company focused on the structural heart area. It offers a portfolio of surgical solutions with a heritage spanning more than 50 years, leveraging a complete and distinctive set of technologies, capabilities and infrastructure. In the aortic segment, Corcym offers surgical sutureless, stentless, and mechanical options for aortic valve replacement, including the Perceval Platform, the only truly sutureless surgical valve available on the market. In the mitral segment, it offers a broad portfolio of mitral repair and replacement options, including rings to reshape mitral repair and valves with tailored options for replacement. Corcym also provides a range of minimally invasive procedural-specific devices designed to achieve optimal access and exposure to target sites while performing MICS procedures.
