Key Customer Contracts Won

Major Australian Retailer

RocketBoots confirms a contract extension with a major Australian retailer, as released to the ASX on 6 December 2024, which continues a 7-year partnership providing critical software across its Australian locations. Over this time, the Company has established opportunities to optimise operations, as well as integrate RocketBoots technology with other retailer systems further enhancing the customers ability to leverage value across its operations.

Importantly, RocketBoots has continued to demonstrate a sustainable return on investment that underpins its commercial model where the Company is now building momentum and scaling the business to secure a share in the billion-dollar global retail, grocery and banking markets.

Key contract terms include:

- The continued provision of RocketBoots' software across its store network;
- Prepayment of contract value of \$339K, up 5% from previous;
- Contract term of 1 year, with the option to extend in 1-year increments; and
- Either party may terminate the agreement at any time, however contract prepayment is non-refundable.

Sales Pipeline

The sales pipeline continues to strengthen as a result of successful ongoing outreach campaigns, word of mouth, partner introductions and the growing acceptance in our target markets that vision AI can enable retailers and retailer banks to run their stores & branches with less OpEx & loss while improving service, sales & loyalty. Of particular interest is that RocketBoots now has 3 large multinational customers in its pipeline.

There are 10 customers in our Advanced Pipeline, customers at this stage have accepted proposals to trial and are in the process of evaluating our software value propositions and the business cases for scaled contracts

across their network of operating sites. These customers operate >10K sites where if successful, RocketBoots vision AI solutions could be deployed.

We now have 25 customers in our Early Pipeline. At this stage we have qualified that the customers have the problems that our software solves for and we are in ongoing discussions as we pursue trial opportunities. Of these, 4 are currently awaiting approval for trials. These customers operate >25K sites.
