ASX Announcement

Order from TOLL Transport for Hydrogen Prime Movers

- Pure Hydrogen's majority owned subsidiary HDrive International, has received a purchase order from global logistics provider TOLL Transport for the delivery of two Taurus 70t Hydrogen Fuel Cell prime movers
- The transaction is part of a broader package valued at over AUD\$2 million, with vehicle deliveries scheduled for Q4 2025.
- This transaction further consolidates growing pipeline of sales and deliveries for Pure Hydrogen's range of hydrogen and battery-electric commercial vehicles in domestic and international markets

Sydney, 23 January 2025: Australian clean energy company Pure Hydrogen Corporation Limited (ASX: PH2) ("Pure Hydrogen" or "the Company") is pleased to announce that its majority-owned subsidiary, HDrive International ('HDrive'), has confirmed the sale of two Taurus 70t Hydrogen Fuel Cell (HFC) prime movers to TOLL Transport ('TOLL').

The purchase order from TOLL is in line with its commitment for zero emissions, which includes strategic investments in low-emission fleet vehicles. Under the terms of the agreement with HDrive, TOLL will pay for the supply of two B-Double (twin trailer) 70t HFC prime movers, with delivery scheduled for Q4 CY2025.

TOLL is an integrated logistics services provider, offering warehousing, sea, air, road, and rail freight services in Australia and internationally. Headquartered in Melbourne, the company employs approximately 16,000 team members, and operates across 150 countries to support more than 20,000 customers.

The Taurus is the first Vehicle Type Approved (VTA) HFC prime mover in Australia, having passed Australian Design Rule (ADR) standards following extensive testing and consultation with domestic regulators. The Taurus can transport gross 70 tonnes, which is the largest clean energy truck available for Australian roads, and offers a road-ready solution to support transport and logistics companies in reaching carbon reduction targets in line with the Australian legislation.

Vehicle sales pipeline

Today's announcement follows two separate agreements with Vietnam ASEAN Hydrogen Club (VAHC) for zero-emission vehicles along with associated refuelling hydrogen infrastructure. Pure Hydrogen anticipates that the total revenue for both agreements with VAHC will be approximately AUD\$9.4 million.

The Company has also confirmed delivery of a HFC waste collection truck to Solo Resource Recovery ('Solo'), a leading Australian waste management company. The vehicle delivery follows the completion of comprehensive vehicle testing following the sale agreement between Pure Hydrogen and Solo for a rear loading HFC Waste Collection Truck in April 2024 (refer ASX Announcement 22 April 2024). The vehicle was delivered to Solo in Victoria ahead of a forthcoming Drive Day in February 2025, prior to its planned deployment in Adelaide, South Australia for the City of West Torrens Council.

Pure Hydrogen's Managing Director, Mr Scott Brown, commented: "We are excited to collaborate with TOLL Transport, a forward-thinking company embracing cleaner, greener transport solutions. This partnership is an additional validation of the market responding to Pure's high quality zero emission products. Orders and our sales pipeline are now accelerating as we witness strong interest from both government and corporate customers, including from Asia, Europe, and North America."

The deployment of the Taurus prime movers exemplifies our mission to deliver high-performance, reliable, and sustainable transport solutions to meet the demands of modern logistics. Furthermore, it underlines the growing traction that Pure Hydrogen and HDrive are establishing in the market for our leading range of commercial transport vehicles. We look forward to providing more updates on our vehicle sales pipeline in the months ahead, as we build momentum in our stated strategy to transition from vehicle development and testing to sales and revenue growth."

About Pure Hydrogen Corporation Limited

Pure Hydrogen is a clean energy-focused company seeking to become the leader in the development of Hydrogen and Energy Projects. It has plans to supply hydrogen fuel as a domestically sourced clean fuel in Australia and other countries. Coupled with its controlling shareholding of HDrive offering an expanding line of Hydrogen fuel cell and electric commercial vehicles to customers seeking to reduce their emissions. Pure Hydrogen has a number of solutions that can allow transition to Zero Emissions (ZE) for commercial customers. Concurrently, the Company is developing natural gas projects directly in Australia and indirectly in Botswana through a strategic investment it holds in a Botswana-focused energy company listed on the ASX.

Strategically, Pure Hydrogen will also prioritise incubation for early-stage companies or projects within the clean energy sector, with the aim of realising profits from those investments. For further details visit www.purehydrogen.com.au
