

Quarterly Activities Report

For the three months ended 31 December 2024

31 January 2025

HIGHLIGHTS

- Execution of an Exclusivity and Heads of Agreement with BML Ventures Pty Ltd (BML) to support development of the Lucky Strike Gold Project with a MRE of 1.27 Mt @ 1.95 g/t Au for 79,600 ounces.
 - Indicated – 0.7Mt at 1.93g/t Au for 43,400 oz Au
 - Inferred – 0.57Mt at 1.97g/t Au for 36,200 oz Au
- The agreement provides the framework for both parties to complete negotiations towards finalising a binding mine Profit Share Agreement (PSA).
- Mineral Resources updated for Burns Central and Mt Martin in line with strategy to unlock value
- At Burns Central, a high-grade zone has been defined of 159,285oz gold, comprising:
 - Indicated - 4.11Mt at 1.19g/t Au, 0.22% Cu and 0.62g/t Ag
 - Inferred – 0.10Mt at 0.63g/t Au, 0.18% Cu and 0.38g/t Ag
- For Mt Martin, a new interpretation and drilling results has resulted in a 13% increase in shallow mineral resources (within 200m from surface) to 439koz gold, comprising:
 - Indicated – 5.60Mt at 1.40g/t Au for 247,500 oz Au
 - Inferred – 3.69Mt at 1.60g/t Au for 191,500 oz Au
- Firm commitments received for a placement of \$3.3 million, leaving the Company well-funded at end of quarter with a \$3.2 million balance.

Lefroy Exploration Limited (ASX:LEX)(Lefroy or the Company) is pleased to present its quarterly activities report for the three months ended 31 December 2024.

Business Development Activities

Exclusivity and Head of Agreement with BML Ventures

In December, the Company executed an Exclusivity and Heads of Agreement with BML Ventures Pty Ltd (BML) to support development of the Lucky Strike Gold Project which contains an MRE of 1.27 Mt @ 1.95 g/t Au for 79,600 ounces.

BML is a private mining contractor, with a proven track record of advancing open pit gold mines in the Kalgoorlie-Kambalda region of WA, including their recent collaboration with Auric Mining (ASX:AWJ) at Jefferys Find¹

This agreement provides the framework for both parties to complete negotiations towards finalising a binding mine profit share agreement.

The indicative non-binding material terms of the Exclusivity and Heads of Agreement include:

- Once all upfront BML costs have been recovered, the net surplus cash (profit) is to be split between LEX 50% and BML 50%;
- On successful execution of a Profit-Sharing Agreement (PSA), BML will coordinate and fund all pre-production mining approvals, capital and ongoing operating costs; and
- BML to coordinate toll milling negotiations and scheduling with third party mill processing plant operators.

The parties have agreed to enter into binding exclusivity arrangements (30 business days) to complete due diligence and further negotiate and finalise a Profit-Sharing Agreement in relation to the Lucky Strike Gold Project.

Since signing the Exclusivity and Heads of Agreement, BML and LEX have worked throughout January together to finalise the PSA, pre-development grade control drilling programmes has been designed, mine optimisation work is in progress and negotiations on a toll milling arrangement with a nearby mill are in progress. The Company expects to be able to announce signing of the PSA during the current quarter.

In order to complete the final stages of these negotiations within the March 2025 quarter, the Company has agreed to extend the exclusivity period with BML by an additional 30 business days.

The Company remains focused on commercialising its existing gold resources, which includes both internal assessment of mining options and engagement with multiple regional operators and prospective developers along its pathway to commercialise advanced gold resource projects within the broader Lefroy Gold Project (refer post- quarter ASX release 23 October 2024).

The Lucky Strike Project hosts a mineral resource estimate of 1.27Mt @ 1.95 g/t Au for 79,600 (Indicated 0.70Mt @ 1.93g/t Au for 43,400 oz. Inferred 0.57Mt @ 1.97g/t for 36,200 oz).

¹ For details of the mine share agreement between Auric Mining and BML Ventures, refer to AWJ ASX Announcement 22 August 2022 Agreement Executed to Commence Gold Mining at Jeffreys Find

Lucky Strike represents one of three major gold projects held by the Company, which also includes Mt Martin and Burns Central Deposits, together totaling greater than 1million ounces of gold (Figure 1, Table 3).

