

RESULTS FOR ANNOUNCEMENT TO THE MARKET

BRISBANE, AUSTRALIA, February 28, 2025 - NOVONIX Limited (NASDAQ: NVX, ASX: NVX) (“NOVONIX” or the “Company”), a leading battery materials and technology company, advises that in accordance with the Listing Rules, NOVONIX encloses the following information:

1. Appendix 4E
2. NOVONIX Limited 2024 Annual Report on Form 20-F

This announcement has been authorised for release by Admiral Robert J Natter, USN Ret., Chairman.

About NOVONIX

NOVONIX is a leading battery technology company revolutionizing the global lithium-ion battery industry with innovative, sustainable technologies, high-performance materials, and more efficient production methods. The Company manufactures industry-leading battery cell testing equipment, is growing its high-performance synthetic graphite material manufacturing operations, and has developed a patented all-dry, zero-waste cathode synthesis process. Through advanced R&D capabilities, proprietary technology, and strategic partnerships, NOVONIX has gained a prominent position in the electric vehicle and energy storage systems battery industry and is powering a cleaner energy future.

Securities registered or to be registered pursuant to Section 12(b) of the Act.

Title of each class	Trading Symbol(s)	Name of each exchange and on which registered
American Depositary Shares, each representing four ordinary shares, no par value	NVX	The Nasdaq Stock Market LLC

Securities registered or to be registered pursuant to Section 12(g) of the Act: None

Securities for which there is a reporting obligation pursuant to Section 15(d) of the Act: None

Indicate the number of outstanding shares of each of the issuer's classes of capital or common stock as of the close of the period covered by the annual report: 488,733,461 Ordinary Shares

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act. Yes ☐ No ☒

If this report is an annual or transition report, indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or (15)(d) of the Securities Exchange Act of 1934. Yes ☐ No ☒

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes ☒ No ☐

Indicate by check mark whether the registrant has submitted electronically every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes ☒ No ☐

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or an emerging growth company. See definition of "accelerated filer," "large accelerated filer" and "emerging growth company" in Rule 12b-2 of the Exchange Act. (Check one):

Large Accelerated Filer ☐

Accelerated Filer ☒

Non-Accelerated Filer ☐

Emerging Growth Company ☒

If an emerging growth company that prepares its financial statements in accordance with U.S. GAAP, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards[†] provided pursuant to Section 13(a) of the Exchange Act. ☐

[†] The term "new or revised financial accounting standard" refers to any update issued by the Financial Accounting Standards Board to its Accounting Standards Codification after April 5, 2012.

Indicate by check mark whether the registrant has filed a report on and attestation to its management's assessment of the effectiveness of its internal control over financial reporting under Section 404(b) of the Sarbanes-Oxley Act (15 U.S.C. 7262(b)) by the registered public accounting firm that prepared or issued its audit report. ☐

If securities are registered pursuant to Section 12(b) of the Act, indicate by check mark whether the financial statements of the registrant included in the filing reflect the correction of an error to previously issued financial statements. ☐

Indicate by check mark whether any of those error corrections are restatements that required a recovery analysis of incentive- based compensation received by any of the registrant's executive officers during the relevant recovery period pursuant to §240.10D-1(b). ☐

Indicate by check mark which basis of accounting the registrant has used to prepare the financial statements included in this filing:

U.S. GAAP ☐

International Financial Reporting Standards as issued by the International Accounting Standards Board ☒

Other ☐

If "Other" has been checked in response to the previous question, indicate by check mark which financial statement item the registrant has elected to follow. Item 17 ☐ Item 18 ☐

If this is an annual report, indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes ☐ No ☒

(APPLICABLE ONLY TO ISSUERS INVOLVED IN BANKRUPTCY PROCEEDINGS DURING THE PAST FIVE YEARS)

Indicate by check mark whether the registrant has filed all documents and reports required to be filed by Sections 12, 13 or 15(d) of the Securities Exchange Act of 1934 subsequent to the distribution of securities under a plan confirmed by a court. Yes ☐ No ☐

INTRODUCTION AND USE OF CERTAIN TERMS

We have prepared this annual report on Form 20-F using a number of conventions, which you should consider when reading the information contained herein. In this annual report, “NOVONIX,” the “Company,” the “Group”, “our company,” “we,” “us” and “our” refer to NOVONIX Limited and its consolidated subsidiaries, taken as a whole. Additionally, this annual report uses the following conventions:

- “US\$,” “U.S. dollars,” “\$” and “dollars” mean United States dollars;
- “A\$” mean Australian dollars;
- “C\$” mean Canadian dollars, unless otherwise noted;
- “ADSS” mean American depositary shares, each of which represents four of our ordinary shares, no par value;
- “ADRs” mean the American depositary receipts that may evidence the ADSs;
- “ASX” refers to the Australian Securities Exchange; and
- “Nasdaq” refers to the Nasdaq Stock Market LLC.

AUSTRALIAN DISCLOSURE REQUIREMENTS

Our ordinary shares are quoted on the ASX in addition to our listing of our ADRs on the Nasdaq. As part of our ASX listing, we are required to comply with various disclosure requirements as set out under the Australian *Corporations Act 2001* and the *ASX Listing Rules*. Information furnished under the sub-heading “Australian Disclosure Requirements” is intended to comply with ASX Listing Rules and the *Corporations Act 2001* disclosure requirements and is not intended to fulfill information required by this Annual Report on Form 20-F.

EXPLANATORY NOTE

On December 20, 2022, the Board of Directors of NOVONIX Limited (the “Board of Directors” or the “Board”) approved a change of fiscal year end from June 30 to December 31 to better align the reporting of the Company’s results with its industry peers. As a result, in February 2023, we filed a transition report on Form 20-F for the six-month transition period of July 1, 2022, to December 31, 2022. Unless otherwise noted, all references to “fiscal year” in this annual report on Form 20-F refer to the fiscal year which, prior to the transition period, ended on June 30, and which, after the transition period, ended December 31. Our consolidated financial statements for the fiscal years ended December 31, 2024, 2023 and six-month period ended December 31, 2022, and year ended June 30, 2022, have been prepared in accordance with International Financial Reporting Standards (“IFRS”) as issued by the International Accounting Standards Board. A comparison of our operating results for the years ended December 31, 2024, and 2023, has been included within *Item 5. Operating and Financial Review and Prospects*.

CAUTIONARY NOTE REGARDING FORWARD-LOOKING STATEMENTS

This annual report contains forward-looking statements about us and our industry that involve substantial risks and uncertainties. All statements other than statements of historical facts contained in this annual report, including statements regarding our future results of operations, financial condition, business strategy, and plans and objectives of management for future operations, are forward-looking statements. In some cases, you can identify forward-looking statements because they contain words such as “anticipate,” “believe,” “contemplate,” “continue,” “could,” “estimate,” “expect,” “intend,” “may,” “plan,” “potential,” “predict,” “project,” “should,” “target,” “will,” or “would,” or the negative of these words or other similar terms or expressions.

We have based these forward-looking statements largely on our current expectations and projections about future events and trends that we believe may affect our financial condition, results of operations, business strategy and financial needs. These forward-looking statements are subject to a number of known and unknown risks, uncertainties, other factors and assumptions, including the risks described in *Item 3. Key Information—D. Risk Factors* contained herein.

These risks are not exhaustive. Other sections of this annual report may include additional factors that could harm our business and financial performance. New risk factors may emerge from time to time, and it is not possible for our management to predict all risk factors, nor can we assess the impact of all factors on our business or the extent to which any factor, or combination of factors, may cause actual results to differ materially from those contained in, or implied by, any forward-looking statements.

You should not rely on forward-looking statements as predictions of future events. We have based the forward-looking statements contained in this annual report primarily on our current expectations and projections about future events and trends that we believe may affect our business, financial condition, and operating results. We undertake no obligation to update any forward-looking statements made in this annual report to reflect events or circumstances after the date of this annual report or to reflect new information or the occurrence of unanticipated events, except as required by law. We may not actually achieve the plans, intentions or expectations disclosed in our forward-looking statements, and you should not place undue reliance on our forward-looking statements. Our forward-looking statements do not reflect the potential impact of any future acquisitions, mergers, dispositions, joint ventures or investments.

In addition, statements that “we believe” and similar statements reflect our beliefs and opinions on the relevant subject. These statements are based on information available to us as of the date of this annual report. While we believe that information provides a reasonable basis for these statements, that information may be limited or incomplete. Our statements should not be read to indicate that we have conducted an exhaustive inquiry into, or review of, all relevant information. These statements are inherently uncertain, and investors are cautioned not to unduly rely on these statements.

You should read this annual report and the documents that we reference in and have filed as exhibits to the annual report with the understanding that our actual future results, levels of activity, performance and achievements may be different from what we expect. We qualify all of our forward-looking statements by these cautionary statements.

PART I

Item 1. Identity of Directors, Senior Management and Advisers

Not applicable.

Item 2. Offer Statistics and Expected Timetable

Not applicable.

Item 3. Key Information

A. [Reserved]

B. Capitalization and Indebtedness

Not applicable.

C. Reasons for the Offer and Use of Proceeds

Not applicable.

D. Risk Factors

Our business is subject to numerous risks and uncertainties that you should consider before investing in our securities. These risks are described more fully below and include, but are not limited to, risks relating to the following:

- We will need to obtain funding to finance our growth and operations, which may not be available on acceptable terms, or at all. If we are unable to raise capital when needed, we may be forced to delay, reduce or eliminate certain operations, and we may be unable to adequately control our costs.
- We face significant challenges in our attempt to develop our anode and cathode materials to produce them at volumes with acceptable performance, yields and costs. The pace of development in materials science is often not predictable. We may encounter substantial delays or operational problems in the scale-up of our anode materials production or the commercialization of our cathode materials technology.
- The systems, equipment and processes we use in the production of our anode materials are complex, and we are subject to many operational risks that could substantially increase our costs, limit the operational performance of our anode materials operations, and adversely affect our business.
- Our failure to achieve existing or target customers' product specifications for our anode materials or otherwise engage target customers successfully and convert such contacts into meaningful orders in the future would have a material adverse effect on our business.
- If we are unable to attract and retain key employees and qualified personnel, our ability to compete could be harmed.
- Labor shortages, turnover, and labor cost increases and the delay or insufficiency of the training of our employees could adversely impact our ability to scale up manufacturing of our anode materials and commercialize our cathode technology.
- If we do not satisfy the terms of our DOE grant, we may be unable to be reimbursed under or otherwise receive any or all of the funds or other benefits under the grant, may be required to return unused funds, and may be subject to claims or penalties, which would have a material adverse effect on our business.
- We may not qualify for tax credits available to U.S. producers of graphite or otherwise realize any of the benefits of such tax credits due to a change in current tax law, our inability to satisfy the requirements for realizing such benefits or factors outside our control.
- Our reliance on certain limited or sole source suppliers subjects us to a number of risks.

- The battery technology market continues to evolve and is highly competitive, and we may not be successful in competing in this industry or establishing and maintaining confidence in our long-term business prospects among current and future partners and customers.
- Our anode materials business is subject to fluctuating and potentially unfavorable market conditions for graphite.
- Our future growth and success will depend on our ability to sell effectively to large customers.
- We depend, and expect to continue to depend, on a limited number of customers for a significant percentage of our revenue.
- Our commercial relationships are subject to various risks which could adversely affect our business and future prospects.
- Our business and future growth depend substantially on the growth in demand for electric vehicles and batteries for grid energy storage.
- Our projected operating and financial results rely in large part upon assumptions and analyses we have developed. If these assumptions or analyses prove to be incorrect, our actual operating results may be materially different from our projected results.
- We may not be able to establish supply relationships for necessary components or may be required to pay costs for components that are more expensive than anticipated, which could delay the introduction or acquisition of additional equipment necessary to support our growth and negatively impact our business.
- We may not be able to accurately estimate the future supply and demand for our materials and equipment, which could result in a variety of inefficiencies in our business and hinder our ability to generate revenue. If we fail to accurately predict our manufacturing requirements or prices of components increase, we could incur additional costs or experience delays.
- We have a history of financial losses and expect to incur significant expenses and continuing losses in the near future.
- We have a concentration of beneficial ownership among Phillips 66, LG Energy Solution, and our executive officers, non-executive directors and their affiliates that may prevent new investors from influencing significant corporate decisions.
- Global political, economic and financial conditions (as well as the indirect effects flowing therefrom) could negatively affect our business, results of operations, and financial condition.
- Our systems and data may be subject to disruptions or other security incidents, and we may face alleged violations of laws, regulations, or other obligations relating to our employees' personal data or confidential data of our customers and other business partners that could result in liability and adversely impact our reputation and future sales.
- Our operations are subject to significant risks of safety incidents, which could result in harm to our workers, damage to our property and delays in our production that would adversely affect our business.
- From time to time, we may be involved in litigation, regulatory actions or government investigations and inquiries, which could have an adverse impact on our profitability and consolidated financial position.
- We may become subject to product liability claims, which could harm our financial condition and liquidity if we are not able to successfully defend or insure against such claims.
- From time to time we may enter into negotiations for acquisitions, dispositions, partnerships, joint ventures or investments that are not ultimately consummated or, if consummated, may not be successful.
- Our facilities or operations could be damaged or adversely affected as a result of natural disasters and other catastrophic events.
- Issues relating to the use of new and evolving technologies, such as Artificial Intelligence, in our business could adversely affect our business and operating results.
- Terrorist activity, acts of war and political instability around the world could adversely impact our business.
- We are subject to substantial regulation and unfavorable changes to, or our failure to comply with, these regulations could substantially harm our business and operating results.
- We are subject to environmental, health and safety requirements which could adversely affect our business, results of operation and reputation.

- We are subject to anti-corruption, anti-bribery, anti-money laundering, financial and economic sanctions and similar laws, and non-compliance with such laws can subject us to administrative, civil and criminal fines and penalties, collateral consequences, remedial measures and legal expenses, all of which could adversely affect our business, results of operations, financial condition and reputation.
- Our success depends upon our ability to obtain and maintain intellectual property protection for our materials and technologies.
- Termination of our collaborative research agreement with Dalhousie University to support the development of current and future technology would likely harm our business, and even if it continues, it may not help us successfully develop any new intellectual property.
- We may be subject to claims by third parties asserting misappropriation of intellectual property, or claiming ownership of what we regard as our own intellectual property.
- Our patent applications may not result in issued patents or our patent rights may be contested, circumvented, invalidated or limited in scope, any of which could have a material adverse effect on our ability to prevent others from interfering with our commercialization of our products.
- Changes in patent law could diminish the value of patents in general, thereby impairing our ability to protect our technologies and processes.
- We may be unable to obtain intellectual property rights or technology necessary to develop and commercialize our materials and equipment.
- We may become involved in lawsuits or other proceedings to protect or enforce our intellectual property, which could be expensive, time-consuming and unsuccessful and have a negative effect on the success of our business.
- An active U.S. trading market may not be sustained.
- The trading price and volume of the ADSs may be volatile, and purchasers of the ADSs could incur substantial losses.
- Future sales of our ordinary shares or the ADSs or the anticipation of future sales could reduce the market price of our ordinary shares or the ADSs.
- If securities or industry analysts do not publish research or reports about our business, or publish inaccurate or unfavorable reports about our business, the price of the ADSs and their trading volume could decline.
- We do not currently intend to pay dividends on our securities and, consequently, your ability to achieve a return on your investment will depend on appreciation in the price of the ADSs.
- The dual listing of our ordinary shares and the ADSs may negatively impact the liquidity and value of the ADSs.
- U.S. investors may have difficulty enforcing civil liabilities against our company, our directors or members of senior management and the experts named in this annual report.
- Australian takeover laws may discourage takeover offers being made for us or may discourage the acquisition of a significant position in our ordinary shares or the ADSs.
- Our Constitution and Australian laws and regulations applicable to us may differ from those which apply to a U.S. corporation.
- Holders of ADSs will not be directly holding our ordinary shares.
- Your right as a holder of ADSs to participate in any future preferential subscription rights offering or to elect to receive dividends in ordinary shares may be limited, which may cause dilution to your holdings.
- You may not be able to exercise your right to vote the ordinary shares underlying your ADSs.
- You may be subject to limitations on the transfer of your ADSs and the withdrawal of the underlying ordinary shares.
- ADS holders' rights to pursue claims are limited by the terms of the deposit agreement.
- We and the depositary are entitled to amend the deposit agreement and to change the rights of ADS holders under the terms of such agreement and we may terminate the deposit agreement, without the prior consent of the ADS holders.
- ADS holders have limited recourse if we or the depositary fail to meet our respective obligations under the deposit agreement.

- As a foreign private issuer, we are exempt from a number of rules under the U.S. securities laws that apply to public companies that are not foreign private issuers.
- As a foreign private issuer we are permitted to adopt certain home country practices in relation to corporate governance matters that differ significantly from Nasdaq corporate governance listing standards and these practices may afford less protection to shareholders than they would enjoy if we complied fully with Nasdaq corporate governance listing standards.
- We may lose our foreign private issuer status in the future, which could result in significant additional cost and expense.
- We are an "emerging growth company" under the JOBS Act and will be able to avail ourselves of reduced disclosure requirements applicable to emerging growth companies, which could make our ordinary shares and ADSs less attractive to investors.
- We have incurred and will continue to incur significant, increased costs as a result of operating as a company with ADSs that are publicly traded in the United States and will incur increased costs as a result of becoming a recipient of United States government funding and incentives, and our management will be required to devote substantial time to new compliance initiatives.
- If we fail to implement and maintain an effective system of internal controls or fail to identify and remediate our material weaknesses thereof, we may be unable to accurately report our results of operations, meet our reporting obligations or prevent fraud, and investor confidence in our Company and the market price of the ADSs may be negatively impacted.
- We currently report our financial results under IFRS, which differs in certain significant respects from U.S. generally accepted accounting principles, or U.S. GAAP.
- We are subject to risks associated with currency fluctuations, and changes in foreign currency exchange rates could impact our results of operations.
- Our ability to utilize our net operating losses to offset future taxable income may be prohibited or subject to certain limitations.
- If we are a passive foreign investment company, there could be adverse U.S. federal income tax consequences to U.S. holders.
- If a U.S. person is treated as owning at least 10% of our ordinary shares, such holder may be subject to adverse U.S. federal income tax consequences.
- Future changes to tax laws could materially adversely affect our company and reduce net returns to our shareholders.

Risks Related to Our Business

We will need to obtain funding to finance our growth and operations, which may not be available on acceptable terms, or at all. If we are unable to raise capital when needed, we may be forced to delay, reduce or eliminate certain operations, and we may be unable to adequately control our costs.

We require significant capital to develop and grow our business and expect to incur significant expenses, including those relating to acquisition of production equipment, facility expansion, research and development, property acquisition and maintenance, regulatory compliance, and sales as we scale our commercial operations and build and market our materials, equipment and service offerings. We also expect our general and administrative costs to increase as we scale our operations. Our ability to generate operating cash flow and become profitable in the future will depend not only on our ability to successfully market our materials, equipment and services, but also to control our costs, and will require us to obtain additional funding.

We have applied for, received, and intend to continue to seek government support through grants, loans and tax or other incentives from federal, state and provincial governments in the U.S. and Canada, and our ability to obtain and use funds from such programs, depends, among other things, on our ability to raise matching funding in a timely manner. For example, in the fourth quarter of 2023, we finalized our \$100 million grant from the Office of Manufacturing & Energy Supply Chains ("MESC Office") of the U.S. Department of Energy ("DOE") to expand domestic production of high-

performance, synthetic graphite anode materials at our Riverside facility in Chattanooga, Tennessee. To use this grant, we must match the costs reimbursed under the grant. We also received a conditional commitment from the DOE through the Loan Programs Office ("LPO") Advanced Technology Vehicles Manufacturing ("ATVM") program for a direct loan of up to \$754.8 million to be applied towards partially financing a proposed new facility in Chattanooga. We would need to raise the remainder of eligible project costs (and fund non-eligible project costs) with equity. While this conditional commitment demonstrates the DOE's intent to finance the new facility, the DOE must complete an environmental review, and the Company must satisfy certain technical, commercial, legal, environmental, and financial conditions before the DOE can decide whether to enter into definitive financing documents and fund the loan. A binding loan agreement from the DOE is also subject to the satisfactory completion of due diligence by the DOE, satisfaction of conditions precedent specified in the term sheet, approval of the Company's Board, receipt of required governmental and third-party consents, and the negotiation and execution of binding loan documents. There can be no assurance that all of the required conditions and other actions will be satisfied or waived or that a final definitive loan agreement will be reached. For a description of the DOE grant, the LPO loan and certain tax incentives we have received and applied for, see *Item 4. Information on the Company— B. Business Overview — NOVONIX Anode Materials*.

The application process for financial, tax and other support from the government is highly competitive, and we cannot predict whether we will ultimately be awarded or receive any additional grants, loans, including the LPO loan, or tax or other incentives. Our ability to obtain grants, loans or tax or other incentives from government entities in the future is subject to the availability of funds under applicable government programs, our ability to raise matching funds and equity, approval of our applications to participate in such programs, achievement of milestones for funding, and ongoing compliance with various laws and regulations as described below.

As of December 31, 2024, we had \$42.6 million in cash, cash equivalents and short-term investments. We require significant additional capital to achieve our plans to expand our production capacity for our anode materials to meet our existing customer commitments and anticipated customer demand. Additional capital may not be available to us on acceptable terms, or at all, and will depend among other things on our creditworthiness and the capital markets. If we raise additional funds through collaboration and licensing arrangements with third parties, we may have to relinquish some rights to our technologies or our product candidates on terms that may not be favorable to us. Any additional capital-raising efforts may divert our management from their day-to-day activities, which may adversely affect our ability to develop and commercialize our current and future product and service offerings or delay, reduce or altogether cease certain operations or future commercialization efforts. See also *Item 3. Key Information — D. Risk Factors ("We have a history of financial losses and expect to incur significant expenses and continuing losses in the near future")*, *Item 5 Operating and Financial Review and Prospects—B. Liquidity and Capital Resources*, and *Item 18. Financial Statements*.

We face significant challenges in our attempt to develop our anode and cathode materials to produce them at volumes with acceptable performance, yields and costs. The pace of development in materials science is often not predictable. We may encounter substantial delays or operational problems in the scale-up of our anode materials production or the commercialization of our cathode materials technology.

Developing anode and cathode materials that meet the requirements for wide adoption by our potential customers is a difficult undertaking. We are still in the development stage for certain of our materials and face significant challenges in producing our materials to required specifications and at commercial volumes. Some of the development challenges that could prevent the successful scale up of production of our materials include changes in product performance from small to large scale production, challenges in deployment of mass production equipment, and inability to produce materials cost effectively at large volumes. If we are unable to cost efficiently design, manufacture, market, and sell our materials, our margins, profitability and prospects would be materially and adversely affected. We have only recently produced anode materials with our proprietary Generation 3 continuous induction graphitization furnace ("Generation 3 furnace systems") and we have yet to produce cathode materials beyond lab and small pilot volumes. Any delay in the manufacturing scale-up of our anode materials, our ability to achieve our customers' desired product specifications or the progression of our cathode synthesis technology would negatively impact our business as it will delay revenue generation and negatively impact our customer relationships.

Our Riverside facility in Chattanooga Tennessee, is targeted to produce anode materials of up to 20,000 tonnes per annum ("tpa"). We utilize new proprietary furnace technology ("Generation 3 furnace systems") developed in collaboration with Harper International Corporation ("Harper"). We have installed Generation 3 furnace systems at our Riverside facility and are continuing the commissioning of those systems to meet our production targets. Our ability to produce at targeted capacity is largely dependent upon Harper manufacturing and supplying Generation 3 furnace systems on a schedule that meets our needs, our successful implementation of the same, and our ability to recruit and retain an increased number of skilled staff focused on plant design, engineering and operations. Our production timelines have recently been adjusted due to delays in receiving equipment from our vendors, ultimately affecting our installation and commissioning schedules. The targeted production capacity of our Riverside facility is planned to help us meet our volume commitments under our supply or offtake agreements with certain customers, including Panasonic Energy Co., Ltd. ("Panasonic Energy"), Stellantis NV ("Stellantis"), and PowerCo SE ("PowerCo"). In addition, we plan to build a new facility, Enterprise South, to be located in the Enterprise South Industrial Park in Chattanooga, Tennessee, to manufacture synthetic graphite primarily for use in electric vehicle ("EV") batteries.

While we have a continued, phased expansion plan of 150,000 tpa to meet expected market demand growth, our plan is contingent on the successful satisfaction of a number of factors, some of which are beyond our control. These factors include, among others, our ability to obtain funding on attractive terms to enable further expansion of our current production facilities and our ability to expand our production capacity through the construction of new production facilities, acquisition, installation and commissioning of new equipment, and business acquisitions, joint ventures and other inorganic means. Any or all of these expansion paths may involve many risks, any of which could materially harm our business, including the diversion of management's attention from core business concerns, failure to effectively exploit acquired technologies, failure to successfully integrate acquired business or realize expected synergies or the loss of key employees from either our business or acquired businesses. If we are unable to execute on those expansion efforts for any reason, we may experience a delay in the manufacturing scale-up or the scale-up may not occur at all, which would result in the loss of customers and materially damage our business, prospects, financial condition, and operating results.

The progression of our cathode materials technology from lab to commercial scale manufacturing is contingent upon the success of our all-dry, zero-waste cathode synthesis process methodology. If production of cathode materials using this methodology, either on a pilot or commercial scale, is not successful, our business, prospects, financial condition, operating results and brand may be materially adversely affected.

The systems, equipment and processes we use in the production of our anode materials are complex, and we are subject to many operational risks that could substantially increase our costs, limit the operational performance of our anode materials operations, and adversely affect our business.

We rely heavily on complex systems, equipment and processes for our operations and the production of our synthetic graphite anode materials. We are commissioning our Generation 3 furnace systems to become qualified to operate at large-scale production. The work required to integrate our systems, equipment, and processes into the production of our anode materials is time intensive and requires us to work closely with Harper and other third-party suppliers to ensure they work properly for our proprietary battery materials technology. This work has involved and will continue to involve a significant degree of uncertainty and risk and may result in a delay in the scaling up of anode materials production or result in additional, unforeseen production costs. Any delay in the scale-up of our production would negatively impact our business as it will delay time to revenue and negatively impact our customer relationships and agreements. Even if we complete the commissioning of our systems and achieve volume production of our anode materials, if the cost, performance characteristics or other specifications of the materials fall short of our targets or our customer requirements, our sales, product pricing and margins could be adversely affected.

Our failure to achieve existing or target customers' product specifications for our anode materials or otherwise engage target customers successfully and convert such contacts into meaningful orders in the future would have a material adverse effect on our business.

Our ability to achieve our customers' desired specifications for our anode materials is critical to our meeting existing customer obligations and gaining new customers. Volume commitments under our offtake agreements with Panasonic Energy, Stellantis and PowerCo depend on our ability to produce our anode materials that meet their specific product specifications. Other potential customers, including LGES, require the successful completion of certain development work before they will enter into any binding offtake agreement. Our success, and our ability to increase revenue and operate profitably, also depends in part on our ability to identify target customers and convert such contacts into meaningful orders or expand on current customer relationships. In addition to new customers, our future success depends on whether our current customers are willing to continue using our materials and equipment as well as whether their product lines continue to incorporate our materials and equipment.

For example, although our anode materials business had signed a non-binding memorandum of understanding with Samsung SDI, the MOU expired without the parties reaching an agreement. Additionally, we have a joint development agreement with LGES which requires successful completion of certain development work before any offtake of our anode materials. The satisfaction of quality standards and milestones of delivering mass production volume samples will be required for final qualification with battery manufacturers. There is no assurance that these conditions will ultimately be satisfied. However, if future production requirements, or similar production requirements with other potential customers, are not met, or the materials produced are not of acceptable quality, we may lose these customers and lose credibility with other domestic and international battery manufacturers and automotive OEMs, any of which could materially adversely affect our financial condition and results of operations.

Our research and development efforts aim to create materials and equipment that are on the cutting edge of technology, but competition in our industry is high. To secure acceptance of our materials and equipment, we must constantly develop and introduce materials and equipment that are cost-effective and with enhanced functionality and performance to meet evolving industry standards. If we are unable to meet our customers' performance or volume requirements or industry specifications, or retain or convert target customers, our business, prospects, financial condition and operating results could be materially adversely affected.

If we are unable to attract and retain key employees and qualified personnel, our ability to compete could be harmed.

Our success depends on our ability to attract and retain our executive officers, key employees and other highly skilled personnel, and our operations may be severely disrupted if we lost their services. As we build our operations and become better known, there is an increased risk that competitors or other companies will seek to recruit and hire our key personnel. The failure to attract, integrate, train, motivate and retain such key personnel could seriously harm our business and prospects.

In addition, we are highly dependent on the services of our senior technical and management personnel, including our executive officers, who would be difficult to replace. If any key personnel were to depart, we may not be able to successfully attract and retain senior leadership necessary to grow our business. We do not currently maintain "key person" life insurance on the lives of our executives or any of our employees. This lack of insurance means that we may not receive adequate compensation for the loss of the services of these individuals.

On January 21, 2025, we announced the planned transition in our CEO role, with Dr. Chris Burns stepping down as Chief Executive Officer effective January 24, 2025. Dr. Burns will continue to support the Company in an advisory capacity, serving as Special Advisor to the Board, in order to provide continuity, support ongoing operations of the Company and ensure a smooth transition. The Board has appointed Mr. Robert Long, our Chief Financial Officer, to serve as interim CEO, effective January 24, 2025, until a permanent CEO is appointed. Mr Long will work closely with the Board to ensure a smooth transition and maintain our momentum and focus on our key strategic goals. We cannot guarantee when we will be able to appoint Dr. Burns' permanent replacement. The change in executive management could disrupt our operations and may have a material adverse effect on our business.

Labor shortages, turnover, and labor cost increases, and the delay or insufficiency of the training of our employees could adversely impact our ability to scale up manufacturing of our anode materials and commercialize our cathode technology.

We continue to face competition for talent, wage inflation and pressure to improve benefits and workplace conditions to remain competitive. Challenging labor market conditions and the highly competitive wage pressure resulting from qualified labor shortage have made it difficult to attract and retain the best talent. A sustained labor shortage or increased turnover rates within our employee base could lead to increased costs, such as increased overtime or financial incentives to meet demand and increased wage rates to attract and retain employees, and could negatively affect our ability to scale up manufacturing for our anode and cathode materials and meet our production targets. Similarly, the complexity of our operations requires that we train our workforce effectively, and our inability to do so on a timely basis may delay or otherwise negatively affect our ability to scale up our anode materials operations, commercialize our cathode technology or otherwise negatively affect our business.

If we do not satisfy the terms of our DOE grant, we may be unable to be reimbursed under or otherwise receive any or all of the funds or other benefits under the grant, may be required to return unused funds, and may be subject to claims or penalties, which would have a material adverse effect on our business.

As a result of the DOE grant, we are required to comply with a number of laws and regulations and terms and conditions of the grant, including the preparation and furnishing of financial reports and other records. Relevant requirements include certain accounting requirements and complying with the cost allowability principles; the U.S. National Environmental Policy Act and other environmental, health and safety requirements; prevailing wage requirements; compliance with export control laws and regulations; requirements to perform work in the U.S. unless DOE grants a waiver; preferences for American-made equipment and products; requirements to substantially manufacture in the U.S. products embodying or produced through the use of a new invention developed under the grant, unless such manufacture is not commercially feasible and DOE agrees to foreign manufacture; requirements to grant liens in favor of the U.S. government on property acquired or developed with grant funds and restrictions on the sale or disposition of such property; data management requirements and restrictions on disclosing sensitive information; affirmative action and pay transparency requirements; requirements for cyber- and technology security, including employment of security officers; requirements to pre-approve participation by foreign nationals in the project; and requirements to pass-down certain of such requirements to our subrecipients and subcontractors. If we are unable to meet these requirements, we may be unable to be reimbursed under or otherwise receive any or all of the funds under the grant, may be required to return unused funds, and may be subject to claims or penalties, including the loss of our eligibility for continued participation in the grant program and other government programs. Other grants and loans for which we have applied would impose similar and potentially additional requirements and, in each case, use of such government funding subjects us to increased inspection and monitoring. We expect that the DOE's MESC Office will, and the DOE's Office of Inspector General may, review our compliance, and the adequacy of our practices for maintaining compliance. In the event of improper or illegal activities, or false or misleading statements in our applications or submissions to the government, we are subject to possible civil and criminal penalties, sanctions, or suspension or debarment from multiple government programs. The associated costs and risks may have a material adverse effect on our business.

We may not qualify for tax credits available to U.S. producers of graphite or otherwise realize any of the benefits of such tax credits due to a change in current tax law, our inability to satisfy the requirements for realizing such benefits or factors outside our control.

We were selected to receive a \$103 million tax credit under the Qualifying Advanced Energy Project Allocation Program (the "48C program") to support production of critical battery materials from our Chattanooga, Tennessee production facility. The 48C program incentivizes clean energy property manufacturing and recycling, industrial decarbonization, and critical materials processing, refining, and recycling, and aims to foster the creation of high-quality jobs, curb industrial emissions, and bolster U.S. domestic production of vital clean-energy products and critical materials. Realization of the full amount of this tax credit is subject to satisfaction of the requirements set forth in Section 48C of the Internal Revenue Code and operational and employment plans set out in the application to the Internal Revenue Service, including the

certification and placed-in-service requirements under the 48C program. In January 2025, we learned that we had not been selected to receive 48C tax credits for the planned Enterprise South facility. We are working with the DOE and the LPO to understand what, if any, impact this may have on the proposed LPO loan. See *Item 4. Information on the Company—B. Business Overview — NOVONIX Anode Materials*.

Under current U.S. tax law, including regulations issued by the U.S. Department of Treasury and the Internal Revenue Service, the production of graphite, including synthetic graphite, is eligible for the Advanced Manufacturing Production Tax Credit under Section 45X ("45X tax credits") of the Internal Revenue Code of 1986, as amended (the "Code"). Enterprise South remains eligible for a potential 45X tax credit, which offers 10% of eligible production costs of critical minerals, including graphite, back to producers. Although current regulations are in final form, because they were issued on October 24, 2024, they are subject to review under the Congressional Review Act, which gives the U.S. Congress the authority to overturn certain actions of federal agencies, including the U.S. Department of Treasury and Internal Revenue Service. In particular, there is a risk that the treatment of synthetic graphite may be subject to change. Further, U.S.-produced graphite indirectly benefits from the Clean Vehicle Tax Credit under Section 30D of the Code, which requires that the critical materials (and the associated constituent materials) contained in the battery cells of the clean vehicle must, to a certain applicable percentage, be extracted or processed in the U.S. or a country with whom the U.S. has a free trade agreement. The Clean Vehicle Tax Credit has been heavily criticized, and there are concerns that it may be repealed or limited, which indirectly could affect the demand for critical minerals. In addition, the critical mineral (and the associated constituent materials) cannot be extracted, processed or recycled by a foreign entity of concern ("FEOC"). That aspect of the regulations has been criticized by some members of Congress who had hoped there would be more restrictions relating to FEOCs. The regulations suggest that where a critical material is an insignificant cost and "non-traceable," it can be excluded from tracking for FEOC purposes. Although the regulations list graphite as a traceable critical mineral, recent comments filed in response to the proposed regulations have requested that graphite be deemed a non-traceable material. The risk that final regulations deem graphite a non-traceable material may be greater as a result of Republican control of the House of Representatives and U.S. Senate.

Our ability to receive any additional tax credits, satisfy the requirements for realizing 48C and other potentially available tax credits, and fully or partially utilize, monetize or otherwise benefit from these tax credits is subject to uncertainty and factors that we may not be able to control.

Our reliance on certain limited or sole source suppliers subjects us to a number of risks.

Our anode materials business is dependent on our continued ability to source certain specialized systems, equipment, components and raw materials from a limited number of suppliers. Our ability to scale up our commercial production of synthetic graphite anode materials and meet our production targets depends on the successful and timely delivery, commissioning, operation and availability of, for example, the Generation 3 furnace systems developed in collaboration with and supplied by Harper. If the successful commissioning is delayed or the systems otherwise fail to perform as expected, we may be delayed or prevented from meeting our production targets or our obligations to customers under our offtake agreements, which would have a material adverse effect on our business, financial condition, liquidity, results of operations and prospects.

We purchase certain of our systems, equipment, components and raw materials from limited sources of supply, and disruption of these sources could negatively affect our ability to produce materials. For example, we may source specialty petroleum needle coke, a key precursor to the synthetic graphite anode material we produce, from Phillips 66 or a select few other suppliers. Even where alternative sources of equipment, materials and components are available, the quality and cost of the alternative materials, regulatory and contractual requirements to qualify materials for use in our production, the time required to establish new relationships with reliable suppliers, and the time potentially to re-qualify products with customers could result in production delays and possible loss of sales. We have in the past and may continue to experience delays in acquiring equipment due to global supply chain issues as well as our dependence on single suppliers such as Harper. Our inability or delay in obtaining the systems, equipment components or raw materials needed for our business may harm our customer relationships or require us to find alternative supply sources at increased costs,

which could have a material adverse effect on our business, financial condition, liquidity, results of operations and prospects.

The battery technology market continues to evolve and is highly competitive, and we may not be successful in competing in this industry or establishing and maintaining confidence in our long-term business prospects among current and future partners and customers.

The battery technology market in which we compete continues to evolve and is highly competitive. Certain energy storage technologies, such as lithium-ion battery technology, have been widely adopted, and current and future competitors may have greater resources than we do and may also be able to devote greater resources to the development of their current and future technologies. These competitors also may have greater access to customers and may be able to establish cooperative or strategic relationships among themselves or with third parties that may further enhance their resources and competitive positioning. In addition, lithium-ion battery manufacturers may continue to reduce cost and expand supply of conventional batteries and therefore negatively impact the ability for us to sell our materials, equipment and services at market-competitive prices and yet at sufficient margins.

Automotive original equipment manufacturers (“OEMs”) are researching and investing in energy storage development and production. We expect competition in energy storage technology and EVs to intensify due to increased demand for these vehicles and a regulatory push for EVs, continuing globalization, and consolidation in the worldwide automotive industry. Developments in alternative technologies or improvements in energy storage technology made by competitors may materially adversely affect the sales, pricing and gross margins of our business. If a competing technology is developed that has superior operational or price performance, our business will be harmed. Similarly, if we fail to accurately predict and ensure that our technology can address customers’ changing needs or emerging technological trends, or if our customers fail to achieve the benefits expected from our materials, equipment and services, our business will be harmed.

We must continue to commit significant resources to develop our technologies in order to establish a competitive position, and these commitments will be made without knowing whether such investments will result in materials, equipment and services that potential customers will accept. There is no assurance we will successfully identify new customer requirements, develop and bring our materials, equipment and services to market on a timely basis, or that products and technologies developed by others will not render our materials, equipment and services obsolete or noncompetitive, any of which would adversely affect our business and operating results.

Customers will be less likely to purchase our materials, equipment and services if they are not convinced that our business will succeed in the long term. Similarly, suppliers and other third parties will be less likely to invest time and resources in developing business relationships with us if they are not convinced that our business will succeed in the long term. Accordingly, in order to build and maintain our business, we must maintain confidence among current and future partners, customers, suppliers, analysts, ratings agencies and other parties in our long-term financial viability and business prospects. Maintaining such confidence may be particularly complicated by certain factors including those that are largely outside of our control, such as our limited operating history, size and financial resources relative to our competitors, market unfamiliarity with our materials, equipment and services, any delays in scaling manufacturing, delivery and service operations to meet demand, competition and uncertainty regarding the future of energy storage technologies and our eventual production and sales performance compared with market expectations.

Our anode materials business is subject to fluctuating and potentially unfavorable market conditions for graphite.

Graphite is not a traded commodity like many base and precious metals, and its sales prices are generally not public. Sales agreements are typically negotiated on an individual and private basis with each potential customer. In addition, there are a limited number of producers of battery-grade graphite, most of whom are producers in China and may make it difficult for new market entrants by increasing their production capacity and lowering sales prices. Factors such as foreign currency fluctuation, supply and demand, industrial disruption and actual graphite market sale prices could have an adverse impact on our ability to sell our synthetic graphite anode materials profitably. If battery manufacturers use less

graphite than expected, or if the demand for EV and energy storage grid batteries is less than anticipated, it could have a material adverse effect on the sales price, profitability and development strategy of our business.

Our future growth and success will depend on our ability to sell effectively to large customers.

Our current and potential customers are primarily battery manufacturers and automotive OEMs that tend to be large enterprises. Therefore, our future success will depend on our ability to effectively sell our materials, equipment and services to such large customers. Sales to these customers involve risks that may not be present (or that are present to a lesser extent) with sales to smaller customers. These risks include, but are not limited to, (i) increased pricing power and leverage held by large customers in negotiating contractual arrangements with us, (ii) higher minimum volume requirements that we may be unable to meet, (iii) longer sales cycles and the associated risk that substantial time and resources may be spent on a potential customer that elects not to purchase our materials, equipment or services, and (iv) requirements that we meet customer standards for their suppliers, including those relating to environmental, social and governance protocols and ISO standards, that we may be unable to meet.

Purchases by large organizations are frequently subject to budget constraints, multiple approvals and unanticipated administrative, processing and other delays. Finally, large organizations typically have longer implementation cycles, require greater product functionality and scalability, require a broader range of services, demand that vendors take on a larger share of risks, require acceptance provisions that can lead to a delay in revenue recognition and expect greater payment flexibility. All of these factors can add further risk to business conducted with these potential customers.

We depend, and expect to continue to depend, on a limited number of customers for a significant percentage of our revenue.

Our Battery Technology Solutions ("BTS") business is currently our only business that is generating revenue, and BTS has generated most of its revenue from a limited number of customers. For the year ended December 31, 2024, the Company had two customers, included in the consulting services revenue stream that accounted for approximately 13% and 12% of total revenues, respectively, and one major customer, included in the hardware sales revenue stream, that accounted for 16% of total revenue. For the year ended December 31, 2023, the Company had two customers, included in consulting services revenue stream, that accounted for approximately 17% and 15% of total revenues, respectively. For the six months December 31, 2022, the Company had three major customers, included in the consulting services revenue stream, that accounted for approximately 27%, 22%, and 11% of total revenue, respectively and two major customers, included in the hardware sales revenue stream, that accounted for approximately 25% and 12% of total revenues, respectively. For the year ended June 30, 2022, the Company had two customers, included in the consulting services revenue stream that accounted for approximately 15%, and 12% of total revenues, respectively and one major customer, included in the hardware sales and consulting services revenue streams, that accounted for 11% of total revenue.

