

DGR Global Limited

Quarterly Activities Report

DGR Global Limited ACN 052 354 837 (**ASX: DGR, DGR Global**) is not just another resources company. DGR Global is a *resource company creator*.

Our project generation, strategic tenure acquisition, corporate development and investment capabilities provide investors diversity across several different commodities, sovereign jurisdictions, and international financial exchanges. With our group of talented exploration staff, we focus on identifying and securing projects that will yield valuable and enduring world-class resource assets.

DGR GLOBAL CREATES RESOURCE COMPANIES

DGR Global's business is the creation of resource exploration, development, and mining companies. The business uses the skills of a core team of talented exploration staff to identify resource projects capable of yielding world class discoveries of commodities with enduring strong fundamentals. This is achieved through the identification of commodities with a favourable 20-year demand, growth, and price outlook. DGR searches for geological terranes with:

- A demonstrated strong endowment for that commodity in an historically under-explored region.
- Opportunity for the application of newly developed exploration and metallurgical techniques to assist in the definition of economic resources.
- Jurisdictions with improving socio-economic and regulatory frameworks.
- Extensive available tenures.
- Existing data sets which provide the basis for innovative reinterpretation.

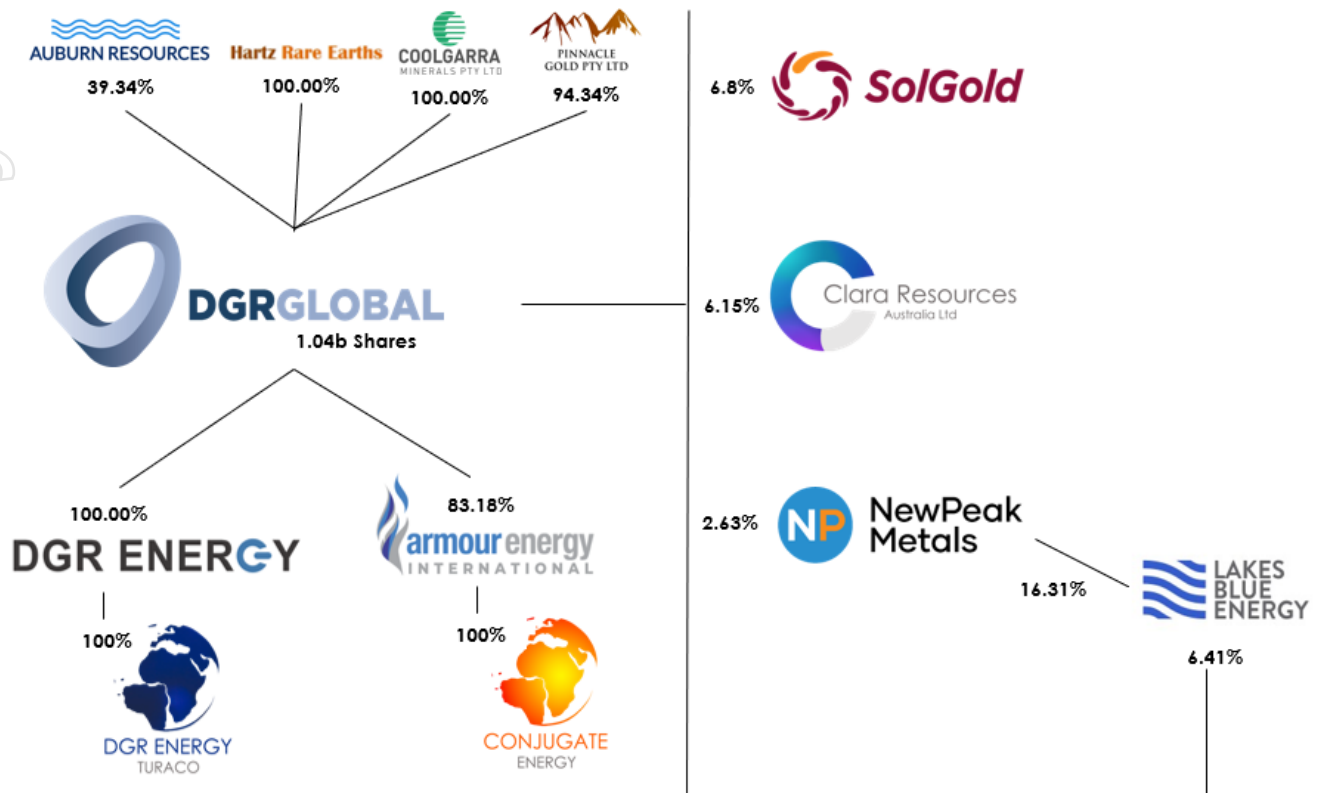

DGR Global provides initial seed funding and management support to secure these assets in subsidiaries and develop these assets to more advanced funding stages. The Company has a pipeline of projects in daughter companies at various stages of emergence, and in 2015 crystallised a significant