Pending a successful partnership with BML Ventures at the Lucky Strike Project, the Company has identified that the Mt Martin Gold Mine represents the next frontier of growth for the Company, with a combined mineral resource estimate of 9.29Mt containing 439,000 ounces grading 1.47g/t Au (Indicated 5.6Mt @ 1.4g/t for 247,500 oz. Inferred 3.69Mt @ 1.61g/t for 191,500 oz) (see Table 3) and (refer ASX release 10 Oct 2024).

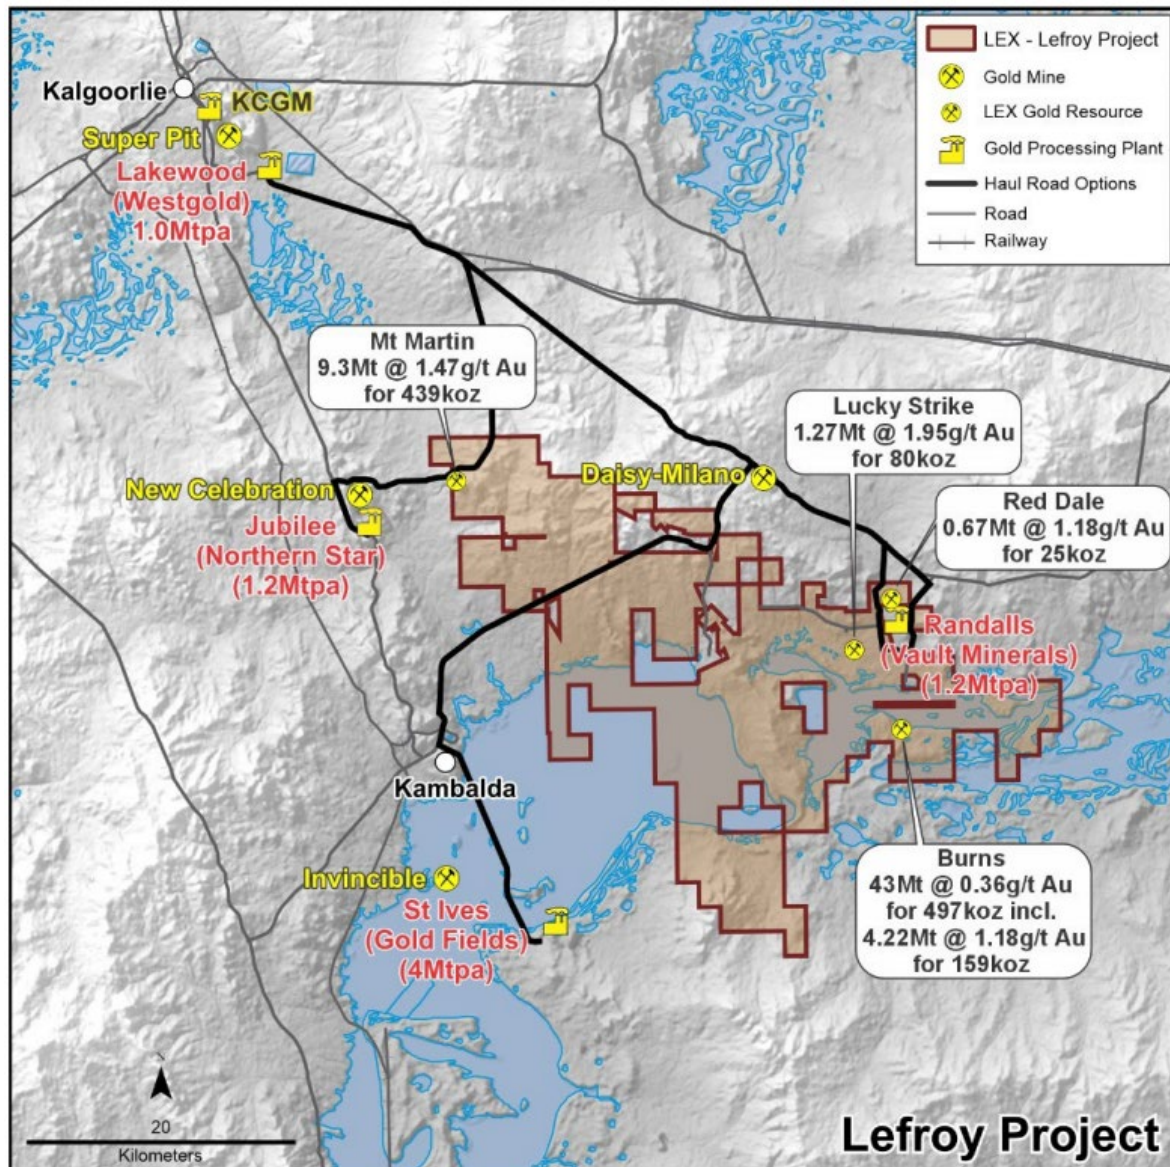

Figure 1: Lefroy Gold Project and location of Lucky Strike

Exploration Activities

The key exploration activities during the quarter were the completion of mineral resource updates for Burns Central and Mt Martin.

BURNS CENTRAL

The Burns Central Deposit forms part of the Burns Gold-Copper Project ('Burns' or 'Project'), 70km southeast of Kalgoorlie in the highly prospective Kalgoorlie Terrane of Western Australia (Figure 1,2 & 4). Burns is located within the broader Lefroy Gold Project, proximal to the St Ives gold camp (Gold Fields Ltd JSE: **GFI**) and the Daisy Milano and Mt Monger gold operations (Vault Minerals Limited ASX: **VAU**).

High-Grade Shallow Mineral Resource Defined

The Company released details of a mineral resource update at the Burns Central deposit, part of the Lefroy Project. This is in keeping with Lefroy's focus to progress and commercialise the Company's portfolio of shallow advanced gold deposits (refer ASX release 27 March 2024).

Following an internal review of the high-grade potential of the Burns Central resource, a high-grade zone has been delineated within the Burns Central Mineral Resource Estimate (MRE). Reporting only blocks within 200m of surface and applying a cut-off grade of 0.5 g/t Au, this zone reports 4.22Mt @ 1.18 g/t Au for 159,285 contained ounces (Table 1), reported across oxide, transitional and fresh mineralisation categories.