Our anode materials business is not yet generating revenue, and our plans to scale the business are dependent upon our collaborations with tier 1 customers such as Panasonic Energy, Stellantis, and PowerCo resulting in sales of our anode materials to those parties. Similarly, our joint development agreement with LG Energy Solution, Ltd. ("LG Energy Solution" or "LGES")) requires successful completion of certain development work before offtake of our anode materials. Because we rely, and will continue to rely, on a limited number of customers for significant percentages of our revenue, a decrease in demand or significant pricing pressure from any of our major customers for any reason could have a materially adverse impact on our business, financial condition, and results of operations.

In addition, a number of factors outside our control could cause the loss of, or reduction in, business or revenues from any customer, including, without limitation, pricing pressure from competitors, a change in a customer's business strategy or financial condition, or change in market conditions. Our customers may also choose to pursue alternative technologies and develop alternative products in addition to, or in lieu of, our materials and equipment, either on their own or in collaboration with others, including our competitors. The loss of any major customer or key project, or a significant decrease in the volume of customer demand or the price at which we sell our materials and equipment to customers, could materially adversely affect our financial condition and results of operations.

In addition, our ability to satisfy our commitments to such customers is dependent, among other things, on reaching the targeted production capacities at our Riverside facility and our planned Enterprise South facility. See *Item 3. Key Information — D. Risk Factors* ("***We face significant challenges in our attempt to develop our anode and cathode materials to produce them at volumes with acceptable performance, yields and costs. The pace of development in materials science is often not predictable. We may encounter substantial delays or operational problems in the scale-up of our anode materials production or the commercialization of our cathode materials technology.***").

Our commercial relationships are subject to various risks which could adversely affect our business and future prospects.

Many of our commercial relationships are conditional, subject to supply performance, market conditions, quality assurance processes and audits of supplier processes or other agreed upon conditions. There can be no assurance that we will be able to satisfy these conditions. If we are unsuccessful in meeting the demand for high-quality materials and equipment, our business and prospects will be materially adversely affected.

In addition, our business partners may have economic, business or legal interests or goals that are inconsistent with our goals. Any disagreements with our business partners may impede our ability to maximize the benefits of any partnerships and slow the commercialization of materials and equipment. Our arrangements may require us, among other things, to pay certain costs or to make certain capital investments, for which we may not have the resources. In addition, if our business partners are unable or unwilling to meet their economic or other obligations under any business arrangements, our business and prospects will be materially adversely affected.

Our business and future growth depend substantially on the growth in demand for electric vehicles and batteries for grid energy storage.

The demand for our materials is directly related to the market demand for EVs and batteries for grid energy storage. However, the markets we have targeted may not achieve the level of growth we expect during the time frame projected. For example, the new U.S. presidential administration has indicated its agenda will focus on deregulation, particularly with respect to environmental and climate change-related regulations, which could be detrimental to companies like ours that are focused on sustainable energy. If markets fail to achieve our expected level of growth, we may have excess production capacity and may not be able to generate enough revenue to obtain profitability. If the market for EVs or batteries for grid energy storage does not develop at the rate or in the manner or to the extent that we expect, or if critical assumptions that we have made regarding the efficiency of our energy solutions are incorrect or incomplete, our business, prospects, financial condition and operating results could be harmed.

Our projected operating and financial results rely in large part upon assumptions and analyses we have developed. If these assumptions or analyses prove to be incorrect, our actual operating results may be materially different from our projected results.

Management's projected operating and financial results reflect current estimates of our future performance. Whether actual operating and financial results and business developments will be consistent with our expectations and assumptions as reflected in our projections depends on a number of factors, many of which are outside our control, including, but not limited to the factors described throughout this annual report. Unfavorable changes in any of these or other factors, most of which are beyond our control, could materially and adversely affect our business, results of operations and financial results.

We may not be able to establish supply relationships for necessary components or may be required to pay costs for components that are more expensive than anticipated, which could delay the introduction or acquisition of additional equipment necessary to support our growth and negatively impact our business.

As we expand our anode materials manufacturing capabilities, we will rely on third-party suppliers for components and materials. Any disruption or delay in the supply of components or materials by our key third-party suppliers or pricing volatility of such components or materials could temporarily disrupt research or production of our anode materials until

an alternative supplier is able to supply the required material. In such circumstances, we may experience prolonged delays, which may materially and adversely affect our results of operations, financial condition and prospects.

We may not be able to control fluctuation in the prices for materials or negotiate agreements with suppliers on terms that are beneficial to us. Our business depends on the continued supply of certain proprietary materials, components and equipment. We are exposed to multiple risks relating to the availability and pricing of such materials and components. Substantial increases in the prices for our raw materials or components would increase our operating costs and materially impact our financial condition.

Currency fluctuations, trade barriers, extreme weather, pandemics, tariffs or shortages and other general economic or political conditions may limit our ability to obtain key components for our battery cell testing equipment or significantly increase freight charges, raw material costs and other expenses associated with our business, which could further materially and adversely affect our results of operations, financial condition and prospects.

We may not be able to accurately estimate the future supply and demand for our materials and equipment, which could result in a variety of inefficiencies in our business and hinder our ability to generate revenue. If we fail to accurately predict our manufacturing requirements or prices of components increase, we could incur additional costs or experience delays.

It is difficult to predict our future revenues and appropriately budget for our expenses, and our views as to industry trends that may emerge may prove false, which could affect our business. Currently, there is limited historical basis for making judgments on the demand for our materials or equipment, or our ability to develop, manufacture, and deliver our materials or equipment, or our profitability in the future. If we overestimate our requirements, our suppliers may have excess inventory, which indirectly would increase our costs. If we underestimate our requirements, our suppliers may have inadequate inventory, which could interrupt manufacturing of our materials or equipment and result in delays in shipments and revenues. In addition, lead times for materials that our suppliers order may vary significantly and depend on factors such as the specific supplier, contract terms and demand for each material at a given time. If we fail to order sufficient quantities of materials in a timely manner, the delivery of materials or equipment to our potential customers could be delayed, which would harm our business, financial condition and operating results.

Additionally, agreements for the purchase of certain components used in the manufacture of our materials and equipment may contain pricing provisions that are subject to adjustment based on changes in market prices of key components. Substantial increases in the prices for such components would increase our operating costs and could reduce our margins if we cannot recoup the increased costs. Any attempts to increase the announced or expected prices of our materials and equipment in response to increased costs of components could be viewed negatively by our potential customers and could adversely affect our business, prospects, financial condition or operating results.

We have a history of financial losses and expect to incur significant expenses and continuing losses in the near future.

We incurred net losses of \$74.8 million, \$46.2 million, \$27.9 million, and \$51.9 million for the years ended December 31, 2024 and 2023, six months ended December 31, 2022, and year ended June 30, 2022, respectively, and net operating cash outflows of \$40.4 million \$36.2 million, \$18.9 million, and \$29.2 million for the years ended December 31, 2024 and 2023, six months ended December 31, 2022, and year ended June 30, 2022, respectively. At December 31, 2024 and 2023, we had a cash balance of \$42.6 million and \$78.7 million, respectively, and net current assets of \$11.1 million and \$51.9 million, respectively.

We expect our expenses to increase in connection with our ongoing activities, particularly as we continue to purchase additional production equipment associated with the manufacture of synthetic graphite. For example, in July 2021, we purchased commercial land and buildings in Chattanooga, USA for \$42.6 million to expand our anode materials business and concurrently entered into a loan facility with DBR Investments Co. Limited for \$30.1 million with an interest rate of 4.09%. The loan was fully drawn down as at December 31, 2024. The total liability at December 31, 2024 is \$27.7 million. In addition, we expect to incur significant commercialization expenses related to sales and marketing to the extent that

such sales and marketing are not the responsibility of any future customers. We may find that these efforts are more expensive than we currently anticipate or that these efforts may not result in revenues, which would further increase our losses, impact our ability to repay our debt (including our \$30 million principal amount of unsecured convertible notes issued to LGES) and require future capital raises to maintain the business. These conditions give rise to a material uncertainty that may cast significant doubt (or raise substantial doubt as contemplated by PCAOB standards) as to our ability to continue as a going concern. If we were not able to continue as a going concern, or if there were continued doubt about our ability to do so, the value of your investment would be materially and adversely affected. See *Item 3. Key Information — D. Risk Factors* ("***We have incurred and will continue to incur significant, increased costs as a result of operating as a company with ADSs that are publicly traded in the United States, and will incur increased costs as a result of becoming a recipient of United States government funding and incentives, and our management will be required to devote substantial time to new compliance initiatives.***").

We have a concentration of beneficial ownership among Phillips 66, LG Energy Solution, and our executive officers, non-executive directors and their affiliates that may prevent new investors from influencing significant corporate decisions.

In September 2021, we consummated a transaction with Phillips 66 pursuant to which Phillips 66 purchased 77,962,578 ordinary shares of NOVONIX for a total purchase price of \$150 million (the "Phillips 66 Transaction"). As of December 31, 2024, Phillips 66 beneficially owned approximately 13.74% of our ordinary shares (based on the number of our ordinary shares outstanding as of that date). In January 2025, Phillips 66 purchased an additional 12,771,392 ordinary shares as part of a private placement, which, after giving pro forma effect to such transaction, would have resulted in its beneficial ownership of 15.99% of our ordinary shares as of December 31, 2024. As of December 31, 2024, as the holder of our unsecured convertible notes, LGES beneficially owned approximately 4.98% of our ordinary shares, and our executive officers, non-executive directors and their affiliates beneficially owned approximately 2% as a group. Based on their beneficial ownership, such security holders will be able to exercise a significant level of influence over all matters requiring shareholder approval. This influence could have the effect of delaying or preventing a change of influence or changes in our management and will make the approval of certain transactions difficult or impossible without the support of these shareholders and their votes. In addition, pursuant to the terms of our 2021 subscription agreement, Phillips 66 has the right to nominate one director to our Board of Directors and certain rights to be notified of, and participate in, issuances of shares by the Company (other than distributions of shares to the Company's shareholders on a pro rata basis). The interests of Phillips 66 and these shareholders may differ from our interests or those of our other shareholders, and these shareholders might not exercise their voting power in a manner favorable to our other shareholders.

Global political, economic and financial conditions (as well as the indirect effects flowing therefrom) could negatively affect our business, results of operations, and financial condition.

In recent times, global political, economic and financial conditions negatively have affected businesses across a range of industries, including the energy storage industry. In addition, there are currently political and trade tensions among a number of the world's major economies, which have resulted in the implementation of tariff and non-tariff trade barriers, including the use of export control restrictions against certain countries and individual companies. Moreover, the new, substantial tariffs on imports to the United States from Canada announced on February 1, 2025, if they are implemented and sustained for an extended period of time, would have a significant adverse effect, including financial, on our business. The U.S. is the largest export destination for our battery testing equipment. See *Item 5. Operating and Financial Review and Prospects*. Implementation, prolongation or expansion of such trade barriers may result in a decrease in the growth of the global economy and the battery industry, and could cause turmoil in global markets that may result in declines in sales from which we generate our income through our materials, technologies and services. Also, any increase in the use of export control restrictions to target certain countries and companies, any expansion of the extraterritorial jurisdiction of export control laws in the jurisdiction in which we operate, or a complete or partial ban on products sales to certain companies could impact not only our ability to supply our materials, technologies and services to such customers, but also customers' demand for our materials, technologies and services.

Any future systemic political, economic or financial crisis or market volatility, including but not limited to, interest rate fluctuation, inflation or deflation and changes in economic, fiscal and monetary policies and changes in government and election results in major economies, could cause revenue or profits for the battery industry as a whole to decline dramatically, and if the economic conditions or financial conditions of our current or target customers were to deteriorate, the demand for our materials, technologies and services may decrease. Further, in times of market instability, sufficient external financing may not be available to us on a timely basis, on commercially reasonable terms to us, or at all. If sufficient external financing is not available when we need such financing to meet our capital requirements, we may be forced to curtail our expansion, modify plans or delay the deployment of new or expanded materials, technologies and services until we obtain such financing. Thus, further escalation of trade tensions, the use of export control restrictions as a non-tariff trade barrier or any future global systemic crisis could materially and adversely affect our results of operations.

Our systems and data may be subject to disruptions or other security incidents, and we may face alleged violations of laws, regulations, or other obligations relating to handling our employees' personal data or confidential data of our customers and other business partners that could result in liability and adversely impact our reputation and future sales.

We may face challenges with respect to information security and maintaining the security and integrity of our systems and other systems used in our business, as well as with respect to the data stored on or processed by these systems. Our proprietary process technology is unique and may make us a target for cyber attackers. We are also at risk for interruptions, outages and breaches of: (a) operational systems, including business, financial, accounting, product development, data processing or production processes, owned by us or our third-party vendors or suppliers and (b) facility security systems, owned by us or our third-party vendors or suppliers. A cyber incident could be caused by disasters, insiders (through inadvertence or with malicious intent) or malicious third parties (including nation-states or nation-state supported actors) using sophisticated, targeted methods to circumvent firewalls, encryption and other security defenses, including hacking, fraud, trickery or other forms of deception. Advances in technology, an increased level of sophistication or expertise of hackers, the ease of gathering intelligence from social media for social engineering, and new discoveries in the field of cryptography or others can result in a compromise or breach of the systems used in our business or of security measures used in our business to protect confidential information, personal information, and other data. The techniques used by cyber attackers change frequently and cybersecurity incidents could be difficult to detect. Although we maintain information technology measures designed to protect ourselves against intellectual property theft, data breaches and other cybersecurity incidents, such measures will require updates and improvements, and we cannot guarantee that such measures will be adequate to detect, prevent or mitigate cyber incidents. The implementation, maintenance, segregation and improvement of these systems requires significant management time, support and cost, and these systems may be insufficient to prevent significant data breaches.

Our ability to conduct our business and operations depends on the continued operation of information technology and communications systems. Systems used in our business, including data centers and other information technology systems, are vulnerable to damage or interruption. Such systems could also be subject to break-ins, cyber-attacks, sabotage and intentional acts of vandalism, as well as disruptions and security incidents as a result of non-technical issues, including intentional or inadvertent acts or omissions by employees, service providers, or others. Such cyber incidents could: significantly disrupt operational systems; result in loss of trade secrets or other proprietary or competitively sensitive information; compromise certain information of customers, employees, suppliers, or others; jeopardize the security of our facilities; and expose us to remediation costs, monetary and reputational damages, legal liability and regulatory actions under evolving laws and regulations related to data protection and privacy.

Moreover, there are inherent risks associated with developing, improving, expanding and updating current systems, including the disruption of our data management, procurement, production execution, finance, supply chain and sales and service processes. These risks may affect our ability to manage our data and inventory, procure parts or supplies or produce, sell, deliver and service our materials and equipment, adequately protect our intellectual property or achieve and maintain compliance with, or realize available benefits under, applicable laws, regulations and contracts. We cannot be sure that these systems upon which we rely, including those of our third-party vendors or suppliers, will be effectively implemented, maintained or expanded as planned. If we do not successfully implement, maintain or expand these systems as planned, our operations may be disrupted, our ability to accurately and timely report our financial results could be

impaired, and deficiencies may arise in our internal control over financial reporting, which may impact our ability to certify our financial results. Moreover, our proprietary information or intellectual property could be compromised or misappropriated and our reputation may be adversely affected. If these systems do not operate as we expect them to, we may be required to expend significant resources to make corrections or find alternative sources for performing these functions.

We use and expect to continue to use outsourced service providers to help provide certain services, and any such outsourced service providers face similar security and system disruption risks as us. Some of the systems used in our business will not be fully redundant, and our disaster recovery planning cannot account for all eventualities. Any data security incidents or other disruptions to any data centers or other systems used in our business could result in lengthy interruptions in our service.

Our operations are subject to significant risk of safety incidents, which could result in harm to our workers, damage to our property and delays in our production that would adversely affect our business.

Our operations pose a number of safety risks, any of which could result in the personal injury or death of our workers, fire or explosion, and damage to machinery, materials and equipment. For example, our manufacturing operations utilize furnaces and equipment heated to extremely high temperatures, for which our existing safety measures, including policies and procedures in place to protect against health and safety incidents or damage to our facility and equipment in the event of a fire or other incident, might not prevent serious injury or death or significant property damage. Consequences of safety incidents may include significant delays or fluctuations in production, increased maintenance and other operating costs, environmental damage, litigation, regulatory action, increased insurance premiums, mandates to halt production, workers' compensation claims, and other liabilities, any of which could materially adversely impact our business, including our results of operations, cash flows, financial condition and prospects, reputation, and ability to operate and finance our business.

From time to time, we may be involved in litigation, regulatory actions or government investigations and inquiries, which could have an adverse impact on our profitability and consolidated financial position.

We may be involved in a variety of litigation, other claims, suits, regulatory actions or government investigations and inquiries and commercial or contractual disputes that, from time to time, are significant. In addition, from time to time, we may also be involved in legal proceedings arising in the normal course of business including commercial or contractual disputes, warranty claims and other disputes with potential customers and suppliers; intellectual property matters; personal injury claims; environmental, health and safety issues; tax matters; and employment matters. From time to time, such legal proceedings may be commenced by a significant customer, which may damage our relationship with such customer. Our significant customers generally are larger enterprises and may be able to or choose to devote greater resources to such legal proceedings. It is difficult to predict the outcome or ultimate financial exposure, if any, represented by these matters, and there can be no assurance that any such exposure will not be material. Such claims may also negatively affect our reputation. See also *Item 3. Key Information — D. Risk Factors* (“***We may become involved in lawsuits or other proceedings to protect or enforce our intellectual property, which could be expensive, time-consuming and unsuccessful and have a negative effect on the success of our business.***”).

We may become subject to product liability claims, which could harm our financial condition and liquidity if we are not able to successfully defend or insure against such claims.

We may become subject to product liability claims, even those without merit, which could harm our business, prospects, operating results, and financial condition. We face inherent risk of exposure to claims in the event our materials and equipment do not perform as expected or malfunction resulting in personal injury or death. A successful product liability claim against us could require us to pay a substantial monetary award. Moreover, a product liability claim could generate substantial negative publicity about our materials, equipment and business and inhibit or prevent commercialization of other future materials or equipment, which would have a material adverse effect on our brand, business, prospects and operating results. Any insurance coverage might not be sufficient to cover all potential product liability claims. Any claim seeking significant monetary damages either in excess of our coverage, or outside of our coverage, may have a material

adverse effect on our reputation, business and financial condition. We may not be able to secure additional product liability insurance coverage on commercially acceptable terms or at reasonable costs when needed, particularly if we do face liability for our materials and equipment and are forced to make a claim under our policy.

From time to time we may enter into negotiations for acquisitions, dispositions, partnerships, joint ventures or investments that are not ultimately consummated or, if consummated, may not be successful.

From time to time we may consider acquisitions, dispositions, partnerships, joint ventures or investments that we believe may allow us to implement our growth strategy. Our transactions with and investments in other companies are inherently risky and could disrupt our ongoing businesses. For example, in January 2022, we entered into definitive supply and investment agreements with KORE Power to become the exclusive supplier of graphite anode materials in support of KORE Power's battery manufacturing operations in the U.S. and acquired an approximate 5% equity stake in KORE Power. During the year ended December 31, 2024, we wrote off this investment in KORE Power and recorded a loss of \$15.3 million based in part KORE Power's announcement that its planned facility in Arizona would not be constructed and the change in its executive leadership. See *Item 5 Operating and Financial Review and Prospects—A. Operating Results - Components of the Results of Our Operations - Results of Operations for the Years Ended December 31, 2024, and 2023 - Loss on equity investment securities at fair value through profit or loss*. If the fair value of any of our investments decreases, our financial results could be adversely affected. Moreover, general operational risks, such as inadequate or failing internal controls of companies we invest in, may also expose our investments to risks of those companies.

We hold tenement rights in a high-grade natural flake graphite deposit located in Northern Queensland, Australia (the "MDG Project"). As of the date of this annual report, we have not generated any revenue from the sale of natural graphite and we have generally put any exploration or development of these assets on hold. In October 2023, we decided to pursue potential opportunities to realize the value of these assets through a strategic transaction. While the Company may engage in discussions with interested third parties regarding the MDG Project, there can be no assurances that any such discussions will result in any transaction involving these assets or that any required tenement rights will be renewed on satisfactory terms, within expected timeframes or at all. If we fail to complete a strategic transaction for the MDG Project or renew our tenement rights on terms we find acceptable, we may not be able to realize the value of these assets.

We cannot forecast the number, timing or size of any future strategic transactions, or the effect that any such transactions might have on our operating or financial results. We may not be able to successfully identify future opportunities or complete any such transactions if we cannot reach agreement on commercially favorable terms, if we lack sufficient resources to finance the transaction on our own and cannot obtain financing at a reasonable cost or if regulatory authorities prevent such transactions from being completed. Management resources may also be diverted from operating our existing businesses to focusing on such opportunities, and we may also incur substantial out-of-pocket costs. Moreover, any such transaction may not be viewed favorably by investors or other stakeholders.

Our facilities or operations could be damaged or adversely affected as a result of natural disasters and other catastrophic events.

Our facilities or operations could be adversely affected by events, conditions and circumstances outside of our control, such as natural disasters, wars, health epidemics, and other calamities. We cannot assure you that our backup systems will be adequate to protect us from the effects of fire, floods, typhoons, earthquakes, power loss, telecommunications failures, war, riots, terrorist attacks or similar events. Any of the foregoing events may give rise to interruptions, breakdowns, system failures, technology platform failures or internet failures, which could cause the loss or corruption of data or malfunctions of software or hardware as well as adversely affect our ability to provide services or manufacture materials or equipment. Any disruptions or other adverse events, whether within or beyond our control, at any of our facilities or in their surrounding areas could have a particularly significant impact on our business performance and financial results.

Moreover, our facilities located in Chattanooga, Tennessee, currently account for 100% of the production of our anode materials, and our facility in Bedford, Nova Scotia, currently accounts for 100% of the production of our battery testing

equipment. As a result, any disruptions or other adverse events, whether within or beyond our control, at those facilities or in the surrounding area could have a particularly significant impact on our business performance and financial results. In addition, while the long-term effects of climate change on the global economy are unclear, we recognize that there are inherent climate-related risks wherever business is conducted. Any of our locations may be vulnerable to the adverse effects of climate change. Our facilities have historically been, and may continue to be, subject to physical climate change risks, including heavy rainfall and flooding in Chattanooga, Tennessee, and wildfires in Halifax, Nova Scotia. Climate-related events, including the increasing frequency of extreme weather events and their impact on critical infrastructure in the United States and elsewhere, have the potential to disrupt our business and/or our third-party service providers or partners, and may cause us to experience higher attrition, losses and additional costs to maintain and resume operations. Transitional climate change risks may subject us to increased regulations, reporting requirements, standards or expectations regarding the environmental impacts of our business, and untimely or inaccurate disclosure could adversely affect our reputation, business or financial performance.

Issues relating to the use of new and evolving technologies, such as Artificial Intelligence (“AI”), in our business could adversely affect our business and operating results.

Issues relating to the use of new and rapidly evolving technologies such as AI in our business may result in reputational harm, competitive harm, legal liability or litigation, or new or enhanced governmental or regulatory scrutiny, ethical concerns, compliance issues, or security risks, and may cause us to incur additional costs to resolve such issues. We are increasingly building AI into our business, particularly in our battery testing services and our technology collaborations with business partners in our BTS division. As with many innovations, AI presents risks and challenges that could affect its adoption and use, and therefore our business. For example, developing, testing and deploying third-party AI systems and services may increase our costs, which could adversely affect our business and operating results. Our business may be disrupted if any of the third-party AI systems and services we use become unavailable due to extended outages or interruptions or because they are no longer available on commercially reasonable terms or prices. Further, market demand and acceptance of AI technologies are uncertain. Potential litigation or government regulation related to AI may also increase the burden and cost of research and development in this area, subjecting us to reputational harm, competitive harm or legal liability. In addition, our employees use generative AI tools throughout the business. Among other pitfalls, such tools may inadvertently generate or reveal confidential information, or may produce responses that are erroneous, biased, inaccurate, illegal or unethical. Failure to address perceived or actual technical, legal, compliance, privacy, security, ethical or other issues relating to the use of AI by us or others in our industry could adversely affect our business and operating results.

Terrorist activity, acts of war and political instability around the world could adversely impact our business.

Terrorist attacks, acts of war and other hostilities, political instability, and the national and international responses to the same, have created many economic and political uncertainties and could adversely affect our business and results of operations in ways that we cannot presently predict. Such events could adversely affect global and regional economies and financial markets in general, which could result in an economic downturn that could adversely affect our operations and ability to finance our operations. Given the uncertainties relating to the Israel-Hamas war and the related Houthi attacks on commercial shipping vessels in the Red Sea and Suez Canal, and Russia's invasion of Ukraine and the international response to these conflicts, including the duration or expansion of the conflicts, we cannot predict the impact that either of these conflicts may have on our future business. U.S. and foreign government-imposed sanctions and export restrictions, as well as escalating hostilities that threaten transportation routes, could adversely affect our business partners, suppliers or customers located in or doing business with Russia or in the Middle East, including as the result of supply disruptions or inability to ship or collect payments for their products. These impacts on our business partners, suppliers and customers, in turn, could negatively affect demand for our products and services and increase our operating costs, which could have a material adverse effect on our business, results of operations, cash flows, financial condition and prospects. In some cases, we are not insured for losses and interruptions caused by terrorist acts and acts of war.

Risks Related to Regulatory Matters

We are subject to substantial regulation, and unfavorable changes to, or our failure to comply with, these regulations could substantially harm our business and operating results.

Our materials, and the purchasers of our materials, are regulated under international, federal, state and local laws, including export control laws. We expect to incur significant costs in complying with these regulations. Regulations related to our Company and the battery and EV industries and alternative energy are currently evolving and we face risks associated with changes to these regulations, particularly in light of the recent government changes and election results in the U.S.

To the extent the laws change, our materials and equipment may not comply with applicable international, federal, state or local laws, which would have an adverse effect on our business. Compliance with changing regulations could be burdensome, time consuming, and expensive. To the extent compliance with new regulations is cost prohibitive, our business, prospects, financial condition and operating results would be adversely affected.

Internationally, there may be laws in jurisdictions we have not yet entered or laws we are unaware of in jurisdictions we have entered that may restrict our sales or other business practices. The laws in this area can be complex and difficult to interpret and may change over time. Continued regulatory limitations and other obstacles that may interfere with our ability to commercialize our materials and equipment could have a negative and material impact on our business, prospects, financial condition and results of operations.

We are subject to environmental, health and safety requirements which could adversely affect our business, results of operation and reputation.

Our facilities and operations are subject to numerous environmental, health and safety (“EHS”) laws and regulations, which require significant capital investment on an ongoing basis. These laws and regulations regulate, among other things, the discharge of materials into the environment, air emissions, the handling and disposal of wastes, remediation of contaminated sites and other matters relating to worker and consumer health and safety, and to the protection of the environment. Non-compliance with applicable EHS laws could give rise to liability, including the potential for civil or criminal fines or penalties, unforeseen capital expenditures or other legal liability. In addition, EHS laws or their enforcement may change or become more stringent over time, which could increase our operating costs, subject us to additional liabilities and cause delays in our processes. We may also face liability for the remediation of contaminated sites, including at third-party contaminated sites where we or our predecessors in interest have sent waste for treatment or disposal. Remediation liability may be imposed without regard to whether we knew of, or caused, the release of such regulated substances. In addition, under environmental laws, we may be liable for the entire cost to remediate a contaminated site, even where multiple parties contributed to the contamination.

In addition, our supply-chain and manufacturing processes rely on the use of fossil fuels for product materials and energy consumption. Changes in rules and regulations (e.g., greenhouse gas regulations, air emission compliance requirements) applicable to us or entities in our supply chain or stricter scrutiny of our sustainability performance by various stakeholders could require us to make changes to our operations, which could increase our operating costs, cause delays or otherwise have an adverse impact on our business.

We are subject to anti-corruption, anti-bribery, anti-money laundering, financial and economic sanctions and similar laws, and non-compliance with such laws can subject us to administrative, civil and criminal fines and penalties, collateral consequences, remedial measures and legal expenses, all of which could adversely affect our business, results of operations, financial condition and reputation.

We are subject to anti-corruption, anti-bribery, anti-money laundering, financial and economic sanctions and similar laws and regulations in various jurisdictions in which we conduct or in the future may conduct activities, including the U.S. Foreign Corrupt Practices Act ("FCPA"), the U.K. Bribery Act 2010, the Australian Criminal Code Act 1995 ("Criminal Code"), the Australian Anti-Money Laundering and Counter Terrorism Financing Act 2006, and other anti-corruption laws and regulations. The FCPA, the U.K. Bribery Act 2010, and the Criminal Code prohibit us and our officers, directors, employees and business partners acting on our behalf, including agents, from corruptly offering, promising, authorizing or providing anything of value, or providing benefit to a "foreign official", or (under the Criminal Code) another person with the intention this will benefit a "foreign public official", for the purposes of influencing official decisions or obtaining or retaining business or otherwise obtaining favorable treatment. The FCPA also requires companies to make and keep books, records and accounts that accurately reflect transactions and dispositions of assets and to maintain a system of adequate internal accounting controls. The U.K. Bribery Act also prohibits non-governmental "commercial" bribery and soliciting or accepting bribes. Our policies and procedures that are designed to comply with these laws may not be sufficient and our directors, officers, employees, representatives, consultants, agents, and business partners could engage in improper conduct for which we may be held responsible.

Non-compliance with anti-corruption, anti-bribery, anti-money laundering, financial and economic sanctions and similar laws could subject us to whistleblower complaints, adverse media coverage, investigations, and severe administrative, civil and criminal sanctions, collateral consequences, remedial measures and legal expenses, all of which could materially and adversely affect our business, results of operations, financial condition and reputation. In addition, changes in these laws in the future could adversely impact our business. See also *Item 3. Key Information — D. Risk Factors ("Any global political, economic and financial crisis (as well as the indirect effects flowing therefrom) could negatively affect our business, results of operations, and financial condition.")*.

Risks Relating to Intellectual Property

Our success depends upon our ability to obtain and maintain intellectual property protection for our materials and technologies.

Our success will depend in significant part on our ability to establish and maintain adequate protection of our owned intellectual property, and the ability to commercialize materials and equipment resulting therefrom, without infringing the intellectual property rights of others. We rely upon a combination of the intellectual property protections afforded by patent, trade secret and other intellectual property laws in the United States, Canada, and other jurisdictions, as well as license agreements and other contractual protections, to establish, maintain and enforce rights in our proprietary technologies, such as our cathode technology.

In addition to patent protection, we rely substantially on trade secrets, including unpatented know-how, technology and other proprietary materials and information, to maintain our competitive position. We seek to protect our intellectual property, in part, by requiring employees and consultants to waive or assign their intellectual property rights to us and by protecting our trade secrets by entering into confidentiality or non-disclosure agreements with our employees, consultants, business partners and other third parties. While it is our policy to enter into such agreements, these steps may be inadequate as we may fail to enter into agreements with all necessary parties, the waivers or assignments of intellectual property rights may not be self-executing or any of these parties may breach the agreements, and there may be no adequate remedy available for such breach of an agreement. We may be forced to bring claims against third parties, or defend claims that they may bring against us, to determine the ownership of what we regard as our intellectual property. Such claims could harm our business, financial condition, results of operations and prospects.

Despite our efforts to protect our proprietary rights, third parties may nevertheless attempt to copy or otherwise obtain and use our intellectual property. Monitoring unauthorized use of our intellectual property is difficult and costly, and the

steps we have taken or will take to prevent infringement, misappropriation, or violation of our intellectual property rights may not be sufficient. Enforcing a claim that a party infringed intellectual property or misappropriated a trade secret is difficult, expensive and time consuming, and the outcome is unpredictable. In addition, some courts both within and outside the United States may be less willing, or unwilling, to protect trade secrets or other intellectual property. Moreover, if a competitor lawfully obtained, reverse engineered or independently developed any technology or information that we protect as trade secret, we would have no right to prevent such competitor from using that technology or information to compete with us, which could harm our competitive position. Our inability to prevent unauthorized use of our intellectual property could harm our business and competitive position.

Furthermore, our owned and in-licensed intellectual property rights may be subject to a reservation of rights by one or more third parties. In some instances, when new technologies are developed with government funding (and in particular, the U.S. government), the government may obtain certain rights in any resulting patents, including a non-exclusive license authorizing the government to use the invention or to have others use the invention on its behalf. These rights may permit the government to disclose our confidential information to third parties and to exercise march-in rights to use or allow third parties to use our licensed technology. For example, the United States federal government retains such rights in inventions produced with its financial assistance under the Bayh-Dole Act. The government can exercise its march-in rights if it determines that action is necessary because we fail to achieve practical application of the government-funded technology, because action is necessary to alleviate health or safety needs, to meet requirements of federal regulations, or to give preference to U.S. industry. Further, the Draft Interagency Guidance Framework for Considering the Exercise of March-In Rights released by the U.S. Department of Commerce's National Institute of Standards and Technology on December 7, 2023 proposes to expand the U.S. government's "march-in" authority under the Bayh-Dole Act. In November 2023, we reached agreement on the terms of a grant from the MESC Office of the DOE and we have begun to use those funds to purchase equipment and facility infrastructure to expand Riverside's production capacity to 20,000 tonnes per annum. As a result of these laws and the U.S. Competitiveness Provisions that are part of the terms of our grant, our rights in certain inventions may be subject to certain requirements to manufacture products embodying such inventions in the United States. An exercise by the government of such rights or by any third party of its reserved rights could harm our competitive position, business, financial condition, results of operations and prospects.

Termination of our collaborative research agreement with Dalhousie University to support the development of current and future technology would likely harm our business, and even if it continues, it may not help us successfully develop any new intellectual property.

In February 2021, we entered into a five-year collaborative research agreement with the Research Group of Dr. Mark Obrovac at Dalhousie University ("Dalhousie") to develop new battery technologies. The agreement may be terminated at will by either party upon 90 days' notice, subject to certain conditions. If Dalhousie elects to terminate this agreement, our ability to continue to develop our technologies could be adversely impacted.

In addition, as of the date of this annual report, most of our patent portfolio has been developed, or includes technology developed, through our collaboration with Dalhousie. Although this collaboration has been historically successful in new intellectual property generation, there can be no assurance that it will be successful in future efforts to develop any new intellectual property. Moreover, while we have the first right to file patent applications based on intellectual property generated under our agreement with Dalhousie, and we would be the sole owner of any such patent and the intellectual property incorporated therein, there can be no guarantee that we will successfully commercialize any such patents or developed intellectual property. Disputes may arise between us and the other parties to this and related agreements regarding intellectual property, including with respect to: the scope of rights granted under, and ownership of the intellectual property resulting from, the agreements and other interpretation-related issues; the amount and timing of payments; the rights and obligations of the parties under the agreements; and the use of intellectual property by each of the parties.

Any disputes with Dalhousie may prevent or impair our ability to maintain our current collaboration arrangement. We benefit from the intellectual property development assistance from Dalhousie to develop, manufacture, expand, and accelerate our materials and technology. We cannot assure you that we will be able to continue to obtain the benefits

granted to us under these agreements. Termination of the collaboration with Dr. Obrovac's Research Group at Dalhousie could result in the loss of important rights and would likely harm our ability to further develop our technology.

We may be subject to claims by third parties asserting misappropriation of intellectual property, or claiming ownership of what we regard as our own intellectual property.

We cannot guarantee that the technology and processes related to our materials and equipment, or our commercialization thereof, do not and will not infringe or otherwise violate any third party's intellectual property. Companies, organizations or individuals, including our current and future competitors, may hold or obtain patents, trademarks or other proprietary rights that would prevent, limit or interfere with our ability to make, use, develop or sell our products or processes, which could make it more difficult for us to operate our business. From time to time, we may receive inquiries from holders of such proprietary rights inquiring whether we are infringing or violating their proprietary rights and/or seek court declarations that they do not infringe upon, misappropriate or otherwise violate our intellectual property rights or challenging our ownership or the validity or enforceability of our intellectual property rights. Although we seek to ensure that our employees do not use the proprietary information or know-how of others in their work for us, we may also be subject to claims that we or these employees have used or disclosed confidential information or intellectual property, including trade secrets or other proprietary information, of any such employee's former employer, or that third parties have an interest in our patents as an inventor or co-inventor. Companies holding patents or other intellectual property rights relating to batteries, electric motors or electronic power management systems may bring suits alleging misappropriation, infringement or violation of such rights or otherwise asserting their rights and seeking licenses.

In addition, if we or any of our commercialization partners are determined to have misappropriated, infringed upon or violated a third party's intellectual property rights and we were unable to successfully challenge the validity or enforceability of such rights, we or our commercialization partners may be required to do one or more of the following:

- cease selling, incorporating or using products or processes that incorporate or use the challenged intellectual property;
- pay substantial damages or other monetary compensation, including treble damages and attorneys' fees in the case of willful patent infringement;
- obtain a license from the holder of the infringed or violated intellectual property right, which license may not be available on reasonable terms or which license could be non-exclusive (thereby giving our competitors and other third parties access to the same technologies licensed to us) or could require substantial licensing and royalty payments; or
- redesign our batteries or other products or processes material to our business in order to avoid infringement or other violation.

Any of the foregoing would harm our business, prospects, financial condition and operating results. In addition, any litigation or claims, whether or not valid, could result in substantial costs and diversion of resources and management's attention.

We also license patents and other intellectual property from third parties, and we may face claims that our use of this intellectual property infringes the rights of others. In such cases, we may seek indemnification from our licensors under our license contracts with them. However, our rights to indemnification may be unavailable or insufficient to cover our costs and losses or otherwise provide us with the continued rights to use such licensed intellectual property.

Our patent applications may not result in issued patents or our patent rights may be contested, circumvented, invalidated or limited in scope, any of which could have a material adverse effect on our ability to prevent others from interfering with our commercialization of our products.

We have rights to five issued patents and 19 active families of patent applications. We intend to continue to apply for patents with claims covering our technologies and processes, including our patent-pending all-dry, zero-waste cathode synthesis technology and any innovations resulting from such process, when and where we deem it appropriate to do so. We have filed patent applications in the United States, Canada and in certain non-U.S. jurisdictions to obtain patent rights

to inventions we have developed, with claims directed to compositions of matter, methods of use and other technologies relating to our programs, including battery applications. There can be no assurance that any of these applications will result in patents being issued. Conversely, we may choose not to file a patent application in order to maintain certain trade secrets or know-how, and a third party may subsequently file a patent covering such trade secrets or know-how. In addition, there can be no assurance that any of our current and future patents will effectively protect our technologies and processes or be sufficiently broad to effectively prevent others from commercializing competitive technologies, processes and products. Publications of discoveries in the scientific literature often lag behind the actual discoveries, and patent applications in the United States and other jurisdictions are typically not published until 18 months after filing or in some cases not at all. Therefore, we cannot be certain that we or our current or future collaborators were the first to make the inventions claimed in our owned patent or pending patent applications, or that we or our current or future collaborators were the first to file for patent protection of such inventions. For a description of our patent portfolio, see *Item 4. Information on the Company— B. Business Overview — Intellectual Property*.

Any changes we make to our technologies or processes to cause them to have what we view as more advantageous properties may not be covered by our existing patent and patent applications, and we may be required to file new applications and/or seek other forms of protection for any such altered technologies or processes. The patent landscape surrounding our underlying technology and processes is potentially crowded, and there can be no assurance that we would be able to secure patent protection that would adequately cover an alternative to our current technologies or processes.

The patent prosecution process is expensive and time-consuming, and we and our current or future collaborators may not be able to prepare, file and prosecute all necessary or desirable patent applications at a reasonable cost or in a timely manner. It is also possible that we or our current or future collaborators will fail to identify patentable aspects of inventions made in the course of development and commercialization activities before it is too late to obtain patent protection for them. Moreover, in some circumstances, we may not have the right to control the preparation, filing and prosecution of patent applications, or to maintain or enforce the patents, covering technology that we license to third parties and may be reliant on our current or future collaborators to perform these activities, which means that these patent applications may not be prosecuted, and these patents enforced, in a manner consistent with the best interests of our business. If our current or future collaborators fail to establish, maintain, protect or enforce such patents and other intellectual property rights, such rights may be reduced or eliminated. If our current or future collaborators are not fully cooperative or disagree with us as to the prosecution, maintenance or enforcement of any patent rights, such patent rights could be compromised.

Further, the issuance of a patent is not conclusive as to its inventorship, scope, validity or enforceability, and our patents may be invalidated, circumvented, narrowed or challenged in the courts or patent offices in the United States and abroad. In recent years, these areas have been the subject of much litigation. As a result, the issuance, scope, validity, enforceability and commercial value of our and our current or future collaborators' patent rights are highly uncertain. The legal protection afforded to inventors and owners of intellectual property in countries outside of the United States may not be as protective or effective as that in the United States and we may, therefore, be unable to acquire and enforce intellectual property rights outside the United States to the same extent as in the United States. In many non-U.S. countries, patent applications and/or issued patents, or parts thereof, must be translated into the native language. If our patent applications or issued patents are translated incorrectly, they may not adequately cover our technologies. Furthermore, others may independently develop or commercialize similar or alternative technologies, or design around our patents.

Filing, prosecuting, enforcing and defending patents in all countries throughout the world would be prohibitively expensive, and our intellectual property rights in some countries outside the United States may be less extensive than those in the United States. The requirements for patentability differ and certain countries have heightened requirements for patentability, requiring more disclosure in the patent application. In addition, certain countries have compulsory licensing laws under which a patent owner may be compelled to grant licenses to third parties. In those countries, we may have limited remedies if patents are infringed or if we are compelled to grant a license to a third party, which could materially diminish the value of those patents and limit our potential revenue opportunities. In addition, many countries limit the enforceability of patents against government agencies or government contractors. In these countries, the patent

owner may have limited remedies, which could materially diminish the value of such patent. Competitors may use technologies in jurisdictions where we have not obtained patent protection to develop their own products and, further, may export otherwise infringing products to territories where we have patent protection, but enforcement is not as strong as that in the United States. Accordingly, our efforts to enforce intellectual property rights around the world may be inadequate to obtain a significant commercial advantage from the intellectual property that we own or license.

Changes in patent law could diminish the value of patents in general, thereby impairing our ability to protect our technologies and processes.