return through the sale of its 15% holding in Orbis Gold for \$26Million. Further return from its holdings in LSE/TSX listed SolGold plc and ASX listed Clara Resources Australia Ltd , New Peak Metals Ltd , Lakes Blue Energy NL and unlisted Auburn Resources Ltd , DGR Energy Ltd and Armour Energy International Ltd is expected over the coming years.

The previous resource exploration and funding activities of DGR's key personnel underscore the opportunities provided by the DGR business model. DGR Global does not generally purchase its exploration projects. DGR's in house generative capabilities give the Company a strong competitive edge. DGR's focus on provincial tenement positions covering entire sedimentary basins or structural blocks where possible, delivers capital, government, and major resource corporate attention.

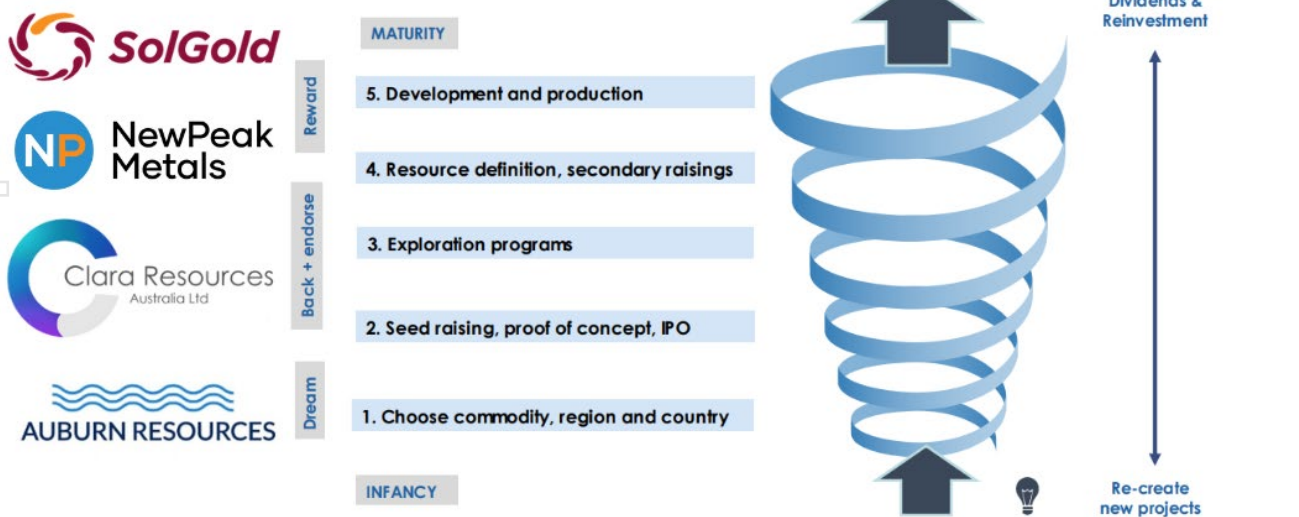

DGR Global holds key equity positions in its subsidiary companies after listing. As shown in the DGR Global Group Corporate Structure as of 31 December 2024, DGR Global holds:

- 6.8% of SolGold Plc (LSE/TSX : SOLG),
- 1.75% of Atlantic Lithium Ltd (LSE : ALL, ASX : A11, OTCQX : ALLIF, GSE : ALLGH),
- 6.15% of Clara Resources Australia Ltd (ASX : C7A),
- 2.63% of New Peak Metals Ltd (ASX : NPM),
- 6.41% of Lakes Blue Energy NL (ASX : LKO).

QUARTERLY REPORT FOR THE PERIOD ENDED 31 DECEMBER 2024

During the quarter field exploration, soil sampling and prospecting activities were undertaken on the South Nicholson Project area, as well as data re-interpretation and modelling for the Calgoa/Kolbar Project area. DGR and its related entities continue to remain active, advance projects and plan exploration programmes within their respective portfolios as reasonably permitted by the prevailing conditions.

Highlights for each entity for the current quarter follow.

