

Joint Venture secured over advanced gold project in Western Australia's world class gold mining district

Highlights

Cazaly signs binding term sheet with Brightstar Resources to earn up to 80% of the Goongarrie Gold Project located in the Kalgoorlie-Menzies district in the Eastern Goldfields of Western Australia

The Project covers 12km strike of the Bardoc Tectonic Zone-Boulder Lefroy Shear Zone (BTZ), host to multiple world class gold deposits

Several high priority gold drill targets with growth potential

Gold mineralisation at the Hastings prospect extends for over 1km, and is open along strike and at depth. Anomalous intercepts include 38m @ 3.1g/t gold¹

Cazaly to spend up to \$3M on exploration to earn staged equity up to 80% of the Goongarrie Project

Cazaly Resources Limited (ASX: CAZ, Cazaly, or the Company) is pleased to announce that it has entered into an exclusive binding agreement with Brightstar Resources Ltd (ASX: BTR), to earn up to 80% equity in the Goongarrie Gold Project (Goongarrie, or the Project).

Cazaly's Managing Director, Tara French comments:

"The Goongarrie gold project presents Cazaly with an outstanding opportunity to explore for new gold resources in a multi-million-ounce gold district. The sizeable land package has multiple gold targets and is largely untested at depth. We are very much looking forward to generating new gold targets and drill testing the existing prospects. With the gold price breaking A\$4,600 oz for the first time, and with a positive pricing outlook, it's the perfect time for Cazaly to get back into gold. We are pleased to have entered into the agreement for nil cash or scrip consideration with all funding going 'into the ground'. We look forward to advancing this project and to working closely with our new partners at Brightstar to maximise value for shareholders."

¹ 01 February 2021. Kingwest Resources Limited ASX announcement "Stellar gold grades in Goongarrie Project discovery"

Goongarrie Gold Project

Goongarrie is located in the northeastern goldfields, 90km north of Kalgoorlie, and is easily accessible via the Goldfields Highway that runs along the western boundary of the project area. The Project consists of 70km² of greenstone sequence within the Kalgoorlie Terrain.

Importantly the Project covers twelve kilometers of the Bardoc Tectonic Zone (BTZ), which is the northern extension of the Boulder-Lefroy Shear Zone (BLSZ) to the south, one of the richest gold mineralised structures in the Yilgarn Craton. Subsequent exploration activities have identified two additional subparallel N-S structures that also have the potential to host significant gold deposits.

Material Terms of Joint Venture Agreement

The terms of the earn-in joint venture agreement for the Goongarrie Project, subject to Cazaly completing due diligence, are:

- Cazaly to expend an initial \$1m on exploration to earn a 25% interest;
- Expend further funds of \$1m to earn a 51% interest;
- Expend further funds of \$1m to earn to an 80% interest.

Tenements included in the Goongarrie Project are listed in Table 1.

Project History

The Goongarrie Project was acquired by Kingwest Resources Ltd (KWR) in 2019. In May 2023 KWR merged with Brightstar Resources Limited whose focus has now shifted away from the Goongarrie project following their recent merger with Alto Metals Ltd (ASX: AME)ⁱ.

Prior to KWR acquiring the Project, very little exploration activity had been completed across the project as work was focused at Menzies and Kalgoorlie. Historic work included soil sampling, trenching, auger drilling, shallow aircore drilling, and limited RC drilling. This work targeted oxide gold mineralisation at surface associated with the Bardoc Tectonic Zone-Boulder Lefroy Shear