Our success is dependent on intellectual property rights, including patents. Obtaining and enforcing patents involves technological and legal complexity, and obtaining and enforcing patents is costly, time-consuming and inherently uncertain. The U.S. Supreme Court in recent years has issued rulings either narrowing the scope of patent protection available in certain circumstances or weakening the rights of patent owners in certain situations or ruling that certain subject matter is not eligible for patent protection. In addition to increasing uncertainty with regard to our ability to obtain patents in the future, this combination of events has created uncertainty with respect to the value of patents, once obtained. Depending on decisions by Congress, the federal courts, the USPTO and equivalent bodies in non-U.S. jurisdictions, the laws and regulations governing patents could change in unpredictable ways that would weaken our ability to obtain new patents or to enforce our existing patent and patents we may obtain in the future.

Patent reform laws, such as the Leahy-Smith America Invents Act, as well as changes in how patent laws are interpreted, could increase the uncertainties and costs surrounding the prosecution of our patent applications and the enforcement or defense of our issued patents.

We may be unable to obtain intellectual property rights or technology necessary to develop and commercialize our materials and equipment.

The patent landscape around our programs is complex, and there may be one or more third-party patents and patent applications containing subject matter that might be relevant to our programs. Depending on what claims may ultimately issue from these patent applications, and how courts construe the issued patent claims, as well as depending on the ultimate method of use of our processes, we may need to obtain a license to practice the technology claimed in such patents. There can be no assurance that such licenses will be available to us on commercially reasonable terms, or at all. If a third party does not offer us a necessary license or offers a license only on terms that are unattractive or unacceptable to us, we might be unable to develop and commercialize one or more of our programs, which would harm our business, financial condition and results of operations. Moreover, even if we obtain licenses to such intellectual property, but subsequently fail to meet our obligations under the relevant license agreements, or such license agreements are terminated for any other reasons, we may lose our rights to the technologies licensed under those agreements.

The licensing or acquisition of third-party intellectual property rights is an area in which many companies operate that have interests that are in conflict with ours, and several more established companies may pursue strategies to license or acquire third-party intellectual property rights that we may consider attractive or necessary. These established companies may have a competitive advantage over us due to their size, capital resources and greater commercialization capabilities. In addition, companies that perceive us to be a competitor may be unwilling to assign or license rights to us. If we are unable to successfully obtain rights to required third-party intellectual property rights or maintain the existing intellectual property rights we have, we may have to abandon development of the relevant programs, which could harm our business, financial condition, results of operations and prospects.

We may become involved in lawsuits or other proceedings to protect or enforce our intellectual property, which could be expensive, time-consuming and unsuccessful and have a negative effect on the success of our business.

Third parties may infringe our patents or misappropriate or otherwise violate our intellectual property rights. In the future, we may initiate legal proceedings to enforce or defend our intellectual property rights, to protect our trade secrets or to determine the validity or scope of intellectual property rights we own or control. Also, third parties may initiate legal proceedings or counterclaims against us to challenge the validity or scope of intellectual property rights we own, control

or to which we have rights. These proceedings can be expensive and time-consuming and many of our adversaries in these proceedings may have the ability to dedicate substantially greater resources to prosecuting these legal actions than we can. Accordingly, despite our efforts, we may not be able to prevent third parties from infringing upon or misappropriating intellectual property rights we own, control or have rights to, particularly in countries where the laws may not protect those rights as fully as in the United States. Litigation could result in substantial costs and diversion of management resources, which could harm our business and financial results. An adverse result in any litigation proceeding could put one or more of our patents at risk of being invalidated, narrowed, held unenforceable or interpreted in such a manner that would not preclude third parties from entering the market with competing products.

Third-party pre-issuance submission to the USPTO, or opposition, derivation, revocation, reexamination, inter partes review or interference proceedings, or other pre-issuance or post-grant proceedings or other patent office proceedings or litigation in the United States or other jurisdictions provoked by third parties or brought by us, may be necessary to determine the inventorship, priority, patentability or validity of inventions with respect to our patents or patent applications. An unfavorable outcome could leave our technology or processes without patent protection, allow third parties to commercialize our technology and processes and compete directly with us, without payment to us, or could require us to obtain license rights from the prevailing party in order to be able to manufacture or commercialize our technologies or processes without infringing third-party patent rights. Our business could be harmed if the prevailing party in such a case does not offer us a license on commercially reasonable terms, or at all. Even if we obtain a license, it may be non-exclusive, thereby giving our competitors access to the same technologies licensed to us. In addition, if the breadth or strength of protection provided by our patents and patent applications is threatened, it could dissuade companies from collaborating with us to license, develop or commercialize current or future technologies.

We may not be aware of all third-party intellectual property rights potentially relating to our technologies or processes, or future technologies or processes, including patents or pending or future patent applications that, if issued, would block us from commercializing our materials and equipment. As to pending third-party applications, we cannot predict with any certainty which claims will issue, if any, or the scope of such issued claims. Even if we believe third-party intellectual property claims are without merit, a court of competent jurisdiction could hold that these third-party patents are valid, enforceable and infringed, which could materially and negatively affect our ability to commercialize any materials and equipment and any other technologies covered by the asserted third-party patents.

Risks Related to the ADSs

An active U.S. trading market may not be sustained.

While our ordinary shares have been listed on the Australian Securities Exchange, or the ASX, since December 2015, and trading on the OTCQX Best Market from September 2020 until December 2023, there was no public market on a U.S. national securities exchange for our ordinary shares until we listed our ADSs on Nasdaq in January 2022. There can be no assurance that an active trading market for the ADSs will be sustained. In the absence of an active trading market for the ADSs, investors may not be able to sell their ADSs.

The trading price and volume of the ADSs may be volatile, and purchasers of the ADSs could incur substantial losses.

The price and trading volumes of our ordinary shares and ADSs may be significantly affected by many factors, including:

- actual or anticipated fluctuations in our or our competitors' financial condition and operating results;
- variations in our financial performance from the expectations of market analysts;
- actual or anticipated changes in our growth rate relative to our competitors;
- competition from existing products or new products that may emerge;
- announcements by us or our competitors of significant business developments, acquisitions or expansion plans, strategic partnerships, joint ventures, collaborations or capital commitments;
- adverse results or delays in our or any of our competitors' products development;
- adverse regulatory decisions;
- the termination of a strategic alliance or the inability to establish additional strategic alliances;
- failure to meet or exceed financial estimates and projections of the investment community or that we provide to the public;
- ADS price and volume fluctuations attributable to inconsistent trading volume levels of the ADSs;
- price and volume fluctuations in trading of our ordinary shares on the ASX;
- short selling or other market manipulation activities;
- additions or departures of key management, or scientific or technology personnel;
- disruptions in our supply or manufacturing arrangements;
- disputes or other developments related to proprietary rights, including patents, litigation matters and our ability to obtain patent and other intellectual property protection for our technologies;
- litigation involving our company;
- announcement or expectation of additional debt or equity financing efforts;
- natural disasters or other calamities or disease outbreaks;
- sales of ordinary shares or the ADSs by us, our affiliates or our other shareholders; and
- general economic and market conditions.

In addition, equity markets generally have experienced, and may in the future experience, extreme price and volume fluctuations, and often these movements do not reflect the operational and financial performance of the listed companies concerned. In particular, share prices of companies in the battery industry have been highly volatile in the past and may continue to be highly volatile in the future. Our operations currently focus on battery materials, technology and services. Therefore, we are especially vulnerable to these factors to the extent that they continue to affect the battery industry. Fluctuations in the share markets in Australia and the United States, as well as macroeconomic conditions, could significantly affect the price of the ADSs. As a result of this volatility, investors may not be able to sell their ADSs at or above the price originally paid for the security.

These and other market and industry factors may cause the market price and demand for the ADSs to fluctuate, regardless of our actual operating performance, which may limit or prevent investors from readily selling their ADSs and may otherwise negatively affect the liquidity of the trading market for the ADSs.

Future sales of our ordinary shares or ADSs or the anticipation of future sales could reduce the market price of our ordinary shares or ADSs.

Sales of a substantial number of shares or ADSs in the public market, or the perception that such sales could occur, could adversely affect the market price of our ordinary shares and the ADSs and may make it more difficult for you to sell your ADSs at a time and price that you deem appropriate. We have recently raised funds through the sales of our ordinary shares. For instance, in addition to placements of our ordinary shares in March, May, and September 2021, in June 2023, we issued unsecured convertible notes to LGES that are currently convertible into up to 28,263,492 ordinary shares, in November 2024 we issued approximately 74.1 million ordinary shares in a fully underwritten institutional placement, and in January 2025 we issued approximately 68.6 million ordinary shares to eligible shareholders pursuant to a share purchase

plan and approximately 12.8 million ordinary shares to Phillips 66 in a conditional placement that was approved by shareholders. See Item 7. Major Shareholders and Related Party Transactions, and Item 10.C – Material Contracts.

The ordinary shares subject to subscription under outstanding options and performance rights exercisable for ordinary shares could become eligible for sale in the public market in the future, subject to certain legal and contractual limitations. Sales of a large number of ordinary shares in the public market could depress the market price of the ADSs. If these additional ordinary shares are sold, or if it is perceived that they will be sold, in the public market, the trading price of the ordinary shares and ADSs could decline substantially, which could impair our ability to raise additional capital through the issuance of ordinary shares, ADSs or other securities in the future, and may cause you to lose part or all of your investment.

If securities or industry analysts do not publish research or reports about our business, or publish inaccurate or unfavorable reports about our business, the price of the ADSs and their trading volume could decline.

The trading market for the ADSs depends in part on the research and reports that securities or industry analysts publish about us or our business. If additional securities or industry analysts do not cover our Company, the trading price for the ADSs could be negatively impacted. If one or more of the analysts who covers us downgrades our equity securities or publishes incorrect or unfavorable research about our business, the price of the ADSs would likely decline. If one or more of these analysts ceases coverage of our company or fails to publish reports on us regularly, or downgrades our securities, demand for the ADSs could decrease, which could cause the price of the ADSs or their trading volume to decline.

We do not currently intend to pay dividends on our securities and, consequently, your ability to achieve a return on your investment will depend on appreciation in the price of the ADSs.

We have not declared or paid any cash dividends on our ordinary shares since our listing on the ASX and do not currently intend to do so for the foreseeable future.

We currently intend to invest our future earnings, if any, to fund our operations and growth. Therefore, you are not likely to receive any dividends on your ADSs for the foreseeable future and the success of an investment in the ADSs will depend upon any future appreciation in its value. Consequently, investors may need to sell all or part of their holdings of the ADSs after price appreciation, which may never occur, as the only way to realize any future gains on their investment. There is no guarantee that the ADSs will appreciate in value or even maintain the price at which you have purchased them. Investors seeking cash dividends should consider not purchasing the ADSs.

While we do not anticipate paying any cash dividends on our ordinary shares in the foreseeable future, if such a dividend is declared, the depositary for the ADSs has agreed to pay to you the cash dividends or other distributions it or the custodian receives on our ordinary shares or other deposited securities after deducting its fees and expenses. You will receive these distributions in proportion to the number of our ordinary shares your ADSs represent. However, in accordance with the limitations set forth in the deposit agreement, it may be unlawful or impractical to make a distribution available to holders of ADSs. We have no obligation to take any other action to permit the distribution of the ADSs, ordinary shares, rights or anything else to holders of the ADSs. This means that you may not receive the distributions we make on our ordinary shares or any value from them if it is unlawful or impractical to make them available to you. These restrictions may negatively impact the value of your ADSs. In addition, exchange rate fluctuations may affect the amount of Australian dollars that we are able to distribute, and the amount in U.S. dollars that our shareholders receive upon the payment of cash dividends or other distributions we declare and pay in Australian dollars, if any. These factors could harm the value of the ADSs, and, in turn, the U.S. dollar proceeds that holders receive from the sale of the ADSs.

The dual listing of our ordinary shares and the ADSs may negatively impact the liquidity and value of the ADSs.

Since the listing of the ADSs on Nasdaq, our ordinary shares have continued to be listed on the ASX. We cannot predict the effect of this dual listing on the value of our ordinary shares and ADSs. However, the dual listing of our ordinary shares and the ADSs may dilute the liquidity of these securities in one or both markets and may negatively impact the development of an active trading market for the ADSs in the United States. The price of the ADSs could also be negatively impacted by trading in our ordinary shares on the ASX.

U.S. investors may have difficulty enforcing civil liabilities against our company, our directors or members of senior management and the experts named in this annual report.

Certain members of our senior management and Board of Directors named in this annual report are non-residents of the United States, and a substantial portion of the assets of such persons are located outside the United States. As a result, it may be impracticable to serve process on such persons in the United States or to enforce judgments obtained in U.S. courts against them based on civil liability provisions of the securities laws of the United States. Even if you are successful in bringing such an action, there is doubt as to whether Australian courts would enforce certain civil liabilities under U.S. securities laws in original actions or judgments of U.S. courts based upon these civil liability provisions. In addition, awards of punitive damages in actions brought in the United States or elsewhere may be unenforceable in Australia or elsewhere outside the United States. An award for monetary damages under U.S. securities laws would be considered punitive if it does not seek to compensate the claimant for loss or damage suffered and is intended to punish the defendant. The enforceability of any judgment in Australia will depend on the particular facts of the case as well as the laws and treaties in effect at the time. The United States and Australia do not currently have a treaty or statute providing for recognition and enforcement of the judgments of the other country (other than arbitration awards) in civil and commercial matters.

As a result, our public shareholders may have more difficulty in protecting their interests through actions against us, our management or our directors than would shareholders of a corporation incorporated in a jurisdiction in the United States. In addition, as a company incorporated in Australia, the provisions of the Corporations Act 2001 (Cth), or the "Corporations Act," regulate the circumstances in which shareholder derivative actions may be commenced, which may be different, and in many ways less permissive, than for companies incorporated in the United States.

Australian takeover laws may discourage takeover offers being made for us or may discourage the acquisition of a significant position in our ordinary shares or ADSs.

We are incorporated in Australia and are subject to the takeover laws of Australia. Subject to a range of exceptions, the takeover provisions in the Corporations Act prohibit the acquisition of a direct or indirect interest in our issued voting shares if the acquisition of that interest will lead to a person's voting power in us increasing from 20% or below to more than 20%, or increasing from a starting point that is above 20% and below 90%. Australian takeover laws may discourage takeover offers being made for us or may discourage the acquisition of a significant position in our ordinary shares. This may have the ancillary effect of entrenching our Board of Directors and may deprive or limit our shareholders' opportunity to sell their ordinary shares.

Our Constitution and Australian laws and regulations applicable to us may differ from those which apply to a U.S. corporation.

As an Australian company we are subject to different corporate requirements than a corporation organized under the laws of the United States. Our Constitution, as well as the Corporations Act, sets forth various rights and obligations that apply to us as an Australian company and which may not apply to a U.S. corporation. These requirements may operate differently than those which apply to many U.S. companies. You should carefully review the summary of these matters set forth under "Description of Securities Registered Under Section 12 of the Exchange Act," as well as our Constitution, which are included as exhibits to this annual report, prior to investing in our securities.

Holders of ADSs will not be directly holding our ordinary shares.

A holder of ADSs will not be treated as one of our shareholders and will not have direct shareholder rights, unless they surrender the ADSs to receive the ordinary shares underlying their ADSs in accordance with the deposit agreement and applicable laws and regulations. Our Constitution and Australian law govern our shareholder rights. The depositary, through the custodian or the custodian's nominee, will be the holder of the ordinary shares underlying ADSs. The deposit agreement among us, the depositary and holders of ADSs, and all other persons directly and indirectly holding ADSs, sets out ADS holder rights, as well as the rights and obligations of us and the depositary. See *Item 12. Description of Securities Other Than Equity Securities – American Depositary Shares*.

Your right as a holder of ADSs to participate in any future preferential subscription rights offering or to elect to receive dividends in ordinary shares may be limited, which may cause dilution to your holdings.

The deposit agreement provides that the depositary will not make rights available to you unless the distribution to ADS holders of both the rights and any related securities are either registered under the Securities Act of 1933, as amended (the "Securities Act"), or exempted from registration under the Securities Act. If we offer holders of our ordinary shares the option to receive dividends in either cash or shares, under the deposit agreement the depositary may require satisfactory assurances from us that extending the offer to holders of ADSs does not require registration of any securities under the Securities Act before making the option available to holders of ADSs. We are under no obligation to file a registration statement with respect to any such rights or securities or to endeavor to cause such a registration statement to be declared effective. Moreover, we may not be able to establish an exemption from registration under the Securities Act. Accordingly, ADS holders may be unable to participate in our rights offerings or to elect to receive dividends in shares and may experience dilution in their holdings. In addition, if the depositary is unable to sell rights that are not exercised or not distributed or if the sale is not lawful or reasonably practicable, it will allow the rights to lapse, in which case you will receive no value for these rights. Under the terms of our subscription agreement with Phillips 66, Phillips 66 also has certain rights to be notified of, and participate in, issuance of shares by the Company, which opportunities may not be available to you or other holders of ADSs.

You may not be able to exercise your right to vote the ordinary shares underlying your ADSs.

Holders of ADSs may exercise voting rights with respect to the ordinary shares represented by the ADSs only in accordance with the provisions of the deposit agreement. The deposit agreement provides that, upon receipt of notice of any meeting of holders of our ordinary shares, the depositary will fix a record date for the determination of ADS holders who shall be entitled to give instructions for the exercise of voting rights. Upon timely receipt of notice from us, if we so request, the depositary shall distribute to the holders as of the record date (i) the notice of the meeting or solicitation of consent or proxy sent by us and (ii) a statement as to the manner in which instructions may be given by the holders.

You may instruct the depositary to vote the ordinary shares underlying your ADSs. Otherwise, you will not be able to exercise your right to vote, unless you withdraw the ordinary shares underlying the ADSs you hold. However, you may not know about the meeting far enough in advance to withdraw those ordinary shares in time to vote them yourself. If we ask for your instructions, the depositary, upon timely notice from us, will notify you of the upcoming vote and arrange to deliver our voting materials to you and will try to vote ordinary shares as you instruct. We cannot guarantee that you will

receive the voting materials in time to ensure that you can instruct the depositary to vote your ordinary shares or to withdraw your ordinary shares so that you can vote them yourself.

Under our Constitution, any resolution to be considered at a meeting of the shareholders shall be decided on a show of hands unless a poll is demanded in accordance with the terms of our Constitution. A poll may be demanded before a vote is taken, or, in the case of a vote taken on a show of hands, immediately before or immediately after, the declaration of the result of the show of hands. Under voting by a show of hands, the depositary will vote (or cause the custodian to vote) all ordinary shares held on deposit at that time in accordance with the voting instructions received from a majority of holders of ADSs who provide timely voting instructions.

You may be subject to limitations on the transfer of your ADSs and the withdrawal of the underlying ordinary shares.

Your ADSs are transferable on the books of the depositary. However, the depositary may close its books at any time or from time to time when it deems expedient in connection with the performance of its duties. The depositary may refuse to deliver, transfer or register transfers of your ADSs generally when our books or the books of the depositary are closed, or at any time if we or the depositary think it is advisable to do so because of any requirement of law, government or governmental body, or under any provision of the deposit agreement, or for any other reason subject to your right to surrender your ADSs and receive the underlying ordinary shares. Temporary delays in the surrendering of your ADSs and receipt of the underlying ordinary shares may arise because the depositary has closed its transfer books or we have closed our transfer books, the transfer of ordinary shares is blocked to permit voting at a shareholders' meeting or we are paying a dividend on our ordinary shares. In addition, you may not be able to surrender your ADSs and receive the underlying ordinary shares when you owe money for fees, taxes and similar charges and when it is necessary to prohibit withdrawals in order to comply with any laws or governmental regulations that apply to ADSs or to the withdrawal of ordinary shares or other deposited securities. See *Item 12. Description of Securities Other Than Equity Securities – American Depositary Shares*.

ADS holders' rights to pursue claims are limited by the terms of the deposit agreement.

The deposit agreement provides that holders and beneficial owners of ADSs, including those holders and owners who acquired ADSs in secondary transactions, irrevocably waive the right to a trial by jury in any legal proceeding arising out of or relating to the deposit agreement or the ADSs, including in respect of claims under U.S. federal securities laws, against us or the depositary to the fullest extent permitted by applicable law. If this jury trial waiver provision is prohibited by applicable law, an action could nevertheless proceed under the terms of the deposit agreement with a jury trial. To our knowledge, the enforceability of a jury trial waiver under the U.S. federal securities laws has not been finally adjudicated by a federal court. However, we believe that a jury trial waiver provision is generally enforceable under the laws of the State of New York, which govern the deposit agreement, by a court of the State of New York or a federal court, which have non-exclusive jurisdiction over matters arising under the deposit agreement, applying such law. In determining whether to enforce a jury trial waiver provision, New York courts and federal courts will consider whether the visibility of the jury trial waiver provision within the agreement is sufficiently prominent such that a party has knowingly waived any right to trial by jury. We believe that this is the case with respect to the deposit agreement and the ADSs. In addition, New York courts will not enforce a jury trial waiver provision in order to bar a viable setoff or counterclaim sounding in fraud or one which is based upon a creditor's negligence in failing to liquidate collateral upon a guarantor's demand, or in the case of an intentional tort claim (as opposed to a contract dispute), none of which we believe are applicable in the case of the deposit agreement or the ADSs.

No condition, stipulation or provision of the deposit agreement or ADSs serves as a waiver by any holder or beneficial owner of ADSs or by us or the depositary of compliance with any provision of the applicable U.S. federal securities laws. If you or any other holder or beneficial owner of ADSs brings a claim against us or the depositary in connection with such matters, you or such other holder or beneficial owner may not be entitled to a jury trial with respect to such claims, which may have the effect of limiting and discouraging lawsuits against us and/or the depositary. If a lawsuit is brought against us and/or the depositary under the deposit agreement, it may be heard only by a judge or justice of the applicable trial court, which would be conducted according to different civil procedures and may result in different outcomes than a trial

by jury would have had, including results that could be less favorable to the plaintiff(s) in any such action, depending on, among other things, the nature of the claims, the judge or justice hearing such claims, and the venue of the hearing.

As the jury trial waiver relates to claims arising out of or relating to the ADSs or the deposit agreement, we believe that the waiver would likely continue to apply to ADS holders or beneficial owners who withdraw the ordinary shares from the ADS facility with respect to claims arising before the cancellation of the ADSs and the withdrawal of the ordinary shares, and the waiver would likely not apply to ADS holders or beneficial owners who subsequently withdraw the ordinary shares represented by ADSs from the ADS facility with respect to claims arising after the withdrawal. However, to our knowledge, there has been no case law on the applicability of the jury trial waiver to ADS holders or beneficial owners who withdraw the ordinary shares represented by the ADSs from the ADS facility.

We and the depositary are entitled to amend the deposit agreement and to change the rights of ADS holders under the terms of such agreement, and we may terminate the deposit agreement, without the prior consent of the ADS holders.

We and the depositary are entitled to amend the deposit agreement and to change the rights of the ADS holders under the terms of such agreement, without the prior consent of the ADS holders. In the event that the terms of an amendment are materially prejudicial to ADS holders' substantial rights, ADS holders will only receive 30 days' advance notice of the amendment, and no prior consent of the ADS holders is required under the deposit agreement. Furthermore, we may decide to terminate the ADS facility at any time for any reason, or the depositary agent may on its own initiative terminate the deposit agreement. If the ADS facility will terminate, ADS holders will receive at least 30 days' prior notice, but no prior consent is required from them. Under the circumstances that we decide to make an amendment to the deposit agreement that is materially prejudicial to the substantial rights of the ADS holders or terminate the deposit agreement, the ADS holders may choose to sell their ADSs or surrender their ADSs and become direct holders of the underlying ordinary shares, but will have no right to any compensation whatsoever.

ADS holders have limited recourse if we or the depositary fail to meet our respective obligations under the deposit agreement.

The deposit agreement expressly limits our obligations and liability and those of the depositary. We and the depositary:

- are only obligated to take the actions specifically set forth in the deposit agreement without negligence or bad faith;
- are not liable if we are or it is prevented or delayed by law or circumstances beyond our or its control from performing our or its obligations under the deposit agreement;
- are not liable if we exercise or it exercises discretion permitted under the deposit agreement;
- are not liable for the inability of any holder of ADSs to benefit from any distribution on deposited securities that is not made available to holders of ADSs under the terms of the deposit agreement, or for any consequential or punitive damages for any breach of the terms of the deposit agreement; and
- may rely upon any documents we believe or it believes in good faith to be genuine and to have been signed or presented by the proper person.

These provisions of the deposit agreement limit the ability of holders of the ADSs to obtain recourse if we or the depositary fail to meet our respective obligations under the deposit agreement.

As a foreign private issuer, we are exempt from a number of rules under the U.S. securities laws that apply to public companies that are not foreign private issuers.

We are a foreign private issuer, as defined in the SEC's rules and regulations and, consequently, we are not subject to all of the disclosure requirements applicable to public companies organized within the United States. For example, we are exempt from certain rules under the Securities Exchange Act of 1934, as amended (the "Exchange Act"), that regulate disclosure obligations and procedural requirements related to the solicitation of proxies, consents or authorizations applicable to a security registered under the Exchange Act, including the U.S. proxy rules under Section 14 of the Exchange Act. In addition, our senior management and directors are exempt from the reporting and "short-swing" profit recovery

provisions of Section 16 of the Exchange Act and related rules with respect to their purchases and sales of our securities. Moreover, while we currently make annual and semi-annual filings with respect to our listing on the ASX and expect to file financial reports on an annual and semi-annual basis, we will not be required to file annual and current reports and financial statements with the Securities and Exchange Commission ("SEC") as frequently or as promptly as U.S. domestic companies whose securities are registered under the Exchange Act and will not be required to file quarterly reports on Form 10-Q or current reports on Form 8-K under the Exchange Act. We will also be exempt from the provisions of Regulation FD, which prohibits the selective disclosure of material nonpublic information to, among others, broker-dealers and holders of a company's securities under circumstances in which it is reasonably foreseeable that the holder will trade in the company's securities on the basis of the information. In addition, foreign private issuers are not required to file their annual report on Form 20-F until four months after the end of each fiscal year.

These exemptions and leniencies will reduce the frequency and scope of information and protections to which you are entitled as an investor and there may be less publicly available information concerning our company than there would be if we were not a foreign private issuer.

As a foreign private issuer, we are permitted to adopt certain home country practices in relation to corporate governance matters that differ significantly from Nasdaq corporate governance listing standards, and these practices may afford less protection to shareholders than they would enjoy if we complied fully with Nasdaq corporate governance listing standards.

As a foreign private issuer with ADSs listed on Nasdaq, we are subject to Nasdaq corporate governance listing standards. However, the governance rules of Nasdaq permit foreign private issuers to follow the corporate governance practices of their home country. Some corporate governance practices in Australia may differ from Nasdaq corporate governance listing standards. For example, we could include non-independent directors as members of our Remuneration Committee and our Nominating and Corporate Governance Committee, and our independent directors may not necessarily hold regularly scheduled meetings at which only independent members of the Board of Directors are present. In addition, the corporate governance practice in our home country, Australia, does not require a majority of our Board to consist of independent directors (although it is recommended). Currently, we intend to follow home country practice to the maximum extent possible. Therefore, our shareholders may be afforded less protection than they otherwise would have under corporate governance listing standards applicable to U.S. domestic issuers. For an overview of our corporate governance practices, see *Item 6. Directors, Senior Management and Employees —C. Board Practices*.

We may lose our foreign private issuer status in the future, which could result in significant additional cost and expense.

While we currently qualify as a foreign private issuer, the determination of foreign private issuer status is made annually based on the last business day of an issuer's most recently completed second fiscal quarter and, accordingly, our next determination will be made based on information as of June 30, 2025. In the future, we would lose our foreign private issuer status if we fail to meet the requirements necessary to maintain our foreign private issuer status as of the relevant determination date. For example, if 50% or more of our securities are held by U.S. residents and more than 50% of our senior management or directors are residents or citizens of the United States, we could lose our foreign private issuer status. As of December 31, 2024, approximately 13.9% of our outstanding ordinary shares were held by U.S. residents.

The regulatory and compliance costs to us under U.S. securities laws as a U.S. domestic issuer may be significantly higher. If we cease to be a foreign private issuer, we will be required to file periodic reports and registration statements on U.S. domestic issuer forms with the SEC, which are more detailed and extensive in certain respects than the forms available to a foreign private issuer. We would be required under current SEC rules to prepare our financial statements in accordance with U.S. GAAP rather than IFRS, and modify certain of our policies to comply with corporate governance practices required of U.S. domestic issuers. Such conversion of our financial statements to U.S. GAAP would involve significant time and cost. In addition, we may lose our ability to rely upon exemptions from certain corporate governance requirements on U.S. stock exchanges that are available to foreign private issuers such as the ones described above and exemptions from procedural requirements related to the solicitation of proxies.

We are an “emerging growth company” under the JOBS Act and will be able to avail ourselves of reduced disclosure requirements applicable to emerging growth companies, which could make our ordinary shares and ADSs less attractive to investors.

We are an “emerging growth company,” as defined in the Jumpstart Our Business Startups Act (the “JOBS Act”), and we intend to take advantage of certain exemptions from various reporting requirements that are applicable to other public companies that are not “emerging growth companies.” These include exemptions from the auditor attestation requirements of Section 404(b) of the Sarbanes-Oxley Act of 2002 (the “Sarbanes-Oxley Act”), reduced disclosure obligations regarding executive compensation in our periodic reports and proxy statements, and exemptions from the requirements of holding a nonbinding advisory vote on executive compensation and shareholder approval of any golden parachute payments not previously approved.

We cannot predict if investors will find the ADSs less attractive because we may rely on these exemptions. If some investors find the ADSs less attractive as a result, there may be a less active trading market for the ADSs and the price of the ADSs may be more volatile. We may take advantage of these exemptions until such time that we are no longer an emerging growth company. We would cease to be an emerging growth company upon the earliest to occur of (i) the last day of the fiscal year in which we have more than \$1.235 billion in annual revenue; (ii) the last day of the fiscal year in which we qualify as a “large accelerated filer”; (iii) the date on which we have, during the previous three-year period, issued more than \$1.0 billion in non-convertible debt securities; and (iv) the last day of the fiscal year in which the fifth anniversary of our first sale of common equity securities pursuant to an effective registration statement under the Securities Act has occurred.

We have incurred and will continue to incur significant, increased costs as a result of operating as a company with ADSs that are publicly traded in the United States, and will incur increased costs as a result of becoming a recipient of United States government funding and incentives, and our management will be required to devote substantial time to new compliance initiatives.

As a company with ADSs that are publicly traded in the United States, we have incurred and will incur significant legal, accounting, insurance, administrative and other expenses. In addition, the Sarbanes-Oxley Act, Dodd-Frank Wall Street Reform and Consumer Protection Act and related rules implemented by the SEC and Nasdaq have imposed various requirements on public companies listed in the United States, including requiring the establishment and maintenance of effective disclosure and procedures and internal control over financial reporting. In addition, our receipt of grants and other funding and incentives from U.S. government agencies will heighten the importance of accurate reporting and internal controls and will impose compliance obligations under a number of other laws and regulations. See also *Item 3. Key Information — D. Risk Factors (“Our DOE grant, and any future grants, loans or incentives we may obtain from governmental agencies, will impose restrictions and compliance obligations on us, with associated costs and risks.”)*, and *Item 4 – Regulation – Department of Energy Grant Terms and Conditions*.

The cost of complying with these requirements may place a strain on our systems and resources. To maintain and improve the effectiveness of our disclosure controls and procedures, we must commit significant resources. Among other things, this has required and will require us to commit additional management, operational and financial resources to identify new professionals to join our company. These activities also may divert management’s attention from other business

concerns, which could have a material adverse effect on our business, results of operations, financial condition and cash flows. Moreover, these requirements have increased and will continue to increase our legal and financial compliance costs and make certain activities, such as procurement and tracking of compliance by sub-contractor and contractual counterparties, more time-consuming and costly. These requirements could also make it more difficult and expensive for us to attract and retain qualified persons to serve on our Board of Directors, our Board committees or as our senior management. Furthermore, if we are unable to satisfy our obligations as a public company listed in the United States, or are alleged to have made false or misleading statements in our applications for government support or other documentation submitted to the government, we could be subject to delisting of the ADSs, fines, sanctions and other regulatory action and potentially civil litigation, which may adversely affect our business, results of operation or financial condition and could result in delays in achieving or maintaining an active and liquid trading market for the ADSs.

If we fail to implement and maintain an effective system of internal controls or fail to identify and remediate our material weaknesses thereof, we may be unable to accurately report our results of operations, meet our reporting obligations or prevent fraud, and investor confidence in our Company and the market price of the ADSs may be negatively impacted.

As a public company, we are required to comply with the SEC's rules implementing Sections 302 and 404 of the Sarbanes-Oxley Act, which requires management to certify financial and other information in our SEC reports and provide an annual management report on the effectiveness of internal control over financial reporting. Our management conducted an evaluation of the effectiveness of our internal control over financial reporting as of December 31, 2024. Based on this evaluation, management has concluded that as of December 31, 2024, we had not maintained effective internal control over financial reporting as a result of the existence of material weaknesses, as further noted below. Consequently, management, with the participation of our interim Chief Executive Officer and Chief Financial Officer, also concluded that our disclosure controls and procedures were not effective as of December 31, 2024.

In connection with the preparation of our financial statements as of and for the year ended June 30, 2022, we identified certain control deficiencies in the design and implementation of our internal control over financial reporting that constituted material weaknesses. These material weaknesses have not yet been fully remediated as of December 31, 2024. As described in *Item 15. Controls and Procedures* of this Form 20-F, we are continuing to implement our remediation plans to address the identified material weaknesses, and our management continues to be actively engaged in the remediation efforts. The material weaknesses will not be considered remediated until the applicable controls operate for a sufficient period of time and management has concluded, through testing, that these controls are operating effectively.

The presence of material weaknesses could result in financial statement errors which, in turn, could lead to errors in our financial reports or delays in our financial reporting, which could require us to restate our financial statements. Remediating material weaknesses will absorb management's time and will require us to incur additional expenses, which could have a negative effect on the trading price of our ordinary shares and the ADSs. In order to establish and maintain effective disclosure controls and procedures and internal controls over financial reporting, we will need to expend significant internal and external resources and provide significant management oversight. Developing, implementing and testing changes to our internal controls may require specific compliance training of our directors and employees, entail substantial costs in order to modify our existing accounting systems, take a significant period of time to complete and divert management's attention from other business concerns. These changes may not, however, be effective in establishing and maintaining adequate internal controls.

If we are unable to conclude that we have effective internal controls over financial reporting, investors may lose confidence in our operating results, the price of our ordinary shares and the ADSs could decline and we may be subject to litigation or regulatory enforcement actions. In addition, if we are unable to meet the requirements of Section 404 of the Sarbanes-Oxley Act, we may not be able to remain listed on Nasdaq.

We currently report our financial results under IFRS, which differs in certain significant respects from U.S. generally accepted accounting principles, or U.S. GAAP.

Currently we report our financial statements under International Financial Reporting Standards ("IFRS") as issued by the International Accounting Standards Board. There have been and there may in the future be certain significant differences between IFRS and U.S. GAAP, and those difference may be material. As a result, our financial information and reported earnings for historical or future periods could be significantly different if they were prepared in accordance with U.S. GAAP. In addition, we do not intend to provide a reconciliation between IFRS and U.S. GAAP unless it is required under applicable law. As a result, you may not be able to meaningfully compare our financial statements under IFRS with those companies that prepare financial statements under U.S. GAAP.

We are subject to risks associated with currency fluctuations, and changes in foreign currency exchange rates could impact our results of operations.

Our ordinary shares are quoted in Australian dollars on the ASX and the ADSs are quoted in U.S. dollars. Any significant change in the value of the Australian dollar may have a negative effect on the value of the ADSs in U.S. dollars. In particular, if the Australian dollar weakens against the U.S. dollar, then, if we decide to convert our Australian dollars into U.S. dollars for any business purpose, appreciation of the U.S. dollar against the Australian dollar would have a negative effect on the U.S. dollar amount available to us. Consequently, appreciation or depreciation in the value of the Australian dollar relative to the U.S. dollar would affect our financial results reported in U.S. dollar terms without giving effect to any underlying change in our business or results of operations. As a result of such foreign currency fluctuations, it could be more difficult to detect underlying trends in our business and results of operations.

Risks Related to Tax Matters

Our ability to utilize our net operating losses to offset future taxable income may be prohibited or subject to certain limitations.

Prior or future changes in our ownership could limit our ability to use our net operating losses ("NOLs") to offset future taxable income. In general, in the United States, Section 382 of the Internal Revenue Code of 1986, as amended, provides an annual limitation with respect to the ability of a corporation to utilize its tax attributes, including its NOLs, against future taxable income in the event of a change in ownership. The use of tax losses incurred prior to a change in ownership may also be limited in Australia. We have not determined whether we have undergone a change in ownership for United States or Australian tax purposes, and it is possible that we may have undergone such a change previously or may undergo such a change as a result of future transactions in our stock (many of which are outside our control). If it is determined that we have previously experienced such an ownership change, or if we undergo one or more ownership changes as a result of future transactions, we may be unable to use all or a portion of our NOLs to offset our future taxable income in the United States or Australia. Any limitations on our ability to use our NOLs may cause income taxes to be paid earlier than otherwise would be paid if such limitations were not in effect and could cause such NOLs to expire unused, in each case, reducing or eliminating the benefit of such NOLs. This could adversely affect our financial condition and operating results.

If we are a passive foreign investment company, there could be adverse U.S. federal income tax consequences to U.S. holders.

Generally, we will be a passive foreign investment company ("PFIC") for U.S. federal income tax purposes for any taxable year in which, after applying certain look-through rules with respect to the income and assets of our subsidiaries, either: (1) at least 75% of our gross income is "passive income" or (2) at least 50% of the average quarterly value of our total gross assets (which would generally be measured by fair market value of our assets) is attributable to assets that produce "passive income" or are held for the production of "passive income." Passive income for this purpose generally includes dividends, interest, royalties, rents, gains from commodities and securities transactions and the excess of gains over losses from the disposition of assets which produce passive income.

We believe that we were not a PFIC for U.S. federal income tax purposes for the taxable year ended December 31, 2023. However, there can be no assurance that we will not be a PFIC for the current taxable year or for any subsequent year. The determination of PFIC status is a factual determination that must be made annually and cannot be made until the close of a taxable year. The determination depends on, among other things, the composition of our income and assets. In this regard, cash generally is treated as a passive asset for PFIC purposes, and the composition of our income and assets will be affected by the amount and timing of any cash we receive, including from any grant funding, government loans or other sources, and the spending of such funds. The fair market value of our assets (including goodwill) may be determined in large part based on the market price of the ADSs and our ordinary shares, which may fluctuate. Moreover, the determination of PFIC status depends, in part, on the application of complex U.S. federal income tax rules which are subject to differing interpretations. Accordingly, there can be no assurance that we would not be a PFIC for the current taxable year or any future taxable year.

If we were to be a PFIC, a U.S. holder would be subject to increased tax liability (generally including an interest charge on certain taxes treated as having been deferred under the PFIC rules) on any gain realized on a sale or other disposition of the ADSs or ordinary shares and on the receipt of certain “excess distributions” received with respect to the ADSs or ordinary shares, unless such U.S. holder makes certain elections. One such election, the “QEF Election,” will be unavailable to a U.S. holder because we do not intend to provide information that a U.S. holder would need to make a valid QEF Election.

U.S. holders should consult their tax advisors regarding the potential application of the PFIC rules to their ADSs or ordinary shares.

If a U.S. person is treated as owning at least 10% of our ordinary shares, such holder may be subject to adverse U.S. federal income tax consequences.

If a U.S. person is treated as owning, directly or indirectly, at least 10% of the value or voting power of our equity, such U.S. person would be treated as a “United States shareholder” with respect to each “controlled foreign corporation” in our Company, if any. Because our Company currently includes one entity that is treated as a U.S. corporation for U.S. federal income tax purposes, all of our current non-U.S. subsidiaries and any future newly formed or acquired non-U.S. subsidiaries that are treated as corporations for U.S. federal income tax purposes will be treated as controlled foreign corporations, regardless of whether we are treated as a controlled foreign corporation. A United States shareholder of a controlled foreign corporation may be required to annually report and include in its U.S. taxable income its pro rata share of “Subpart F income,” “global intangible low-taxed income” and investments in U.S. property by controlled foreign corporations, regardless of whether we make any distributions on the ADSs or ordinary shares. An individual who is a United States shareholder with respect to a controlled foreign corporation generally would not be allowed certain tax deductions or foreign tax credits that would be allowed to a United States shareholder that is a U.S. corporation. Failure to comply with controlled foreign corporation reporting obligations may subject a United States shareholder to significant monetary penalties. We cannot provide any assurances that we will furnish to any United States shareholder information that may be necessary to comply with the reporting and tax paying obligations applicable under the controlled foreign corporation rules of the Internal Revenue Code. U.S. persons should consult their tax advisors regarding the potential application of these rules to their investment in the ADSs.

Future changes to tax laws could materially adversely affect our company and reduce net returns to our shareholders.

Our tax treatment is subject to the enactment of, or changes in, tax laws, regulations and treaties, or the interpretation thereof, tax policy initiatives and reforms under consideration and the practices of tax authorities in jurisdictions in which we operate, including those related to the Organization for Economic Co-Operation and Development's Base Erosion and Profit Shifting Project and other initiatives. Such changes may include (but are not limited to) the taxation of operating income, investment income, dividends received or (in specific context of withholding tax) dividends paid. We are unable to predict what tax reform may be proposed or enacted in the future or what effect such changes would have on our business, but such changes, to the extent they are brought into tax legislation, regulations, policies or practices, could affect our financial position and overall or effective tax rates in the future in countries where we have operations, reduce post-tax returns to our shareholders, and increase the complexity, burden and cost of tax compliance.

Item 4. Information on the Company

A. History and Development of the Company

We were incorporated under the laws of Australia in 2012 under the name Graphitecorp Pty Limited. In 2015, we completed an initial public offering of our ordinary shares and the listing of our ordinary shares on the Australian Securities Exchange, or the ASX, and changed our name to GRAPHITECORP Limited. In 2017, we changed our name to NOVONIX Limited.

The principal place of business of NOVONIX Limited and our registered office are located at Level 38, 71 Eagle Street, Brisbane, Queensland 4000, Australia. Our telephone number is +1 423-298-1007. Our agent for service of process in the United States is National Registered Agents, Inc., located at 1209 Orange Street, Wilmington, DE 19801.