DGR Global Ltd [ASX:DGR]

- The Company continues to focus on new project generation and value creation and also continues to seek out new investment and development opportunities to drive the creation of new resource companies.
- DGR also holds 83.28% of Armour Energy International Ltd (Armour Energy International) which holds the highly prospective oil project in the Kanywataba Block, Uganda. Armour Energy Ltd (in liquidation) holds 16.82% of Armour Energy International¹.
- DGR also holds 100% of DGR Energy which holds the Turaco tenement 100%.
- DGR also owns 39.34% owned, public, unlisted Auburn Resources Ltd.
- Armour Energy Ltd - As previously disclosed to the ASX* post Armour Energy Ltd being placed into receivership and administration on the 10th of November 2023. DGR Global Ltd ('DGR' or 'the Company') had a material investment in Armour Energy Ltd (in liquidation) both via convertible notes and its position as the company's largest shareholder.
 - Accordingly, DGR Global Ltd progressed various Deeds of Company Arrangement (DOCA's) to present to creditors at the second creditors meeting dated 19th of January 2024 which sought to cater to all stakeholders' interests including all creditors and shareholders of Armour Energy Limited (in liquidation) and its subsidiaries.
 - DGRs DOCA's were voted against by creditors who supported the competing bid from ADZ Energy Pty Ltd a company incorporated in Australia in October 2023. The competing bid focussed primarily on the subsidiaries of Armour Energy Ltd (in liquidation), which has itself now been placed into liquidation.
 - DGR contends that the receivers of Armour Energy Ltd (in liquidation) were invalidly appointed and have commenced proceedings in relation to that, which are ongoing.
- In December 2023, DGR Global Ltd (DGR) commenced legal proceedings in the Supreme Court of Queensland in relation to the administration and receivership of the Armour Group (Proceedings). DGR refers to its previous Quarterly Reports advising on the Proceedings.
 - DGR has applied for and, in October 2024, obtained leave of the Court to amend its claims and pleadings to include additional claims for tortious conspiracy by unlawful means against all of the Defendants other than the Perpetual Defendants.
 - Related to DGR's tortious conspiracy claims, in September 2024 DGR applied for disclosure of certain privileged documents from the Defendants. Shortly after the filing of the application, two of the Defendants, ADZ Energy Pty Ltd and Shunkang, waived privilege over various documents which were produced to DGR. So too were privilege documents produced by the Sixth Defendant, Baker & McKenzie.

- In October 2024, the Court moved the 10 day trial listed in December 2024 and listed it as an 18 day trial commencing on 22 April 2025.
- In December 2024, the defendants made applications for DGR to provide security for the defendants' costs of the proceeding. Those application were heard in January 2025 and judgment was delivered shortly thereafter. [On 28 January 2025, DGR issued an ASX Announcement](#) in relation to the Court's decision and order for securtion.
- In an application for leave to amend its claim and statement of claim, DGR sought (amongst other things) to add the Perpetual Defendants to the tortious conspiracy claim and to amend DGR's counterfactual. That application was heard in mid-December and judgment was delivered on 30 January 2025. Leave to amend against the Perpetual Defendants and to amend the counterfactual were refused. Leave was granted to DGR in respect of the majority of its other amendments. DGR is currently considering this judgment however the Court is yet to make the orders arising from the judgment.
- As a result of DGR amending its claims, the Defendants are yet to file amended Defences and the pleadings have not yet closed.
- On 30 January 2025, DGR filed its lay evidence.
- Disclosure by the parties is ongoing and there are various interlocutory disputes concerning disclosure which are yet to be heard and decided.
- The Court recently ordered further timetabling directions for the Proceeding. Under that timetable, the filing of the defendant's lay evidence and the filing of the parties' expert evidence is due by the end of February 2025.
- There is a likelihood that DGR will soon apply to stay the proceedings pending the outcome of any appeal against the security for costs order and to have additional time to raise the security for costs as presently ordered.
- DGR announced that it has executed a Term Sheet in relation to a proposed facility agreement, in two tranches potentially for up to a total of \$23.5M, to fund refinancing of existing debt facilities, provide working capital and ongoing legal fees². DGR is progressing finalisation of the facility agreement and convening of a general meeting of shareholders to approve the same .
- HSEC (Health, Safety, Environment and Community) for the group entities for which DGR acts as Operator, maintains a rolling 12-month TRIFR of 0.00 and recorded zero environmental incidents for the corresponding period, demonstrating DGR's continuous commitment to sustainable and safe operations.