Significantly, this high-grade zone is reported at over 98% Indicated resource classification, with combined oxide and transitional material representing over 34% of the total resource.

Table 1: Mineral Resource Statement for Burns Central, including Gold (Au), Copper (Cu) and Silver (Ag), (0.5 g/t Au cut-off) and maximum 200m depth from surface. Small discrepancies may occur due to the effect of rounding

Mineralisation	Category	Average Value				Material Content		
		Mass Mt	Au g/t	Cu %	Ag g/t	Au oz	Cu t	Ag oz
Oxide	Indicated	1.06	1.35	0.21	0.56	46,122	2,219	19,280
	Inferred	0.02	0.70	0.32	0.77	416	59	462
	Total	1.08	1.34	0.21	0.57	46,538	2,279	19,741
Transitional	Indicated	0.27	0.93	0.56	1.29	8,152	1,532	11,269
	Inferred	0.00	0.57	0.08	0.08	2	0	0
	Total	0.27	0.93	0.56	1.29	8,154	1,532	11,269
Fresh Rock	Indicated	2.78	1.15	0.19	0.57	102,941	5,368	51,104
	Inferred	0.08	0.62	0.15	0.29	1,652	124	769
	Total	2.86	1.14	0.19	0.56	104,593	5,492	51,873
Total	Indicated	4.11	1.19	0.22	0.62	157,215	9,119	81,653
	Inferred	0.10	0.63	0.18	0.38	2,070	184	1,231
	Total	4.22	1.18	0.22	0.61	159,285	9,303	82,883

Furthermore, the contained gold ounces (159,285 oz) within this recently calculated high grading central core represents 32% of the entire gold ounces (497,472 oz) reported in the May 2023 original MRE. Expressed differently, 32% of the contained gold ounces at Burns Central are contained within 10% of the defined tonnes (159,258 oz within 4.2Mt versus 497,472 oz within 42.95Mt).