NOVONIX Anode Materials LLC (formerly PUREgraphite, LLC) ("NAM") was established in March 2017 as a joint venture to develop and commercialize ultra-high purity high performance graphite anode material for the lithium-ion battery market focused on electric vehicles ("EVs"), energy storage systems ("ESSs") and specialty applications. In fiscal year 2019, we exercised our call option, pursuant to which we acquired all our joint venture partner's interest in NOVONIX Anode Materials and increased our ownership to 100%.

In June 2017, we acquired Battery Testing Services, Inc., now known as NOVONIX Battery Technology Solutions, Inc. ("BTS"). BTS was founded by Dr. Chris Burns, our former CEO and current special advisor to the Board, and researchers from the research group at Dalhousie University, headed by Dr. Jeff Dahn. BTS aims to provide innovative battery R&D capabilities and technological advantage.

On July 28, 2021, we completed the purchase of an approximately 404,000 square-foot facility in Chattanooga, Tennessee, which we refer to as "Riverside", our first mass production site for production of anode materials. Additionally, NOVONIX Anode Materials has also initiated work on further expansion plans beyond Riverside. We recently announced our intention to enter into a purchase and sale agreement with the City of Chattanooga, Tennessee, and Hamilton County, Tennessee, for land where we intend to develop our second mass production plant, referred to as "Enterprise South." The execution of the purchase and sale agreement is subject to approvals of the City of Chattanooga and Hamilton County, and the closing of the transaction will be subject to the satisfaction of certain conditions to be specified in the purchase and sale agreement. For more information on our anode materials production, see *"Item 4.B. Business Overview - NOVONIX Anode Materials."*

Since the beginning of fiscal year 2020 and through the date of this report, we have incurred capital expenditures of approximately \$164.4 million, primarily consisting of purchases of property, plant and equipment and capital leases in connection with the expansion of our business and development of our technologies. Capital expenditure commitments as of the end of fiscal 2024 but not recognized as liabilities were approximately \$53.0 million. For more information on our capital expenditures, see *Item 5. Operating and Financial Review and Prospects—B. Liquidity and Capital Resources*, and *Item 8. Financial Information*.

The SEC maintains an Internet site at <http://www.sec.gov> that contains reports, proxy and information statements, and other information regarding issuers that file electronically with the SEC. Our website address is www.novonixgroup.com. Information that we furnish to or file with the SEC, including our Annual Reports on Form 20-F and reports of foreign private issuer on Form 6-K, and any amendments to, or exhibits included in, these reports are made available for download, free of charge, through our website as soon as reasonably practicable. We may use our website as a distribution channel of material company information. Financial and other important information regarding the Company is routinely posted on and accessible through our website at www.novonixgroup.com. Accordingly, investors should monitor this channel, in addition to following our press releases, SEC filings and public conference calls and webcasts. The reference to our website is an inactive textual reference only and information contained in, or that can be accessed through, our website is not part of this annual report.

B. Business Overview

NOVONIX is a leading battery materials and technology company committed to onshoring the graphite supply chain and providing revolutionary solutions for the global lithium-ion battery industry. with innovative, sustainable technologies, high-performance materials, and more efficient production methods. The Company offers innovative, sustainable technologies, high-performance materials, as well as more efficient production methods. NOVONIX is growing its high-performance synthetic graphite anode material manufacturing operations, has developed a patented all-dry, zero-waste, cathode synthesis process, and manufactures industry-leading battery cell testing equipment. Through advanced R&D capabilities, proprietary technology, and strategic partnerships, NOVONIX has gained a prominent position in the electric vehicle and energy storage industries and is working to power a cleaner energy future.

Our mission is underpinned by an increasing emphasis on environmentally conscious battery technologies, which we believe are key to creating a sustainable future. We are focused on the development of innovative, sustainable technologies and processes as well as high-performance materials that support longer life batteries, higher-energy efficiency, reduced chemical usage, reduced waste generation, and the use of cleaner power inputs.

Our vision is to provide revolutionary clean energy solutions to the battery industry. Our core values, curiosity, collaboration, and commitment, promote a corporate culture where we put people first, foster resilient problem solving, and take pride in what we are accomplishing to create a more sustainable future.

NOVONIX is well-positioned to be an industry leader at the forefront of product innovation and intellectual property development in the battery materials and technology industry with a focus on supporting the onshoring of the battery supply chain. The Company has built a team of top talent with experience to drive innovation company wide and believes it has the next-generation technology needed to support the rapidly growing EV and ESS markets in North America.

The Company continues to receive and install equipment at its Riverside facility in Chattanooga, Tennessee to meet growing customer demand for high-performance synthetic graphite materials. This year, NOVONIX signed offtake agreements with Stellantis, PowerCo, and Panasonic Energy and is currently working to meet customer milestones for mass production qualification as well as compliance criteria. Current customer agreements are forecasted to exceed our planned volumes at our Riverside facility, driving demand into our next planned site at, Enterprise South.

Additionally, NOVONIX continues to focus on developing improved and sustainable technologies, pursuing strategic partnerships with leading international battery companies and growing an intellectual property pipeline that we believe will position the Company at the forefront of next generation battery technology.

Throughout fiscal year 2024, NOVONIX continued to focus on the execution of its business strategy and growth initiatives. NOVONIX had net assets of \$137.6 million including \$42.6 million in cash and cash equivalents at December 31, 2024. The Company reported a statutory after-tax loss for the year ended December 31, 2024, of \$74.8 million. These financial results are in line with management expectations.

Highlights of the Year Ended December 31, 2024

The year ended December 31, 2024, saw significant progress for NOVONIX along our four main growth strategies. The Company continued to make progress towards its business goals, by 1) securing financing to scale operations to create value for shareholders, (2) scaling our operations to deliver commercial production, (3) securing tier-one customers, (4) maintaining industry leading research and development efforts for battery materials.

Key highlights and developments during 2024 include:

Scale Operations to Deliver Commercial Production

- Completed independent engineering assessment of Riverside facility in Chattanooga, Tennessee with plans to reach 20,000 tpa in 2028
- Continued to receive, install, and commission equipment at Riverside aimed at reaching commercial production capacity of 3,000 tpa at Riverside to support final qualification and anticipated start of production for Panasonic Energy in early 2026
- Announced intended location for new synthetic graphite manufacturing plan in the Enterprise South Industrial Park in Chattanooga, Tennessee, targeting to bring online an initial 31,500 tpa of production capacity in 2028

Secure Tier 1 Customers

- Signed a binding offtake agreement with Panasonic Energy for 10,000 tonnes of high-performance synthetic graphite materials from 2025 through 2028 (as noted above, we plan to deliver product in early 2026)
- Signed binding offtake agreement with Stellantis for up to a target volume of 115,000 tonnes of high-performance synthetic graphite materials from 2026 through 2031
- Signed binding offtake agreement with PowerCo SE for a minimum of 32,000 tonnes of high-performance synthetic graphite materials to be supplied to PowerCo from 2027 through 2031

Maintain Industry-Leading R&D Efforts for Battery Materials

- Released inaugural Sustainability Report
- Entered into a testing and development agreement with PowerCo, Volkswagen Group's wholly owned battery cell manufacturing company
- Granted patents for graphite/silicon alloy composite material in Europe, Japan, and the United States
- Won Reuters Global Energy Transition Awards in the category of R&D Achievement for all-dry, zero-waste cathode synthesis technology
- Granted patent for all-dry, zero-waste cathode synthesis technology in Japan
- Entered Joint Development Agreement with CBMM, focused on niobium materials for improved Cathode Active Materials ("CAM") performance
- Entered Collaboration Agreement with ICoNiChem Widnes Limited ("ICoNiChem"), focused on sustainable CAM feedstock materials
- Published white paper focused on our cathode technology
- Entered into strategic partnership with Voltaiq to drive efficiency and quality in the battery industry
- Entered license agreement with Harper International

Secure Financing to Scale Operations

- Selected for \$103 million Qualifying Advanced Energy Project tax credit for Riverside facility
- Received \$12.9 million in reimbursements from the DOE's MESC Office grant to expand production at Riverside facility
- Completed equity raise to continue to investment in machinery and equipment at our Riverside facility to achieve the 2025 targeted production capacity and certain qualification requirements for Panasonic, Stellantis and PowerCO
- Offered conditional commitment for a direct loan of up to \$754 million from the DOE for a new synthetic graphite manufacturing plant in Tennessee, Enterprise South

Our Growth Strategies

NOVONIX's leadership is focused on continuing the successful execution of its operational strategic roadmap with the objective of maximizing long-term shareholder value through the generation of strong cash flow and the pursuit of profitable, high-growth opportunities through innovative, sustainable technologies, high-performance materials, and more efficient production methods for the global lithium-ion battery industry. The Company's key strategies for 2025 include:

Scale Operations to Deliver Commercial Production

- Install, qualify, commission, and start-up of equipment for commercial production capacity of 3,000 tpa at Riverside to support final qualification and anticipated start of production for Panasonic Energy in early 2026, Stellantis in 2026, and PowerCo in 2027
- Leverage Riverside engineering to progress Enterprise South plans
- Invest in its team through recruitment, training, and development to ensure recruitment and retention of the best talent in the industry

Secure Tier 1 Customers

- Aim to complete product qualification for offtake agreement with Panasonic Energy for the planned start of production in early 2026
- Continue to pursue additional supply agreements to allocate capacity from the planned Enterprise South facility, toward its initial production target of 31,500 tpa

Maintain Industry-Leading R&D Efforts for Battery Materials

- Engage in phased commercialization strategy that leverages our existing expertise, strategic partnership and ongoing research and development to position our patented all-dry, zero-waste, cathode synthesis processing technology
- Operates its pilot line to demonstrate the scalability of its cathode synthesis technology. These capabilities support sampling to potential customers and will be leveraged for new strategic partnerships with ICoNiChem and CBMM through which we will synthesize, test, and analyze cathode active materials
- Continue advancing intellectual property, aimed at driving innovation across our technologies and reinforcing our position as a leader in next-generation battery materials. Patents acquired this year reflect our progress and ongoing efforts to build a robust IP portfolio that supports our current and future products that will power sustainable energy solutions

Secure Financing to Scale Operations

- Offered conditional commitment for a \$754 million loan from the DOE. The Company will work with the DOE LPO to satisfy certain technical, commercial, legal, environmental, financial conditions and certain government approvals to enter into definitive financing documents and fund the loan for Enterprise South
- Invest alongside remaining MESC grant funds to scale Riverside production
- Attract additional strategic investment to continue production build out of Riverside and for growth plans at Enterprise South

Operational Structure at a Glance

NOVONIX is a leading battery technology and materials company. Our synergistic operating structure, as depicted below, is integral to the company's current business development and growth strategy.

NOVONIX™ ANODE MATERIALS

- Leading domestic supplier of battery-grade synthetic graphite
- Establishing first large-scale and sustainable production operation to advance North American battery supply chain
- Accelerating the clean energy transition through proprietary technology, advanced R&D and partnerships

NOVONIX™ CATHODE MATERIALS

- Commercializing patented, all-dry, zero-waste cathode synthesis technology
- Minimizing environmental impact while producing high performance materials
- Producing cathode samples on pilot line with total production capacity of up to 10 tpa

NOVONIX™ BATTERY TECHNOLOGY SOLUTIONS

- Providing industry leading Ultra-High Precision Coulometry cell testing equipment
- Offering R&D Services with in-house pilot line, cell testing, and expertise to accelerate customer development programs

NOVONIX Anode Materials

NOVONIX Anode Materials, located in Chattanooga, Tennessee, is a leading domestic supplier of high-performance battery-grade synthetic graphite.

NAM's Riverside facility is poised to become the first large-scale production site dedicated to high-performance synthetic graphite for the battery sector in North America. This year, the Company signed binding offtake agreements with Tier 1 customers including Stellantis, PowerCo, and Panasonic. These contracts allocate the remainder of our available volumes at our Riverside facility and a portion of the volumes to be produced at our next planned mass production facility, Enterprise South. The Company also entered into a licensing agreement with its long-time technology partner, Harper, for the rights and use of its continuous, induction-based graphitization furnace technology. Upon making an initial payment within 12 months of the effective date of the agreement, which is solely at the Company's option, NOVONIX will have the exclusive license to use the technology to further develop the furnaces used for the thermal production of graphite material for use in the battery anode market.

Riverside is slated to begin commercial production in early 2026, with plans to grow output to 20,000 tpa to meet current customer commitments. In November 2023, we reached agreement on the terms of a grant from the MESC Office of the DOE and we have begun to use those funds to purchase equipment and facility infrastructure to expand Riverside's production capacity to 20,000 tpa. In April 2024, we were selected to receive a US\$103 million tax credit (the "48C tax

credit”) under the Qualifying Advanced Energy Project Allocation Program (the “48C program”), to support production of critical battery materials from the Riverside facility.

Our team continues to receive, install, and commission equipment at Riverside towards our initial 3,000 tpa of production capacity to support our planned start of production for Panasonic Energy in early 2026.

NAM’s Lookout Valley (“Lookout Valley”) facility, also located in Chattanooga, Tennessee, is the center of the Company’s product and process development for the anode materials business scale up and optimization. Lookout Valley operates full pilot production to produce materials to customer specification. Our team applies learnings and principles to Riverside, the first mass production site.

Conditional Commitment for a US\$754 Million Loan from U.S. Department of Energy

To meet anticipated customer demand, the Company plans to build a new facility to be located in the Enterprise South Industrial Park in Chattanooga, Tennessee, to manufacture synthetic graphite primarily for use in EV batteries. The planned Enterprise South facility is targeted to have an initial production capacity of 31,500 tpa, with plans to expand to up to 75,000 tpa of production capacity. In December, the Company announced a conditional commitment from the DOE through the Loan Programs Office for a direct loan of up to \$754.8 million, which includes \$692 million in principal and \$62.8 million in capitalized interest, to be applied towards partially financing the new facility. The proposed financing is being offered under the DOE LPO’s Advanced Technology Vehicles Manufacturing Loan Program.

Key terms of the DOE’s conditional commitment, including those set forth in a non-binding term sheet attached to the conditional commitment letter signed by the DOE, the Company and NOVONIX Enterprise South LLC, an indirect wholly owned subsidiary of the Company (“NES”), include:

- the loan will be structured in two tranches based on a phased completion of infrastructure and production lines from a total eligible investment of \$943.6 million;
- the loan will be comprised of two primary tranches that will have terms of 15 years and 10 years, respectively, from the date of first payment of each. The first tranche will be to support the site and infrastructure for the Enterprise South facility and 21,000 tpa of production capacity, while the second tranche will support an additional 10,500 tpa of production capacity;
- an additional tranche to fund eligible project costs will be subject to repayment upon receipt of any proceeds derived from the monetization of any tax credit received by the Company or NES related to the Enterprise South facility under the Qualifying Advanced Energy Project Allocation Program (see below for the update related to the Company’s receipt of this tax credit);
- the loan will be guaranteed by the Company and secured by a first priority security interest in all assets of NES, equity interests in and, with certain exceptions, assets of certain of the Company’s existing subsidiaries; and
- each advance of loan proceeds will have a separate interest rate set by the Federal Financing Bank under the general supervision of the Secretary of Treasury at the time that the respective advance is made.

While this conditional commitment demonstrates the DOE’s intent to finance the Enterprise South facility, the DOE must complete an environmental review, and the Company must satisfy certain technical, commercial, legal, environmental, and financial conditions before the DOE can decide whether to enter into definitive financing documents and fund the loan. A binding loan agreement from the DOE is also subject to the satisfactory completion of due diligence by the DOE, satisfaction of conditions precedent specified in the term sheet, approval of the Company’s Board, receipt of required governmental and third-party consents, and the negotiation and execution of binding loan documents. Once binding loan documents have been signed, the Company and NES will need to satisfy certain conditions precedent prior to loan closing, and/or prior to first and subsequent advances of loan proceeds.

The Enterprise South facility (*site rendering below*) is expected to reach initial production capacity by the end of 2028 and is anticipated to create 450 full-time operational jobs and 500 construction jobs. Enterprise South, together with Riverside, is planned to bring the Company's total production capacity to over 50,000 tpa by 2028.

In January 2025, the Company learned that it had not been selected to receive tax credits under the 48C Program for Enterprise South and is working to understand what, if any, impact this may have on the proposed loan. The conditional commitment from the LPO remains unchanged at up to \$754.8 million. Enterprise South remains eligible for potential tax credits under the Advanced Manufacturing Production Tax Credit (Section 45X) which offers 10% of eligible production costs of critical minerals, including graphite, back to producers.

Tier 1 Customer Offtake Agreements: Panasonic Energy, Stellantis, and PowerCo

This year, NOVONIX has signed binding offtake agreements to supply synthetic graphite to Panasonic Energy, Stellantis, and PowerCo, allocating all the volume to be produced at our Riverside facility.

In February 2024, the Company announced the signing of a binding offtake agreement with Panasonic Energy for at least 10,000 tonnes of high-performance synthetic graphite material to be supplied to Panasonic Energy's North American operations from 2025 through 2028. As a leading battery cell provider, Panasonic Energy is working to expand its production of EV batteries in North America to meet increased demand while also increasing the percentage of materials procured locally. Panasonic Energy is establishing a sustainable supply and working to meet the objective to reduce the carbon footprint of their entire lithium-ion battery supply chain for EVs by 50% in 2031 compared to 2022 levels.

In November 2024, NOVONIX signed a binding offtake agreement with Stellantis, a leading automotive company, for a minimum of 86,250 tonnes, up to a target volume of 115,000 tonnes of high-performance synthetic graphite material. The material will be supplied to Stellantis' cell manufacturing partners in North America over a six-year term starting in 2026. Stellantis is one of the world's leading automakers – with brands including Dodge, Fiat, Jeep, Ram, Maserati, Peugeot, Opel, and Alfa Romeo – and has announced plans to invest more than €50 billion over the decade in electrification to deliver on its targets of reaching 100% passenger car battery-electric vehicles.

Also in November, the Company signed a binding offtake agreement with PowerCo for a minimum of 32,000 tonnes of high-performance synthetic graphite material. The material will be supplied to PowerCo over a five-year term starting in 2027. Established by Volkswagen in 2022, PowerCo is committed to ramp-up global battery cell production. PowerCo

oversees international factory operations, advances in cell technology, and vertical integration of the battery value chain. PowerCo has identified three gigafactory locations – Salzgitter in Germany, Valencia in Spain, and St. Thomas in Canada – with a combined capacity of up to 200 GWh/year.

Customers* Supporting Growth

6-year commitment for up to a target volume of 115,000 tonnes starting in 2026 to cell manufacturers LGES & Samsung

5-year commitment for a minimum of 32,000 tonnes starting in 2027

4-year commitment totaling 10,000 tonnes following successful qualification in 2025

Upon successful completion of JDA, LGES has the option to purchase up to 50,000 tonnes over a 10-year period

Continuing discussions with other Tier 1 cell manufacturers and OEMs expected to lead to additional contracted volumes of synthetic graphite with a target of 150K+ tpa

Contracted Customer Volumes^{1,2}

1. Contracted volumes shown require product qualification and growth dependent on customer plans and capital availability. NVX will add production lines at facilities to generally align with contracted volumes
2. The volumes shown are management's annual estimates of the offtakes for Stellantis, PowerCo and Panasonic, including the assumption that Panasonic contract is renewed past 2028

*Agreements require final product qualification. The Company also has a supply agreement with KORE Power to support its proposed KOREPlex facility. KORE Power has made the decision not to construct the KOREPlex facility. As such, the Company has not factored any potential purchase by KORE Power into its currently planned allocation of capacity.

Technology License Agreement with Harper

In January 2025, the Company entered into a license agreement with its long-time technology partner, Harper International Corporation, for the rights and use of its continuous, induction-based graphitization furnace technology.

In December 2020, NOVONIX and Harper announced a strategic partnership to develop innovative graphitization furnace technology to be used to produce synthetic graphite anode material for the lithium-ion battery sector. This partnership provided for commitments from NOVONIX to purchase from Harper, and from Harper to develop and exclusively supply NOVONIX with proprietary systems for thermal processing material for the battery anode market.

Alongside this exclusive use agreement, the license agreement provides NOVONIX the right to an exclusive license to Harper's technology on which its continuous graphitization furnaces operate. Upon making an initial payment within 12 months of the effective date of the agreement, NOVONIX will have the exclusive license to use the technology to further develop the furnaces used for the thermal production of graphite material for use in the battery anode market. Upon equipment meeting certain performance objectives, and NOVONIX's payment of additional licensing fees, the license will expand to include NOVONIX's right to build equipment using the licensed technology, either internally or through other permitted sublicensees.

Intellectual Property

NAM exclusively owns all graphite-related intellectual property of its former joint venture partner and has the ongoing exclusivity for the development of graphite products and battery anode materials using that technology. Our intellectual property includes innovative, high-performance graphite anode materials, which have been demonstrated in internal testing to outperform leading materials currently in the market, and production methods that we expect to deliver production costs significantly lower than existing producers.

Through operational growth and strategic partnerships, NOVONIX has developed proprietary technology that delivers increased energy efficiency, negligible facility emissions, and anode materials that outperform industry standards. In June 2022, NOVONIX released the results of a Life Cycle Assessment, which showed an approximate 60% decrease in global warming potential compared to commercially manufactured anode grade synthetic graphite produced in China, and an approximate 30% decrease in global warming potential compared to anode grade natural graphite also produced in China. NAM strives for the highest performance while powering the battery materials industry with lower carbon emissions.

In the fourth quarter of 2024, the U.S. Patent and Trademark Office granted NOVONIX a patent for the graphite/silicon alloy composite material previously granted in Europe in the third quarter and Japan in the second quarter. This patent covers a new type of anode active material for lithium-ion battery applications combining a silicon alloy material within a graphite matrix and the method of making the same. Examination of additional patent members for this anode active material will take place over the coming months. Continued advancement of intellectual property is an important part of NOVONIX's long-term strategy, driving innovation across our technologies and reinforcing our position as a leader in next-generation battery materials. This latest milestone reflects our ongoing efforts to build a robust IP portfolio that supports our current and future products that will power sustainable energy solutions.

NOVONIX Battery Technology Solutions

NOVONIX Battery Technology Solutions, located in Nova Scotia, Canada, was founded by Dr. Chris Burns and researchers from the research group at Dalhousie University, formerly headed by Dr. Jeff Dahn, in 2013. NOVONIX acquired BTS in June 2017, and we have continued our collaboration with Dalhousie University through our partnership with Dr. Mark Obrovac, a leading battery materials innovator, and his team. NOVONIX exclusively owns all intellectual property developed within Dr. Obrovac's group under the collaborative research agreement without any ongoing obligations to Dalhousie University.

Our capabilities and expertise to develop new materials and accelerate research and development activities has led to the development of our patented processing technology for cathode materials, which we are continuing to leverage to support customer needs.

BTS meets our customer's needs in two critical ways: battery testing equipment and research and development services. Our team is proud to provide manufacturers with what we believe to be the most accurate lithium-ion battery cell test equipment in the world. In October 2024, Voltaiq, an industry leader in battery quality analytics software, and NOVONIX announced a strategic partnership aimed at revolutionizing the battery industry's approach to quality control and efficiency. NOVONIX had previously been developing its own data and analytics offering to support its needs and look at leveraging potential artificial intelligence and machine learning integration. Through this partnership, NOVONIX will work with Voltaiq to integrate these features into Voltaiq's platform. The partnership represents a significant step forward in addressing industry challenges, combining Voltaiq's best-in-class battery quality analytics software with NOVONIX's Ultra-High Precision Coulometry Systems ("UHPC"), as well as its expertise in battery R&D and materials development.

Key highlights of the partnership include:

- Integration of Voltaiq's advanced analytics platform into NOVONIX's battery materials development programs
- Enhanced quality control and defect detection capabilities in gigafactories and battery research labs using best-in-class software and UHPC equipment
- Improved efficiency in battery development cycles, leading to faster time-to-market for new battery technologies.

Ultra-High Precision Coulometry Systems (Hardware)

NOVONIX provides the only UHPC systems available today for those seeking state-of-the-art battery testing equipment for their laboratory research, product development, and manufacturing environments. Our world-class UHPC systems are fully capable battery cyclers that allow our customers to rapidly test electrochemical processes within cells of various form factors, with industry leading precision and accuracy.

Our UHPC equipment is used by leading battery makers, researchers, and equipment manufacturers including 80% of the top cell makers in China, and 50% of major automotive OEMs worldwide.

In December 2024, BTS announced a strategic collaboration with Gamry Instruments Inc. (“Gamry”), a leader in Electrochemical Impedance Spectroscopy (“EIS”) technology, that will allow for a seamless integration of a Gamry EIS box with a NOVONIX UHPC system. The Gamry EIS box can either be rack-mounted or placed near a UHPC system. A new interconnect cable will connect both the UHPC Channel Module and Gamry EIS box to a NOVONIX Thermal Chamber. This integration allows for an automated experience for running EIS measurements during an experiment.

NOVONIX is always looking for new ways to deliver value to our customers and the Company is now able to distribute Gamry products as part of integrated UHPC systems to its customers worldwide.

Research & Development Services (Consulting Services)

In 2017, our team started working to establish a battery pilot line, along with cell testing capabilities, to support the Company’s work in battery materials development. These resources and services continue to be leveraged by our anode and cathode materials teams and well as external customers and partners.

NOVONIX has significantly expanded its research and development capabilities through direct investments and our long-term collaborative research agreement with Dalhousie University. BTS now has an established team of leading scientists with an internal battery pilot line to prototype and evaluate new materials and cell designs, and leverage extensive battery testing capabilities, including our proprietary UHPC.

With the battery industry growing, there is a shortage of facilities, infrastructure, time, capital, personnel, and knowledge. We provide a range of services and co-development models to help our customers gain the insights they need to make the right decisions at the critical R&D stage. The BTS team holds a wide array of expertise in engineering, metrology, and electrochemistry that establishes them as industry experts. They engage with customers in a variety of ways including project scoping, cell design, testing, evaluation protocols, as well as analyzing process and performance data.

Cathode Materials

In 2021, NOVONIX began development of its patented all-dry, zero-waste cathode synthesis technology. This process technology minimizes environmental impact while producing high performance materials. In 2023, the Company commissioned a pilot line with a nameplate capacity of 10 tpa to demonstrate the scalability of its technology.

The Company is committed to a phased commercialization strategy that leverages our existing expertise, strategic partnerships, and ongoing R&D to position our CAM processing technology to have a transformative impact on the lithium-ion battery sector.

NOVONIX plans to build on success to accelerate commercialization through:

- Aligning technology to global market trends
- Strategic development partnerships

- Technology licensing and joint ventures
- Leverage government support and potential strategic investment

In June 2024, NOVONIX's all-dry, zero-waste cathode synthesis technology was recognized by Reuters Global Energy Transition Awards, winning the R&D Achievement category.

In the third quarter of 2024, NOVONIX and CBMM, the world leader in the production and commercialization of niobium products, announced the signing of a joint development agreement focused on nickel-based cathode materials. Under the agreement, NOVONIX will use its patented all-dry, zero-waste synthesis process to synthesize, test, and analyze CAM that will incorporate CBMM's suite of niobium products with the goal of developing a CAM with improved performance at a lower cost.

NOVONIX will utilize its cathode pilot line and BTS capabilities to characterize the materials under the project through their physical and electrochemical performance, including building full scale pouch cells for benchmark evaluation. CBMM will provide various materials throughout the project to compare and demonstrate optimal performance in NOVONIX's cathode powders. Upon successful completion of milestones during this one-year project, NOVONIX and CBMM may enter into an agreement for CBMM products to be integrated into NOVONIX's production processes.

In October 2024, NOVONIX also announced the signing of a Joint Collaboration Agreement with ICoNiChem focused on the development of nickel-based CAM. ICoNiChem is an expert in transition metal chemistry specializing in cobalt and nickel compounds made from 100% ethically source feedstocks to modern industries across the globe.

NOVONIX and ICoNiChem have been selected for funding under the 2024 Canada-UK critical minerals call for proposals, which is focused on advancing projects related to critical minerals essential for industries like renewable energy, electric vehicles, and electronics. To support their participation in the project, BTS is receiving advisory services and up to CAD \$127,928 in funding from the National Research Council of Canada Industrial Research Assistance Program ("NRC IRAP"), while ICoNiChem is receiving support through Innovate UK. The 2-year project, with a total budget of CAD \$515,686 between NOVONIX and ICoNiChem, aims to further improve the sustainability of the NOVONIX all-dry, zero-waste technology by incorporating recycled metal feedstock, such as cobalt and nickel carbonates and oxides, into the process.

Upon successful completion of milestones, NOVONIX may enter into commercial agreements for ICoNiChem products with the goal of integrating recycled feed into its CAM production processes moving forward.

Mount Dromedary Graphite Project

We hold tenement rights in the Mount Dromedary Graphite Project (the "MDG Project"), a high-grade natural flake graphite deposit located in Northern Queensland, Australia. As of the date of this annual report, the Company has not generated any revenue from the sale of natural graphite.

In April 2024, NOVONIX signed a Share Sale and Purchase Agreement under which its wholly owned subsidiary, MD South Tenements Pty Ltd, which holds the Mount Dromedary natural graphite exploration interests, will be divested to Axon Graphite Limited ("Axon Graphite"), a wholly owned subsidiary of Lithium Energy Limited ("Lithium Energy"). As a consideration for the transaction, NOVONIX will receive shares in Axon Graphite, subject to the completion of the parties' due diligence enquiries, completion of the initial public offering ("IPO") of Axon Graphite, and receipt of approval and admission of Axon Graphite to the Australian Securities Exchange ("ASX").

Axon Graphite will seek to capitalize on expected growth in EV sales and battery-based grid scale energy storage systems over the coming decades, through the production and sale of graphite-based battery anode material, one of the key components of electric vehicle and grid storage batteries. See *Item 3. Key Information — D. Risk Factors* ("**From time to time we may enter into negotiations for acquisitions, dispositions, partnerships, joint ventures or investments that are not ultimately consummated or, if consummated, may not be successful.**").

Tenement List

Tenement	Permit Holder	Grant Date	NVX Rights	Expiry Date
EPM 26025	Exco Resources Pty Ltd.	14/12/2015	100% (Sub-Blocks, Normanton 3123 D, J, N, O, S)	13/12/2025
EPM 17323	MD South Tenements Pty Ltd. (Subsidiary of NOVONIX Limited)	20/10/2010	100%	19/10/2027
EPM 17246	MD South Tenements Pty Ltd.	26/10/2010	100%	25/10/2027

Principal Markets

The principal markets in which our BTS division competes are North America, Asia, and Europe through the sale of battery testing equipment and related consulting services. BTS customers are primarily battery manufacturers and developers, including specialty materials manufacturers, consumer electronics OEMs and automotive OEMs, primarily across the lithium-ion battery value chain. Revenues during the years ended December 31, 2024 and 2023, six months ended December 31, 2022, and year ended June 30, 2022 were \$5.9 million, \$8.1 million, \$2.7 million, and \$6.1 million, respectively.

In fiscal year 2024, North America, Asia, Australia, and Europe accounted for 71%, 22%, 3%, and 4% of revenues, respectively. In fiscal year 2023, North America, Asia, Australia, and Europe accounted for 82%, 8%, 6%, and 4% of revenues, respectively. In fiscal year 2022, North America, Asia and Europe accounted for 79%, 17% and 4% of revenues, respectively.

As of the date of this annual report on Form 20-F, we have not generated any revenue from sale of synthetic graphite. If our commercialization efforts for our synthetic graphite product are successful, we may generate revenue from the sale of our synthetic graphite materials primarily in North America primarily to customers in the EV and grid storage industries.

Sales and Marketing

We market and sell our BTS battery testing equipment and related consulting services through a combination of direct contact with customers' research and development experts and third-party distributors who specialize in battery testing technologies and sell to automotive and electronics OEMs, battery developers and manufacturers, and research institutions. As we develop and commercialize our synthetic graphite anode materials business, we market our battery materials through the direct engagement of a combination of our corporate, R&D and operations leadership teams.

Raw Materials

Raw materials for our BTS business are comprised of various equipment and other components from a wide range of third-party suppliers. As we expand our anode materials manufacturing capabilities, we will begin to rely on third-party suppliers for components and materials. See “Risk Factors—***We may not be able to establish supply relationships for necessary components or may be required to pay costs for components that are more expensive than anticipated, which could delay the introduction or acquisition of additional equipment necessary to support our growth and negatively impact our business.***”

Seasonality

We have not been subject to any seasonality in our continuing operations in any material respect.

Our Competitive Strengths

We develop and supply what we believe is the most accurate battery testing technology in the world. Our UHPC technology for short term reliable evaluation of the cycle life of lithium-ion cells was developed in the laboratory at Dalhousie University by Dr. Jeff Dahn, who joined our team as Chief Scientific Advisor on July 1, 2021. Our former CEO, Dr. Chris Burns, was a team lead of that laboratory. This testing technology delivers high accuracy, high precision measurements that are dependable and repeatable, with the potential to allow cycle life evaluation to be made in weeks instead of years. We believe our Ultra-High Precision Coulometry technology provides significantly higher grading measurements than our competitors, enabling us to support the most urgent and innovative performance cell testing projects and is used by industry leaders across the battery sector.

Our proprietary process technology and capabilities across the battery and energy storage value chain drive innovation and commercial opportunities. By playing a critical role across the full value chain, our proprietary testing and development technologies provide us with in-depth visibility into industry and technological trends ranging from materials to end use cases and requirements. We believe that this access should allow us to remain at the forefront of lithium-battery technology. As the broader battery and energy storage industry continues to evolve, we are committed to continuing to expand into new and emerging technologies.

A leading U.S.-based supplier of battery-grade synthetic graphite anode material, with capacity scaling as market demand grows. Our NOVONIX Anode Materials business is well-positioned to help localize synthetic graphite as U.S. and non-U.S. companies seek to diversify their suppliers of battery materials with the goal of sourcing material within the U.S. We are a leading U.S.-based supplier with plans to scale significant domestic volumes of battery-grade synthetic graphite anode material. To our knowledge, we are the only qualified U.S.-based supplier of battery-grade synthetic graphite anode material.

Our high-performance anode materials have longer cycle life with competitive costs. NOVONIX Anode Materials’ premium graphite showcases higher coulombic efficiency as well as capacity retention compared to industry leading materials in head-to-head comparisons (including a Tier 1 automotive OEM cell used as a reference benchmark). We believe NOVONIX’s materials have the highest purity in the market as they contain essentially no contaminants, enhancing safety as well as performance. We believe NOVONIX Anode Materials’ process is also a “greener” alternative as it utilizes higher energy efficiency production technology, several lower emission energy sources and no chemical purification, avoiding the environmental and safety risks of such processes. The strength of NOVONIX Anode Materials’ products are evidenced by our supply agreements with Stellantis, PowerCo and Panasonic Energy, and a joint development agreement with LGES. Our mission is to be a leader with high performance, longer life, lower costs, and “greener” materials.

Our offerings are directly compatible with today’s installed and planned battery manufacturing technology. NOVONIX Anode Materials provides proven technology that can be integrated into current cell designs with no material additional costs to cell manufacturers. An extremely limited number of suppliers are established outside of Asia, which could lead to a lack of localized supply options. The plug and play characteristic along with superior material performance and competitive pricing is expected to drive continued industry adoption of our offerings.

Our research and development team consists of renowned battery technology researchers including Dr. Jeff Dahn and Dr. Mark Obrovac. Dr. Jeff Dahn, who joined our team as Chief Scientific Advisor on July 1, 2021, is a leading researcher in the field of lithium-ion batteries and materials. Dr. Dahn is a named inventor on over seventy patents and patent applications. Dr. Mark Obrovac is another renowned researcher in battery materials and process technology, a NOVONIX sponsored researcher, and the head of the Obrovac Research Group at Dalhousie University. With the support of leading innovative battery technology researchers, we believe NOVONIX is well-positioned to remain at the forefront of battery technology.

We are partnering with industry-leading companies. To further the development and production of advanced anode materials, we are partnering with Harper International, a global leader in complete thermal processing solutions and technical services to produce advanced materials, to develop proprietary next-generation furnace technology. This arrangement demonstrates that industry leaders have identified NOVONIX as a strategic partner for continued innovation.

We were selected to receive support from the U.S. Government. Since November 2023, we have finalized a \$100 million grant from the DOE MESC Office, were selected to receive a \$103 million 48C tax credit and received a conditional commitment from the Loan Programs Office of the DOE for a direct loan of up to \$754.8 million, to help finance the growth of our anode materials business. We believe that the grant, tax credit and conditional loan commitment demonstrate the commitment by the U.S. Government to support the establishment of domestic supply of high-performance battery materials, while highlighting the expertise, progress, strategic partnerships, and technology NOVONIX has developed.

Competition

The battery materials market consists of many small suppliers (of which we form part of that market), a smaller number of large volume suppliers and a small number of large dominating buyers. As the market continues to grow, we face the risk that one or more competitors, or a new entrant to the market, will increase their competitive position through aggressive marketing campaigns, product innovation, price discounting, acquisitions, or advances in technology. We strive to remain competitive by continuing to develop our products, technologies and associated intellectual property licenses and maintaining competitive pricing. However, in the event we are unable to adapt to changing market pressures or customer demands and keep pace with technological change relative to our competitors, or we are forced to reduce pricing in response to competition, our revenue and profit margins could be affected, which could have a material adverse effect on our business and cash flows, financial condition and results of our operations.

Although, to our knowledge, we are the only qualified U.S.-based supplier of battery-grade synthetic graphite anode material, there are four categories of companies that could be considered potential competition. The first are established synthetic graphite manufacturing companies outside the United States, predominantly in Asia. While these companies do have established manufacturing capacity, they suffer from a geopolitical disadvantage not being located in the United States and suffer from higher energy costs and have less stringent environmental regulations. The second category of potential competition is natural graphite mining companies. Natural graphite provides historically cheaper pricing than synthetic graphite; however natural graphite significantly underperforms relative to synthetic graphite in battery testing and has potential environmental concerns regarding mining practices. The third potential category of competition are existing graphitization companies and new entrants to the production of battery grade synthetic graphite in the United States. While these companies may have significant furnace operations, we believe there are no other graphitization companies or new entrant that have developed an economic process to manufacture battery grade synthetic graphite to the specifications of tier-1 battery manufacturers building in the United States. The fourth and final category of competition are companies developing disruptive technologies such as silicon anodes and liquid metal/solid-state batteries. There are significant marketing materials available to demonstrate the promise of these potential disruptive technologies. However, we are unaware of any technology that has a path to develop, a cost competitive product in the foreseeable future that will meet the increasing lifetime requirements for EVs and energy storage solutions markets and thus be able to capture more than a niche portion of the battery market. As a result, we do not foresee these new technologies having a material impact on the addressable market for our graphite anode material products in the foreseeable future.

Intellectual Property

As of December 31, 2024, we have rights to five issued patents and nineteen active families of patent applications. Our oldest patent application was filed with a priority date in 2015. This patent information is based on our current assessment of patents that we own or control or have exclusively licensed. The information is subject to revision, for example, in the event of changes in the law or legal rulings affecting our patents or if we become aware of new information.

The actual protection afforded by a patent varies in each country and is dependent on the type of patent, the scope of its coverage as determined by the patent office or courts in that country, and the availability of legal remedies in the country. Patents expire, on a country-by-country basis, at various times depending on several factors, including the filing date of the corresponding patent application(s), the availability of patent term adjustment, patent term extension and supplemental protection certificates and requirements for terminal disclaimers. In most countries, including Australia and the United States, the patent term is 20 years from the earliest claimed filing date of a non-provisional patent application or its foreign equivalent in the applicable country. In the United States, a patent's term can be lengthened in certain cases by a patent term adjustment, which compensates a patentee for administrative delays by the USPTO in examining and granting a patent, or may be shortened if a patent is terminally disclaimed over a commonly owned patent or a patent naming a common inventor and having an earlier expiration date.

We may not be able to develop patentable products or processes or obtain patents from pending patent applications. In the event of patent issuance, the patents may not be entirely sufficient to protect the proprietary technology owned by or licensed to us or our partners. Our current patents, or patents that issue on pending applications, may be challenged, invalidated, infringed, or circumvented. In addition, changes to patent laws in the United States or in other countries may limit our ability to defend or enforce our patents or may apply retroactively to affect the term and/or scope of our patents. Our patents may be challenged by third parties in post-issuance administrative proceedings or in litigation as invalid, not infringed, or unenforceable under U.S., Canadian, U.K, Australian or other foreign laws, or they may be infringed by third parties. As a result, we are or may be from time to time involved in the defense and enforcement of our patent or other intellectual property rights in a court of law and administrative tribunals, such as in USPTO inter partes review or reexamination proceedings, foreign opposition proceedings or related legal and administrative proceedings in the United States and elsewhere. The costs of defending our patents or enforcing our proprietary rights in post-issuance administrative proceedings or litigation may be substantial and the outcome can be uncertain. An adverse outcome may allow third parties to use our proprietary technologies without a license from us.

Furthermore, we rely upon trade secrets and know-how and continuing technological innovation to develop and maintain our competitive position. We seek to protect our proprietary information, in part, by using confidentiality and invention assignment agreements with commercial partners, collaborators, employees and consultants. These agreements are designed to protect our proprietary information and, in the case of the invention assignment agreements, to grant it ownership of technologies that are developed through a relationship with a third party. These agreements may be breached, and we may not have adequate remedies for any breach. In addition, our trade secrets may otherwise become known or be independently discovered by competitors. To the extent that our commercial partners, collaborators, employees, and consultants use intellectual property owned by others in their work for us, disputes may arise as to the rights in related or resulting knowledge and inventions.

Our commercial success will also depend in part on not infringing upon the proprietary rights of third parties. It is uncertain whether the issuance of any third-party patent would require us to alter our development or commercial strategies for our product candidates or processes, or to obtain licenses or cease certain activities. Our breach of any license agreements or failure to obtain a license to proprietary rights that we may require to develop or commercialize our future products may have an adverse impact on us. If third parties prepare and file patent applications in the United States that also claim technology to which we have rights, we may have to participate in interference or derivation proceedings in the USPTO to determine priority of invention.

We currently rely on our registered and unregistered trademarks, trade names and service marks, as well as our domain names and logos, as appropriate, to market our brands and to build and maintain brand recognition.