SolGold Plc (LSE and TSX: SOLG) – DGR Interest 6.8% 204.2M Shares

- Focus on high-grade world-class copper gold porphyry systems at Cascabel in Ecuador. Cascabel is proximate to Quito and seaports, is at low elevation, and has abundant water supplies and access to hydropower.
- SolGold remains the dominant explorer in the country.
- Previous announcements of the successful completion of the new Cascabel Pre-Feasibility Study (PFS) and Cascabel Complementary Investment protection Agreement (CIPA). The PFS revealed:
 - a global resource of nearly 4 bn tonnes containing 14.4 mt of copper, 36.6 m oz gold and 110 m oz of silver.
 - a project assessed at PFS level, based on just 18% of the total resource tonnage at Cascabel based on conservative metal prices of US\$3.85 copper and US\$1750/ oz gold prices.
 - Start-up rate of 12 mtpa, underground block cave building to 24 mtpa.
 - production of a high quality gold rich concentrate.
 - Environmentally acceptable footprint.
 - project life for the study period only of 28 years.
 - NPV (discounted at 8%) of \$3.2 bn after all taxes (reduced to \$2.9 bn post US\$750m stream).
 - IRR after tax of 24%.
 - Preproduction capital costs of US\$1.55 bn.
- A Company update and a Cascabel Project update were both released during the quarter, as well as the announcement of the commencement of geotechnical investigations at Cascabel.
- DGR notes that considerable upside exists to be refined during the DFS permitting and financing phases through opportunities for:
 - benefits of increased copper prices US\$4.20/lb and copper US\$2300/oz currently representing a notional increase in revenues of 9% for copper and 31% for gold before all expenses and tax (approximately 15% blended).
 - increases in metallurgical recoveries especially gold.
 - expediting production by bringing the Tandayama resource to reserves status and production up to 2 years sooner.
 - further resource definition on the Cascabel tenement.
 - further operating cost reductions through mine and mill optimisation and green power initiatives.
 - Refinement of mine, mill and infrastructure design and capex.
 - reduction in discount rates and cost of capital.
 - assessment of the long term cash flow value of the other 82 % of the resource not assessed in the study.

- DGR also notes that:
 - SolGold continues to offer unique upside from its comprehensive national exploration portfolio in Ecuador.
 - Efforts continue in respect of the emplacement of the balance of the financing package for development using strategies which minimise equity dilution.

Auburn Resources | 39.34% DGR Interest 19.1M Shares

- Large tonnage zinc, copper and gold focussed company with ongoing development of a number of projects, including three district scale flagship projects in QLD and the NT.
- Potential for major copper gold discoveries at Mt Abbott, Calgoa and Marodian Projects³.
- Exploration targets defined for zinc at the Ban Ban Project.
- Under-explored areas of most endowed provinces with multiple Tier 1 targets.
- Completion of the acquisition of Ripple Resources Pty Ltd adding substantial value to the asset package of Auburn Resources.
- Field exploration, mapping and soil sampling programme planned for the South Nicholson Project was completed with assay results and interpretation/modelling pending.
- The Calgoa/Kolbar Project data re-interpreted and revised modelling commenced.

Project: Kanywataba Block and Turaco Block | Area: 344km² | Prospective for: Oil and Gas
Location: Albertine Graben, Uganda

Inspired by the world's "conjugate margins" where rich oil plays lie in porous and permeable sand traps along the fractured edges of the earth's seven major continental plates. These are Rift Basin settings and host 33% of the world's oil resources.

One of the world's early forming conjugate margins is in the East African Rift system where the Albertine Graben is located underneath Lake Albert.

The Albertine Graben lies on Uganda's western border and is renowned as an exceptionally hydrocarbon-rich rift basin.

DGR continues to explore all available funding options to progress exploration work on both the Kanywataba and Turaco Blocks.

Activities to date include:

KANYWATABA BLOCK

- Original 2D lines shot in 2010.
- Additional 2D seismic lines shot in 2021, focusing on quantifying and de-risking our portfolio.

TURACO BLOCK

- Large 3D seismic coverage
- 3D reprocessing (390km²), geochemical analysis, AVO and attribute analysis & Miocene outcrop study

Within the block there are multiple developed (untested) on-trend structural traps (3-way and 4-way dip closures) and multiple untested stratigraphic traps.

The Kingfisher oil discovery (40km NE of Kanywataba) oil seeps confirm a local working petroleum system.

The Albertine Graben showing its location in Uganda.

NEW OPPORTUNITIES
