Portfolio Outperforms, Interim Dividend Up 12.5% Half Year Report to 31 December 2024

Mirrabooka is an investor in small and mid-cap companies seeking to provide attractive income and capital growth over the medium to long term to shareholders at a low cost.

For the six-month period, Mirrabooka's portfolio return including the benefit of franking was 11.5%. The combined Small Ordinaries and Mid Cap 50 sector benchmark including franking, was 7.5% over the same period.

The 12-month portfolio return including franking was 18.2%. The combined Small Ordinaries and Mid Cap 50 benchmark return over the corresponding period including franking was 11.1%. The strong relative outperformance has come from holdings such as Gentrack Group, Pinnacle Investment Management Group, Temple & Webster Group, Macquarie Technology Group, Netwealth Group and Redox. In addition, the underweight portfolio position in many mid-sized resource companies that underperformed the market has also benefited relative performance over the 12-month period.

Portfolio return (including the full benefit of franking) to 31 December 2024

Per annum returns other than for six months. Mirrabooka's performance numbers are after costs.

Past performance is not indicative of future performance.

Portfolio activity was relatively subdued given the generally high valuation levels in the small and mid-cap sector of the market. Selling commonly involved trimming of holdings for risk management purposes due to stretched share prices in larger portfolio positions and the sale of our successful investment in PSC Insurance because of a takeover. Buying activity was spread across a number of new and existing holdings where we have seen the most attractive medium-term value on offer for the quality and growth prospects of these companies. The recent outcome of such investment activity has seen us build a surplus cash position of approximately 3% of the portfolio.

The interim dividend has been increased to 4.5 cents per share fully franked up from the interim dividend last year of 4.0 cents per share fully franked.

Half Year Profit was \$4.6 million, in line with \$4.6 million in the prior corresponding period.

Market Commentary and Portfolio Performance

The 2024 calendar year has seen ongoing strength in global equity markets, with significant divergence in performance across different sectors of the market. Of most relevance to Mirrabooka, high-growth industrial companies have been particularly well supported on the ASX, while commodity facing resource companies have struggled. These trends have been supportive for Mirrabooka, with our preference for companies that are best placed to grow their earnings over the long term.

Mirrabooka delivered a return for the 12 months to 31 December 2024 including the benefit of franking of 18.2% (return figures including franking only include the benefit of franking which Mirrabooka has distributed to shareholders). This was well ahead of the return for the combined Small Ordinaries and Mid Cap 50 benchmark, which was 11.1% including franking over the same period.

Over longer time horizons that are more aligned with our investment focus, we have continued to be encouraged by the outperformance of the Mirrabooka portfolio. When measured since our inception in April 1999 Mirrabooka's portfolio return to 31 December 2024, was 12.6% per annum, significantly outperforming both the benchmark at 8.5% per annum and S&P/ASX 200 Accumulation Index at 9.8% per annum. We are also encouraged by the consistency of portfolio outperformance that we have delivered when measured across 3, 5 and 10 years.

In the 2024 calendar year Mirrabooka's relative portfolio return benefited significantly from holdings in Gentrack Group, Pinnacle Investment Management Group, Temple & Webster, Macquarie Technology Group, Netwealth Group and Redox.

Meaningful detractors to performance came from IDP Education, Tourism Holdings, Domino's Pizza Enterprises, Audinate and Corporate Travel.

It was notable that the performance drag from these underperforming holdings was significantly below the benefit received from our strongest performers, an outcome that we aim to achieve with our investment approach focussed on owning quality business in the portfolio.

Portfolio Adjustments

While the portfolio has performed well in an environment that has generally seen high-quality and high-growth companies afforded a further expansion in their valuation multiples, these conditions have challenged our ability to find compelling investment opportunities.

As a result, the second half of 2024 has seen a more subdued level of purchases than is typical for Mirrabooka. Approximately \$47 million was invested into new and existing investment portfolio holdings for the six months, which reflects an annualised level of turnover of approximately 14% of Mirrabooka's portfolio, significantly below our typical level of 20 to 25% per annum.