Regulation

Our business is subject to regulation in several areas. Changes in government, monetary policies and laws and regulations, among other things, can have a significant impact on our assets, operations, financial performance and, ultimately, the value of our company and our ordinary shares. Changes may occur in the U.S., Canada, Australia, or any other country in which we operate, or subsequently start to operate. Such changes are likely to be beyond our control and may affect the industries in which we operate, our company, or both. Non-compliance with changing laws and regulations may expose the company to legal risk via investigations or litigious proceedings from regulators, counterparties, or consumers. This section sets forth a summary of the principal laws and regulations relevant to our business.

Department of Energy Grant Terms and Conditions

Under the award agreement that the Company finalized in November 2023 with DOE's MESC Office, and the underlying regulations applicable to the \$100 million grant awarded to the Company, which is payable upon achieving certain milestones and must be matched by the recipient, the Company is required to comply with a number of U.S. laws and regulations. Relevant requirements include the U.S. National Environmental Policy Act and other environmental, health and safety requirements; minimum wage and apprenticeship requirements; export control laws; requirements to perform work in the U.S.; preferences for U.S. supplies of goods and services; requirements to carry out manufacturing using new inventions (if developed through the grant) in the U.S. to the extent commercially feasible; requirements to grant liens in favor of the U.S. government on property acquired or developed with grant funds and restrictions on sales or dispositions of such property; data management and intellectual property sharing requirements; and requirements to pass-down certain of such requirements to our sub-contractors and contractual counterparties. We expect that the DOE's MESC Office will, and the DOE's Office of Inspector General may, review our compliance, and the adequacy of our practices for maintaining compliance. In the event of improper or illegal activities, or misleading statements in our applications, we are subject to possible civil and criminal penalties, sanctions, or suspension or debarment.

In addition to the matching funding requirements and the cost of complying with law and regulations, the Company may be required to pay the costs of a third party monitoring firm and is required to indemnify the U.S. government and its officers, agents, or employees in the event of liability arising from claims for death, bodily injury, or loss of or damage to property or to the environment, resulting from the project, except to the extent that such liability results from the direct fault or negligence of U.S. government officers, agents or employees. See *Item 3. Key Information—D. Risk Factors* ("***We will need to obtain funding from time to time to finance our growth and operations, which may not be available on acceptable terms, or at all. If we are unable to raise capital when needed, we may be forced to delay, reduce or eliminate certain operations, and we may be unable to adequately control our costs.***" and "***Our DOE grant, and any future grants, loans or incentives we may obtain from governmental agencies, will impose restrictions and compliance obligations on us, with associated costs and risks.***").

Corporations Act and ASX Listing Rules

As a company incorporated in Australia, we remain subject to the Corporations Act 2001 (Cth), or Corporations Act, and we are regulated by both the Australian Securities and Investments Commission, or ASIC, the country's corporate regulator, and the Australian Securities Exchange, or ASX, as an entity listed on that exchange. Accordingly, we must comply with all Corporations Act requirements and the Listing Rules maintained by ASX. Changes to these rules and requirements may have an impact on our assets, operations, financial performance, value, or other matters. Breaches of these rules and regulations may give rise to regulatory action from ASIC or ASX or litigious proceedings initiated by other stakeholders.

The Foreign Corrupt Practices Act

The FCPA prohibits any U.S. individual or business from paying, offering, or authorizing payment or offering of anything of value, directly or indirectly, to any foreign official, political party or candidate for the purpose of influencing any act or decision of the foreign entity in order to assist the individual or business in obtaining or retaining business. The FCPA also obligates companies whose securities are listed in the United States to comply with accounting provisions requiring us to maintain books and records that accurately and fairly reflect all transactions of the corporation, including international subsidiaries, and to devise and maintain an adequate system of internal accounting controls for international operations.

Environmental, Health and Safety

Our facilities and operations are subject to numerous environmental, health and safety (“EHS”) laws and regulations which require significant capital investment on an ongoing basis and could give rise to unforeseen liability, including as a result of a governmental enforcement action or obligations to remediate contaminated sites, including third-party contaminated sites where we have sent waste for treatment or disposal. EHS laws or their enforcement may become more stringent over time, which could increase our operating costs and subject us to additional liabilities.

See *Item 3. Key Information—D. Risk Factors—Risks Related to Regulatory Matters* contained herein.

Sustainability and ESG Strategy and Initiatives

We believe that an increasing emphasis on environmentally conscious battery technologies is key to a sustainable future with widespread adoption of EVs and grid ESS. Many current manufacturing methods for key battery materials are energy intensive, wasteful or hazardous to the environment. End users and OEMs are focused on sourcing materials from cleaner technologies. We are committed to the development of technologies that support key sustainability criteria in the field of battery materials and technologies, including:

- **Longer Life Batteries.** We believe that the use of NOVONIX’s synthetic graphite leads to longer life batteries which therefore generate less overall waste in recycling or disposal.
- **Higher Energy Efficiency.** Improvements in process technology demonstrated by NOVONIX Anode Materials as well as through NOVONIX’s all-dry, zero-waste cathode synthesis process technology could reduce the amount of energy required to produce key battery materials. NOVONIX’s proprietary graphitization furnace technology was developed with the objective of being the highest efficiency graphitization technology.
- **Reduced Chemical Usage.** NOVONIX Anode Materials uses no chemical purification, which reduces risks of harmful chemical leaks, spills, or exposure, while eliminating costs of compliance with chemical disposal requirements. Additionally, NOVONIX’s all-dry, zero-waste cathode synthesis technology does not use chemicals or reagents that would typically be used and require reclamation and treatment after processing.
- **Reduced Waste Generation.** NOVONIX is focused on high yield technologies to produce key battery materials. NOVONIX Anode Materials process development has maintained what we believe to be industry-leading yields through our graphitization furnaces. NOVONIX’s all-dry, zero-waste cathode synthesis technology can allow for the manufacturing of cathode materials requiring essentially no reagents, reduced water consumption, no sodium sulphate byproduct generation and other reductions in waste streams.
- **Cleaner Power Inputs.** NOVONIX is focused on sourcing power for its manufacturing from clean sources of energy generation. As such, our current location in the Tennessee Valley Authority has an electrical grid make-up which is over 50% non-carbon producing sources of energy including nuclear, hydro, wind and solar.

In 2023, we commenced our environmental, social and governance (“ESG”) program by establishing a committee comprised of internal personnel across the Company (the “ESG Committee”). To guide discussions around relevant sustainability themes, we engaged a third-party ESG advisor, with whose support we performed a focused materiality assessment to identify key ESG topics relevant to our current and future business. That assessment and the efforts that followed, including the preparation of our inaugural Sustainability Report, considered a range of ESG reporting protocols and frameworks considered relevant to our business, such as the Sustainability Accounting and Standards Board, Global

Reporting Initiative, and the UN Development Goals. The ESG Committee looked to a range of protocols and frameworks for the following reasons:

- our primary focus was to lay the foundation for an ESG program that would begin with a focus on key ESG topics and then develop and expand in 2023 and beyond;
- we believed it would be premature to evaluate and decide on a single or limited number of reporting standards that could be applied across businesses;
- our two operating subsidiaries – NAM and BTS – while both broadly engaged in the battery industry, have key differentiators between their businesses that required consideration of a broader range of reporting standards that properly accounted for those differences; and
- our NAM business has not yet achieved its full scale operations, with plans to begin production in early 2026, which meant many of its business activities that relate to key ESG topics were still under development or not yet generating significant or reportable data.

Our inaugural Sustainability Report is available at <https://www.novonixgroup.com/about-us/sustainability/>. The reference to our website address does not constitute incorporation by reference of the information contained at or available through our website, and you should not consider the website or any of its contents, including the Sustainability Report, to be a part of, this annual report.

AUSTRALIAN DISCLOSURE REQUIREMENTS

Dividends

The Directors do not recommend the payment of a dividend. No dividend was paid during the financial year.

C. Organizational Structure

The chart below sets forth our corporate organizational structure, including our directly and indirectly owned subsidiaries, as of December 31, 2024.

D. Property, Plants, and Equipment

We maintain facilities in Chattanooga, Tennessee, and Bedford and Dartmouth, Nova Scotia, and hold interests in the MDG Project in Queensland, Australia.

Chattanooga, Tennessee

We lease property with an area of approximately 120,000 square feet. We acquired an additional property with an area of approximately 404,000 square feet in late July 2021. These properties are used in connection with our NAM business.

Nova Scotia

We own two properties totaling 57,000 square feet. These properties are used in connection with our BTS business.

Australia

We hold tenement rights in the Mount Dromedary Graphite Project (the "MDG Project"), a high-grade natural flake graphite deposit located in Northern Queensland, Australia. As of the date of this annual report, we have not generated any revenue from the sale of natural graphite.

In April 2024, NOVONIX signed a Share Sale and Purchase Agreement under which its wholly owned subsidiary, MD South Tenements Pty Ltd, which holds the Mount Dromedary natural graphite exploration interests, will be divested to Axon Graphite Limited ("Axon Graphite"), a wholly owned subsidiary of Lithium Energy Limited ("Lithium Energy"). As a consideration for the transaction, NOVONIX will receive shares in Axon Graphite, subject to the completion of the parties' due diligence enquiries, completion of the initial public offering ("IPO") of Axon Graphite, and receipt of approval and admission of Axon Graphite to the Australian Securities Exchange ("ASX"). This decision was based on what the Company considered more favorable investment opportunities through the manufacturing of advanced battery anode materials and the development of new battery technologies. See *Item 5. Operating and Financial Review and Prospects—A. Operating Results*.

We believe our facilities in Chattanooga, Tennessee, and Nova Scotia, are adequate and suitable for our current and anticipated needs and that, should it be needed, suitable additional or alternative space will be available to accommodate our operations.

As of December 31, 2024, the net book values of tangible fixed assets were as follows:

Asset category	At December 31, 2024	At December 31, 2023
	Net book value US\$	Net book value US\$
Land	\$ 2,272,297	\$ 2,330,826
Building	42,014,149	43,786,229
Leasehold Improvements	227,954	424,769
Machinery and Equipment	18,833,358	21,204,001
Construction in Progress	85,962,585	72,047,622
Total tangible fixed assets	<u>\$ 149,310,343</u>	<u>\$ 139,793,447</u>

Item 4A. Unresolved Staff Comments

Not applicable.

Item 5. Operating and Financial Review and Prospects

The following discussion of our financial condition and results of operations is based upon and should be read in conjunction with our consolidated financial statements and their related notes included in this annual report on Form 20-F.

Certain information included in this discussion and analysis includes forward-looking statements that are subject to risks and uncertainties, which may cause actual results to differ materially from those expressed or implied by such forward-looking statements. For further information on important factors that could cause our actual results to differ materially from the results described in the forward-looking statements contained in this discussion and analysis, see “Cautionary Note Regarding Forward-Looking Statements,” above, and the risks described in Item 3. Key Information—D. Risk Factors contained herein.

A. Operating Results.

Overview

NOVONIX is a leading critical mineral, battery materials and technology company aiming to revolutionize the global lithium-ion battery industry with innovative, sustainable technologies, high-performance materials, and more efficient production methods. The Company is growing its high-performance synthetic graphite anode material manufacturing operations, manufactures industry-leading battery cell testing equipment, and has developed an all-dry, zero-waste cathode synthesis process. Through advanced R&D capabilities, proprietary technology, strategic partnerships, and as a leading North American supplier of battery-grade synthetic graphite, NOVONIX has gained a prominent position in the critical mineral, electric vehicle and energy storage systems battery industry and is working to power a cleaner energy future.

We currently operate two core businesses: *NOVONIX Anode Materials* and *NOVONIX Battery Technology Solutions*. We also have a third reporting segment related to our Mount Dromedary graphite project, which is currently held as available for sale and is not presently considered by management as a core operating business.

NAM is the leading domestic supplier of battery-grade synthetic graphite, a critical mineral, and was established with the objective of commercializing what we believe is the most advanced anode material in the market for EVs and energy storage applications. These end-markets continue to demand high-performance batteries with longer life cycles, while at the same time pursuing cost efficiencies to continue to drive mass adoption. Anode materials are one of the most significant components that define the overall performance, reliability, and cycle life of the battery cell. To our knowledge, we are the only qualified U.S.-based producer of EV battery-grade synthetic graphite anode material and believe NAM is well positioned to onshore the supply chain and support the rapid growth in demand for these advanced anode materials in North America and globally.

BTS provides industry leading battery testing technology and research and development (“R&D”) services to create next generation batteries. BTS also serves as the pillar of innovation across the NOVONIX ecosystem by creating a positive feedback loop with our anode and cathode materials businesses through the development of applications and strategic partnerships. This collaboration drives our continuous technological innovation and enables us to deliver best-in-class products and services for customers.

NOVONIX holds tenement rights in the Mount Dromedary Graphite Project (the “MDG Project”), a high-grade natural flake graphite deposit located in Northern Queensland, Australia. In April 2024, NOVONIX signed a Share Sale and Purchase Agreement under which its wholly owned subsidiary, MD South Tenements Pty Ltd, which holds the Mount Dromedary natural graphite exploration interests, will be divested to Axon Graphite Limited (“Axon Graphite”), a wholly owned subsidiary of Lithium Energy Limited (“Lithium Energy”). As a consideration for the transaction, NOVONIX will receive shares in Axon Graphite, subject to the completion of the parties’ due diligence enquiries, completion of the initial public offering (“IPO”) of Axon Graphite, and receipt of approval and admission of Axon Graphite to the Australian Securities Exchange (“ASX”). On September 9, 2024, NOVONIX and Lithium Energy provided an update on the spin-out and IPO and

ASX listing of Axon Graphite, which encompasses the merger of the high-grade natural graphite assets of Lithium Energy (known as the Burke and Corella Deposits) and NOVONIX (known as the Mt Dromedary Deposit) to form a distinct vertically integrated Battery Anode Material business in Queensland, Australia. As of the date of this annual report, we have not generated any revenue from the sale of natural graphite. See *Item 3. Key Information—D. Risk Factors* ("**From time to time we may enter into negotiations for acquisitions, dispositions, partnerships, joint ventures or investments that are not ultimately consummated or, if consummated, may not be successful.**").

Overview of Financials

We have incurred operating losses since our inception in 2012. Our ability to generate product revenue sufficient to achieve profitability will be dependent on our ability to begin significant production and commercialization of NOVONIX Anode Materials business' synthetic graphite product. Accordingly, we expect to continue to incur significant expenses as we continue to scale production of our synthetic graphite product, the majority of which will be associated with planned production equipment spend. We also expect to incur significant costs associated with operating as a public company in Australia and the United States, including additional legal, accounting, investor relations, compliance, and other expenses.

As a result, we will need substantial additional funding to support our continuing operations and pursue our growth strategy. Until such time, if ever, as we can generate sufficient revenue from synthetic graphite sales, we expect to finance our operations through the issue of equity, debt financings, or other capital sources, which may include collaborations with other companies or other strategic transactions as well as U.S. government financing support and tax incentives. We may be unable to raise additional funds or enter into such other agreements or arrangements when needed on favorable terms. If we fail to raise capital or enter into such agreements as and when needed, we may have to significantly delay, scale back or discontinue the development and commercialization of our synthetic graphite product. See *Item 3. Key Information—D. Risk Factors* ("**We may need to obtain funding from time to time to finance our growth and operations, which may not be available on acceptable terms, or at all. If we are unable to raise capital when needed, we may be forced to delay, reduce or eliminate certain operations, and we may be unable to adequately control their costs.**") contained herein.

Because of the numerous risks and uncertainties associated with the commercialization of battery-grade synthetic graphite, we are unable to predict the timing or amount of increased expenses or when or if we will be able to achieve or maintain profitability. Even if we are able to generate product sales, we may never become profitable. If we fail to become profitable or are unable to sustain profitability on a continuing basis, then we may be unable to continue our operations at planned levels and be forced to scale back or discontinue our operations. See *Item 3. Key Information—D. Risk Factors* ("**We have a history of financial losses and expect to incur significant expenses and continuing losses in the near future.**") contained herein.

As of December 31, 2024, we had cash and cash equivalents of \$42.6 million. During the year ended December 31, 2024, the Company claimed \$19.2 million from the \$100 million DOE MESC grant. We continue to receive, install, and commission equipment at Riverside towards our initial 3,000 tpa of production capacity to support our planned start of production for Panasonic Energy in early 2026. We believe that our existing cash and cash equivalents will help support capacity expansion towards 3,000 tpa, which is expected to be completed in early 2026. We have based these estimates on assumptions that may prove to be wrong, and we could exhaust our available capital resources sooner than we expect. See "*—Liquidity and Capital Resources,*" below.

Components of Our Results of Operations

Segment Information

Our segments consist of Battery Materials (NAM), Battery Technology (BTS), and Graphite Exploration (MDG Project). In order to comply with the requirement to discuss significant components of revenue and expenses, and to enable investors to understand the consolidated amounts, where applicable we have provided a discussion along segmental lines. As a result, the discussion and analysis of segments is integrated with the discussion of the consolidated amounts to avoid confusion and duplication of disclosure.

Revenue

NOVONIX Anode Materials

As of the date of this annual report on Form 20-F, we have not generated any revenue from sale of synthetic graphite. If our commercialization efforts for our synthetic graphite product are successful, we may generate revenue from the sale of our synthetic graphite materials. In addition, if we enter into additional collaboration, partnership or license agreements with third parties, we may generate revenue in the future from payments from such collaboration or license agreements or a combination of product sales and those payments.

NOVONIX Battery Technology Solutions

Revenue is contributed through two primary BTS business lines: hardware sales and consulting services. Our customers include leading battery makers and researchers and equipment manufacturers, and numerous specialty materials, consumer electronics OEMs and automotive OEMs.

When we sell battery testing equipment, we enter into a contract with our customers covering the price, specifications, delivery dates and warranty for the products being purchased among other things. Our contractual delivery periods vary, but are typically about three months. Contracts for battery testing equipment can range in value based on the amount of equipment provided and the duration of the contract. Revenue from the sales of BTS hardware is recognized at the point in time when the hardware is delivered and the legal title has passed.

The consulting services business provides battery cell design, implementation and support services under fixed-price and variable price contracts. Revenue from providing services is recognized in the accounting period in which the services are rendered. For fixed-price contracts, revenue is recognized based on the actual service provided to the end of the reporting period relative to the remaining services under the contract because the customer receives and uses the benefits simultaneously. This is determined based on the actual labor hours spent relative to the total expected labor hours.

Where the contracts include multiple performance obligations, the transaction price will be allocated to each performance obligation based on the stand-alone selling prices. Where these are not directly observable, they are estimated based on expected cost-plus margin.

Our BTS revenue is affected by changes in the price, volume and mix of products and services purchased by BTS' customers. The price and volume of our products is driven by the demand for our products, changes in product mix between equipment and services, geographic mix of our customers, and strength of competitors' product offerings.

Graphite Exploration

As of the date of this annual report on Form 20-F, we have not generated any revenue from the sale of natural graphite. We do not expect any revenue from our interests in the MDG Project in the near future. In October 2023, the Company decided to pursue potential opportunities to realize the value of these assets through a strategic transaction. All tenement rights remain current, exploration activity is continuing to the extent required under the tenement rights, a resource, principally high-grade graphite, has been identified, and, as a result of the Company's decision, the assets are classified as being available for sale as of the years ended December 31, 2023 and 2024.

Other Income

Other income is primarily comprised of interest income and grant income. Interest income is recognized as interest accrues using the effective interest method. This is a method of calculating the amortized cost of a financial asset and allocating the interest income over the relevant period using the effective interest rate, which is the rate that discounts estimated future cash receipts through the expected life of the financial asset to the net carrying amount of the financial asset. Government grants are recognized where there is reasonable assurance that the grant will be received and all attached conditions will be complied with. When the grant relates to an expense item, it is recognized as income on a systematic

basis over the periods that the related costs, for which it is intended to compensate, are expensed. When the grant relates to an asset, it is recognized as an offset to the cost of the related asset. Other income also includes gains on revaluation of previously held equity method investments, which can be recognized when we obtain control over the equity method investee.

Product Manufacturing and Operating Costs

Product manufacturing and operating costs consists of product costs, including purchased materials and components, as well as costs related to shipping, which, as at the date of this annual report on Form 20-F, have been in connection with our BTS business only. Our product costs are affected by the underlying cost of raw materials and component costs.

Administrative and Other Expenses

Administrative and other expenses consist primarily of travel expenses, facilities costs, audit, legal, tax, insurance, information technology and other costs.

We expect to incur additional audit, tax, accounting, legal and other costs related to compliance with applicable securities and other regulations, as well as additional insurance, investor relations and other costs associated with being a public company in Australia and the United States. In addition, if we cease to qualify as a foreign private issuer in the future, we would expect that we would incur additional expenses as a domestic reporting company in the United States. *See Item 3.*

Key Information—D. Risk Factors ("We may lose our foreign private issuer status in the future, which could result in significant additional cost and expense.").

Borrowing Costs

The borrowing costs are recognized in the profit or loss statement in the reporting period in which they are incurred.

Borrowing costs consist primarily of interest accrued on loan notes and borrowings, loss on redemption of loan notes and unwinding of fair value gains.

Impairment Losses

At the end of each reporting period, the Company assesses whether there is any indication that an asset may be impaired. The assessment includes the consideration of external and internal sources of information, including dividends received from subsidiaries, associates or joint ventures deemed to be out of pre-acquisition profits. If such an indication exists, an impairment test is carried out on the asset by comparing the recoverable amount of the asset, being the higher of the asset's fair value less costs of disposal and value in use, to the asset's carrying amount. Any excess of the assets carrying amount over its recoverable amount is recognized immediately in profit or loss, unless the asset is carried at a revalued amount in accordance with another accounting standard. Any impairment loss of a revalued asset is treated as a revaluation decrease in accordance with that other accounting standard.

Depreciation and Amortization Expenses

Depreciation expense consists of costs associated with property, plant and equipment ("PP&E") which are depreciated over their expected useful lives. We expect that as we increase both our revenues and the number of our general and administrative personnel, we will invest in additional PP&E to support our growth resulting in additional depreciation expense.

Amortization expense consists of costs associated with technology intangible assets other than goodwill, which are amortized over their expected useful lives.

Research and Development Costs

Research and development costs primarily represent the Company's investment in research and development activities for our all-dry, zero-waste cathode synthesis process and our data analytics project. At present, our research and development activities are conducted through our two core businesses: BTS and NAM; all-dry, zero-waste cathode synthesis and data analytics falls under BTS R&D.

Research expenditures are recognized as an expense when incurred. Costs incurred on development projects (relating to the design and testing of enhancements or extensions of products from the all-dry, zero-waste project) are recognized as intangible assets when:

- The technical feasibility of completing the intangible asset so that it will be available for use or sale;
- The intention to complete the intangible asset and use it or sell it;
- The ability to use or sell the intangible asset;
- How the intangible asset will generate probable future economic benefits;
- The availability of adequate technical, financial, and other resources to complete the development and to use or sell the intangible asset; and
- The ability to measure reliably the expenditure attributable to the intangible asset during its development.

The expenditure capitalized comprises all directly attributable costs, including costs of materials, services, direct labor and an appropriate proportion of overhead. Other development expenditures that do not meet these criteria are recognized as an expense when incurred. Development costs previously recognized as an expense are not recognized as an asset in a subsequent period. Capitalized development costs are recorded as intangible assets and amortized from the point at which the asset is ready for use on a straight-line basis over its useful life.

Share Based Compensation

Equity-settled share-based compensation benefits are provided to directors and employees. Equity-settled transactions are awards of shares, options or performance rights over shares, that are provided to directors and employees in exchange for the rendering of services.

The Company measures the cost of equity settled transactions with employees by reference to the fair value of the equity instruments at the date at which they are granted. The fair value is determined by using either a binomial or Monte Carlo option pricing model taking into account the terms and conditions upon which the instruments were granted. The accounting estimates and assumptions, including share price volatility, interest rates and vesting periods would have no impact on the carrying amounts of assets and liabilities within the next annual reporting period but may impact the profit or loss and equity.

The cost of equity-settled transactions is recognized as an expense with a corresponding increase in equity over the vesting period. The cumulative charge to profit or loss is calculated based on the grant date fair value of the award, the best estimate of the number of awards that are likely to vest and the expired portion of the vesting period. The amount recognized in profit or loss for the reporting period is the cumulative amount calculated at each reporting date less amounts already recognized in previous reporting periods.

Share-based payment expenses are recognized over the period during which the employee provides the relevant services. This period may commence prior to the formal grant date, such as where the granting of options or performance rights are subject to shareholder approval. In this situation, the entity estimates the grant date fair value of the equity instruments for the purposes of recognizing an expense for the services received during the period between service commencement date and grant date. Once the grant date has been established, the fair value of the equity instrument is calculated, and the earlier estimate is revised so that the amount recognized for services received is ultimately based on the grant date fair value of the equity instruments. Where there is a difference between the estimated grant date fair

value and the actual grant date fair value, adjusting entries are recognized in share-based payment expense and the share-based payment reserve.

Employee Benefits Expense

Employee benefits expenses consist of fixed annual remuneration, short-term incentives, and long-term incentives. Employees receive their fixed annual remuneration in cash. Short-term incentives are payable on achievement of mutually agreed KPIs each fiscal year with short-term incentives being payable in either cash or by way of the issue of fully paid ordinary shares. The Company has historically paid short-term incentives in cash.

At the Board's discretion, employees are invited to participate in the long-term incentive program which comprises one-off grants of options and/or performance rights, with varying vesting conditions.

Foreign Currency Gain (Loss)

Foreign currency gain (loss) results from a change in exchange rates between our functional currency and the currency in which a foreign currency transaction is denominated.

Income Tax (Expense) Benefit

The income tax expense or benefit for the reporting period is the tax payable on that period's taxable income based on the applicable income tax rate for each jurisdiction, adjusted by the changes in deferred tax assets and liabilities attributable to temporary differences, unused tax losses and the adjustment recognized for prior reporting periods, where applicable.

Deferred tax assets and liabilities are recognized for temporary differences at the tax rates expected to be applied when the assets are recovered or liabilities are settled, based on those tax rates that are enacted or substantively enacted, except for:

- When the deferred income tax asset or liability arises from the initial recognition of goodwill or an asset or liability in a transaction that is not a business combination and that, at the time of the transaction, affects neither the accounting nor taxable profits; or
- When the taxable temporary difference is associated with interests in subsidiaries, associates or joint ventures, the timing of the reversal can be controlled, and it is probable that the temporary difference will not reverse in the foreseeable future.

Deferred tax assets are recognized for deductible temporary differences and unused tax losses only if it is probable that future taxable amounts will be available to utilize those temporary differences and losses.

The carrying amount of recognized and unrecognized deferred tax assets are reviewed at each reporting date. Deferred tax assets recognized are reduced to the extent that it is no longer probable that future taxable profits will be available for the carrying amount to be recovered. Previously unrecognized deferred tax assets are recognized to the extent that it is probable that there are future taxable profits available to recover the asset.

Deferred tax assets and liabilities are offset only where there is a legally enforceable right to offset current tax assets against current tax liabilities and deferred tax assets against deferred tax liabilities; and they relate to the same taxable authority on either the same taxable entity or different taxable entities which intend to settle simultaneously.

Results of Operations for the Years Ended December 31, 2024, and 2023

The following table sets forth a summary of our consolidated statements of profit or loss and other comprehensive income for the periods presented.

(\$ in millions)	Year Ended December 31,		Year Ended December 31, 2024 vs. 2023
	2024	2023	\$ Change
Revenue	\$ 5.9	\$ 8.1	(2.2)
Product manufacturing and operating costs	(1.8)	(2.8)	1.0
Administrative and other expenses	(19.9)	(18.9)	(1.0)
Depreciation and amortization expenses	(4.6)	(4.7)	0.1
Loss on equity investment securities at fair value through profit or loss	(15.3)	—	(15.3)
Research and development costs	(4.9)	(5.8)	0.9
Share based compensation	(5.5)	(5.6)	0.1
Employee benefits expense	(23.6)	(20.3)	(3.3)
Borrowing costs	(3.6)	(2.9)	(0.7)
Foreign currency (loss)/gain	(1.2)	1.4	(2.6)
(Loss)/gain on fair value of derivative financial instruments	(4.5)	1.5	(6.0)
Other income, net	4.3	3.6	0.7
Loss before income tax (expense) benefit	(74.7)	(46.4)	(28.3)
Income tax (expense) benefit	(0.1)	0.2	(0.3)
Net loss	<u>(74.8)</u>	<u>(46.2)</u>	<u>(28.6)</u>
Other comprehensive loss, net of tax			
Foreign currency translation of foreign operations	(3.8)	(1.5)	(2.3)
Total comprehensive loss	<u>\$ (78.6)</u>	<u>\$ (47.7)</u>	<u>(30.9)</u>

Revenue

Revenue decrease by \$2.2 million to \$5.9 million for the year ended December 31, 2024, compared to \$8.1 million for the year ended December 31, 2023. The decrease was primarily due to softer demand from existing customers and a lack of new customers for hardware sales and consulting services in our BTS segment.

Product Manufacturing and Operating Costs

Product manufacturing and operating costs decreased \$1.0 million to \$1.8 million for the year ended December 31, 2024, compared to \$2.8 million for the year ended December 31, 2023. The decrease was due to cost savings achieved amongst major suppliers.

Administrative and Other Expenses

Administrative and other expenses increased \$1.0 million to \$19.9 million for the year ended December 31, 2024, compared to \$18.9 million for the year ended December 31, 2023. The increase was primarily due legal and consulting fees related to the DOE LPO loan application process.

Loss on equity investment securities at fair value through profit or loss

During the year ended December 31, 2024, the Company assessed the fair value of the investment in KORE Power and determined that it should be reduced to \$0 as of December 31, 2024, and recorded a loss of \$15.3 million. This determination was based in part on milestones regarding financing, construction and the timeline of KORE Power's KOREPlex facility planned in Arizona not being met and the resulting announcement that the KOREPlex facility was not to be constructed and the change in Chief Executive Officer leadership of KORE Power.

Employee Benefits Expense

Employee Benefits expense increased \$3.3 million to \$23.6 million for the year ended December 31, 2024, compared to \$20.3 million for the year ended December 31, 2023. The increase was primarily driven by higher personnel-related costs to support the alignment with the expansion of the business.

Foreign Currency (Loss)/Gain

Foreign currency loss for the year ended December 31, 2024, was \$1.2 million compared to a foreign currency gain for the year ended December 31, 2023, of \$1.4 million. Our foreign currency gain/loss fluctuates based on our exposure to transactions and balances denominated in currencies other than the functional currency of the related subsidiary.

(Loss)/Gain on fair value of derivative financial instruments

Loss on fair value of derivative financial instruments for the year ended December 31, 2024 was \$4.5 million compared to a gain of \$1.5 million for the for the year ended December 31, 2023. The decrease is due to the revaluation of the derivative component of the convertible notes issued to LGES in 2023.

Results of Operations for the Years Ended December 31, 2023 and December 31, 2022

For a comparison of our Results of Operations for the year ended December 31, 2023, to the year ended December 31, 2022, see "Item 5. Operating and Financial Review and Prospects" of our Form 20-F for the fiscal year ended December 31, 2023, filed with the SEC on February 28, 2024.

AUSTRALIAN DISCLOSURE REQUIREMENTS

Principal activities

During the year, the principal activities of the Company included investment in scalability efforts to increase production capacity of anode materials, entered into customer offtake agreements for anode materials, commercialization of the Company's cathode technology and expansion of cell assembly and testing capabilities.

Company Secretary

The Company Secretary is Suzanne Yeates. Appointed to the position of Company Secretary on 18 September 2015, Ms. Yeates is a Chartered Accountant and Founder and Principal of Outsourced Accounting Solutions Pty Ltd. She holds similar positions with other public and private companies.

Events after the reporting date

Since December 31, 2024, the Company has:

- issued 53,887,112 fully paid ordinary shares under a Share Purchase Plan at AUD\$0.60 per share, raising AUD\$32,332,267.

- issued 12,771,392 fully paid ordinary shares under an Institutional Placement to Phillips 66 Company at AUD\$0.60 per share, raising USD\$5million
- on January 21, 2025, announced the planned transition in our CEO role, with Dr. Chris Burns stepping down as Chief Executive Officer effective January 24, 2025. Dr. Burns will continue to support the Company in an advisory capacity, serving as Special Advisor to the Board, in order to provide continuity, support ongoing operations of the Company and ensure a smooth transition. The Board has appointed Mr. Robert Long, our Chief Financial Officer, to serve as interim CEO, effective January 24, 2025, until a permanent CEO is appointed. Mr. Long will work closely with the Board to ensure a smooth transition and maintain our momentum and focus on our key strategic goals.

There have been no other matters or circumstances that have arisen since the end of the twelve months ended December 31, 2024, which significantly affected or could significantly affect the operations of the Company, the results of those operations or the state of affairs of the Company in future financial years.

Significant Changes in the State of Affairs

There have been no significant changes in the state of our affairs during the year ended December 31, 2024 except as noted in the "Business Overview" section included in Item 4.B.

Likely Developments and Expected Results of Operations

Comments on likely developments and expected results of operations are included in Item 5.

Environmental Regulations

The Company is subject to environmental regulations in respect of its exploration and development activities in Australia and its operations in the United States and Canada and is committed to undertaking all its operations in an environmentally responsible manner.

To the best of the Directors' knowledge, the Company has adequate systems in place to ensure compliance with the requirements of all environmental legislation and are not aware of any breach of those requirements during the financial year and up to the date of the Directors' report included in *Item 6. Directors, Senior Management and Employees — B. - Compensation*.

B. Liquidity and Capital Resources

The liquidity and capital resources discussion that follows contains certain estimates as of the date of this annual report on Form 20-F of our estimated future sources and uses of liquidity (including estimated future capital resources and capital expenditures) and future financial and operating results. These estimates represent forward looking information and reflect numerous assumptions made by us with respect to industry performance, general business, economic, regulatory, market and financial conditions and other future events, and matters specific to our businesses, all of which are difficult or impossible to predict and many of which are beyond our control. See "Cautionary Note Regarding Forward-Looking Statements."

Material Cash Commitments and Contractual Maturities

The Company had commitments for payments under exploration permits of \$470,763, \$2,000, \$4,000, and \$15,853 as at December 31, 2024, December 31, 2023, December 31, 2022, and June 30, 2022, respectively. The Company also has contractual obligations in respect of a non-cancellable operating lease for its Lookout Valley facility in Chattanooga, Tennessee of \$7.0 million. The Company recognized a right-of-use asset for this lease. No other material commitments or contractual obligations exist as at June 30, 2022.

As of December 31, 2024, the contractual maturities of the Company's non-derivative financial liabilities were as follows (\$ in millions):

Contractual maturities of financial liabilities	Less than 6 months	6 – 12 months	Between 1 and 2 years	Between 2 and 5 years	Over 5 years	Total contractual cash flows	Carrying amount
At December 31, 2024	US\$	US\$	US\$	US\$	US\$	US\$	US\$
Trade and other payables	\$ 8.5	\$ —	\$ —	\$ —	\$ —	\$ 8.5	\$ 8.5
Lease liabilities	0.4	0.4	0.8	2.7	4.2	8.5	7.0
Borrowings	1.4	1.4	2.8	41.9	31.7	79.2	64.4
Total non-derivatives	<u>\$ 10.3</u>	<u>\$ 1.8</u>	<u>\$ 3.6</u>	<u>\$ 44.6</u>	<u>\$ 35.9</u>	<u>\$ 96.2</u>	<u>\$ 79.9</u>

Funding Requirements

As of December 31, 2024, we had cash and cash equivalents of \$42.6 million. On November 1, 2023 we were awarded a \$100 million grant from the Department of Energy Office of Manufacturing and Energy Supply Chains to be utilized in the expansion of our Riverside facility. Receipts from this Grant will be paid against verified expenses and are required to be matched with Company funding. During the year ended December 31, 2024, the Company claimed \$19.2 million from the \$100 million DOE MESC grant. We continue to receive, install, and commission equipment at Riverside towards our initial 3,000 tpa of production capacity to support our planned start of production for Panasonic Energy in early 2026. Overall, we plan to increase our production capacity at our existing, planned and potential facilities to 150,000 tpa in at least three phases and over a time frame to be determined. Phase 1 of our production capacity plan is the full build-out and commissioning of our Riverside facility in Chattanooga, Tennessee. In Phase 2, we plan to construct our Enterprise South facility with an initial production capacity of 31,500 tpa taking our aggregate production capacity to 50,000 tpa between both facilities. Phase 3 includes an expansion of the Enterprise South facility with plans to reach a targeted capacity of 75,000 tpa as well as a third greenfield manufacturing facility that would take the Company's total production capacity to 150,000 tpa for targeted total production capacity, although plans for Phase 3 are still being developed and will be dependent on customer demand. We have based these estimates on assumptions that may prove to be wrong, and we could exhaust our available capital resources sooner than we expect. We will need to obtain additional funding to expand our production facilities and meet our targeted production capacities and fund our continuing operations. See *Item 3. Key Information—D. Risk Factors* ("**We may need to obtain funding from time to time to finance our growth and operations, which may not be available on acceptable terms, or at all. If we are unable to raise capital when needed, we may be forced to delay, reduce or eliminate certain operations, and we may be unable to adequately control their costs.**").

Sources and Uses of Liquidity

We expect our expenses to continue to increase in connection with our ongoing activities, particularly as we continue purchase additional production equipment associated with the manufacture of synthetic graphite. In November 2024, the Company successfully completed a fully underwritten placement of new fully paid ordinary shares ("New Shares") to institutional and sophisticated investors (the "Institutional Offering") at an offer price of A\$0.60 per New Share ("Institutional Placement") for net proceeds of US\$26.6 million. Under the Institutional Placement, the Company issued approximately 74.1 million New Shares pursuant to the Company's existing placement capacity under ASX Listing Rule 7.1. The 74.1 million New Shares issued under the Institutional Placement rank equally with existing shares on issue. In connection with this equity placement, the Company also (i) issued approximately 12.8 million shares under the second placement to existing major shareholder Phillips 66 (the "Secondary Placement") after shareholder approval at an extraordinary general meeting on 22 January 2025 to raise US\$5.0 million and (ii) offered a non-underwritten Share Purchase Plan ("SPP") which closed on 10 January 2025. The Company received valid applications from eligible shareholders for 68.6 million fully paid ordinary shares in NOVONIX ("SPP Shares") to raise US\$25.8 million (before costs) under the SPP. The SPP size was increased by US\$22.5 million above its original target of US\$3.3 million. Of the total subscriptions received, the Company accepted US\$20.2 million or approximately 78%.

The Company will use the proceeds from the Institutional Offering, the Secondary Placement and the SPP to purchase, install, and commission additional equipment in the Company's Riverside facility in Chattanooga, Tennessee, which was purchased on July 28, 2021 for \$42.6 million to expand our anode materials production facilities. In connection with the purchase of this Riverside facility, the Company entered into a loan facility with DBR Investments Co. Limited for \$30.1 million with an interest rate of 4.09%. The loan has been fully drawn down as of December 31, 2023. The total liability as of December 31, 2024 was \$27.7 million. In December, the Company announced a conditional commitment from the U.S. Department of Energy through the Loan Programs Office for a direct loan of up to US\$754.8 million (\$692 million in principal and \$62.8 million in capitalized interest) to be applied towards partially financing a proposed new facility in Chattanooga, Tennessee. If finalized, the loan would be applied towards partially financing the construction of the new facility, Enterprise South, to be located in the Enterprise South Industrial Park in Chattanooga, Tennessee. This facility is expected to produce approximately 31,500 tonnes per annum of synthetic graphite.

On June 21, 2023, pursuant to the LGES Note Agreement, we issued an aggregate principal amount of US\$30 million unsecured convertible notes to LGES (the "Convertible Notes"). The Convertible Notes bear interest at an annual percentage rate of 4.0%, have a maturity date of June 7, 2028 and will mandatorily convert into ordinary shares upon LGES' acceptance of the first purchase order under any purchase agreement that it may enter into with NOVONIX. However, LGES may elect to convert some or all of the Convertible Notes prior to such time. No interest would be payable on the Convertible Notes that are converted into ordinary shares prior to the maturity date. On the maturity date, LGES may elect to redeem or convert all of the Convertible Notes then outstanding, in which case interest will be payable in cash (in the case of redemption) or "in-kind" (in the case of conversion). The conversion price of the Convertible Notes is AUD\$1.60 per ordinary share. The proceeds from issuing the Convertible Notes have been utilized for continued development of anode materials, operational needs and general corporate purposes. See *Item 7.-Major Shareholders and Related Party Transactions*.

In addition, we expect to incur significant commercialization expenses related to sales, marketing, and distribution to the extent that such sales, marketing and distribution are not the responsibility of any future customers. Further, we expect to incur additional costs associated with operating as a public company in Australia and the United States. We may find that these efforts are more expensive than we currently anticipate or that these efforts may not result in revenues, which would further increase our losses, impact our ability to repay our debt (including the Convertible Notes issued to LGES) and require future capital raises to maintain our business.

We believe we will continue to incur operating and net losses in each fiscal year until at least the time we begin significant production of our anode materials, which is not expected to occur earlier than 2026 and may occur later or not at all. These conditions give rise to substantial doubt over our ability to continue as a going concern. If we were not able to continue as a going concern, or if there were continued doubt about our ability to do so, additional financing may not be available to us. See *Item 3. Key Information—D. Risk Factors ("We have a history of financial losses and expect to incur significant expenses and continuing losses in the near future.")*.

Until we can generate a sufficient amount of revenue from the sale of synthetic graphite, if ever, we expect to finance our operating activities through our existing liquidity and future financing activities, including a combination of equity offerings, debt financings, collaborations, strategic partnerships and licensing arrangements. To the extent that we raise additional capital through the sale of equity or convertible debt securities, ADS holders' ownership interests will be diluted, and the terms of these securities may include liquidation or other preferences that adversely affect the rights of such holders. Debt financing, if available, may involve agreements that include covenants limiting or restricting our ability to take specific actions, such as incurring additional debt, making capital expenditures or declaring dividends. If we raise funds through collaborations, strategic alliances or licensing arrangements with third parties, we may have to relinquish valuable rights to our technologies, intellectual property, future revenue streams or product candidates. If we are unable to raise additional funds through financings when needed, we may be required to delay, limit, reduce or terminate our product development or future commercialization efforts or grant rights to develop and market product candidates that we would otherwise prefer to develop and market ourselves. See *Item 3. Key Information—D. Risk Factors ("We may need to obtain funding from time to time to finance our growth and operations, which may not be available on acceptable*

terms, or at all. If we are unable to raise capital when needed, we may be forced to delay, reduce or eliminate certain operations, and we may be unable to adequately control their costs.”).