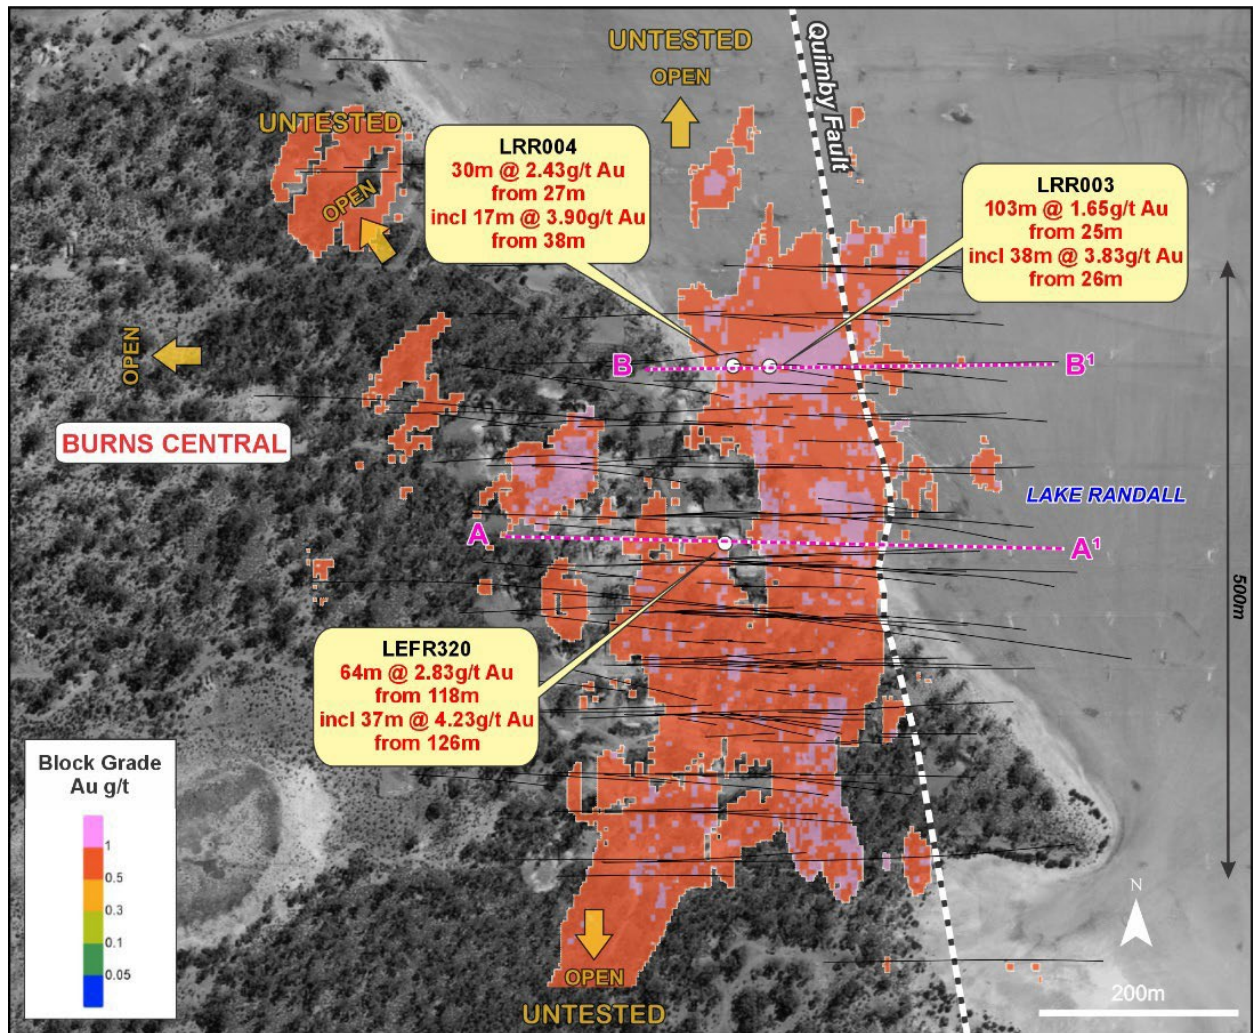

Figure 2: Burns Central Location depicting resource cut to 0.5g/t Au

As reported in the maiden MRE for Burns in May 2023 (refer ASX release 4 May 2023), the Company recognised the importance of a significant north-south trending structure (now named the Quimby Fault).