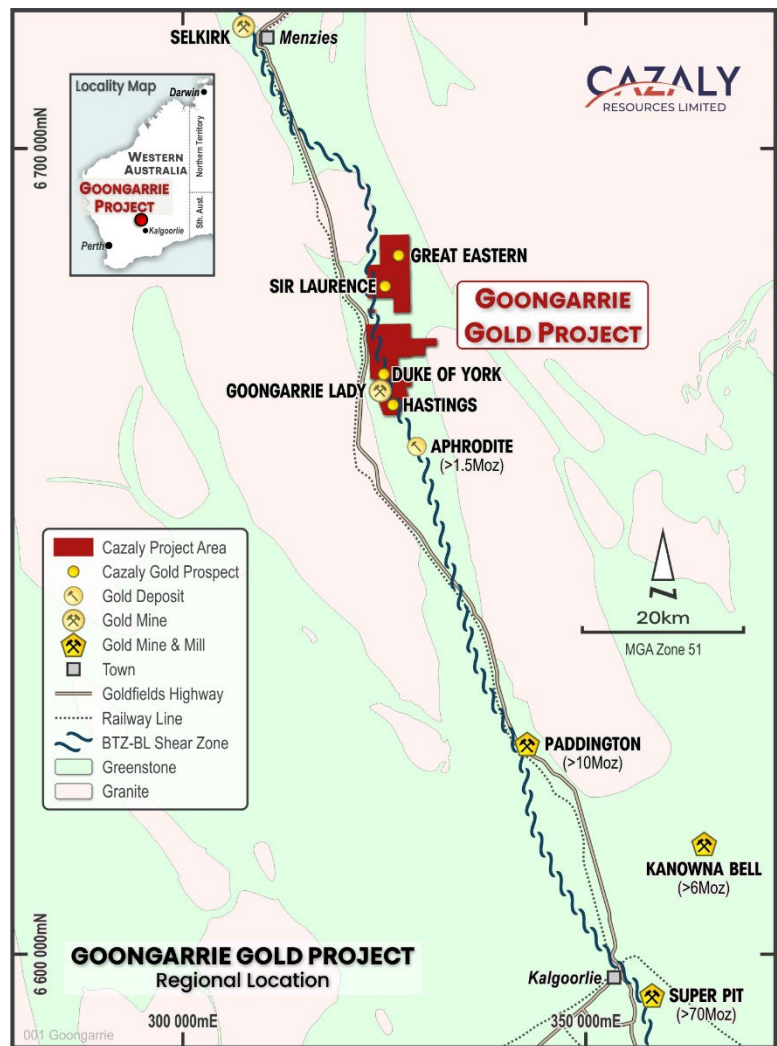

Figure 1. Regional location – Goongarrie Gold Project.

Zone (BTZ). Two gold deposits along the BTZ were initially mined in the late 1980s at Jennys Reward, and Goongarrie Lady which was recently re-commissioned by a private group. There is potential for the discovery of new gold deposits undercover along the 12km strike length of the BTZ and along largely untested parallel mineralised structures that run N-S through the length of the project.