Our present and future funding requirements will depend on many factors, including, among other things:

- the initiation, progress, timing, and costs associated with our planned capacity expansion, including but not limited to onboarding and training production operators, installation of production equipment, and installation and commissioning of required supporting building and equipment infrastructure;
- costs associated with expanding our organization, including our management infrastructure;
- selling and marketing activities undertaken in connection with the commercialization of our synthetic graphite product; and
- the costs of operating as a public listed company in both Australia and the United States.

Sources and Uses of Liquidity

The following table summarizes our cash flows for the periods presented.

(\$ in Millions)	Year Ended December 31,		Year Ended December 31, 2024 vs. 2024
	2024	2023	\$ Change
Net cash outflow from operating activities	\$ (40.4)	\$ (36.2)	\$ (4.2)
Net cash outflow from investing activities	(18.2)	(11.7)	(6.4)
Net cash inflow from financing activities	25.2	29.3	(4.1)
Net decrease in cash and cash equivalents	(33.4)	(18.6)	(14.8)
Effects of foreign currency	(2.7)	(1.7)	(1.0)
Cash and cash equivalents at the beginning of the year	78.7	99.0	(20.3)
Cash and cash equivalents at the end of the year	<u>\$ 42.6</u>	<u>\$ 78.7</u>	<u>\$ (36.2)</u>

Cash Flows from Operating Activities

For the years ended December 31, 2024, and 2023, net cash used in operating activities was \$40.4 million and \$36.2 million, respectively. The increase in net cash used in operating activities was primarily due to an increase in payments to suppliers and employees.

Payments to suppliers and employees increased to \$50.3 million in the year ended December 31, 2024, from \$45.6 million in the year ended December 31, 2023, in line with increased business activities in both our BTS and NAM segments.

Year Ended December 31, 2023, compared to Year Ended December 31, 2022

For a comparison of our Cash Flows from Operating Activities for the year ended December 31, 2023, to the year ended December 31, 2022, see "Item 5. Operating and Financial Review and Prospects" of our Form 20-F for the fiscal year ended December 31, 2023, filed with the SEC on February 28, 2024.

Cash Flows from Investing Activities

For the years ended December 31, 2024, and 2023, net cash used in investing activities was \$18.2 million and \$11.7 million, respectively. The increase was primarily due to an increase of \$10.7 million in payments for property, plant and equipment partially offset by government grants received.

Years Ended December 31, 2023, compared to Year Ended December 31, 2022

For a comparison of our Cash Flows from Investing Activities for the year ended December 31, 2023, to the year ended December 31, 2022, see "Item 5. Operating and Financial Review and Prospects" of our transition report on Form 20-F for the fiscal year ended December 31, 2023, filed with the SEC on February 28, 2024.

Cash Flows from Financing Activities

For the years ended December 31, 2024, and 2023, net cash provided by financing activities was \$25.2 million and net cash used in financing activities was \$29.3 million, respectively. The decrease was primarily due to the net proceeds from the issuance of the \$30.0 million of Convertible Notes in 2023 compared to the \$28.8 million in proceeds (net of issue costs) from the issuance of new ordinary shares.

Year Ended December 31, 2023, compared to Year Ended December 31, 2022

For a comparison of our Cash Flows from Operating Activities for the year ended December 31, 2023, to the year ended December 31, 2022, see "Item 5. Operating and Financial Review and Prospects" of our Form 20-F for the fiscal year ended December 31, 2023, filed with the SEC on February 28, 2024.

Credit Risk

The Company has no significant concentration of credit risk with respect to any counterparties or on a geographical basis. Amounts are considered as "past due" when the debt has not been settled, in line with the terms and conditions agreed between the Company and the customer to the transaction.

The Company assesses impairment on trade and other receivables using the simplified approach of the expected credit loss (ECL) model under AASB 9.

The balance of receivables that remain within initial trade terms are considered to be of high credit quality.

Emerging Growth Company Status

As a company with less than \$1.235 billion in revenue during our last fiscal year, we qualify as an "emerging growth company" as defined in the JOBS Act. As an emerging growth company, we may take advantage of specified reduced disclosure and other requirements that are otherwise applicable generally to public companies. These provisions include:

- exemption from the auditor attestation requirement of Section 404 of the Sarbanes-Oxley Act of 2002, or the Sarbanes-Oxley Act, in the assessment of our internal controls over financial reporting;
- reduced disclosure obligations regarding executive compensation in our periodic reports and proxy statements;
- exemptions from the requirements of holding a non-binding advisory vote on executive compensation, including golden parachute compensation.

We may take advantage of these exemptions until such time that we are no longer an emerging growth company.

Accordingly, the information that we provide shareholders and holders of the ADSs may be different than you might obtain from other public companies. We will cease to be an emerging growth company upon the earliest to occur of (i) the last day of the fiscal year in which we have more than \$1.235 billion in annual revenue; (ii) the last day of the fiscal year in which we qualify as a "large accelerated filer"; (iii) the date on which we have, during the previous three-year period, issued more than \$1.0 billion in non-convertible debt securities; and (iv) the last day of the fiscal year in which the fifth anniversary of the completion of our first sale of common equity securities pursuant to an effective registration statement under the Securities Act.

Foreign Private Issuer Status

We are also considered a “foreign private issuer” under U.S. securities laws. In our capacity as a foreign private issuer, we are exempt from certain rules under the Exchange Act that impose certain disclosure obligations and procedural requirements for proxy solicitations under Section 14 of the Exchange Act. In addition, our senior management, the members of our Board of Directors and our principal shareholders are exempt from the reporting and “short-swing” profit recovery provisions of Section 16 of the Exchange Act and the rules under the Exchange Act with respect to their purchases and sales of our securities. Moreover, we are not required to file periodic reports and financial statements with the SEC as frequently or as promptly as U.S. companies whose securities are registered under the Exchange Act. In addition, we are not required to comply with Regulation FD, which restricts the selective disclosure of material information.

We may take advantage of these exemptions until such time as we are no longer a foreign private issuer. We will remain a foreign private issuer until such time that 50% or more of our outstanding voting securities are held by U.S. residents and any of the following three circumstances applies: (i) the majority of the members of Board of Directors or our senior management are U.S. citizens or residents; (ii) more than 50% of our assets are located in the United States; or (iii) our business is administered principally in the United States.

We have taken advantage of certain reduced reporting and other requirements in this annual report. Accordingly, the information contained herein may be different from the information you receive from other public companies.

Passive Foreign Investment Company Status

Generally, we will be a passive foreign investment company (“PFIC”) for U.S. federal income tax purposes for any taxable year in which, after applying certain look-through rules with respect to the income and assets of our subsidiaries, either: (1) at least 75% of our gross income is “passive income” or (2) at least 50% of the average quarterly value of our total gross assets (which would generally be measured by fair market value of our assets) is attributable to assets that produce “passive income” or are held for the production of “passive income.” Passive income for this purpose generally includes dividends, interest, royalties, rents, gains from commodities and securities transactions and the excess of gains over losses from the disposition of assets which produce passive income.

We believe that we were not a PFIC for U.S. federal income tax purposes for the taxable year ended December 31, 2024. However, there can be no assurance that we will not be a PFIC for the current taxable year or for any subsequent year. The determination of PFIC status is a factual determination that must be made annually and cannot be made until the close of a taxable year. The determination depends on, among other things, the composition of our income and assets. In this regard, cash generally is treated as a passive asset for PFIC purposes, and the composition of our income and assets will be affected by the amount and timing of any cash we receive, including from any grant funding, government loans or other sources, and the spending of such funds. The fair market value of our assets (including goodwill) may be determined in large part based on the market price of the ADSs and our ordinary shares, which may fluctuate. Moreover, the determination of PFIC status depends, in part, on the application of complex U.S. federal income tax rules which are subject to differing interpretations. Accordingly, there can be no assurance that we would not be a PFIC for the current taxable year or any future taxable year.

If we were to be a PFIC, a U.S. holder would be subject to increased tax liability (generally including an interest charge on certain taxes treated as having been deferred under the PFIC rules) on any gain realized on a sale or other disposition of the ADSs or ordinary shares and on the receipt of certain “excess distributions” received with respect to the ADSs or ordinary shares, unless such U.S. holder makes certain elections. One such election, the “QEF Election,” will be unavailable to a U.S. holder because we do not intend to provide information that a U.S. holder would need to make a valid QEF Election.

U.S. holders should consult their tax advisors regarding the potential application of the PFIC rules to their ADSs or ordinary shares. The language in this section supersedes the language included in *Item 3. Key Information—D. Risk Factors (“If we are a passive foreign investment company, there could be adverse U.S. federal income tax consequences to U.S.*

holders.”) contained herein and supplements the discussion under Item 10. Additional Information—E. Taxation—U.S. Federal Income Tax Considerations—Passive Foreign Investment Company Considerations contained herein.

C. Research and Development, Patents and Licenses, Etc.

Information regarding our research and development and patent matters are detailed in *Item 4.B. Business Overview* of our 2024 annual report.

D. Trend Information

Our growth strategy and industry trends are detailed in *Item 3. Key Information—B. Business Overview* of this annual report. The uncertainties and material commitments such as financial instruments that are likely to have a material effect on our financial condition are described in *Item 3. Key Information—D. Risk Factors* contained herein and *Item 5. Operating and Financial Review and Prospects – B. Liquidity and Capital Resources*, above.

E. Critical Accounting Estimates

Our consolidated financial statements are prepared in conformity with IFRS, as issued by the IASB. In preparing our consolidated financial statements, we make judgments, estimates and assumptions about the application of our accounting policies which affect the reported amounts of assets, liabilities, revenue and expenses. Our critical accounting estimates and judgments and sources of estimation uncertainty are described in Note 1 to our audited consolidated financial statements, which are included elsewhere in this Annual Report.

Item 6. Directors, Senior Management and Employees

A. Directors and Senior Management

The following table sets forth information relating to our directors and senior management, also referred to in this report as key management personnel or "KMP," as of the date of this annual report on Form F-20.

Name	Age	Position
Senior Management		
Robert Long	53	Interim Chief Executive Officer and Chief Financial Officer
Rashda Buttar	56	Chief Legal & Administrative Officer
Darcy MacDougald	45	Chief Operating Officer
Directors		
Anthony Bellas	71	Deputy Chairman and Non-executive Director
Sharan Burrow AC	70	Non-executive Director
Ronald Edmonds	67	Executive Director and Interim Executive Officer - Finance
Nick Liveris	41	Non-executive Director
Robert Natter	79	Chairman and Non-executive Director
Jean Oelwang	60	Non-executive Director
Suresh Vaidyanathan	58	Non-executive Director

The business addresses for our senior management and Board of Directors are NOVONIX Limited, Level 38, 71 Eagle Street, Brisbane, Queensland 4000, Australia.

Senior Management

Robert Long

Mr. Robert Long has been the Company's interim CEO since January 2025, and also serves as its CFO. Mr. Long joined the Company as its CFO effective September 1, 2024. Mr. Long brings over 25 years of experience in the business and finance sectors. From 2020 to early-2024, he was the founder and Chief Executive Officer of Bridges Consumer Healthcare, a private equity-backed provider of over-the-counter health and personal care brands. From 2019 to 2020, he was Senior Vice President Strategy for Shaw Industries, and from 2015 to 2019. He served in various financial and accounting roles with escalating responsibility and ultimately as Head of North America Region with Sanofi Consumer Healthcare. Previously, Mr. Long was a Senior Audit Manager with Ernst & Young. Mr. Long is a Certified Public Accountant in the State of Tennessee and a graduate of the University of Tennessee at Chattanooga.

Rashda Buttar

Ms. Rashda Buttar is the Company's Chief Legal & Administrative Officer. Before joining the Company in April 2021, Ms. Buttar served as Senior Vice President - General Counsel & Corporate Secretary of Foresight Energy LP from 2011 to 2017. Ms. Buttar served as Vice President, Associate General Counsel and Corporate Secretary of Patriot Coal Corporation from 2007 to 2011 and Assistant General Counsel and Assistant Corporate Secretary of TALX Corporation from 2003 to 2007. Ms. Buttar received her Juris Doctor from Saint Louis University School of Law and her undergraduate degree in Russian and Eastern European Studies and Political Science from Saint Louis University.

Darcy MacDougald

Mr. Darcy MacDougald is the Chief Operating Officer of NOVONIX, he joined the Company in May 2021. Previously, Mr. MacDougald served as President of NOVONIX Battery Technology Solutions. He is a seasoned business professional with over 15 years of senior leadership experience scaling high-growth operations in both listed and PE-backed electronics manufacturing, telecommunications, pharmaceutical marketing, and clinical research organizations. Prior to NOVONIX, he served as Head of Operations at STI Technologies Inc., an IQVIA company, for nearly six years as a member of the executive

team responsible for Pharmacy Reimbursement Solutions, Data Analytics, and Patient Support Programs. Also, Mr. MacDougald was a Senior Manager at BlackBerry for eight years accountable for Operations Management, Business Management, Problem Management, Data Analytics, Customer Insight, and Strategic Technical Issues. Originally from Prince Edward Island, Canada, Mr. MacDougald graduated from the University of New Brunswick, with a bachelor's degree in Electrical Engineering and holds a Master's in Business Administration from Saint Mary's University in Halifax, Nova Scotia.

Non-executive Directors

Anthony Bellas

Mr. Anthony Bellas was appointed as Deputy Chairman of the Company on November 30, 2021. Mr. Bellas previously served as the inaugural Chairman of the Company since August 11, 2015. He brings over 30 years of experience in the public and private sectors. Mr. Bellas was previously CEO of the Seymour Group, one of Queensland's largest private investment and development companies. Prior to joining the Seymour Group, Mr. Bellas held the position of CEO of Ergon Energy, a Queensland Government-owned corporation involved in electricity distribution and retailing. Before that, he was CEO of CS Energy, also a Queensland Government-owned corporation and the State's largest electricity generation company, operating over 3,500 MW of gas-free and coal-free plants at four locations. Mr. Bellas had an extensive career with Queensland Treasury, achieving the position of Deputy Under Treasurer. Mr. Bellas is also a director and Deputy Chairman of State Gas Limited (ASX: GAS), Healthcare Logic Global Ltd, Loch Explorations Pty Ltd, Green and Gold Minerals Pty Ltd and Burlington Mining Pty Ltd, and was a director of intelliHR Limited until 2023.

Sharan Burrow AC

In February 2024, Sharan Burrow AC was appointed to the Board of Directors, effective February 28, 2024. Ms. Burrow is a global advocate for human rights, climate action, and Just Transition. She is the former General Secretary of the International Trade Union Confederation (2010-2022). Previously she was President of the Australian Council of Trade Unions (2000-2010). Ms. Burrow is well known for her international advocacy on employment, human rights, industrial relations, corporate responsibility, and climate action with just transition solutions. She has represented workers and civil society groups in global policy discussions in United Nations bodies, on the Governing Body of the International Labour Organisation as well as at the tables of the G7, G20, World Bank, and International Monetary Fund. She has twice been a Co-Chair of the World Economic Forum's Annual Meeting in Davos. Ms. Burrow is currently a Visiting Professor in Practice at the London School of Economics-Grantham Institute, a Vice Chair of the European Climate Foundation, a board member of the Green Hydrogen Association, Co-Chair of the IEA Labour Council, a Commissioner for the Global Commission on Climate Governance, a B Team Leader and formerly Co-chair of 100% Human at Work. Ms. Burrow has also been appointed to the Temasek Sustainability Advisory Panel.

Ronald Edmonds

Mr. Ronald Edmonds joined our Board as a Non-executive Director in October 2022. Effective August 1, 2024, the Board appointed Mr. Edmonds to an interim role as Executive Officer - Finance to ensure a smooth transition of the CFO role to Mr. Long. From 2009 to June 2024, Mr. Edmonds was the Controller, Vice President of Controllers and Tax and the Chief Accounting Officer of Dow, a materials science company with 2023 sales of \$45 billion. He was formerly the Co-Controller of DowDuPont, a \$73 billion holding company comprised of The Dow Chemical Company and DuPont which was spun into three independent, publicly traded companies in agriculture (Corteva), materials science (Dow) and specialty products sectors (DuPont). Edmonds led all aspects of Dow's Controllers & Tax organizations, overseeing 1,250 employees and is responsible for all accounting, management reporting, external reporting, statutory reporting, internal controls, finance systems, tax planning, tax operations & strategy, and tax controversy globally for 500 legal entities. He oversaw all corporate controls that guide enterprise strategy, investment decisions, and global initiatives for Dow. Prior to Dow, he served in finance and accounting roles at Chiquita Brands International, The Upjohn Company, and Arthur Andersen & Company. He is a member of the Public Accounting Oversight Board's Standards and Emerging Issues Advisory Group.

Nicholas Liveris

Mr. Nicholas Liveris was appointed to our Board effective September 1, 2024. Prior to such date he served as the Company's CFO since July 1, 2021. Mr. Liveris previously served as the operational CFO for NOVONIX Anode Materials and NOVONIX Battery Technology Solutions. He also led business development initiatives for the Company. Mr. Liveris has more than 10 years of experience in investment banking and management consulting. He was previously a Senior Engagement Manager at McKinsey where he led transformation programs for automotive and manufacturing companies. Before joining McKinsey, he was an Investment Banking Analyst at Merrill Lynch covering the transportation sector.

Robert Natter

Admiral Robert J. Natter serves as our Chairman and Non-executive Director effective as of November 30, 2021. He previously served as an Executive Director from September 30, 2020 and has been a Director since 2017. He retired from active military service with the U.S. Navy in 2003 and has 17 years' experience in the private sector of the U.S. and Australia markets. During his Navy career, Admiral Natter served as the Commander of the U.S. Seventh Fleet, controlling all U.S. Navy operations throughout the western Pacific and Indian Oceans. As a four-star Admiral, Natter was Commander in Chief of the U.S. Atlantic Fleet and the first Commander of U.S. Fleet Forces Command, overseeing all Continental U.S. Navy bases and the training and readiness of all Navy ships, submarines, and aircraft squadrons based there. He is on the Board and chairs the Governance and Compensation Committee and the Government Security Committee of Allied Universal Security Company with over 800,000 employees worldwide. He also served on the Board of Intellisense (ISI), a privately held technology company based in Torrance, California, until 2023. Admiral Natter also serves on the U.S. Naval Academy Foundation Board and was Chairman of the Academy Alumni Association, representing over 60,000 living Academy alumni. He also served on the Navy Seal Museum and the Yellow Ribbon Fund Boards.

Jean Oelwang

Ms. Jean Oelwang joined our Board as a Non-executive Director in March 2022. Ms. Oelwang has 18 years of experience in helping to start and lead telecommunications companies in South Africa, Colombia, Bulgaria, Singapore, Hong Kong, Australia, and the U.S. This included roles in marketing, customer service, sales, and as a CEO. Over the last 20 years, she has been the Founding CEO and Trustee of Virgin Unite, the independent non-profit foundation of the Virgin Group, helping lead the incubation and start-up of several global initiatives, many with a focus on people and sustainability, including: The Elders, The B Team, Planetary Guardians, The Carbon War Room (merged with RMI), Ocean Unite, 100% Human at Work, and The Caribbean Climate Smart Accelerator. Ms. Oelwang also worked with 25 Virgin businesses across 15 industries to help embed purpose in all they do and served as a Partner in the Virgin Group leading their people strategy. She is on the Advisory Council of The Elders, a B Team leader and Audit Chair, the co-founder and a trustee of Plus Wonder, and the author of the book Partnering and has completed the Harvard Business School Corporate Director Certificate program.

Suresh Vaidyanathan

Mr. Suresh Vaidyanathan joined our Board as Non-executive Director in September 2023. Mr. Vaidyanathan is currently Vice President, Renewable Fuels for Phillips 66. He was appointed to succeed Ms. Zhanna Golodryga as Phillips 66's nominee to the Board of the Company. A global business leader with more than 30 years in the oil and gas energy industry, Mr. Vaidyanathan's career has spanned roles in technical, operations, and business functions and general management around the world. Prior to assuming his current role with Phillips 66 in 2023, Mr. Vaidyanathan was Vice President & Chief Engineer, Refining Business Improvement and led Phillips 66's effort to improve margins and costs, advance use of digital technologies and jumpstart renewable energy activities.

Advisors

Christopher Burns

Dr. Christopher Burns, 37, is currently a Special Advisor to the Board and interim CEO. From September 2020, to January 2025, he was the Company's CEO. He is the founder and CEO of NOVONIX Battery Technology Solutions, which he co-founded in Canada in 2013, as well as CEO of NOVONIX Anode Materials. During his candidacy for his PhD at Dalhousie University, he co-developed Ultra-High-Precision-Coulometry technology. While CEO of the Company, Dr. Burns also managed NOVONIX's sponsorship of Dr. Mark Obrovac's laboratory at Dalhousie University. He was also formerly a Senior Research Engineer with Tesla. Mr. Burns is also a director of Axon Graphite Limited, a wholly owned subsidiary of Lithium Energy Limited.

Dr. Jeff Dahn

Dr. Jeff Dahn, 67, is a leading researcher with over 40 years of experience in the field of lithium-ion batteries and materials who currently serves as our Chief Scientific Advisor. Dr. Dahn obtained a B.Sc. degree in Physics from Dalhousie University in 1978 and completed his Ph.D. at the University of British Columbia in 1982. After completing his Ph.D., Dr. Dahn worked at the National Research Council of Canada (between 1982 and 1984) and at Moli Energy Limited (between 1985 and 1990), where he did pioneer work on lithium-ion battery technology. In 1990, Dr. Dahn accepted a faculty position within the Physics department of Simon Fraser University. In 1996, Dr. Dahn returned to Dalhousie University.

In 2016, Dr. Dahn commenced a research partnership with Tesla, which has since been extended until 2026. Dr. Dahn is the author or co-author of over 730 refereed academic publications and seventy-three inventions with patents issued or fled.

Dr. Dahn has received a number of national and international awards and recognitions, including the Battery Division Research Award from The Electrochemical Society in 1996, the "Technology Award" from the ECS Battery Division in 2011, the Governor General's Innovation Award in 2016 and the Gerhard Herzberg Gold Medal in Science and Engineering, which is regarded as Canada's top science award, in 2017. Dr. Dahn was appointed Fellow of the Royal Society of Canada in 2001 and named an Officer of the Order of Canada in 2020.

Andrew Liveris AO

Mr. Andrew Liveris AO is strategic advisor to the Company. From 2018 until April 2024, Mr. Liveris was a Non-executive Director of the Company. A recognized global business leader with more than 40 years at the Dow Chemical Company, Mr. Liveris' career has spanned roles in manufacturing, engineering, sales, marketing, and business and general management around the world. During more than a decade as Dow's CEO, Mr. Liveris led Dow's transformation from a cyclical commodity chemicals manufacturing company into a global specialty chemical, advanced materials, agro-sciences, and plastics company. Mr. Liveris is a non-executive director of Lucid Motors (Nasdaq: LCID), a non-executive director of Saudi Arabian Oil Company (Saudi Aramco), a non-executive director of Worley Parsons Limited (ASX: WOR) and a non-executive director of International Business Machines (IBM) Corporation (NYSE: IBM). Mr. Liveris has also been appointed as the Chair of the Brisbane Organising Committee for the 2032 Olympic and Paralympic Games.

Family Relationships

Andrew Liveris, a Non-executive Director until April 2024, is the father of the Company's Non-executive Director and former Chief Financial Officer, Nick Liveris.

B. Compensation

Remuneration Report for Australian Disclosure Requirements

Dear NOVONIX shareholders.

On behalf of the Board of Directors and as Chair of the Remuneration Committee, I am pleased to present the remuneration report for the financial year ended December 31, 2024.

Thanks to the team for a wonderful year where we 1) secured three cornerstone customers, 2) significantly advanced our production capabilities to be on track to deliver product by early 2026 from our Riverside facility, 3) built up the team and the Board to prepare for this next period of growth, and 4) secured \$1,009M funding to help us scale our manufacturing operations.

Our efforts include bringing in Robert Long as Chief Financial Officer (“CFO”) in September 2024. Robert brings over 25 years of experience in finance and executive leadership with both public and private companies. We also appointed Darcy MacDougald, Chief Operating Officer, as KMP effective January 1, 2024. Both Robert and Darcy are based in Chattanooga. To further support management during this critical time, Ron Edmonds, a seasoned finance leader and NOVONIX Board member, took on the interim role of Executive Officer – Finance effective August 1, 2024.

As production is our major focus, we are working on recruiting a Chief Executive Officer who has deep manufacturing, production, and scale-up experience and who will be based in Chattanooga with the team. Robert Long has been appointed Interim CEO during this transition period. We are grateful to Dr. Chris Burns who will be staying on as a Special Advisor to the Board based in Halifax to ensure continuity. We would like to thank Chris for all his hard work with the team to get the Company to this exciting moment. After many years in the industry, he became CEO of NOVONIX in 2020 and we are very grateful that he is remaining as a critical supporter for the Board and team in this next phase to ensure NOVONIX’s success.

On the Board, we were very pleased to add Sharan Burrow AC in February 2024 as an independent Board member. She has extensive experience with governance, human capital, government relations, and manufacturing industries. Nick Liveris also joined the Board on September 1, 2024, bringing extensive financial experience and continuity as he was the CFO of NOVONIX since July 2021. Andrew Liveris stepped off the Board in April 2024 and will continue to serve as an advisor to play an important growth role with partners and investors.

As you know, in 2024, we significantly revamped our remuneration framework to be in line with feedback from shareholders last year. We are not planning on making any significant changes this year. We will continue to align with performance-based rewards as we enter this growth phase.

The changes implemented to our compensation programs in response to that feedback were presented in last year’s Remuneration Report at our 2024 AGM and received 90% support from shareholders. As such, we have continued these practices into our 2024 Remuneration Report with key elements such as:

- the updated pay philosophy with guiding principles;
- a streamlined and clear narrative in our annual remuneration report;
- clear disclosures for short-term incentive (“STI”) metrics; and
- equity grants under our long-term incentive plan (“LTIP”) consisting 100% of performance rights vesting based on performance over a three-year period, using challenging relative total shareholder return (“TSR”) performance goals and a revenue modifier. These equity grants included no performance rights with time-based vesting.

As always, we welcome your feedback and input to ensure we build this critical company as a leader in US production of synthetic graphite.

We are all honored to be part of this important mission and are grateful for your support.

With gratitude,

Jean Oelwang
Chairperson of the Remuneration Committee

OVERVIEW OF THE REMUNERATION REPORT

The Board of Directors presents the NOVONIX Limited 2024 remuneration report, outlining key aspects of our remuneration policy and framework and remuneration awarded this financial year ending December 31, 2024 to our Key Management Personnel and our Non-Executive Directors. The remuneration report has been audited as required by s308 (3C) of the Corporations Act 2001 and contains the following sections:

- Remuneration and our 2024 Performance
- Key Management Personnel (each a “KMP and collectively “KMPs”) covered by the Remuneration Report
- KMP Remuneration at a Glance
- KMP Remuneration Governance
- Our Remuneration Strategy
- Our Remuneration Mix
- Remuneration Outcomes for the Year Ended December 31, 2024
- Other Aspects of our Remuneration Program
- Remuneration Expenses for KMPs
- Non-Executive Director Remuneration
- Additional Statutory Information

REMUNERATION AND OUR 2024 PERFORMANCE

We are in the business of supplying advanced, high-performance battery materials, equipment, and services to the global lithium-ion battery market. Founded in 2012 and publicly traded since 2015, we started as a company in a nascent industry and continue to grow scale in an increasingly highly specialized industry.

As part of our business strategy, we maintain a lean but experienced team. To deliver on our ambitious business objectives, we aim to attract and retain high-quality employees who embody our core values of curiosity, collaboration, and commitment in a competitive market and even more competitive industry. We are a dual-listed Australian corporation with a management team and operations based entirely in North America, with approximately 180 full-time employees in the United States and Canada.

In 2024, our management made important strides in our business, executing on several critical business goals, namely:

- ✓ completed independent engineering assessment of our Riverside facility
- ✓ signed a binding offtake with Panasonic Energy for a minimum of 10,000 tonnes of high-performance synthetic graphite
- ✓ signed a binding offtake with Stellantis NV for a minimum of 86,250 tonnes of high-performance synthetic graphite
- ✓ signed a binding offtake with PowerCo SE for a minimum of 32,000 tonnes of high-performance synthetic graphite
- ✓ selected for US\$103 Million Qualifying Advanced Energy Project Tax Credit to support our Riverside facility
- ✓ offered a conditional commitment for US\$754 Million loan from the U.S. Department of Energy for a new synthetic graphite plant in Chattanooga, Tennessee
- ✓ entered into a licensing agreement with Harper International for the rights and use of its continuous induction-based graphitization furnace technology, since the conclusion of FY2024.
- ✓ progressed our cathode technology commercialization through signing development agreements with CBMM and ICoNiChem Widnes Limited
- ✓ raised \$28.8M on the ASX

As a growth stage company, we incurred in FY 2024, and have historically incurred, operating losses due to significant expenses, which we expect will continue as we develop our technology and scale production ahead of eventual commercialization, revenue growth, and, ultimately profitability. During the year, our share price also experienced some decline, however less of a decline than others in our sector. This stemmed from various factors, many of which were unrelated to Company performance but which we recognize still negatively impacted shareholders, including: fluctuations in current and expected demand for EVs and ESS; trends in technology adoption; international market prices for battery anode materials; potential changes in political administration in the United States; and general market sentiment towards the battery materials and lithium-ion battery sectors. Given the nature of our activities and the consequential operating results, we have not proposed or paid dividends to shareholders or returned capital to them.

In this critical growth phase where we aim to achieve important business milestones and the challenging goals we have set for ourselves, while sustaining losses and seeing our share price fluctuate, we must take care that our remuneration program accomplishes several aims: it must ensure the ability to attract and retain employees in an intensely competitive global industry, it must incentivize and reflect the performance of our pre-profitability business assessed mainly on technology and operating milestones, rather than conventional financial metrics; it must promote the interests of shareholders, whose investment in us is often impacted by macroeconomic factors outside our control; and, as a dual-listed Australian company, it must meet the expectations of both Australian and U.S. investors, each of whom have distinct expectations around remuneration.

The 2024 remuneration program was designed to achieve these goals. The program incentivizes management to deliver growth and results, while at the same time motivating and retaining key talent in the North American market where our operations are located; we recognize these as vital to achieving both short and long-term business objectives and enhancing shareholder value in the long term.

The following tables summarize the key financial and share price performance over the past five financial years, being factors that have been considered in both STI and LTI outcomes.

The details of revenue and net profit (loss) before income tax:

	Year Ended December 31, 2024	Year Ended December 31, 2023	Six months ended December 31, 2022	Year Ended June 30, 2022	Year Ended June 30, 2021
Revenue	5,854,424	8,054,528	2,702,276	6,101,155	5,227,347
Net loss	(74,822,141)	(46,248,261)	(27,864,014)	(51,860,307)	(18,076,077)

The details of share price movements are as follows:

	December 31, 2024	December 31, 2023	December 31, 2022	June 30, 2022	June 30, 2021
Share price (AUD)	\$ 0.735	\$ 0.735	\$ 1.47	\$ 2.28	\$ 2.22

KEY MANAGEMENT PERSONNEL COVERED BY THE REMUNERATION REPORT

This remuneration report discusses the compensation of the KMP listed below (defined under Australian rules as individuals who have authority and responsibility for planning, directing, and controlling the activities of the Company, directly or indirectly, including all Directors).

Name	Position	Country	Term as KMP in FY2024
NON-EXECUTIVE DIRECTORS			
R Natter	Independent Chairman	United States	Full year
A Bellas	Independent Deputy Chairman	Australia	Full year
S Burrow	Independent Non-executive Director	Australia	Appointed effective February 28, 2024
R Edmonds	Executive Officer – Finance (from August 1, 2024) Independent Non-executive Director (to July 31, 2024)	United States	Full year
A Liveris	Non-executive Director	Australia	Resigned effective April 17, 2024.
N Liveris	Non-executive Director	United States	Appointed effective September 1, 2024
J Oelwang	Independent Non-executive Director	United States	Full year
S Vaidyanathan	Non-executive Director	United States	Full year
EXECUTIVE KMP			
C Burns	Chief Executive Officer	Canada	Full year
R Buttar	Chief Legal & Administrative Officer	United States	Full year
N Liveris	Chief Financial Officer	United States	Resigned effective August 31, 2024.
R Long	Chief Financial Officer	United States	Appointed effective September 1, 2024.
D MacDougald	Chief Operating Officer	United States	Full year

As recently announced on January 20, 2025, Dr Chris Burns has stepped down as Chief Executive Officer effective January 24, 2025, and Robert Long has been appointed as Interim Chief Executive Officer.

Except as outlined above, there have been no other changes to KMPs, both since the end of the reporting period and as of the date of this remuneration report.

KMP REMUNERATION AT A GLANCE

The following table summarizes total remuneration for each of the executive KMPs for 2024 showing the grant date fair values of the equity grants.

Name	Fixed Remuneration (USD\$)				Variable Remuneration (USD\$)			Total (USD\$)
	Cash Salary	Post-Employment Benefits	Annual Leave Entitlements	Non-Monetary Benefits	STI	Performance/Share Rights	Options ¹	
C Burns ²	628,456	11,078	37,183	2,691	377,074	2,254,886	392,820	3,704,188
R Long (appointed September 1, 2024)	133,333	—	12,821	6,276	60,000	74,794	—	287,224
R Buttar	381,563	6,221	22,012	2,631	228,938	665,892	—	1,307,257
D MacDougald	353,667	10,767	7,008	9,594	159,150	463,347	—	1,003,533
R Edmonds (appointed executive August 1, 2024)	83,333	—	—	—	—	—	—	83,333
N Liveris	271,333	11,500	(15,653)	12,644	—	(374,434) ³	(395,391) ³	(490,001)

⁽¹⁾ Represents the expense for 2024 fiscal year associated options held by the relevant KMP during the 2024 fiscal year. No options were granted during the 2024 fiscal year.

⁽²⁾ Cash salary amounts for Chris Burns throughout this remuneration report represent the USD translated amount of the salary he received in CAD.

The following table shows the total remuneration realized by our executive KMPs in 2024, based on the value of outstanding equity awards that vested or were exercised during the year, excluding post-employment and annual leave entitlements. For LTI awards granted for 2024, all performance rights vest based on corporate performance, with none vesting solely based on time:

Name	Fixed Remuneration (USD\$)	Variable Remuneration (USD\$)				Total (USD\$)
	Cash Salary	STI	Intrinsic value Realised on Performance Rights with Performance -Based Vesting	Intrinsic value Realised on Performance Rights with Only Time- Based Vesting	Intrinsic value Realised on Options Exercised	
C Burns	628,456	377,074	25,486 ¹	333,572 ¹	133,806	1,498,394
R Long	133,333	60,000	—	—	—	193,333
R Buttar	381,563	228,938	4,607 ¹	139,960 ¹	—	755,068
D MacDougald	353,667	159,150	—	113,479 ¹	—	626,296
R Edmonds	83,333	—	—	26,384 ¹	—	109,717
N Liveris	271,333	—	12,052 ¹	157,768 ¹	133,806	574,959

^[1] Value converted from AUD.

As shown by the two preceding tables, we determined to grant a significant portion of equity awards in 2024 so as to tie KMPs' incentives with the interests of shareholders. At the same time, the value of equity previously awarded to management that vested in 2024 was significantly lower than the value of their 2024 grants, reflecting a strong link between the interests of KMPs of those of shareholders during a period of reduced share price performance.

KMP REMUNERATION GOVERNANCE

Role of the Remuneration Committee

The Board is responsible for the Company's remuneration strategy. The Remuneration Committee, comprised of a majority of independent, non-executive Directors, advises the Board on remuneration policies and practices generally, and makes specific recommendations on remuneration packages and other terms of employment for executive KMPs and non-executive Directors. Individual pay structures and outcomes are developed in consultation with external and independent remuneration consultants, and reviewed and approved by the Remuneration Committee, which then recommends them for approval to the Board.

In making recommendations to the Board, the Remuneration Committee considers, among other things, relevant market trends and practices, individual roles and responsibilities, legal and regulatory requirements, diversity (including with respect to gender), and feedback from shareholders and other stakeholders. This governance structure is aimed at ensuring that our remuneration program aligns the pay of our management team with shareholder value, within the context of our Company's unique situation as a dual-listed Australian company in a critical growth stage with a management team and operations based entirely in North America.

Role of Management

Although the Remuneration Committee ultimately is responsible for reviewing and making recommendations to the Board for the Company's remuneration policies and framework, the Remuneration Committee may receive input from the management team, which it reviews closely. The Remuneration Committee, at its discretion, may invite representatives of management and other employed personnel to attend committee meetings. Our executive KMPs do not participate in Remuneration Committee discussions about their own remuneration and do not have any indirect conflict in setting the remuneration of other KMPs.

Role of Consultants

When appropriate, the Remuneration Committee will seek advice or recommendations from external and independent expert consultants, including benchmarking studies. In 2024, the Remuneration Committee retained AON Consulting Inc. ("AON"), which advised on various remuneration-related items, including peer group development, market practices, industry trends, investor views, and market data. Advice provided by consultants during the year did not constitute a "remuneration recommendation" as defined in section 9B of the Corporations Act and was received free from any undue influence by KMPs to whom the advice related. Furthermore, our Remuneration Committee concluded that AON is "independent" pursuant to Rule 5605(d)(3) of The Nasdaq Stock Market ("Nasdaq").

Remuneration Peer Group

To understand the external market competitiveness of the compensation for our KMPs, our independent executive remuneration consultant analyzes publicly available information and compares the compensation of each KMP to data for comparable positions at companies in our peer group and provides a report to the Remuneration Committee. The Remuneration Committee reviews our peer group periodically, with input from its independent executive remuneration consultant. In creating the peer group, our independent executive remuneration consultant considers various factors, including: (i) relative size to our Company (revenue, market capitalization, and other relevant criteria); and (ii) nature of business (business focus, model, and location).

The 2024 compensation peer group consisted of 20 companies publicly traded in the United States in various industries, including electronic equipment and instruments, specialty chemicals, electrical components and equipment, automobile manufacturers, automotive retail, construction machinery and heavy transportation equipment, environmental and facilities services, and diversified metals and mining, with revenues generally less than \$1 billion.

Changes to our Remuneration Program in 2024

As previously disclosed, in response to shareholder and proxy advisor concerns in 2023, we committed to reforming our remuneration program for 2024. The key changes made to the 2024 remuneration program were as follows:

What We Heard	What We Did
Remuneration was not sufficiently aligned with performance. <i>STI performance criteria:</i> STIs should be more closely aligned to well-understood quantitative and financial metrics. <i>STI performance criteria:</i> STI payouts should better reflect negative share price performance. <i>Long-term incentive (“LTI”) performance criteria:</i> With STI payouts linked to business goals, LTI payouts should be better linked to share price performance. LTI payouts should also be based on multi-year performance. <i>LTI performance criteria:</i> LTI payouts should align with longer-term business goal of achieving revenues. Size of equity grants was not in line with market practice for Australia. <i>LTI quantum:</i> Generally, local Australian companies pay their executives LTIs of a more modest quantum. <i>Director compensation:</i> Market in Australia is to pay directors LTIs with a lower value.	For STIs granted in 2024, goals include forward-looking revenue and revenue in-hand (aggregate 25% weight), budget variance (10% weight) and access to capital (10% weight), with the rest made of up strategic, operational, and people/ESG-based metrics, in light of our continued emphasis on scaling our business as a growth-stage company. For STIs granted in 2024, the Remuneration Committee retains discretion to reduce annual STI payout based on negative annual TSR and other factors, thus further aligning management’s interests with those of shareholders. For LTI awards granted in 2024, all performance rights vest based on corporate performance, with none vesting solely based on time. Payouts are measured based on achievement of relative TSR (versus a peer group of 20 companies primarily focused in the diversified metals and electronic equipment industries) over a three-year performance period and are capped at the target opportunity. Performance rights require a minimum level of relative TSR (35th percentile) to achieve any payout, regardless of revenue earned, and a relative TSR of at least 60th percentile to pay out at the target opportunity, which is the highest level. This establishes a rigorous framework for evaluating Company performance and is directly aligned with shareholders’ interests. Performance rights granted in 2024 also include a revenue modifier based on the attainment of a three-year revenue goal (with the payout still capped at the target opportunity). The addition of this modifier reinforces our focus on top-line revenue growth, a core metric for effectively scaling and growing the business. For LTIs granted in 2024, awarded LTI opportunities with a quantum substantially below the median of our U.S. peer group. For 2024, Director LTI quantum reduced 50% in value from the prior year.

OUR REMUNERATION STRATEGY

As discussed in “Remuneration and our 2024 Performance,” our remuneration strategy is informed by both U.S. and Australian pay practices, our market, industry, and growth stage, and is designed to ensure we can:

- attract and retain experienced leaders and key employees in the markets in which the Company operates in a highly specialized and competitive industry,
- link remuneration with performance to align pay outcomes with value created for the Company and its shareholders,
- reward performance that will support our long-term strategic growth, business objectives, innovation, and a strong culture, and
- encourage an ownership mentality across all levels of the Company.

These strategic priorities have led us to implement the following pay practices in 2024:

	Fixed Remuneration ¹	Performance-Based Remuneration	
		Short-Term Incentives	Long-Term Incentives
Rationale	Attracts and retains key personnel via competitive baseline pay and provides a level of cash income predictability and stability.	Focuses attention on corporate KPIs that promote achievement of strategic objectives and shareholder wealth.	Serves multi-pronged purpose: - retains employees. - provides a framework for increasing shareholder value and business performance through key objectives that we believe are critical to long-term profitability. - conserves cash.
Delivered as	Cash.	Cash.	Performance rights in our ordinary shares.
Process	Set annually.	Granted annually. Remuneration Committee sets one-year performance goals upon grant at beginning of year and assesses their achievement after end of that year.	Granted annually. For performance-vesting grants, Remuneration Committee sets multi-year performance goals upon grant at beginning of year and assesses their achievement after a 3-year period.
Quantum of opportunity	Set according to each KMP's accountabilities, experience and qualifications, and market relativities.	Opportunity set as a percentage of fixed remuneration. Pay outcomes are variable based on the achievement of performance criteria and Remuneration Committee's discretion.	Opportunity set based on target number of shares. Actual pay outcomes following vesting are variable subject to share price fluctuations and/or the achievement of performance criteria.
Performance criteria	N/A	Corporate KPIs (business milestones including financial metrics), allowing use of negative discretion.	Relative TSR with a revenue modifier.
Performance and service period	N/A	1 year.	3 years.
Cessation of employment	N/A	No award will be made to employees who have ceased employment.	Unvested performance rights are forfeited, unless Board exercises discretion.