This fault coincides with and strikes sub-parallel to the eastern edge of the recognised high-grade Au zone at Burns (Figure 2).

Significant gold intersections are associated with this north-south trending fault, with the system remaining open to the north and south (Figure 2).

ASX Announcement

ASX: LEX

Several historical significant drillhole intersections were returned by the Company within previous phases of drilling at Burns, with notable intercepts (using a 0.5g/t cut-off) reported including:

- **61m @ 2.96 g/t Au (from 120m), including 37m @ 4.23 g/t Au (from 126m) in LEFR320**
- **39m @ 3.87 g/t Au (from 26m) in LRR003; and**
- **30m @ 2.43 g/t Au (from 27m), including 17m @ 3.9 g/t (from 38m) in LRR004**

These highly significant Au intersections, coupled with a sound understanding of the structural controls to high-grade gold mineralisation at Burns, and with the system remaining open north and south, represent a compelling exploration target for growing the high-grade mineral resource. Further details can be found in the ASX Announcement dated 3 October 2024.

MT MARTIN

Growth in Near Surface Mineral Resources

During the December quarter, the Company completed an update to the MRE for the Mt Martin deposit, located within the Location 45 freehold property (Figure 3).

The update at Burns Central along with Mt Martin focused on unlocking value from both projects significant near-surface mineral resources.

Since the acquisition of the Mt Martin project by the Company in May 2023, numerous activities have been undertaken to unlock value, including:

- Target generation and execution of a 29-hole RC drilling program, testing shallow extensions to the Mt Martin resource (refer to LEX ASX release 18 January 2024), with intersections including:
- **8m @ 3.98 g/t Au from 38m (East Shear) in LEFR395**
- **35m @ 1.78 g/t Au from 209m (Main Shear) in LEFR379**
- A thorough reinterpretation and wireframing of the main geological resource domains using Leapfrog software.
- Completion of down-hole density surveys on six RC drillholes at Mt Martin, resulting in an upgrade of density values applied to tonnage calculations across the deposit.

Table 2 below shows the updated MRE (October 2024), compared to the previous MRE calculated in 2013¹, with both reporting at a 0.5g/t cut-off, and only reporting resource blocks within 200m of surface.

Further details relating to the update of the Mt Martin resource can be found in the ASX announcement dated 10 October 2024.

Table 2: Mineral Resource estimate comparison for Mt Martin (between April 2013 and Oct 2024) reported at a 0.5g/t cut-off and reporting all block within 200m of surface. Small discrepancies may occur due to the effect of rounding.

		April 2013			Oct 2024		
	Category	Tonnes	Au g/t	Oz	Tonnes	Au g/t	Oz
Total Resource*	Indicated	4,356,486	1.81	253,937	5,597,000	1.40	247,500
	Inferred	2,484,081	1.68	134,493	3,698,000	1.60	191,500
	Total	6,840,567	1.77	**388,430	9,295,000	1.47	439,000