These purchases have been spread across a number of holdings where we have seen the most attractive medium-term value on offer for the quality and growth prospects of the company. The most material purchases were less than \$5 million representing approximately 0.7% of the overall portfolio. This reflects the challenge we have felt in investing with conviction in what appears to us to be a fully valued market.

New stocks to the portfolio, NZ listed Channel Infrastructure and Napier Port Holdings, the recent IPO of Cuscal, and Servcorp were among our largest purchases but were still only relatively small investments. Each of these businesses were attractive for their strong positions in their respective industries, backable management teams and the relative value on offer when taking a medium-term view. However, these companies are unlikely to be among the strongest earnings growth contributors in the portfolio, with higher-growth businesses in the market generally presenting us with the challenge of prohibitive valuations.

The most material additions to existing holdings were in Life 360, Cobram Estate Olives and EVT, with each purchased at prices that look attractive relative to where they are now trading.

Selling activity for the calendar year was more in line with our typical turnover level, albeit the largest of these sales was due to the \$14.1 million received from the takeover of our successful investment in PSC Insurance.

We exited three other stocks in the last six months: JB Hi-Fi, a company that we continue to rate very highly but where we felt the valuation was overly demanding against its growth prospects, Domino's Pizza Enterprises, which had been a disappointing investment and Imdex, which saw the share price appreciate beyond our assessment of fair value before we were able to build a meaningful position.

The balance of our selling saw reductions across a number of our successful investments, reflecting our view of stretched valuations. We continue to act with some caution when doing this given our experience with high-quality growing companies that are often able to sustain strong share price performance well beyond expectations. Notwithstanding this, when observing these conditions across a significant number of our larger holdings we felt it prudent to manage the risk in the portfolio by reducing exposure.

In this context, the most material reductions in the six months were in Pinnacle Investment Management Group, Gentrack Group, Fisher & Paykel Healthcare, Breville Group, REA and Netwealth. We retain material holdings in each of these companies.

Outlook

We continue to view our role as providing the best possible exposure to high-quality mid and small cap equities for our shareholders when taking a medium to long term view. We resist being drawn into predicting markets or economic variables and don't believe that we are able to add value by timing markets through varying our cash position.

We do, however, consider valuation as a critical factor in generating attractive medium to long term returns. We are constantly making this assessment, considering a variety of different factors for a diverse set of companies when considering new opportunities, adding to existing holdings and testing the portfolio for the risk of extreme valuations.

The recent outcome of such investment activity has seen us build a surplus cash position of approximately \$19 million or 3% of the portfolio. In the absence of a shift in equity market conditions, we are content to have surplus cash as we patiently explore the market for compelling investment opportunities.

Experience tells us that equity markets will continue to be volatile and that periods of significant performance divergence across sectors are often followed by a recalibration as the momentum of a market narrative has been found, with hindsight, to

have run well through fair value. These risks are on our minds as we consider stocks that have recently seen their share prices propelled by the enthusiasm for artificial intelligence and the widespread recognition of the high-quality nature of subscription-based software companies.

Notwithstanding this valuation-based caution, in the longer term we continue to view the prospects of the companies that we have chosen to own in Mirrabooka positively. We look forward to our next round of meetings with company management of portfolio holdings and have confidence in the updates we expect to receive on their strategic progress.

1. Basis of preparation of half-year financial report

This general purpose half-year financial report has been prepared in accordance with Accounting Standard AASB 134 *Interim Financial Reporting* and the *Corporations Act 2001*.

This half-year financial report does not include all the notes of the type normally included in an annual financial report. This report should be read in conjunction with the 2024 Annual Report and public announcements made by the Company during the half-year, in accordance with the continuous disclosure requirements of the *Corporations Act 2001*.

The accounting policies adopted are consistent with those of the previous financial year and corresponding interim reporting period.

In the interests of transparency in its reporting, the Company uses the phrase “market value” in place of the AASB terminology “fair value for actively traded securities.”