¹ Fixed remuneration includes cash salary, post-employment benefits, annual leave entitlements and non-monetary benefits.

OUR REMUNERATION MIX

Our Remuneration Committee reviews and recommends to the Board the remuneration strategy for our KMPs annually to ensure it remains aligned to our business needs and outcomes. In our current, early stage of growth, setting quantitative target performance levels can be challenging. This is further complicated by rapidly shifting market and regulatory conditions. The majority of our target compensation is performance-based and at risk, and, for our CEO, was focused on long-term performance. Our 2024 pay mix reflected significant reduction in LTI opportunity.

REMUNERATION OUTCOMES FOR THE YEAR ENDED DECEMBER 31, 2024

Cash Salary/Fixed Remuneration

The Remuneration Committee provides guidance in setting cash salaries for the Company's KMPs at levels that reflect the Remuneration Committee's assessment of competitive compensation averages within our peer group for individuals with similar responsibilities at companies with similar financial, operating and industry characteristics, in similar locations. The members of the Remuneration Committee also evaluate KMP compensation using their accumulated individual knowledge and industry experience, as well as publicly available compensation information with respect to companies within our peer group.

In 2024, the Remuneration Committee kept KMPs' cash salaries at the same level as 2023, as shown below.

KMP	2024 Cash Salary (USD\$)	2023 Cash Salary (USD\$)	% Change
Chris Burns	628,456 ¹	653,217	Nil
Rashda Buttar	381,563	381,563	Nil
Nick Liveris	407,000	407,000	Nil
Robert Long	400,000	N/A	N/A
Darcy MacDougald	353,667	N/A	N/A
Ron Edmonds	200,000	N/A	N/A

¹ Cash salary for Chris Burns is denominated in CAD, which did not change from 2023 to 2024, however paid in USD and is translated into USD on a quarterly basis at the average rate. The amount of his compensation is translated throughout this remuneration report to USD.

Short-term Incentives

The purpose of our STIs is to motivate and reward our KMPs for the attainment of measurable performance objectives, including annually set goals for financing, strategic, and operational performance in line with KPIs. These are criteria that management is focused on for the Company in our current growth stage. The KPIs are the same among all KMPs and measure the Company's achievement during the fiscal year. While financial metrics do not currently make up the majority of KPIs, given that we remain focused on scaling the business and that certain of our long-term incentives include a revenue metric, they represented 40% of all KPIs for the 2024 STIs.

During the year for which performance is measured, each KMP receives an STI target award, which is a percentage of their salary for that year. Following the end of the year, Company performance against each KPI is measured. The level of achievement on each KPI is multiplied by the relative weight for that KPI, which then translates to a defined payout expressed as a percentage of the target STI.

For 2024, the target STI was 100% of salary for all KMPs. The table below shows the STI objectives and outcomes for the fiscal year.

Metric Category (Weighting)	Goals	% of Total STI		Outcome as % of total STI
		Assuming Highest Rating	Rating	
Operational (40%)	3-year Forward Looking Revenue In-Hand	15%	100%	15%
	Pilot Customer Qualified Materials	10%	83%	8%
	NRS Graphitization Production Target	15%	-	-
	Operational Subtotal			23%
People / ESG (15%)	Total Recordable Incident Frequency Rate	5%	100%	5%
	Employee Survey Engagement	5%	100%	5%
	ESG Program	5%	100%	5%
	People/ESG Performance Subtotal			15%
Strategic (15%)	Cathode Commercial Partnerships	5%	75%	4%
	Cathode Production Performance Delta from Commercial Standards	5%	100%	5%

	BTS Non-Standard Service Agreements	3%	75%	2%
	Data Solutions Customers	2%	-	-
	Strategic Subtotal			11%
Financial	Revenue	10%	-	-
(30%)	Budget Variance	5%	56%	3%
	Access to Strategic Capital	15%	50%	8%
	Financial Subtotal			11%
	STI Performance Ratio			60%
	STI Payout Ratio Approved by the Committee and Board			60%

The Remuneration Committee assessed the Company's performance of KPIs for the financial year ended December 31, 2024 as achieving 60% of target. This reflects achievement of several significant operational, financial, and people goals. This led to the following payouts for 2024, which the Company believes reflects the close link between the STI remuneration and the Company performance during the financial year.

KMP	Cash Salary (USD\$)	STI Target (%)	Achieved Performance Ratio	STI Payout Ratio	Actual Payout (USD\$)
Chris Burns	628,456	100%	60%	60%	377,074
Rashda Buttar	381,563	100%	60%	60%	228,938
Robert Long	400,000	75%	60%	60%	60,000
Darcy MacDougald	353,667	75%	60%	60%	159,150

Long-term Incentives

Performance rights

KMPs participate in the LTIP, composed of grants of performance rights with varying vesting conditions. The dollar value of the LTI award is converted into a fixed number of performance rights based on the market value of NOVONIX shares at the time of grant.

In 2024, 100% of our grants to all of our KMPs were performance rights vesting based on the achievement of performance criteria, as shown below. None of these awards vest solely based on time.

Vesting is measured based on the relative Total Shareholder Return (rTSR) performance relative to the entities of a select peer group of companies primarily in the diversified metals and electronic equipment industries over the Performance Period (January 1, 2024 to December 31, 2026) as follows:

% of FY24 Performance Rights that vest	TSR Ranking
Below the 35th percentile	0% of FY24 Performance Rights will vest
At the 35th percentile	25% of FY24 Performance Rights will vest
At or above the 60th percentile	100% of FY24 Performance Rights will vest
Above the 35th percentile and below the 60th percentile	Pro rata vesting between 25% and 100% of FY24 Performance Rights

The number of FY24 Performance Rights that will vest upon satisfaction of the TSR Measure (specified above) will be adjusted based on the Company meeting certain revenue milestones in respect of the 2026 Financial Year (assessed as at December 31, 2026), as follows:

Multiplier	Revenue target (USD)
0.7x Number of FY24 Performance Rights that have vested	Up to 35,000,000
1.5x Number of FY24 Performance Rights that have vested	70,000,000 or greater
Pro rata between 0.7x and 1.5x Number of FY24 Performance Rights	Above 35,000,000 and below 70,000,000

Notwithstanding the Revenue Target Modifier, the total number of Performance Rights that can vest shall not exceed the number of Performance Rights representing the target opportunity.

The number of Performance Rights awarded to KMP during the financial year are set out in the table below:

KMP	Total Performance Rights (#)
Chris Burns	3,658,161
Nick Liveris	1,398,709
Robert Long	1,144,130
Darcy MacDougald	1,075,930
Rashda Buttar	1,075,930

The performance rights listed above were granted to executives on April 18, 2024, with the exception of Mr. Long whose performance rights were granted on October 8, 2024. The long-term incentives were issued as performance rights under the Company's existing Performance Rights Plan. The target opportunities for all incentives were of a quantum substantially below the median of our U.S. peer group.

Mr. Liveris ceased employment with the Company on August 31, 2024 and his performance rights lapsed at that time.

The Remuneration Committee believes that the performance criteria in the performance rights provide challenging but appropriate incentives to KMPs given our focus on producing revenue over the coming years and our recognition of the necessary runway for achieving that goal. As discussed above, the relative TSR performance goals establish a rigorous framework for evaluating Company performance and are aimed at directly aligning the interests of our KMPs with those of our shareholders. Additionally, the revenue modifier enhances our focus on top-line revenue growth, which is critical for effectively scaling and growing the business.

Options

No options were awarded to executive KMPs during the 2024 financial year.

Post-Employment and Other Benefits

We provide certain pension and superannuation benefits to certain of our directors and members of our senior management under Australian law. For the fiscal year ended December 31, 2024, the total amounts set aside or accrued by us to provide pension, retirement or similar benefits to our directors and members of our senior management was \$56,853.

OTHER ASPECTS OF OUR REMUNERATION PROGRAM

Share Ownership Guidelines

To further align the interests of our non-executive Directors and other leadership with those of shareholders, the Company has adopted share ownership guidelines in 2024. These require (1) each non-executive Director (other than those who do not receive remuneration from us, as further described below) to retain ordinary shares having a value of at least three times the annual cash retainer fee and (2) the Chief Executive Officer to retain ordinary shares having a value equal to three times his annual salary. Until reaching the required ownership level, non-executive Directors covered by the guidelines and the Chief Executive Officer are required to retain at least 50% of their shares, net of applicable tax withholding and the payment of any exercise or purchase price (if applicable), received upon the vesting or settlement of

equity awards or the exercise of share options. Each non-executive Director covered by the guidelines and the Chief Executive Officer has five years to comply with the guidelines, and options and unvested performance rights do not count toward the requirement. The following shows compliance with the ownership guidelines as of December 31, 2024:

KMP	Share Ownership Guideline (Multiple of Salary or Retainer)	Share Ownership as of 31 December 2024
C Burns	3x cash salary	Guidelines met
Non-executive Directors*	3x cash retainer	Guidelines met**

* Does not include Mr. Vaidyanathan, who is not permitted to receive remuneration, including any equity incentives, in his personal capacity under the terms of his employment with Phillips 66 and terms of engagement with the Company (all of whose equity grants are paid or granted directly to Phillips 66). In addition, includes Mr. Edmonds, who the Company has determined should remain covered by these guidelines, as he was a non-executive Director before being named interim Executive Officer – Finance.

** Non-executive Directors who joined the Company in the past two years have not yet met the required ownership level but retain at least 50% of their shares as required.

Clawback Policy

We maintain a clawback policy as required by the rules of Nasdaq. Our clawback policy covers each of our current and former executive officers (i.e., executive KMPs). The policy provides that, subject to the limited exemptions provided by the Nasdaq rules, if the Company is required to restate its financial results due to material noncompliance with financial reporting requirements under the securities laws, the Remuneration Committee must reasonably promptly seek recovery of any cash or equity-based incentive compensation (including vested and unvested equity) paid or awarded to the covered individual, to the extent that the compensation (i) was based on erroneous financial data and (ii) exceeded what would have been paid to the executive officer under the restatement. Recovery applies to any such excess cash or equity-based bonus/other incentive compensation received by any covered individual, while he/she was an executive officer, on or after October 2, 2023 during the three completed fiscal years immediately preceding the date on which the Company determines an accounting statement is required. For more information, see the full text of our claw-back policy, which is filed as an exhibit to our Annual Report on Form 20-F.

REMUNERATION EXPENSES FOR KMPS

The following table details the remuneration expenses recognized for the Company's KMPs and non-executive Directors, for the current period and previous financial year measured in accordance with accounting standard requirements.

Year ended December 31, 2024 – All amounts are shown in USD\$.

Termination arrangements	Entitled to severance of 12 months' base salary, 12 months of STI, prorate STI for year of termination and 12 month vesting of LTI post termination	Entitled to severance of 12 months' base salary, 12 months of STI, prorate STI for year of termination and 12 month vesting of LTI post termination	Entitled to severance of 12 months' base salary, 12 months of STI, prorate STI for year of termination and 12 month vesting of LTI post termination	Entitled to severance of 12 months' base salary, 12 months of STI, prorate STI for year of termination and 12 month vesting of LTI post termination

Except for their pension/superannuation benefits (which is outlined in the “Post-Employment Benefits” column of the table under the heading “KMP REMUNERATION AT A GLANCE”), the KMPs are not entitled to any other termination payments or benefits under their service contracts.

AON, an external remuneration consultant, is engaged to benchmark KMP salaries, with those salaries positioned at the 50th percentile of the peer group. KMP salaries also are set taking into account each KMP’s accountabilities, experience, and qualifications.

NON-EXECUTIVE DIRECTOR REMUNERATION

Non-executive Director remuneration includes both a cash component and an annual grant of equity awards using a value-based approach by issuing share rights to non-executive Directors each financial year.

As a sign of the Board’s long-term commitment to investors and the Company, effective January 1, 2024, Directors reduced the value of share rights they received from \$110,000 to \$55,000. At the 2024 AGM, the shareholders approved the granting of the financial year 2024 share rights to Directors. The number of share rights granted was calculated by dividing the value of the share rights (\$55,000) by the closing share price of the Company’s shares on the ASX on December 31, 2024, and the USD\$/AUD\$ spot rate as of December 31, 2024. The share rights automatically vested on December 31, 2024.

If a non-executive Director is appointed during the financial year, the number of share rights to be issued comprises a pro-rata amount of the value of the share rights, based on the date of the non-executive Director’s appointment, as a proportion of the financial year. The number of share rights is then calculated by dividing the value of the share rights by the closing share price of the Company’s shares on the ASX and the USD\$/AUD\$ spot rate on the trading day immediately prior to the non-executive Director’s appointment.

If a non-executive Director ceases to hold office as a Director prior to the vesting date, that person's share rights will lapse, and they will be entitled to a pro-rata amount of shares representing the proportion of the relevant financial year that such person was a non-executive Director.

Mr. Vaidyanathan is not permitted to receive remuneration, including any equity incentives, in his personal capacity under the terms of their employment with Phillips 66 and terms of engagement with the Company. Accordingly, all fees earned by, and all equity instruments granted to, Mr. Vaidyanathan are paid or granted directly to Phillips 66.

The table below shows the value of share rights that were granted, exercised and forfeited during the year ended December 31, 2024.

2024	Non-executive Director share rights				
	Number Granted	Value Granted (AUD\$) ¹	Value Exercised (AUD\$) ¹	Number Forfeited	Value Forfeited (AUD\$) ¹
A Bellas	109,749	105,908	—	—	—
S Burrow	84,145	81,200	—	—	—
R Edmonds	109,749	169,024	63,116	—	—
N Liveris	—	—	—	—	—
R Natter	109,749	105,908	—	—	—
J Oelwang	109,749	105,908	—	—	—
S Vaidyanathan	109,749	105,908	—	—	—

¹ Amounts are disclosed in AUD\$ as the value is determined based on the ASX share price at grant date, which is denominated in AUD.

The non-executive Directors received the following cash fees:

	USD\$
Chairman	106,000
Base non-executive Director fee	50,000
Chair of Audit & Risk Committee	20,000
Member of Audit & Risk Committee	10,000
Chair of Nominating and Corporate Governance Committee	10,000
Member of Nominating and Corporate Governance Committee	5,000
Chair of Remuneration Committee	15,000
Member of Remuneration Committee	7,500

The current base fees were reviewed with effect from September 1, 2022.

The maximum annual aggregate non-executive Directors' fee pool limit is \$700,000 (excluding share-based payments) and was approved by shareholders at the 2023 AGM.

Any Director who devotes special attention to the business of the Company, or who otherwise performs services which in the opinion of the Directors are outside the scope of the ordinary duties of a Director may be paid extra remuneration as determined by the Directors, which will not form part of the aggregate fee pool limit above. Non-executive Directors are not entitled to any performance-related remuneration or retirement allowances outside of statutory superannuation entitlements.

All non-executive Directors enter into a service agreement with the Company in the form of a letter of appointment. The letter summarizes the Board policies and terms, including remuneration relevant to the office of Director.

ADDITIONAL STATUTORY INFORMATION

(i) Performance Based Remuneration Granted, Forfeited, and Cancelled During the Year

The table below shows for each KMP how much of their STI cash bonus was awarded and how much was forfeited. It also shows the fair value of performance rights that were granted, exercised, forfeited and cancelled (where applicable) during

the year ended December 31, 2024. The number of performance rights and percentages vested/forfeited for each grant are disclosed in section (ii) on page 50 below.

	Total STI Bonus		LTI Performance Rights		
	Total STI Opportunity (USD\$)	Awarded %	Forfeited %	Value Granted AUD \$	Value Exercised AUD \$*
2024					
C Burns	628,456	60%	40%	3,250,642	539,552
R Long	100,000	60%	—	795,399	—
R Buttar	381,563	60%	40%	956,071	218,204
D MacDougald	265,250	60%	—	956,071	113,479
N Liveris	—	-	—	—	255,190

* The value at the exercise date of options/performance rights that were granted as part of remuneration and were exercised during the year has been determined as the intrinsic value of the options at that date.

(ii) *Terms and conditions of the share-based payment arrangements*

Options

The terms and conditions of each grant of options affecting remuneration in the current or a future reporting period are as follows:

Name Grant Date	Vesting Date	Expiry Date	Number Under Option	Exercise Price AUD \$	Value per Option at Grant Date AUD \$	Performance Achieved	Vested %
C Burns

~ These options vest in 10 equal tranches upon the achievement of progressive incremental production milestones of 1,000 tonnes. The vesting dates in the table represent the current estimate of when the vesting conditions will be met, and the options can be exercised.

The number of options over ordinary shares in the Company provided as remuneration to key management personnel is shown in the table below on page 97. The options carry no dividend or voting rights. When exercisable, each option is convertible into one ordinary share of NOVONIX Limited.

Performance Rights

The terms and conditions of each grant of performance rights affecting remuneration in the current or a future reporting period are as follows:

KMP	Number	Grant Date	Vesting Date	Vesting Conditions	Grant Date Fair Value Per Unit (AUD\$)
C Burns	1,412,000	1/28/2022	6/30/2024	50% vest subject to continued employment at	\$ 7.21
N Liveris	667,831	10/26/2022	6/30/2024	30 June 2024 and 50% vest subject to achievement	\$ 2.90
R Buttar	255,238	1/28/2022	6/30/2024	of revenue for the period 1 July 2023 to 30 June 2024: a)0-50% of award for linear revenue up to USD\$45M b)50-100% of award for incremental revenue linearly from USD\$45m - \$105m.	\$ 7.21
C Burns	2,275,400	10/26/2022	6/30/2025	50% vest subject to continued employment at	\$ 2.90
N Liveris	778,400	10/26/2022	6/30/2025	30 June 2025 and 50% vest subject to achievement	\$ 2.90
R Buttar	359,300	10/26/2022	6/30/2025	of revenue, for the 12-month period preceding vesting date as follows: a)0-50% of award for linear revenue up to USD\$75M b)50-100% of award for incremental revenue linearly from USD\$75m - \$180m.	\$ 2.90
C Burns	1,604,871	4/13/2025	12/31/2025		\$ 1.09
N Liveris	549,035	4/5/2023	12/31/2025		\$ 1.21
R Buttar	253,401	4/13/2023	12/31/2025	50% vest subject to continued employment at 31 December 2025 and 50% vest achievement of revenue targets for the 2025 financial year as follows: a)0-25% of award for linear revenue up to USD\$50M b)25-50% of award for incremental revenue linearly from USD\$50m - \$125m+.	\$ 1.09
C Burns	3,658,161	4/18/2024	12/31/2026		\$ 0.89
R Long	1,144,130	10/8/2024	12/31/2026		\$ 0.70
D MacDougald	1,075,930	4/18/2024	12/31/2026		\$ 0.89
R Buttar	1,075,930	4/18/2024	12/31/2026	TSR performance relative to the entities of a select group of comparable listed battery technology entities over the Performance Period (1/1/24 to 31/12/26). The vesting percentage resulting from the TSR condition is subject to adjustment based on revenue performance in FY26.	\$ 0.89
R Buttar					
Tranche 2	37,500	10/6/2021	4/22/2024	Vest subject to continued service with the Company up to the vesting date.	\$ 4.92
Tranche 3	37,500	10/6/2021	4/22/2025		\$ 4.92

The number of performance rights over ordinary shares in the Company provided as remuneration to KMPs is shown on page 98. The performance rights carry no dividend or voting rights. Rights granted are dependent on the recipient's continued service, or achievement of performance related vesting conditions, by the vesting date.

Upon vesting, each performance right is convertible into one ordinary share of NOVONIX Limited. If a KMP ceases employment before the rights vest, the rights will be forfeited, except in limited circumstances that they are approved by the Board on a case-by-case basis.

Share Rights

The terms and conditions of each grant of share rights affecting remuneration in the current or a future reporting period are as follows, for each of our non-executive Directors:

	Number	Grant Date	Vesting Date	Grant Date Fair Value Per Unit AUD \$
A Bellas	109,749	April 17, 2024	December 31, 2024	\$ 0.965
S Burrow	84,145	April 17, 2024	December 31, 2024	\$ 0.965
R Edmonds	65,405	April 17, 2024	April 17, 2024	\$ 0.965
R Edmonds	109,749	April 17, 2024	December 31, 2024	\$ 0.965
N Liveris	—	—	—	—
R Natter	109,749	April 17, 2024	December 31, 2024	\$ 0.965
J Oelwang	109,749	April 17, 2024	December 31, 2024	\$ 0.965
S Vaidyanathan	109,749	April 17, 2024	December 31, 2024	\$ 0.965

The number of share rights over ordinary shares in the Company provided as remuneration to key management personnel is shown on page 99. The share rights carry no dividend or voting rights.

These share rights vest in full in one installment based solely on service to us through the vesting date and do not have any performance related vesting conditions.

Upon vesting, each share right is convertible into one ordinary share of NOVONIX Limited. If a non-executive Director ceases to hold office before the share rights vest, the rights will vest on a pro rata basis representing the proportion of the relevant financial year that such a person served as a non-executive Director. For example, if a non-executive Director who is issued share rights ceases to hold office halfway through the financial year, then that non-executive Director will only be entitled to half of the shares initially awarded.

(iii) Reconciliation of options, performance rights, share rights and ordinary shares held by KMP

The table below shows a reconciliation of options held by each KMP (to the extent they held any options at all) from January 1, 2024 to December 31, 2024.

Options

(iv) Loans with KMPs

During the financial year there were no loans to executive KMP during the financial year (2023: Nil)

(v) Other transactions with KMPs

There have been no other transactions with KMPs.

(vi) *Reliance on external remuneration consultants*

The Remuneration Committee engages AON to review its remuneration policies and to provide recommendations on KMP cash salary, short-term and long-term incentive plan design. AON was engaged by the Remuneration Committee independently of management. AON was paid \$218,575 for these services during the year ended December 31, 2024.

End of remuneration report (audited)

For personal use only

AUSTRALIAN DISCLOSURE REQUIREMENTS

Options Granted as Remuneration

No options have been granted over unissued shares during or since the end of the year ended December 31, 2024, to our Directors or senior management.

KMP Interests

The relevant interest of each KMP, as defined by section 608 or the Corporations Act, in the share capital of NOVONIX, as notified by the directors to the ASX in accordance with section 205G(1) of the *Corporations Act 2001*, at the date of this report is as follows:

Director	NOVONIX Limited ordinary shares	Share Rights over NOVONIX Limited ordinary shares
Anthony Bellas	2,643,792	109,749
Sharan Burrow	—	84,145
Ron Edmonds	65,405	109,749
Nick Liveris	1,394,681	—
Admiral Robert Natter	2,664,646	109,749
Jean Oelwang	79,165	109,749
Suresh Vaidyanathan ¹	—	—

¹ Mr. Vaidyanathan is not permitted to receive remuneration, including any equity incentives, in his personal capacity under the terms of his employment with Phillips 66 and terms of engagement with the Company (all of whose equity grants are paid or granted directly to Phillips 66).

Meetings of Directors

The number of meetings of the Company's Board of Directors and of each Committee held during the year ended December 31, 2024, and the number of meetings attended by each Director were:

	Full Meetings of Directors		Meetings of Audit & Risk Committee		Meeting of the Remuneration Committee		Meeting of the Nominating and Corporate Governance Committee	
	A	B	A	B	A	B	A	B
Admiral R J Natter	15	15	-	-	-	-	3	3

J Oelwang	14	15	3	3	5	5	3	3
S Vaidyanathan	15	15	-	-	5	5	-	-

A = Number of meetings attended

B = Number of meetings held during the time the director held office, was a member of the committee during the year and was not absent from a meeting due to a conflict of interest.

Shares under option

Unissued ordinary shares of NOVONIX Limited under option at the date of this report are as follows:

Date Options Granted	Expiry Date	Exercise Price AUD\$	Number Under Option	
			Vested	Unvested
March 13, 2019	Cessation of employment	\$ 0.50	—	8,500,000
March 14, 2019	Cessation of employment	\$ 0.50	516,667	—
December 17, 2019	Cessation of employment	\$ 0.50	—	1,000,000
February 4, 2020	Cessation of employment	\$ 0.50	—	1,000,000

Unissued ordinary shares of NOVONIX Limited under performance right at the date of this report totaled 15,343,410. 3,295,990 of the performance rights expire on December 31, 2027 and 1,858,272 expire on December 31, 2026 with the balance expiring on cessation of employment of the holder. 8,032,746 of the performance rights on issue were granted during the financial period, with the remaining 7,310,664 being granted in the prior financial years.

Unissued ordinary shares of NOVONIX Limited under share rights at the date of this report totaled 632,890. All of these rights were granted during the financial period and vested on December 31, 2024.

No performance right holder, share right holder, or option holder has any right to participate in any other share issue of the Company or any other entity.

Shares issued on the exercise of options during the year

The following ordinary shares of NOVONIX Limited were issued during the year ended December 31, 2024 on the exercise of options. No further shares have been issued since that date. No amounts are unpaid on any of the shares.

Date options granted	Issue price of shares	Number of shares
	AUD \$	issued
March 14, 2021	\$ 0.50	\$ 33,334
July 31, 2019	\$ 0.70	\$ 3,415,759

Insurance of Officers and Indemnities

During the financial period, NOVONIX Limited paid a premium of \$3,962,922 to insure the Directors and Secretaries of the Company.

The liabilities insured are legal costs that may be incurred in defending civil or criminal proceedings that may be brought against the officers in their capacity as officers of entities in the Company, and any other payments arising from liabilities incurred by the officers in connection with such proceedings. This does not include such liabilities that arise from conduct involving a willful breach of duty by the officers or the improper use by the officers of their position or of information to gain advantage for themselves or someone else or to cause detriment to the Company. It is not possible to apportion the premium between amounts relating to the insurance against legal costs and those relating to other liabilities.

Proceedings on Behalf of the Company

No person has applied to the Court under section 237 of the *Corporations Act 2001* for leave to bring proceedings on behalf of the Company, or to intervene in any proceedings to which the Company is a party, for the purpose of taking responsibility on behalf of the Company for all or part of those proceedings. No proceedings have been brought or intervened in on behalf of the Company with leave of the Court under section 237 of the *Corporations Act 2001*.

Audit and Non-Audit Services

Details of amounts paid or payable to the auditor (PricewaterhouseCoopers Australia) for audit and non-audit services during the period are disclosed in Note 8 Auditor's remuneration.

The Company may decide to employ the auditor on assignments additional to their statutory audit duties where the auditor's expertise and experience with the Company and/or the Company are important.

The Board has considered the position and, in accordance with advice received from the Audit & Risk Committee, is satisfied that the provision of the non-audit services is compatible with the general standard of independence for auditors imposed by the Corporations Act 2001. The Directors are satisfied that the provision of non-audit services by the auditor did not compromise the auditor independence requirements of the Corporations Act 2001 for the following reasons:

- all non-audit services have been reviewed by the Audit & Risk Committee to ensure they do not impact the impartiality and objectivity of the auditor
- none of the services undermine the general principles relating to auditor independence as set out in APES 110 *Code of Ethics for Professional Accountants*.

Auditor's Independence Declaration

A copy of the auditor's independence declaration as required under section 307C of the Corporations Act 2001 in relation to the audit for the year ended December 31, 2024, is included in Exhibit 99 of this annual report on Form 20-F.

Directors' Resolution

This report is made in accordance with a resolution of Directors.

R Natter
Chairman

Brisbane February 28, 2025

C. Board Practices

Board of Directors

Our Board of Directors currently consists of seven members. Under our Constitution and the ASX Listing Rules, we must hold an election of directors each year at our annual general meeting of shareholders. A director (other than our managing director) must not hold office (without re-election) past the third annual general meeting following the director's appointment or three years, whichever is longer. If there would otherwise not be a vacancy on the board, and no director is required to retire, then the director who has been longest in office since last being elected must retire. The retirement of a director from office under the Constitution and the re-election of a director or the election of another person to that office (as the case may be) takes effect at the conclusion of the meeting at which the retirement and re-election or election occurs.

The membership of our Board of Directors is directed by the following recommendations and requirements as set forth in the Corporations Act, the ASX Listing Rules and Corporate Governance Principles and Recommendations, our Constitution, and our Corporate Governance Charter, as applicable:

- the ASX Listing Rules and the Corporations Act do not require that a majority of our directors be independent, although it is recommended by recommendation 2.4 of the ASX Corporate Governance Principles and Recommendations, which differs from the independence standards under Nasdaq corporate governance listing standards. Our Board has determined that four of our seven directors are independent under the ASX Corporate Governance Principles and Recommendations;
- there must be a minimum of three directors, half of our directors should be non-executive directors, and, unless shareholders in a general meeting resolve otherwise, there will be a maximum of 12 directors. The appointment of an alternate director does not count towards the total number of directors. Within those limits, our Board of Directors may determine the number of directors to serve on our board at any one time;
- our Board of Directors has the power to appoint any person to be a director, either to fill a vacancy or as an additional director (provided that the total number of directors does not exceed the maximum number of directors permitted), and any director so appointed will hold office until the end of the next annual general meeting when he or she must seek re-election by way of ordinary resolution;
- a director may, with the approval of a majority of the Board of Directors, appoint a person to be that director's alternate director for any period that director decides, whom in the appointing director's absence may exercise any power that the appointing director may exercise and attend and vote in place of or on behalf of the appointing director, and will hold office until the office of the appointing director is vacated or the alternate director's appointment is terminated or suspended by a majority of the Board of Directors; and
- our Board of Directors should, collectively, have a broad range of experience, expertise, skills, and contacts relevant to the Company and its business.

Our Board of Directors has delegated responsibility for the strategic and operational management of our businesses to the Chief Executive Officer but remains responsible for overseeing the performance of management. The principal roles and responsibilities of our Board of Directors include the following:

- providing leadership and setting the strategic objectives of the Company;
- determining the Board's composition, including appointment and retirement or removal of the Chairman and Deputy Chairman (if applicable);
- overseeing the Company, including its control and accountability systems;
- appointing and removing the Chief Executive Officer or equivalent;
- where appropriate, ratifying the appointment and the removal of senior executives of the Company;
- reviewing, ratifying, and monitoring the risk management framework and setting the risk appetite within which the Board expects management to operate;

- approving and formulating company strategy and policy, monitoring senior executives' implementation of strategy;
- approving and monitoring operating budgets and major capital expenditures;
- overseeing the integrity of the Company's accounting and corporate reporting systems, including the external audit;
- monitoring industry developments relevant to the Company and its business;
- developing suitable key indicators of financial performance for the Company and its business;
- overseeing the Company's corporate strategy and performance objectives developed by management;
- overseeing the Company's compliance with its continuous disclosure obligations;
- approving the Company's remuneration framework;
- monitoring the overall corporate governance of the Company (including its strategic direction and goals for management, and the achievement of these goals); and
- overseeing committees of the Board of Directors.

Our Board of Directors has established delegated limits of authority, which define the matters that are delegated to management and those that require the Board of Directors' approval. Under the Corporations Act, at least one of our directors must be a resident Australian. None of our non-executive directors have any service contracts with us that provide for benefits upon termination of employment. Under our Corporate Governance Charter, the Board of Directors is required to meet at least six times per year.

Board Committees

To assist with the effective discharge of its duties, the Board of Directors has established an Audit and Risk Management Committee, a Remuneration Committee and a Nominating and Corporate Governance Committee. Each of these committees operates under a charter approved by our Board of Directors, which sets forth the purposes and responsibilities of the committee as well as qualifications for committee membership, committee structure and operations and committee reporting to the Board of Directors.

Audit and Risk Management Committee

The members of our Audit and Risk Management Committee are Mr. Bellas (Chair), Ms. Burrow and Ms. Oelwang. Each member of our Audit and Risk Management Committee can read and understand fundamental financial statements in accordance with applicable requirements. Mr. Bellas qualifies as an "audit committee financial expert," as such term is defined in the rules of the SEC, and all of the members of the Audit and Risk Management Committee are independent, as independence is defined under the ASX Corporate Governance Principles and Recommendations as well as the SEC and Nasdaq rules applicable to foreign private issuers.

The charter for our Audit and Risk Management Committee requires the committee to consist of at least three directors, all of whom must be non-executive directors and a majority of whom must be independent directors. The chairperson of our Audit and Risk Management Committee must be an independent director and cannot be the chairperson of our Board of Directors. Under its charter, the Audit and Risk Management Committee meets as often as the Committee members deem necessary in order to fulfil its role and at least twice each year.

The role of the Audit and Risk Management Committee is to advise our Board of Directors on the establishment and maintenance of a framework of internal controls for the Company's management and assist our Board of Directors with policy on the quality and reliability of financial information prepared for use by the Board. Specific responsibilities of our Audit and Risk Management Committee include:

- monitoring the establishment of an appropriate internal control framework, including information systems, and its operation and considering enhancements;
- assessing corporate risk (including economic, environmental, social sustainability and cybersecurity risks) and compliance with internal controls;

- overseeing business continuity planning and risk mitigation arrangements;
- assessing the objectivity and performance of the internal audit function and considering enhancements;
- reviewing reports on any material misappropriation, frauds, and thefts from the Company;
- reviewing reports on the adequacy of insurance coverage;
- monitoring compliance with relevant legislative and regulatory requirements (including continuous disclosure obligations) and declarations by the committee secretary in relation to those requirements;
- reviewing material transactions which are not a normal part of the Company's business;
- reviewing the nomination, performance, and independence of the external auditors, including recommendations to the Board for the appointment or removal of any external auditor and the rotation of the audit engagement partner;
- liaising with the external auditors and monitoring the conduct, scope, and adequacy of the annual external audit;
- reviewing management corporate reporting processes supporting external reporting, including the appropriateness of the accounting judgments or choices made by management in preparing the financial reports and statements;
- reviewing financial statements and other financial information distributed externally, including considering whether the financial statements reflect the understanding of the Audit and Risk Management Committee and otherwise provide a true and fair view of the financial position and performance of the Company;
- preparing and recommending for approval by the Board the corporate governance statement for inclusion in the annual report or any other public document;
- reviewing external audit reports and monitoring, where major deficiencies or breakdowns in controls or procedures have been identified, remedial action taken by management;
- reviewing any proposal for the external auditor to provide non-audit services and whether it might compromise the independence of the external auditor; and
- reviewing and monitoring compliance with the Code of Conduct.

Remuneration Committee

The members of our Remuneration Committee are Ms. Oelwang (Chair), Mr. Bellas, Ms. Burrow and Mr. Vaidyanathan. The role of the Remuneration Committee is to advise our Board of Directors on remuneration and issues relevant to remuneration policies and practices, including for our senior management and non-executive directors. The Remuneration Committee is required to hold at least two regular meetings each year. Specific responsibilities of our Remuneration Committee include:

- reviewing and evaluating relevant market practices and trends for remuneration relevant to the Company;
- reviewing and making recommendations to our Board of Directors for our remuneration practices, policies, and framework, including in relation to equity-based remuneration plans and superannuation arrangements and the allocation of the directors' fee pool;
- overseeing the performance and reviewing and making recommendations to our Board of Directors for the remuneration packages of our senior management and non-executive directors;
- preparing for our Board of Directors any report that may be required under applicable legal or regulatory requirements about remuneration matters and reviewing our reporting and disclosure practices in relation to the remuneration of our senior management and non-executive directors; and
- reviewing, making recommendations to our Board of Directors on remuneration by gender and other diversity criteria, reporting to our Board of Directors as necessary to facilitate compliance with our diversity policy, and reviewing and reporting to the Board, at least annually, on the proportion of women and men in the workforce at all levels of the Company, and their relative levels of remuneration.
- assisting the Board with respect to, and, to the extent authority is so delegated to it by the Board, administering the Company's long-term incentive and equity-based plans; administering and making determinations under and recommendations to the Board with respect to, the Company's policy for the recovery of erroneously awarded compensation (the "Clawback Policy");

- preparing for the Board any report that may be required under applicable legal or regulatory requirements about remuneration matters;
- reviewing the Company's reporting and disclosure practices in relation to the remuneration of directors and senior executives;
- reviewing, making recommendations to the Board on remuneration by gender (and other diversity benchmarks) and reporting to the Board as necessary to facilitate compliance with the Company's Diversity Policy; and
- reviewing and reporting to the Board, at least annually, on the proportion of women and men in the workforce at all levels of the Company, and their relative levels of remuneration.

The charter for our Remuneration Committee requires the committee to consist of at least three directors, all of whom must be non-executive directors and, until such time as required by applicable law or listing rules to consist of 100% independent directors, a majority of whom (including the committee Chair) must also be independent directors. Ms. Oelwang, Mr. Bellas and Ms. Burrow are considered independent directors under the ASX Corporate Governance Principles and Recommendations. Mr. Vaidyanathan represents a substantial shareholder and is therefore not considered independent under the ASX Corporate Governance Principles and Recommendations.

Nominating and Corporate Governance Committee

The members of our Nominating and Corporate Governance Committee are Admiral Natter (Chair), Mr. Bellas, and Ms. Oelwang. The role of the Nominating and Corporate Governance Committee is to review and consider the structure and balance of the Board, to make recommendations regarding the Company's director nominations process, and develop and maintain the Company's corporate governance policies, having regard to the applicable law and good corporate governance standards. The Nominating and Corporate Governance Committee is required to hold at least two regular meetings each year. Specific responsibilities of our Nominating and Corporate Governance Committee include:

- determining the qualifications, qualities, skills, and other expertise required to be a director and developing and recommending to the Board for its approval and disclosure, a Board skills matrix setting out the mix of skills and diversity that the Board currently has and/or is looking to achieve in its membership;
- identifying and screening, and if thought fit, recommending to the Board, individuals qualified to become members of the Board, after considering the necessary and desirable competencies of new Board members, and the range and depth of skills and the diversity of the Board;
- considering, and if thought fit, making recommendations to the Board regarding the re-election by shareholders of any director under the retirement by rotation provisions or any director who must stand for election as a result of extended tenure;
- undertaking the appropriate checks on candidates for the Board (including checks concerning the person's character, qualifications and experience, education, criminal record, bankruptcy history and independence as a director) and providing that information, where material and relevant, to shareholders before recommending a candidate for appointment or re-election;
- ensuring that the Company enters into a written agreement with each new Board member which sets out the terms of their appointment;
- assessing and considering the time required to be committed by a director to properly fulfil their duty to the Company and advise the Board, and assisting with the conduct of an annual evaluation of the Board, its committees and individual Directors, as well as the chair's annual performance review of the CEO and the assessment of the performance of the Board chair;
- reviewing the Board's committee structure and composition and making recommendations to the Board regarding the appointment of directors to serve as members of each committee and committee chair annually;

- identifying and making recommendations to the Board regarding the selection and approval of candidates to fill any vacancy on the Board and/or any Board committee, either by election by shareholders or appointment by the Board.
- developing and overseeing a Company orientation program for new directors and a continuing education program for current directors, periodically reviewing these programs and updating them as necessary;
- developing and recommending to the Board for approval a succession plan for non-executive directors and the CEO, reviewing such plan periodically, developing and evaluating potential candidates for the Board and recommending to the Board any changes to and any candidates for succession under such plan, taking into consideration, in the case of non-executive directors, the mix of skills, experience, expertise, diversity, independence and other qualities of existing directors and how the candidate's attributes will balance and complement those qualities and address any potential skill gaps in relation to the current composition of the Board;
- assessing and making recommendations to the Board in relation to, the independence of non-executive directors on appointment, and then annually and whenever any new interests or relationships are disclosed by a director;
- overseeing the Company's corporate governance practices and procedures, including identifying best practices and, at least once a year, reviewing and recommending to the Board for approval any changes to the documents, policies and procedures in the Company's corporate governance framework;
- reviewing and overseeing the implementation of the Company's Diversity Policy and, with the appropriate support and input from management, reviewing and reporting to the Board, on an annual basis, the effectiveness of such policy and progress in achieving its measurable objectives, the division of responsibilities and accountability for developing and implementing diversity initiatives across the organization, and the relative proportions of identified minorities on the Board, in senior management positions and in the Company's workforce;
- reviewing and, if thought fit, recommending to the Board for approval the Corporate Governance Statement for inclusion in the annual report;
- developing and recommending to the Board for approval a Company policy for the review and approval of related party transactions and to review, approve and oversee any transaction between the Company and any related party on an ongoing basis; and
- overseeing the Company's ESG strategy and initiatives, including:
 - o considering current and emerging ESG trends that may affect the Company's business, operations, performance or reputation;
 - o periodically reviewing reports from management regarding the Company's ESG strategy, initiatives, objectives, and performance metrics, and the associated risks and opportunities with respect to ESG matters;
 - o developing and recommending to the Board for approval policies and procedures relating to the Company's ESG strategy and initiatives;
 - o monitoring ongoing execution of the Company's ESG strategy and initiatives, and performance against key ESG metrics;
 - o reviewing ESG disclosures issued by the Company; and
 - o at least annually, assessing the overall effectiveness of the Company's ESG programs and, as and when appropriate, addressing with the Audit and Risk Management Committee issues that arise with respect to environmental and social sustainability risks.

The charter for our Nominating and Corporate Governance Committee requires the committee to consist of at least three directors, all of whom must be non-executive directors and a majority of whom (including the committee Chair) must also be independent directors. All of the members of the Nominating and Corporate Governance Committee are non-executive directors and are considered independent directors under the ASX Corporate Governance Principles and Recommendations.

Foreign Private Issuer Exemption

We qualify as a “foreign private issuer” as defined in Section 405 of the Securities Act. As a foreign private issuer, we are exempt from certain rules under the Exchange Act that impose disclosure requirements as well as procedural requirements for proxy solicitations under Section 14 of the Exchange Act. In addition, the members of our Board of Directors and senior management are not subject to short-swing profit and insider trading reporting obligations under Section 16 of the Exchange Act. They are, however, subject to the obligations to report changes in share ownership under Section 13 of the Exchange Act and related SEC rules, to the extent applicable.