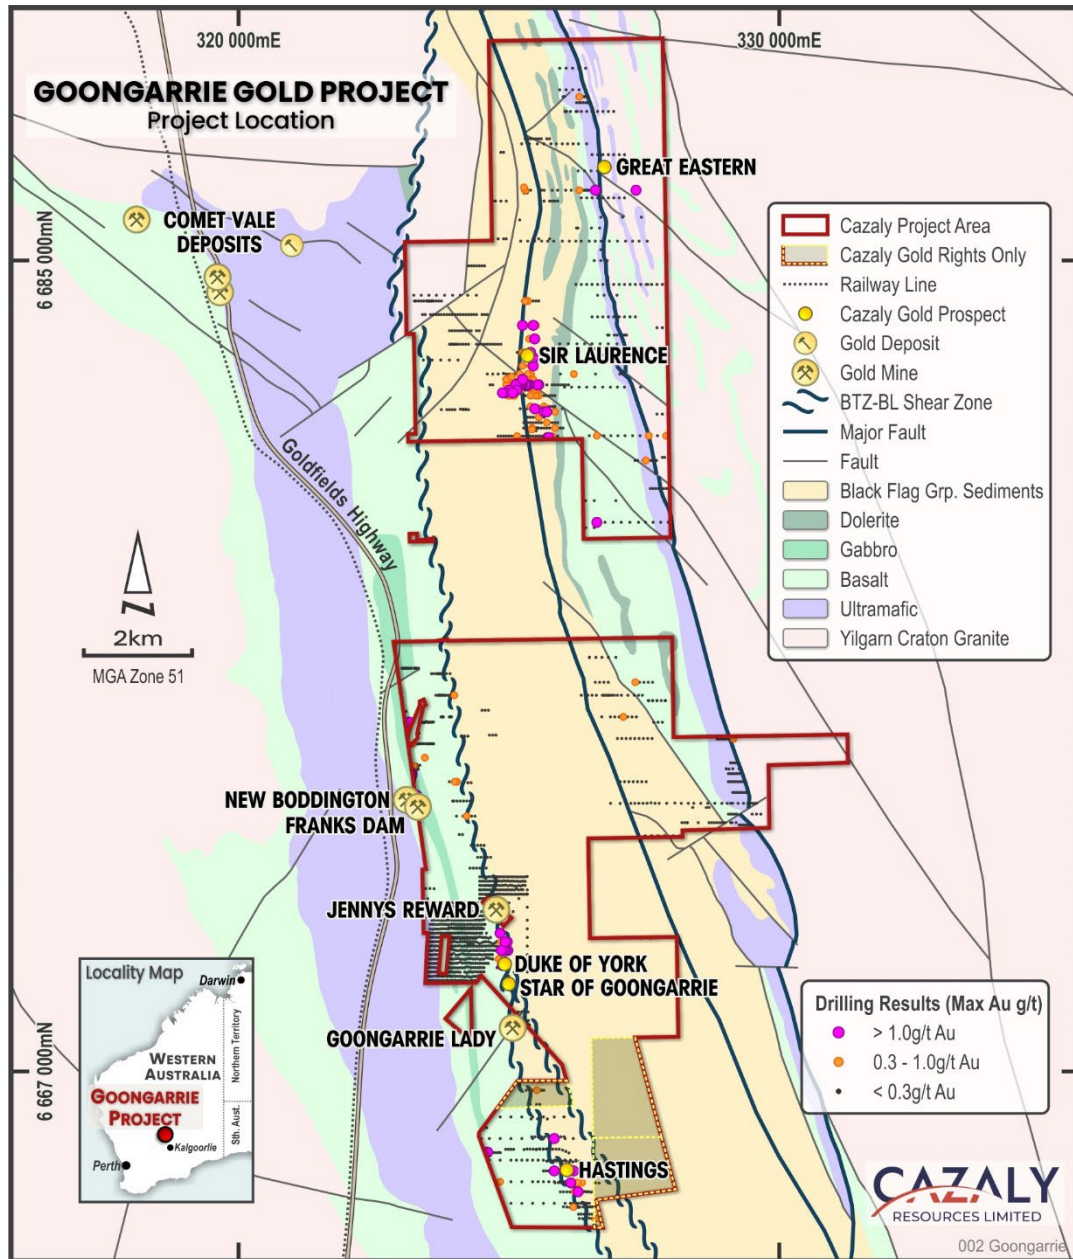

Figure 2. Gold Prospects and historical drilling. NB: all gold prospects lie within the Project area, all mines and deposits on this plan are located outside the Project area.

KWR completed aeromagnetic and passive seismic surveys in addition to AC, RC and diamond drilling, which largely focused on targets beneath thick clay sediments on Lake Goongarrie, along a N-S structure parallel to the BTZ. Several other gold prospects were also identified along the BTZ that require further drilling and will be the initial focus for Cazaly.

Significant gold prospects (Figure 2):

- **Hastings** – formerly the Area 9 prospect, bedrock gold mineralisation over 1km strike, including the anomalous gold intersection in KGA038, **38m @ 3.1g/t Au**, that extends from 62m to the end of hole at 100m depthⁱⁱ. The prospect lies under cover along the BTZ shear zone which hosts the recent +1Moz Aphrodite gold discovery located 9km to the south.
- **Duke of York** – bedrock gold mineralisation along the BTZ shear extending from the open pit mines at Goongarrie Lady to Jennys Reward. Anomalous gold intercepts include **13m @ 3.5g/t Au** from 36–49m in JRR008ⁱⁱⁱ, and **8m @ 10.7g/t Au** from 75–83m in JRR024^{iv}, and remains to be tested up dip and along strike.
- **Sir Laurence** – widespread gold mineralisation over 2km strike within channel sands and gravels (eg KGA0409 3m @ 6.5g/t Au from 86–89m^v) at the base of Goongarrie Lake sediments. Mineralisation was also discovered in the underlying bedrock within the Black Flag Group with anomalous intercepts including 5m @ 4.8g/t Au from 113.3m in KDG004^{vi}.
- **Great Eastern** – formerly the East Lake prospect, bedrock gold mineralisation within ultramafic and clastic sediments associated with a significant N-S trending fault and NW splays at the greenstone/granite margin.

Cautionary Statement (historical)

The historical exploration results reported above have been sourced from the Kingwest historical data base and public reports as listed under “References” and may not be reported in accordance with the JORC Code. The historical information is an accurate representation of the available data for the project that has been sourced to date.

Next Steps

All available historical data has been sourced and is being reformatted, validated, and compiled for review. Following the conclusion of due diligence and Cazaly’s decision to proceed with the JV earn in agreement, all gold targets will be ranked in order of prospectivity and an exploration program designed to progressively test prioritised gold drill targets. Drilling will commence once all appropriate stakeholder approvals are in place, including heritage, environment, and drilling.

Competent Persons Statement

The information in this announcement accurately represents the available data as referenced in this document, and has been reviewed by Ms Tara French and Mr Don Horn, who are employees of the Company. Ms Tara French and Mr Horn are both Members of the Australasian Institute of Geoscientists and have sufficient experience which is relevant to the style of mineralisation and type of deposit under consideration and to the activity which they are undertaking to qualify as a Competent Persons as defined in the 2012 Edition

of the 'Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves'. The company confirms that it is aware the historical information may not have been reported in accordance with JORC 2012, and the more recent information was reported in accordance with JORC 2012, it is also not aware of any new information or data that materially affects the information included in the original reports. Ms Tara French and Mr Horn both consent to the inclusion of the matters based on the information in the form and context in which it appears.

Forward Looking Statement

This ASX announcement may include forward-looking statements. Forward-looking statements include, but are not limited to, statements concerning Cazaly's planned exploration program(s) and other statements that are not historical facts. When used in this document, words such as "could," "plan," "estimate," "expect," "intend," "may," "potential," "should," and similar expressions are forward looking statements. Although Cazaly Resources believes that its expectations reflected in these forward-looking statements are reasonable, such statements involve risks and uncertainties and no assurance can be given that actual results will be consistent with these forward-looking statements. The forward-looking statements in this announcement reflect views held only as at the date of this announcement.
