Alcidion secures 10-year contract with North Cumbria Integrated Care (NCIC) for Miya Precision EPR Platform

Highlights

- Alcidion has secured a long-term contract with North Cumbria Integrated Care NHS Foundation Trust (NCIC) for use of its Miya Precision platform to provide an Electronic Patient Record (EPR)
- Total Contract Value (TCV) of ~\$37.5M (£19.0M) over a term of 10 years with options to extend
- Deployment to begin immediately, with \$8.0M-\$9.0M expected to be recognised in FY25 subject to implementation milestones
- Alcidion's Miya Precision EPR was chosen following a competitive tender process
- NCIC extends Alcidion's market footprint in the North East North Cumbria region, with two other NHS trusts in the region also using modules from the Alcidion product suite

Melbourne, Victoria | [Alcidion Group Limited](#) (ASX:ALC) (Alcidion) has today announced it has signed a new contract ('the Contract') with North Cumbria Integrated Care NHS Foundation Trust (NCIC) in the United Kingdom for use of its Miya Precision platform to provide an Electronic Patient Record (EPR) to the Trust.

Alcidion's modular EPR will enhance digital maturity and support clinicians to deliver high quality safe patient care. Intuitive design, ease of use and interoperability with specialist systems that NCIC wishes to retain, are key benefits recognised by the Trust's EPR evaluation team. The full Miya Precision EPR will enable mobile working, streamline patient flow, support clinical decision-making processes and provide clinicians with real-time access to a unified patient record.

The Miya Precision EPR will support care delivery across emergency, inpatient and outpatient services. The clinical workflows will be complemented by the availability of real-time patient flow management capability and extensive clinical documentation functionality that is designed to support all clinical roles in documenting patient care. The use of the cloud-hosted, web-based solution will be extended through the provision of a smart-phone based mobile app that will provide care teams with access to the full patient record wherever and whenever needed.

This agreement will extend Alcidion's footprint in the North East North Cumbria region, with another NHS Trust Northumbria Healthcare NHS Foundation Trust currently using the Miya Precision Patient Administration System (PAS) module, and South Tees using the EPR platform.

The Total Contract Value (TCV) is approximately ~\$37.5M (£19.0M) over a total term of 10 years. In FY25 Alcidion will recognise \$8.0M - \$9.0M of this contract dependent on progress against project implementation milestones.

NCIC provides hospital and community health services to around half a million people. It is responsible for delivering around 70 acute and community services across 15 main locations in the United Kingdom, supported by more than 6,500 employees. In a health network of this size and diversity, EPR infrastructure is of critical importance to patient flow, safety and clinical outcomes.

Alcidion CEO and MD, Kate Quirke said: “Securing this long-term contract with North Cumbria Integrated Care is a significant step for the Trust and demonstrates the value a modern, modular EPR platform can bring to healthcare systems. Miya Precision has a strong reputation for supporting clinicians to digitise their workflows and improve care outcomes for patients, and we are excited to deliver this for NCIC.”

“For Alcidion, this contract represents a key milestone in our efforts to support major healthcare providers with market-leading digital health solutions. The emergence of smarter, more focused electronic patient records infrastructure is being widely accepted as an essential part of clinical workflow and patient care, globally, and we remain committed to continuous improvement and world-class innovation in this space.”

Dr Adrian Clements, Executive Medical Director of NCIC, said: “Our partnership with Alcidion and the introduction of the Miya Precision EPR platform marks a significant step forward in transforming how we deliver patient care at NCIC. This innovative, user-friendly system will streamline workflows, reduce duplication, and provide our teams with the tools they need to focus on what matters most – our patients. By integrating cutting-edge technology, we are not just keeping pace with modern healthcare, but setting a standard for safer, smarter, and more efficient care delivery.”
