Wonarah Field Operations

The following detail highlights strategic decisions, project milestones, and the phased development pathway for the Wonarah Phosphate Project. These initiatives underscore Avenira's commitment to achieving near-term cashflow and building a foundation for long-term growth.

Revised Mine Management Plan

Avenira has submitted its updated Mining Management Plan (MMP) during the quarter for the Wonarah Phosphate Project, lodged with the Department of Lands, Planning and Environment, Northern Territory Government on 9 December.

Key highlights of the updated MMP include:

- **Operational Scaling:** Targeting production of Direct Shipping Ore (DSO) from the Arruwurra deposit based on an expansion of the existing Feasibility Study.²
- **Infrastructure Development:** Including haul roads, waste rock dumps, fuel storage facilities, and a demineralisation plant.
- **Environmental Compliance:** Comprehensive risk assessments and management strategies aligned with regulatory standards.

Approval of the MMP is anticipated during Q1CY25.

Dry Season Ecology Survey

SLR Consulting completed a comprehensive Dry Season Ecology survey across key areas of the Wonarah Project during the quarter, including the Arruwurra mining area, Main Zone deposit, and the planned northern borefield.

This survey forms part of Avenira's environmental commitments and will refine areas of focus for the Wet Season Survey scheduled for May 2025.

Phosphate Beneficiation Project – EPA Assessment

Environmental assessments for a proposed Phosphate Ores Beneficiation plant are underway, in line with regulatory requirements. These assessments will review alignment with previous approvals to support streamlined regulatory processes, pending confirmation.

Development Pathway – Wonarah Phosphate Project

Avenira is advancing a phased development strategy for the Wonarah Phosphate Project, focusing on disciplined capital allocation and sustainable growth. The key phases are:

1. **Early Revenue Generation – Stage 2 Direct Shipping Ore (DSO)**
Development of DSO operation is underway, initially leveraging the existing Mining Authorisation 1170-01³ followed by the resubmitted MMP when the authorisation is received⁴. Operations are targeted to commence in late Q3 / early Q4 2025.
2. **Regulatory and Technical Studies**
Environmental studies and Environmental Protection Authority (EPA) assessments are progressing to support future developments, including the Flotation Project, Stage 3 DSO, YP Project and TPA Project.
3. **Feasibility Study – Flotation, Stage 3 DSO**
Feasibility studies aim to unlock the economic potential of Avenira's 812Mt resource base⁵ by upgrading to commercial-grade products, enhancing scalability and viability.
4. **Future Prospects – Downstream Production:**
 - **YP Project:** A cornerstone of Avenira's downstream strategy, targeting global demand for high-grade phosphorus products across agriculture, chemicals, and renewable energy sectors.
 - **TPA Project:** Producing high-purity phosphoric acid for specialized applications, broadening Avenira's product portfolio and diversifying revenue streams.

Jundee South Gold Project

During the quarter, Avenira commenced an aeromagnetic survey covering approximately 29,355 linear kilometres. Conducted by MagSpec Airborne Surveys, this program leverages advanced geophysical techniques to gather detailed magnetic and radiometric data across the exploration area. As at 22 January 2025 the aeromagnetic airborne survey had been completed pending compilation of results.

The finalization including geophysical interpretation is expected in late Q1 2025, leading to refined geological interpretations and the identification of new exploration targets, representing a key step in unlocking the potential and discovery of this region.