*Incorporating Mt Martin, Swift and Adelaide resource numbers

** The tonnes, grade and ounces reported relate to only blocks filtered within 200m of surface.

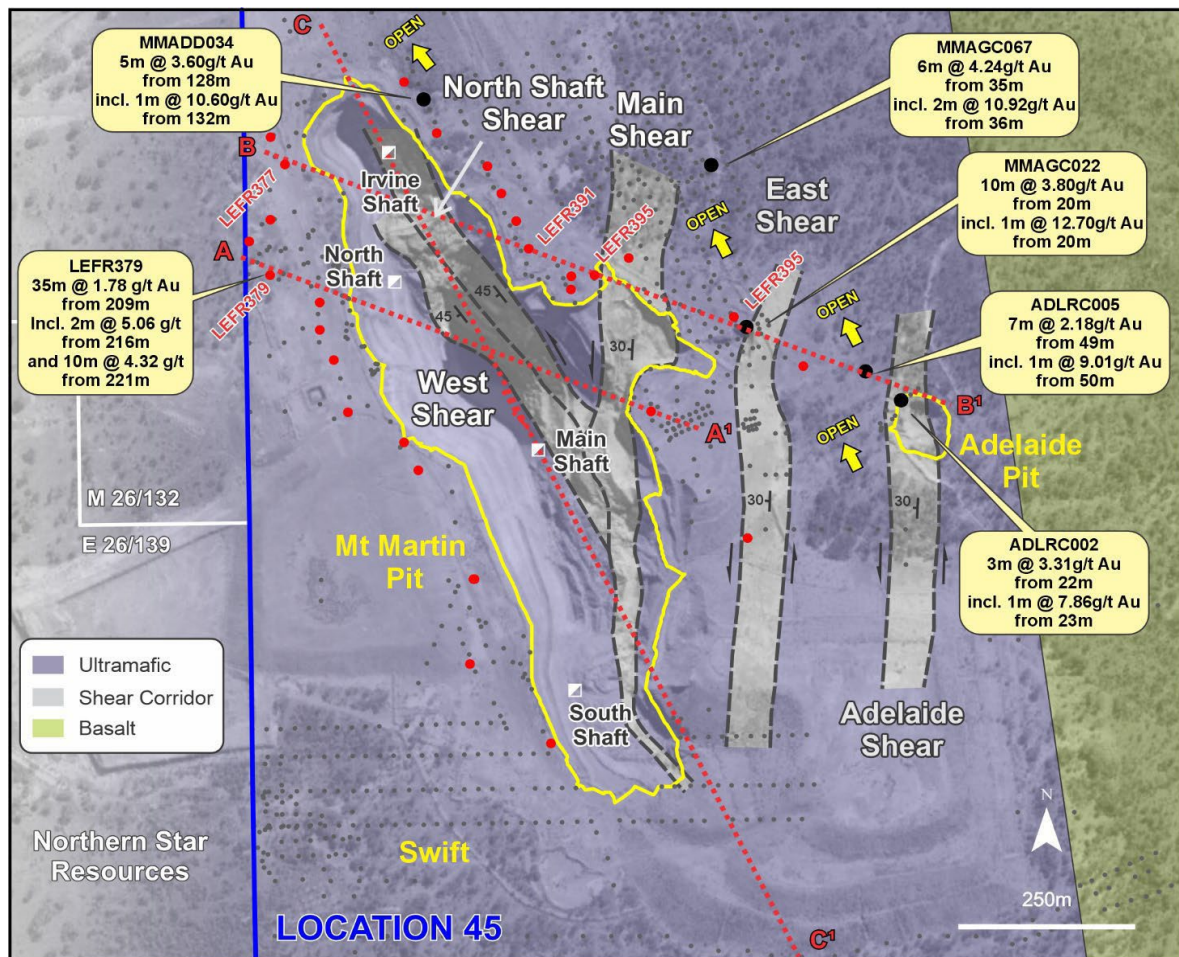

Figure 3: Mt Martin Geology (Plan View)

CORPORATE

Cash Position

As at 31 December 2024, the Company had cash reserves of \$3.2 million and no debt (refer to section 4.6 of Appendix 5B December 2024 quarterly cash flow report).

During the December 2024 quarter, the Company's total outgoings on its operating activities were \$321k (refer to section 1.9 of the Appendix 5B).

Net cash used in investing activities was \$541k, which was primarily attributed to exploration and evaluation (refer to section 2.6 of Appendix 5B).

\$3.3 Million Placement

The Company received firm commitments to raise \$3.3 million (before costs) in an oversubscribed share placement to institutional and sophisticated investors (refer ASX release 28 October 2024).

Directors of Lefroy have committed to participating in the Placement for a total of \$270,000, subject to shareholder approval.

The Company is now well-funded to proceed down its pathway via its advanced conversations towards an outcome of commercialising its advanced gold projects, with the clear goal of unlocking the value of its gold assets, through a strategic partnership.

