

Symal awarded \$347 million Gawara Baya Wind Farm Project

21 February 2025: Symal Group Limited (**Company or Symal**) (**ASX: SYL**) is pleased to announce that its wholly owned subsidiary, Symal Infrastructure Pty Ltd (**Symal Infrastructure**) has been awarded a \$347,000,000 (excluding GST) conditional contract with Upper Burdekin Wind Farm Pty Ltd as trustee for the Gawara Baya Project Trust for the Civil Balance of Plant (**CBoP**) works on Gawara Baya Wind Farm project (**Gawara Baya Wind Farm**).

Gawara Baya Wind Farm is a wind energy project with the capacity to provide clean power to Australian homes, eliminating approximately 1.3 million tonnes of carbon dioxide from Australia's energy market every year.

The project is located on an active cattle property within Gugu Badhun Country in North Queensland, in close proximity to the existing transmission infrastructure.

Symal's CBoP scope of works includes the full civil scope including quarry and concrete supply, earthworks, drainage, internal road network construction, internal bridge construction, concrete foundations and crushed rock hardstands. The CBoP is conditional and not guaranteed and is subject to a number of conditions being finalised prior to the CBoP being in full force and effect.

The works to be performed by Symal are forecast to commence in FY26 and will run for ~2 years from satisfaction of the conditions precedent and receipt of the Notice to Proceed from the Client.

Commenting on the successful awarding of the Gawara Bay Wind Farm project, Group Managing Director Joe Bartolo, said:

"This significant project further strengthens our commitment to our national expansion into Northern Queensland and adds to Symal's long list of renewable energy projects we have successfully delivered and adds a significant amount to our work in hand position."