Post Quarter End Activity

Subsequent to the quarter the General Meeting of Shareholders was convened to ratify the placement shares issued under Listing Rule 7.1 and 7.1a, as well as the approval of issue of shares to the Directors. All resolutions were carried by a poll.

In January, the Company has also advanced negotiations with BML Ventures towards finalising the terms of a profit share agreement relating to the Lucky Strike Gold Project.

SIGNIFICANT ASX ANNOUNCEMENTS

The Company confirms that it is not aware of any new information or data that materially affects the information included in the original market announcements. In the case of all Mineral Resource Estimate's (MRE), the Company confirms that all material assumptions and technical parameters underpinning the estimates continue to apply and have not materially changed.

The Company released a number of significant ASX announcements in the last quarter and post-quarter end:

3 October 2024	High Grade Shallow Resource to Unlock Value at Burns Central
10 October 2024	Lefroy Builds Near-surface Gold Resources at Mt Martin – Update
16 October 2024	South-West Connect – Investor Presentation October 2024

23 October 2024	Commercialising Resources to Advance Exploration Targets
28 October 2024	\$3.3M Raised to Commercialise Resources & Target Discoveries
14 Nov 2024	2024 AGM Presentation
18 Dec 2024	Lefroy Signs Agreement with BML to advance Lucky Strike
13 Jan 2025	Results of General Meeting of Shareholders

DISCLAIMER CAUTION REGARDING FORWARD-LOOKING INFORMATION

This document contains forward-looking statements concerning Lefroy Exploration Limited. Forward-looking statements are not statements of historical fact and actual events and results may differ materially from those described in the forward-looking statements as a result of a variety of risks, uncertainties and other factors. Forward-looking statements are inherently subject to business, economic, competitive, political and social uncertainties and contingencies. Many factors could cause the Company's actual results to differ materially from those expressed or implied in any forward-looking information provided by the Company, or on behalf of, the Company. Such factors include, among other things, risks relating to additional funding requirements, metal prices, exploration, development and operating risks, competition, production risks, regulatory, including environmental regulation and liability and potential title disputes.

Forward-looking statements in this document are based on the Company's beliefs, opinions and estimates of Lefroy Exploration Limited as of the dates the forward-looking statements are made, and no obligation is assumed to update forward-looking statements if these beliefs, opinions and estimates should change or to reflect other future developments.

COMPETENT PERSON STATEMENT

The information in this announcement that relates to exploration targets and exploration results is based on information compiled by Graeme Gribbin, a competent person who is a member of the Australian Institute of Geoscientists (AIG). Mr Gribbin is employed by Lefroy Exploration Limited. Mr Gribbin has sufficient experience that is relevant to the style of mineralisation and type of deposits under consideration and to the activity being undertaken to qualify as a Competent Person as defined in the 2012 edition of the JORC Code. Mr Gribbin consents to the inclusion in this announcement of the matters based on his work in the form and context in which it appears.

ABOUT LEFROY EXPLORATION

Lefroy Exploration Limited (ASX:LEX) is an active West Australian exploration company focused on developing its growing gold and critical minerals projects. The Company's portfolio of high-quality projects includes the Lefroy Project (Figure 4), located in the heart of the world-class Kalgoorlie and Kambalda gold and nickel mining districts, the Lake Johnston Project 120km west of Norseman, and the large 2,872km² Glenayle Project 210km north of Wiluna.

The Lefroy Project is a contiguous land package of 635km² with a growing mineral resource inventory of greater than 1 million ounces of gold, 58,000 tonnes of contained copper and 14,780 tonnes of contained nickel, (refer to Table 3).

Lefroy holds the mineral rights to Hampton East Location 45 (Location 45) (Refer ASX release 23 May 2023). Location 45 is a freehold property, located within 25km of Kambalda and 35km southeast of Kalgoorlie. The property hosts the historic Mt Martin gold mine, which has historically produced approximately 200,000 ounces of gold grading at 2.8g/t and which includes an existing resource of 439,000 oz gold (9.29Mt @ 1.47g/t Au) (refer to ASX release 10 October 2024).