The foreign private issuer exemption also permits us to follow home country corporate governance practices or requirements instead of certain Nasdaq listing requirements, including the following:

- We rely on an exemption from the requirement that our independent directors meet regularly in executive sessions under Nasdaq listing rules. The ASX Listing Rules and the Corporations Act do not require the independent directors of an Australian company to have such executive sessions.
- We rely on an exemption from the quorum requirements applicable to meetings of shareholders under Nasdaq listing rules. In compliance with Australian law, our Constitution provides that two shareholders present, in person or by proxy, attorney or a representative, shall constitute a quorum for a general meeting. Nasdaq listing rules require that an issuer provide for a quorum as specified in its by-laws for any meeting of the holders of ordinary shares, which quorum may not be less than 33 1/3% of the outstanding voting ordinary shares.
- We follow applicable Australian law and the ASX Listing Rules regarding prior shareholder approval in lieu of the requirement prescribed by Nasdaq listing rules that issuers obtain shareholder approval prior to the issuance of securities in connection with certain acquisitions, private placements of securities, or the establishment or amendment of certain stock option, purchase, or other compensation plans. Applicable Australian law and the ASX Listing Rules differ from Nasdaq requirements, with the ASX Listing Rules requiring prior shareholder approval for issuance of equity securities in a number of circumstances, including (i) issuance of equity securities exceeding 15% of our issued share capital in any 12-month period (but, in determining the 15% limit, securities issued under certain exceptions to the rule or with shareholder approval are not counted), (ii) subject to certain exceptions, issuance of equity to related parties (as defined in the ASX Listing Rules) and (iii) issuances of securities to directors or their associates under an employee incentive plan.
- The ASX Listing Rules and the Corporations Act do not require the establishment of a Remuneration Committee or a Nominating and Corporate Governance Committee, and, if established, do not require all members to be independent directors. However, under Rule 10A-3 promulgated under the Exchange Act, all members of our Audit and Risk Management Committee are required to be independent pursuant to the standards set forth in such rule, and we currently comply with this requirement.

Rule 10A-3 under the Exchange Act provides that the Audit and Risk Management Committee must have direct responsibility for the nomination, compensation, and choice of our auditors, as well as control over the performance of their duties, management of complaints made, and selection of consultants. Under Rule 10A-3, if the laws of a foreign private issuer’s home country require that any such matter be approved by the Board of Directors or the shareholders of the Company, the Audit and Risk Management Committee’s responsibilities or powers with respect to such matter may instead be advisory.

We intend to take all actions necessary for us to maintain compliance as a foreign private issuer under the applicable corporate governance requirements of the Sarbanes-Oxley Act, the rules adopted by the SEC and the listing rules of Nasdaq.

D. Employees

We had 202 employees as of December 31, 2024, 122 of whom were located in the United States and 80 were located in Canada. We believe we offer our employees competitive compensation packages and a dynamic work environment. We have been able to attract and retain qualified employees and maintain a core management team. We plan to hire additional experienced and talented employees in areas such as research and development, production, finance, and marketing as we grow our business.

We believe that we maintain a good working relationship with our employees, and we have not experienced any major labor disputes.

E. Share Ownership

The following table sets forth information with respect to the beneficial ownership of our ordinary shares as of December 31, 2024, for:

- each member of our senior management;
- each of our directors; and
- all our directors and senior management as a group.

To our knowledge, as of December 31, 2024, approximately 79,148,084 ordinary shares, or 13.9% of our ordinary shares, were held of record by 36 residents of the United States.

We have determined beneficial ownership in accordance with the rules and regulations of the SEC, and the information is not necessarily indicative of beneficial ownership for any other purpose. Except as indicated by the footnotes below, we believe, based on information furnished to us, that the people and entities named in the table below have sole voting and sole investment power with respect to all shares that they beneficially own.

Applicable percentage ownership is based on 567,941,993 ordinary shares outstanding as of December 31, 2024. In computing the number of shares beneficially owned by a person or entity and the percentage ownership of such person or entity, we deemed to be outstanding all shares subject to options and performance rights held by the person or entity that are currently exercisable, or exercisable within 60 days of December 31, 2024. However, except as described above, we did not deem such shares outstanding for the purpose of computing the percentage ownership of any other person or entity. The information contained in the following table is not necessarily indicative of beneficial ownership for any other purpose, and the inclusion of any shares in the table does not constitute an admission of beneficial ownership of those shares. Each of our shareholders is entitled to one vote per ordinary share. None of the holders of our ordinary shares have different voting rights from other holders of ordinary shares. We are not aware of any arrangement that may, at a subsequent date, result in a change of control of our company. For further information regarding options to purchase

ordinary shares and performance rights held by our directors and senior management, see “Management—Remuneration.”

Name of Beneficial Owner	Number of Ordinary Shares Beneficially Owned	Percentage of Shares Beneficially Owned
Dr. Christopher Burns ⁽¹⁾	4,083,150	*
Admiral Robert J Natter ⁽²⁾	2,774,395	*

Mr. Nicholas Liveris ⁽⁵⁾	1,394,681	*
Ms. Rashda Buttar ⁽⁶⁾	291,868	*
Mr. Darcy MacDougald ⁽⁷⁾	164,101	*
Ms. Jean Oelwang ⁽⁸⁾	188,914	*
Mr. Ron Edmonds ⁽⁹⁾	175,154	*
All directors and senior management as a group (9 persons)	11,865,485	2.0%

⁽¹⁾ Consists of 4,083,150 ordinary shares held beneficially by Dr. Christopher Burns, our Chief Executive Officer.

⁽²⁾ Consists of 1,786,370 ordinary shares held by HSBC Custody Nominees (Australia) Limited, an entity that manages the investment of Admiral Robert Natter, a member and Chairman of our Board of Directors, in the Company and 878,276 ordinary shares by Admiral Robert Natter beneficially. It also includes 109,749 share rights issuable for vested share rights.

⁽³⁾ Consists of 2,277,551 ordinary shares held by Loch Explorations Pty Ltd, and 321,777 ordinary shares held by AG Bellas Super Pty Ltd, entities which a member and Deputy Chairman of our Board of Directors, Mr. Anthony Bellas, controls. It also includes 109,749 share rights issuable for vested share rights.

⁽⁴⁾ Consists of 84,145 share rights issuable for vested share rights held beneficially by Ms. Sharan Burrow, a member of our Board of Directors.

⁽⁵⁾ Consists of 1,394,681 ordinary shares held beneficially by Mr. Nicholas Liveris, a member of our Board of Directors.

⁽⁶⁾ Consists of 291,868 ordinary shares held beneficially by Ms. Rashda Buttar, our Chief Legal and Administrative Officer.

⁽⁷⁾ Consists of 164,101 ordinary shares held beneficially by Mr. Darcy MacDougald, our Chief Operating Officer.

⁽⁸⁾ Consists of 79,165 ordinary shares held beneficially by Ms. Jean Oelwang, a member of our Board of Directors. It also includes 109,749 share rights issuable for vested share rights.

⁽⁹⁾ Consists of 65,405 ordinary shares held beneficially by Mr. Ron Edmonds, a member of our Board of Directors. It also includes 109,749 share rights issuable for vested share rights.

For information on arrangements for involving the employees in the capital of the Company as they relate to our directors and members of our senior management, see *Item 6. Directors, Senior Management and Employees — B. Compensation*.

The Company maintains two plans to provide equity awards to its directors, executives, employees and consultants, the Performance Rights Plan and the Executive Options Plan (the “Plans”). The Performance Rights Plan provides for issuance of performance rights to eligible participants designated by the Board, which entitle the grantee to an ordinary share (or the cash value) upon satisfaction of specified vesting conditions. Unvested performance rights generally lapse upon a termination of employment, other than due to redundancy, death or disability.

The Executive Options Plan provides for the issuance of stock options to eligible participants (other than directors) designated by the Board, which entitle the grantee to receive ordinary shares upon exercise once any vesting conditions have been satisfied. Options generally lapse upon a termination of employment, unless otherwise determined by the Board.

Performance rights (or a prorated portion, if determined by the Board) and stock options vest upon a change in control, unless otherwise determined by the Board, with treatment of the vested award determined by the Board in accordance with the applicable Plan.

Each of the Plans is administered by the Board. Performance rights and options have no voting rights, do not provide the right to dividends and cannot be transferred without the Board's approval.

F. Disclosure of a Registrant's Action to Recover Erroneously Awarded Compensation.

Not applicable.

Item 7. Major Shareholders and Related Party Transactions

A. Major Shareholders

Below is information with respect to the beneficial ownership of our ordinary shares as of December 31, 2024, for each person or group of affiliated persons known by us to beneficially own more than 5% of our ordinary shares. We have determined beneficial ownership in accordance with the rules and regulations of the SEC, and the information is not necessarily indicative of beneficial ownership for any other purpose.

- Phillips 66 Company beneficially owns 78,050,122 ordinary shares, or approximately 13.74% of our issued and outstanding ordinary shares, and, we believe, based on information furnished to us, holds sole voting and investment power with respect to such shares.
- LGES beneficially owns 28,263,492 ordinary shares, or approximately 4.98% of our issued and outstanding ordinary shares, and, we believe, based on information furnished to us, shares voting and investment power with respect to such shares with LG Chem, Ltd., the controlling shareholder of LGES. In the event LGES elects to convert all of the notes on the maturity date (in lieu of redeeming them), upon conversion, LGES would beneficially own 34,475,363 ordinary shares, or approximately 6.07% of our issued and outstanding ordinary shares. See *Item 10. Additional Information — C. Material Contracts*.

Applicable percentage ownership is based on 567,941,993 ordinary shares outstanding as of December 31, 2024. In computing the number of shares beneficially owned by a person or entity and the percentage ownership of such person or entity, we deemed to be outstanding all shares subject to options and performance rights held by the person or entity that are currently exercisable, or exercisable within 60 days of December 31, 2024. However, except as described above, we did not deem such shares outstanding for the purpose of computing the percentage ownership of any other person or entity. The information set forth above is not necessarily indicative of beneficial ownership for any other purpose, and the inclusion of any shares above does not constitute an admission of beneficial ownership of those shares. Each of our shareholders is entitled to one vote per ordinary share. None of the holders of our ordinary shares have different voting rights from other holders of ordinary shares. We are not aware of any arrangement that may, at a subsequent date, result in a change of control of our company. For further information regarding options to purchase ordinary shares and performance rights held by our directors and senior management, see "Management—Remuneration."

Unless otherwise indicated, the address of each beneficial owner listed above is c/o NOVONIX Limited, Level 38, 71 Eagle Street, Brisbane, Queensland 4000, Australia.

B. Related Party Transactions

During the fiscal year ended December 31, 2024:

- On April 18, 2024, 3,658,161 performance rights were granted to Chris Burns as an LTI. The performance rights (convertible to ordinary shares on a 1:1 basis) vest on December 31, 2026. The performance rights vest subject to the achievement of performance conditions. An expense of \$716,966 was recognized during the year ended December 31, 2024, relating to these performance rights.
- On April 18, 2024, 1,075,930 performance rights were granted to Rashda Buttar as an LTI. The performance rights (convertible to ordinary shares on a 1:1 basis) vest on December 31, 2026. The performance rights vest subject to the achievement of performance conditions. An expense of \$210,918 was recognized during the year ended December 31, 2024, relating to these performance rights.
- On April 18, 2024, 1,398,709 performance rights were granted to Nick Liveris as an LTI. These performance rights lapsed on cessation of Nick Liveris' employment with the Company, and accordingly no expense was recognized during the year ended December 31, 2024, relating to these performance rights.
- On April 18, 2024, 1,075,930 performance rights were granted to Darcy MacDougald as an LTI. The performance rights (convertible to ordinary shares on a 1:1 basis) vest on December 31, 2026. The performance rights vest subject to the achievement of performance conditions. An expense of \$210,873 was recognized during the year ended December 31, 2024, relating to these performance rights.
- On April 18, 2024, 109,749 share rights were granted to Tony Bellas. The share rights (convertible to ordinary shares on a 1:1 basis) vest on December 31, 2024. An expense of \$69,893 was recognized during the year ended December 31, 2024, relating to these share rights.
- On April 18, 2024, 109,749 share rights were granted to Robert Natter. The share rights (convertible to ordinary shares on a 1:1 basis) vest on December 31, 2024. An expense of \$69,893 was recognized during the year ended December 31, 2024, relating to these share rights.
- On April 18, 2024, 109,749 share rights were granted to Phillips 66 Company. The share rights (convertible to ordinary shares on a 1:1 basis) vest on December 31, 2024. An expense of \$69,893 was recognized during the year ended December 31, 2024, relating to these share rights.
- On April 18, 2024, 109,749 share rights were granted to Jean Oelwang. The share rights (convertible to ordinary shares on a 1:1 basis) vest on December 31, 2024. An expense of \$69,893 was recognized during the year ended December 31, 2024, relating to these share rights.
- On April 18, 2024, 109,749 share rights were granted to Ron Edmonds. The share rights (convertible to ordinary shares on a 1:1 basis) vest on December 31, 2024. An expense of \$69,893 was recognized during the year ended December 31, 2024, relating to these share rights.
- On April 18, 2024, 84,145 share rights were granted to Sharan Burrow. The share rights (convertible to ordinary shares on a 1:1 basis) vest on December 31, 2024. An expense of \$53,587 was recognized during the year ended December 31, 2024, relating to these share rights.
- On October 8, 2024, 1,144,130 performance rights were granted to Robert Long as an LTI. The performance rights (convertible to ordinary shares on a 1:1 basis) vest on December 31, 2026. The performance rights vest subject to the achievement of performance conditions. An expense of \$74,794 was recognized during the year ended December 31, 2024, relating to these performance rights.
- During the year ended December 31, 2024, Phillips 66 were paid fees totaling \$57,500 for Mr Suresh Vaidyanathan's services to the Company as a Director. Mr. Suresh Vaidyanathan is not permitted to receive remuneration in his personal capacity under the terms of his employment with Phillips 66 and terms of engagement with the Company. Accordingly, all fees earned by them are paid directly to Phillips 66.

In addition, on January 28, 2025, in conjunction with the institutional placement of ordinary shares completed in November 2024 and the non-underwritten share purchase plan completed in January 2025, the Company issued to Phillips 66 12,771,392 ordinary shares for approximately US\$5.0 million. The placement to Phillips 66 was approved by the Company's shareholders at an extraordinary general meeting held on January 22, 2025.

There were no other related party transactions for the period from the beginning of our last full fiscal year up to the latest practicable date. For details of disclosures relating to key management personnel, refer to Note 29.

Director and Senior Management Compensation

See *Item 6. Directors, Senior Management and Employees — B. Compensation* for information regarding compensation of our senior management and directors.

Indemnification Agreements

Our Constitution provides that, to the full extent permitted by law, to the extent that an officer is not otherwise indemnified pursuant to any insurance coverage, we will indemnify every person who is or has been an officer of the company against any liability incurred by that person as an officer. This includes any liability incurred by that person in their capacity as an officer of a related body corporate.

We intend to enter into Deeds of Indemnity, Insurance and Access, or Indemnity Deeds with each a non-executive director and executive officer. Under the Indemnity Deeds, we will agree to indemnify (to the maximum extent permitted under Australian law and our Constitution, subject to certain specified exceptions) each director and executive officer against all liabilities incurred in any capacity, including acting as an authorized representative of NOVONIX, and any and all costs and expenses relating to such a claim or to any notified event incurred by such director or executive officer, including costs and expenses reasonably and necessarily incurred to mitigate any liability for such a claim or any claim which may arise from such a notified event. The Indemnity Deeds will provide that the indemnities are unlimited as to amount, continuous and irrevocable.

Separately, we intend to obtain insurance for our directors and executive officers, as will be required by the Indemnity Deeds.

As far as indemnification for liabilities arising under the Securities Act may be permitted to directors, officers or persons controlling us pursuant to the foregoing provisions, we have been informed that in the opinion of the SEC such indemnification is against public policy as expressed in the Securities Act and is therefore unenforceable.

Related Person Transaction Policy

We comply with Australian law and the rules and regulations of the ASX regarding approval of transactions with related parties. Under Australia's securities laws and ASX rules, transactions with directors or significant shareholders of the Company (or their associates) may require shareholder approval depending on the size or nature of the transaction.

All of the transactions described above were entered into prior to the adoption of the written policy, but our Board of Directors and, where necessary, our shareholders, evaluated and approved all transactions that were considered to be related party transactions under Australian law and the rules and regulations of the ASX at the time at which they were consummated.

C. Interests of Experts and Counsel

Not applicable.

Item 8. Financial Information

A. Consolidated Financial Statements and Other Financial Information

For a list of all financial statements filed as part of this annual report, see “Item 18. Financial Statements.” For information on our dividend policy see “Item 10.B. Memorandum and Articles of Association.”

Legal Proceedings

We believe that we are currently not a party to any material legal proceedings. From time to time, we may become involved in legal proceedings arising in the ordinary course of our business. Such claims or legal actions, even if without merit, could result in the expenditure of significant financial and management resources and potentially result in civil liability for damages. For risks related to legal proceedings, see “Risk Factors—***From time to time, we may be involved in litigation, regulatory actions or government investigations and inquiries, which could have an adverse impact on our profitability and consolidated financial position,***” and “Risk Factors—***We may become involved in lawsuits or other proceedings to protect or enforce our intellectual property, which could be expensive, time-consuming and unsuccessful and have a negative effect on the success of our business.***”

B. Significant Changes

No significant change, other than as otherwise described in this annual report on Form 20-F, has occurred in our operations since the date of our consolidated financial statements included in this annual report on Form 20-F.

Item 9. The Offer and Listing

A. Offer and Listing Details

The principal trading market for our ordinary shares is the Australian Securities Exchange ("ASX"), on which the ordinary shares have been listed since 2015 and trade under the symbol "NVX." Our ADSs are listed and trading on Nasdaq under the symbol "NVX."

B. Plan of Distribution

Not applicable.

C. Markets

Our ordinary shares are publicly traded on the ASX under the symbol “NVX.”

Our ADSs, each representing four of our ordinary shares, are publicly traded on the Nasdaq Global Market under the symbol “NVX.” The Bank of New York Mellon, acting as depositary, registers and delivers the ADSs.

D. Selling Shareholders

Not applicable.

E. Dilution

Not applicable.

F. Expenses of the Issue

Not applicable.

Item 10. Additional Information

A. Share Capital

Not applicable.

B. Memorandum and Articles of Association

Information called for by this Item 10.B is set forth in the section "Memorandum and Articles of Association" included in Exhibit 2.3 to this annual report, filed in accordance with instruction 2(d) of the Instructions as to Exhibits of Form 20-F, and is hereby incorporated by reference thereto.

C. Material Contracts

Except as described below or elsewhere in this annual report, all material contracts entered into by us in the past two years preceding the filing of this annual report were entered into in the ordinary course of business:

Subscription Agreement with Phillips 66.

On January 28, 2025, in conjunction with the institutional placement of ordinary shares and the non-underwritten share purchase plan, the Company issued to Phillips 66 12,771,392 ordinary shares for US\$5.0 million. The placement to Phillips 66 was approved by the Company's shareholders at an extraordinary general meeting held on January 22, 2025.

Unsecured Convertible Note Agreement with LG Energy Solution.

On June 21, 2023, pursuant to the LGES Note Agreement, NOVONIX issued an aggregate principal amount of US\$30 million unsecured convertible notes to LGES. The convertible notes bear interest at a rate of four percent per annum and have a maturity date of June 7, 2028. The notes will mandatorily convert into ordinary shares upon LGES' acceptance of the first purchase order under any purchase agreement that it may enter into with NOVONIX. However, LGES may elect to convert some or all of the notes prior to such time. No interest would be payable on the notes that are converted into ordinary shares prior to the maturity date. On the maturity date, LGES may elect to redeem or convert all of the notes then outstanding, in which case interest will be payable in cash (in the case of redemption) or "in-kind" (in the case of conversion). The conversion price of the notes is AUD\$1.60 per ordinary share. NOVONIX plans to utilize the proceeds for continued development of anode materials, operational needs and general corporate purposes.

D. Exchange Controls

Australia has largely abolished exchange controls on investment transactions. The Australian dollar is freely convertible into U.S. dollars or other currencies. In addition, there are currently no specific rules or limitations regarding the export from Australia of profits, dividends, capital or similar funds belonging to foreign investors, except that certain payments to non-residents must be reported to the Australian Cash Transaction Reports Agency, which monitors such transaction, and amounts on account of potential Australian tax liabilities may be required to be withheld unless a relevant taxation treaty can be shown to apply and under such there are either exemptions or limitations on the level of tax to be withheld.

E. Taxation

The following summary of material U.S. federal income tax and Australian tax considerations of an investment in the ADSs is based upon the federal income tax laws of the United States and regulations promulgated thereunder and the tax laws of Australia and the regulations promulgated thereunder, each as in effect as of the date of this annual report, all of which are subject to change or differing interpretations, possibly with retrospective effect. This summary does not deal with all possible tax consequences relating to an investment in the ADSs, including tax consequences under U.S. state or local tax laws, U.S. federal tax laws other than U.S. federal income tax laws, certain Australian tax laws, and the tax laws of any jurisdiction outside of the United States and Australia.

U.S. Federal Income Tax Considerations

The following describes material U.S. federal income tax considerations relating to the acquisition, ownership, and disposition of the ADSs, and the ownership and disposition of any ordinary shares received in exchange for such ADSs from the depository. This summary addresses these tax considerations only for U.S. holders (as defined below) that hold ADSs, and any ordinary shares received in exchange for such ADSs from the depository, as capital assets (generally, property held for investment).

This summary is based on the U.S. Internal Revenue Code of 1986, as amended (the “Code”), existing, proposed and temporary U.S. Treasury Regulations promulgated thereunder and administrative and judicial interpretations thereof, in each case, as in effect on the date hereof and all of which are subject to change and to differing interpretations, possibly with retroactive effect. Any such change or differing interpretations could affect the tax considerations described below. There can be no assurances that the U.S. Internal Revenue Service (the “IRS”) will not take a position that differs from those described below or that such a position would not be sustained by a court. We have not obtained, nor do we intend to obtain, a ruling with respect to the U.S. federal income tax considerations of the purchase, ownership, or disposition of the ADSs or ordinary shares. Accordingly, U.S. holders should consult their tax advisors concerning the U.S. federal, state, local and non-U.S. tax consequences of acquiring, owning, and disposing of the ADSs or ordinary shares in their particular circumstances.

This summary does not address any U.S. federal tax considerations other than U.S. federal income tax considerations (such as estate or gift tax considerations, the Medicare contribution tax imposed on certain net investment income, or any state, local, or non-U.S. tax considerations).

This summary does not address all U.S. federal income tax considerations that may be relevant to a U.S. holder based on its particular circumstances. This summary also does not address U.S. federal income tax considerations applicable to a U.S. holder that may be subject to special tax rules including the following:

- banks, financial institutions, or insurance companies;
- brokers, dealers, or traders in securities, currencies, commodities, or notional principal contracts;
- tax-exempt entities;
- individual retirement accounts and other tax-deferred accounts;
- real estate investment trusts or regulated investment companies;
- persons that hold the ADSs or our ordinary shares as part of a “hedging,” “integrated,” “wash sale” or “conversion” transaction or as a position in a “straddle” for U.S. federal income tax purposes;
- S corporations, partnerships, or other pass-through entities for U.S. federal income tax purposes and investors in such entities;
- former citizens or long-term residents of the United States;
- persons that received the ADSs as compensation;
- persons required to accelerate the recognition of any item of gross income as a result of any item of gross income with respect to the ADSs or our ordinary shares being taken into account in an applicable financial statement;
- persons acquiring the ADSs in connection with a trade or business conducted outside of the United States, including a permanent establishment or a fixed base in Australia;
- persons subject to the alternative minimum tax;
- holders that own directly, indirectly, or constructively, 10% or more of the voting power or value of our equity interests; and
- holders that have a “functional currency” other than the U.S. dollar.

Persons who hold the ADSs and fall within one of the categories above are advised to consult their tax advisor regarding the specific U.S. federal income tax consequences which may apply to their particular situation.

For the purposes of this description, a “U.S. holder” is a beneficial owner of the ADSs or our ordinary shares that is, for U.S. federal income tax purposes:

- an individual who is a citizen or resident of the United States;
- a corporation created or organized under the laws of the United States, any state thereof or the District of Columbia;
- an estate, the income of which is subject to U.S. federal income taxation regardless of its source; or
- a trust, if a court within the United States is able to exercise primary supervision over its administration and one or more U.S. persons have the authority to control all of the substantial decisions of such trust, or if such trust has a valid election in effect under applicable U.S. Treasury Regulations to be treated as a U.S. person.

If an entity treated as a partnership for U.S. federal income tax purposes holds the ADSs or our ordinary shares, the U.S. federal income tax consequences relating to an investment in the ADSs, and our ordinary shares will depend in part upon the status of the partner and the activities of the partnership. Such a partner or partnership should consult its tax advisor regarding the specific U.S. federal income tax considerations of acquiring, owning, and disposing of the ADSs or our ordinary shares in its particular circumstances.

U.S. holders of the ADSs should consult their tax advisors as to the particular tax consequences applicable to them relating to the acquisition, ownership, and disposition of the ADSs or our ordinary shares, including the applicability of U.S. federal, state and local tax laws, Australian tax laws and other non-U.S. tax laws.

ADSs. In general, for U.S. federal income tax purposes, a U.S. holder holding ADSs will be treated as the owner of the ordinary shares represented by the ADSs. Accordingly, exchanges with the depository of ADSs for ordinary shares, and of ordinary shares for ADSs, generally will not be subject to U.S. federal income tax.

Distributions. As described under the heading “Dividend Policy,” we do not expect to make any distributions in respect of the ADSs or our ordinary shares. Subject to the discussion under “—Passive Foreign Investment Company Considerations,” below, the gross amount of any distribution (including any amounts withheld in respect of Australian tax or in respect of fees payable to the depository) actually or constructively received by a U.S. holder with respect to the ADSs or our ordinary shares generally will be taxable to the U.S. holder as a dividend to the extent of the U.S. holder’s pro rata share of our current or accumulated earnings and profits as determined under U.S. federal income tax principles. Generally, distributions in excess of our current and accumulated earnings and profits will be treated as a non-taxable return of capital to the extent of the U.S. holder’s adjusted tax basis in the ADSs or our ordinary shares, and thereafter as capital gain from the disposition of the ADSs or our ordinary shares. However, since we do not intend to calculate our earnings and profits under U.S. federal income tax principles, it is expected, and U.S. holders should assume, that any distribution will be reported as a dividend and will constitute ordinary dividend income to a U.S. holder. Any dividends will generally be treated as foreign source and will not be eligible for the dividends-received deduction generally allowed to corporate U.S. holders.

Subject to the discussion under “—Passive Foreign Investment Company Considerations,” below, dividends paid to non-corporate U.S. holders may qualify as “qualified dividend income” eligible for the preferential rates of taxation applicable to long-term capital gains if we are a “qualified foreign corporation” and certain other requirements (discussed below) are met. We generally will be considered to be a qualified foreign corporation (a) if we are eligible for the benefits of the Convention between the Government of the United States of America and the Government of Australia for the Avoidance of Double Taxation and the Prevention of Fiscal Evasion with Respect to Taxes on Income, signed on August 6, 1982, as amended and currently in force (the “U.S.-Australia Tax Treaty”), or (b) the ADSs or our ordinary shares are readily tradable on an established securities market in the United States. The ADSs are currently listed on the Nasdaq Global Market, which is an established securities market in the United States, although there can be no assurance that the ADSs will remain listed on Nasdaq or be considered readily tradable on an established securities market in the United States now or in the future. In addition, we believe that we qualify as a resident of Australia for purposes of, and are eligible for the benefits of, the U.S.-Australia Tax Treaty, although there can be no assurance in this regard. Therefore, subject to the discussion under “—Passive Foreign Investment Company Considerations,” below, any dividends on the ADSs or our ordinary shares

generally will be “qualified dividend income” in the hands of individual U.S. holders, provided that a holding period requirement (more than 60 days of ownership, without protection from the risk of loss, during the 121-day period beginning 60 days before the ex-dividend date) and certain other requirements are met.

A U.S. holder may be able to claim as a credit against its U.S. federal income tax liability the amount of any Australian tax withheld from any dividends at a rate not exceeding an applicable rate under the U.S.-Australia Tax Treaty. Alternatively, a U.S. holder may deduct such Australian taxes from its U.S. federal taxable income, provided that the U.S. holder elects to deduct rather than credit all foreign income taxes paid or accrued for the relevant taxable year. The rules governing U.S. foreign tax credits are complex. Each U.S. holder should consult its tax advisors regarding the foreign tax credit rules.

In general, the amount of any distribution paid to a U.S. holder in a foreign currency will be the U.S. dollar value of the foreign currency calculated by reference to the spot exchange rate on the day the depositary receives the distribution (in the case of ADSs) or on the day the distribution is received by the U.S. holder (in the case of ordinary shares), regardless of whether the foreign currency is converted into U.S. dollars at that time. If distributions received in a foreign currency are converted into U.S. dollars on the day they are received, a U.S. holder should not be required to recognize foreign currency gain or loss in respect of the distribution. A U.S. holder that does not convert foreign currency received as a distribution on an ordinary share into U.S. dollars on the date of receipt generally will have a tax basis in such foreign currency equal to the U.S. dollar value of such foreign currency on the date of receipt. Any foreign currency gain or loss a U.S. holder recognizes on a subsequent conversion of foreign currency into U.S. dollars will be U.S. source ordinary income or loss.

As discussed below under “*Item 12. Description of Securities Other Than Equity Securities – American Depositary Shares—Fees and Expenses*,” the amount of any distribution that is paid to a U.S. holder will be reduced by certain fees that such U.S. holder is required to pay to the depositary. The amount of any dividend a U.S. holder is deemed to receive and include in income for U.S. federal income tax purposes will not be reduced by the amount of any fees that are withheld, and a U.S. holder would be deemed to pay the amount of such fees to the depositary. Any such fees generally will be treated as items of investment expense which may not be deductible in the case of certain investors due to general limitations on the deductibility of investment expenses. U.S. holders should consult their tax advisor with respect to the tax treatment of the payment of any such fees to the depositary.

Sale or Other Taxable Disposition. A U.S. holder generally will recognize gain or loss for U.S. federal income tax purposes upon the sale or other taxable disposition of the ADSs or the ordinary shares in an amount equal to the difference between the U.S. dollar value of the amount realized from such disposition and the U.S. holder’s adjusted tax basis in those ADSs or ordinary shares, determined in U.S. dollars. Subject to the discussion under “—Passive Foreign Investment Company Considerations” below, any such gain or loss generally will be a capital gain or loss and will be long-term capital gain or loss if the U.S. holder’s holding period for such ADSs or ordinary shares is more than one year at the time of such disposition. A U.S. holder’s adjusted tax basis in the ADSs or our ordinary shares generally will be equal to the cost of such ADSs or ordinary shares. Any long-term capital gain from the disposition of the ADSs or our ordinary shares by a non-corporate U.S. holder generally is eligible for a preferential rate of taxation. The deductibility of capital losses for U.S. federal income tax purposes is subject to limitations. Any such gain or loss that a U.S. holder recognizes generally will be treated as U.S. source gain or loss for foreign tax credit limitation purposes.

For a cash basis taxpayer, any units of foreign currency received on a disposition of the ADSs or our ordinary shares that are treated as traded on an established securities market are translated into U.S. dollars at the spot exchange rate on the settlement date of the disposition. No foreign currency exchange gain or loss will result for a cash basis taxpayer from currency fluctuations between the trade date and the settlement date of such a disposition.

An accrual basis taxpayer may elect the same treatment required of cash basis taxpayers with respect to dispositions of the ADSs or our ordinary shares that are traded on an established securities market, provided the election is applied consistently from year to year. Such an election may not be changed without the consent of the IRS. For an accrual basis taxpayer who does not make such election or if the ADSs or our ordinary shares that are not treated as traded on an established securities market, any units of foreign currency received on a disposition of the ADSs or our ordinary shares

are translated into U.S. dollars at the spot exchange rate on the trade date of the disposition. In such case, the taxpayer may recognize exchange gain or loss based on currency fluctuations between the trade date and the settlement date. Any foreign currency gain or loss a U.S. holder recognizes will be U.S. source ordinary income or loss.

Passive Foreign Investment Company Considerations. Generally, we will be a “passive foreign investment company” (“PFIC”) for U.S. federal income tax purposes for any taxable year in which, after applying certain look-through rules with respect to the income and assets of our subsidiaries, either: (1) at least 75% of our gross income is “passive income” or (2) at least 50% of the average quarterly value of our total gross assets (which would generally be measured by fair market value of our assets) is attributable to assets that produce “passive income” or are held for the production of “passive income.” For purposes of these calculations, we will be treated as holding our proportionate share of the assets of and receiving directly our proportionate share of the income of, any corporation in which we directly or indirectly own at least 25% (by value) of the shares. Passive income for this purpose includes dividends, interest, royalties, rents, gains from commodities and securities transactions and the excess of gains over losses from the disposition of assets which produce passive income.

Based on our current and anticipated operations and composition of our assets and income, we believe that we were not a PFIC for U.S. federal income tax purposes for our tax year ended December 31, 2023. However, there can be no assurance that we will not be a PFIC for the current taxable year or any subsequent year. The determination of PFIC status is a factual determination that must be made annually and cannot be made until the close of a taxable year. In particular, our PFIC status may be determined in large part based on the market price of the ADSs and our ordinary shares. The market price of the ADSs and our ordinary shares may fluctuate, and a significant decrease in the market price could cause us to be treated as a PFIC. Moreover, the determination of PFIC status depends, in part, on the application of complex U.S. federal income tax rules which are subject to differing interpretations. Accordingly, there can be no assurance that we would not be a PFIC for the current taxable year or any future taxable year.

If we are a PFIC, a U.S. holder will be subject to a special tax at ordinary income tax rates on “excess distributions,” including certain distributions by us and any gain that the U.S. holder recognizes on the sale or other disposition of the ADSs or our ordinary shares. Distributions received by a U.S. holder (other than distributions in the first year that a U.S. holder holds the ADSs or ordinary shares) in a taxable year that exceed 125% of the average annual distributions received during the shorter of the three preceding taxable years or the portion of the U.S. holder’s holding period for the ADSs or ordinary shares that precedes the taxable year of the distribution will be treated as an excess distribution. The amount of U.S. federal income tax on any excess distributions will be increased by an interest charge to compensate for the tax deferral, calculated as if the excess distributions were earned ratably over the period that the U.S. holder has held the ADSs or ordinary shares. Dividends received with respect to the ADSs, or our ordinary shares will not be eligible for the preferential tax rate applicable to “qualified dividend income” received by non-corporate U.S. holders if we are a PFIC for the taxable year of the distribution or for the preceding taxable year. Classification as a PFIC may also have other adverse tax consequences. A U.S. holder may be able to mitigate certain of these adverse tax consequences if it is able to make a timely qualified electing fund election (a “QEF election”) or a mark to market election with respect to the ADSs. However, a QEF election may only be made by a U.S. holder if we provide such holder with certain information, and we do not expect to provide U.S. holders with the information necessary to make a QEF election in the event we were to be a PFIC.

If we are a PFIC in any year in which a U.S. holder owns the ADSs or our ordinary shares, we would continue to be treated as a PFIC with respect to such U.S. holder in all succeeding years during which the U.S. holder owns the ADSs or ordinary shares, regardless of whether we continue to meet the tests described above, unless we cease to be a PFIC and the U.S. holder has made certain elections under applicable U.S. Treasury regulations with respect to its ADSs or ordinary shares.

If a U.S. holder owns the ADSs or our ordinary shares during any taxable year in which we are a PFIC, the U.S. holder generally will be required to file an IRS Form 8621 (Information Return by a Shareholder of a Passive Foreign Investment Company or Qualified Electing Fund) with respect to the Company, generally with the U.S. holder’s U.S. federal income tax return for that year. U.S. holders should consult their tax advisor regarding any annual filing requirements.

The U.S. federal income tax rules relating to PFICs are complex. Prospective U.S. holders should consult their tax advisors with respect to the acquisition, ownership and disposition of the ADSs or our ordinary shares, the consequences to them of an investment in a PFIC, any elections available with respect to the ADSs or ordinary shares (including QEF elections and mark-to-market elections) and the IRS information reporting obligations with respect to the acquisition, ownership and disposition of the ADSs and ordinary shares.

Backup Withholding and Information Reporting. U.S. holders generally will be subject to information reporting requirements with respect to dividends paid on the ADSs or our ordinary shares, and on the proceeds from the sale, exchange or other disposition of the ADSs or our ordinary shares that are paid within the United States or through U.S.-related financial intermediaries, unless the U.S. holder is an “exempt recipient.” In addition, U.S. holders may be subject to backup withholding on such payments, unless the U.S. holder provides a correct taxpayer identification number and a duly executed IRS Form W-9 or otherwise establishes an exemption. Backup withholding is not an additional tax, and the amount of any backup withholding will be allowed as a credit against a U.S. holder’s U.S. federal income tax liability and may entitle such holder to a refund, provided that the required information is timely furnished to the IRS.

Foreign Asset Reporting. Certain U.S. holders who are individuals are required to report information relating to an interest in the ADSs and our ordinary shares, subject to certain exceptions (including an exception for ADSs and ordinary shares held in accounts maintained by U.S. financial institutions) by filing IRS Form 8938 (*Statement of Specified Foreign Financial Assets*) with their U.S. federal income tax return. Substantial penalties may be imposed upon a U.S. holder that fails to comply. U.S. holders should consult their tax advisors regarding their information reporting obligations, if any, with respect to their ownership and disposition of the ADSs or our ordinary shares.

THE DISCUSSION ABOVE IS A SUMMARY OF THE U.S. FEDERAL INCOME TAX CONSEQUENCES OF AN INVESTMENT IN THE ADSs AND IS BASED UPON LAWS AND RELEVANT INTERPRETATIONS THEREOF IN EFFECT AS OF THE DATE OF THIS ANNUAL REPORT, ALL OF WHICH ARE SUBJECT TO CHANGE OR DIFFERING INTERPRETATION, POSSIBLY WITH RETROACTIVE EFFECT. EACH PROSPECTIVE INVESTOR SHOULD CONSULT ITS TAX ADVISOR ABOUT THE TAX CONSEQUENCES TO IT OF AN INVESTMENT IN THE ADSs IN LIGHT OF THE INVESTOR’S OWN CIRCUMSTANCES.

Australian Tax Considerations

In this section, we discuss material Australian income tax, landholder duty and goods and services tax considerations related to the acquisition, ownership, and disposal by the absolute beneficial owners of the ADSs or ordinary shares represented by ADSs. It is based upon existing Australian tax law and administrative practice as of the date of this annual report, which is subject to change, possibly retrospectively. This discussion does not address all aspects of Australian tax law which may be important to particular investors in light of their individual investment circumstances, such as ADSs or shares held by investors subject to special tax rules (for example, authorized deposit-taking institutions, insurance companies or tax-exempt organizations). In addition, this summary does not discuss any non-Australian or state tax considerations, other than landholder duty.

Prospective investors are urged to consult their tax advisors regarding the Australian and non-Australian income and other tax considerations of the acquisition, ownership, and disposal of the ADSs or shares, including before the deposit of shares with the depositary in exchange for ADSs. This summary is based upon the premise and assumption that the holder of an ADS is not an Australian tax resident and is not carrying on business in Australia through a permanent establishment or similar taxable nexus (referred to as a “Non-Australian Holder” in this summary).

Nature of ADSs for Australian Taxation Purposes

Prospective investors and non-Australian holders of ADSs should obtain specialist Australian tax advice regarding their rights and obligations under the deposit agreement with the depositary, including whether the deposit arrangement would result in the holders of an ADS being “absolutely entitled” to the underlying shares represented by the ADS for Australian taxation purposes, especially before the prospective investor or Non-Australian Holder takes any action either to: (1) deposit ordinary shares to the depositary in exchange for ADSs; or (2) surrender ADSs to the depositary for cancellation to receive the ordinary shares underlying the Non-Australian Holder's ADSs. Apart from certain aspects of the

Australian tax legislation (for example, the Australian capital gains tax and withholding tax provisions, which are discussed below), there is no express legislative basis for disregarding “bare trusts” or similar arrangements for Australian tax purposes generally, and the Australian Taxation Office has not published any binding guidance in respect of ADS arrangements.

Consistent with our understanding that the deposit agreement, which is proposed for the holders of ADSs, is on similar terms to agreements that govern ADSs in respect of other foreign private issuers, this summary proceeds on the assumption that the deposit arrangement results in holders of ADSs being “absolutely entitled” to the underlying shares and also “presently entitled” to any dividend paid on the underlying ordinary shares. On this basis, holders of ADSs can be treated as the owners of the underlying ordinary shares for Australian capital gains tax purposes and dividends paid on the underlying ordinary shares will also be treated as dividends derived by the holders of ADSs as the persons presently entitled to those dividends.

The Australian tax implications of depositing shares with the depositary in exchange for ADSs will depend on the individual circumstances of the investor. For investors who hold such shares on capital account, on the basis of the assumption regarding absolute entitlement the deposit of such shares with the depositary should not be subject to Australian capital gains tax.

Taxation of Dividends

Australia operates a dividend imputation system under which dividends may be declared to be “franked” to the extent they are paid out of company profits that have been subject to income tax. Fully franked dividends are not subject to dividend withholding tax. To the extent that dividends are unfranked, or partly franked, the unfranked amount of dividends payable to Non-Australian Holders will be subject to dividend withholding tax except to the extent they are declared to be “conduit foreign income,” or CFI. Dividend withholding tax will be imposed at 30%, unless a shareholder or other specified recipient is a resident of a country with which Australia has a double taxation treaty and qualifies for the benefits of the treaty. For example, under the provisions of the current Double Taxation Convention between Australia and the United States, the Australian tax withheld on unfranked dividends that are not declared to be CFI paid by us to which a resident of the United States is beneficially entitled generally is limited to 15%.

However, under the Double Taxation Convention between Australia and the United States, if a U.S. resident company that is a Non-Australian Holder directly owns a 10% or more voting interests in NOVONIX, the Australian tax withheld on unfranked dividends that are not declared to be CFI paid by us to which the company is beneficially entitled is generally limited to 5%.

Character of ADSs or Shares for Australian Taxation Purposes

The Australian income tax treatment of a sale or disposal of the ADSs or underlying shares will depend on whether they are held on revenue or capital account. ADSs may be held on revenue rather than capital accounts, for example, where they are held by share traders, or any profit arises from a profit-making undertaking or scheme entered into by the holder. Non-Australian Holders of ADSs should obtain specialist Australian tax advice regarding the characterization of any gain or loss on a sale or disposal of the ADSs or underlying shares as revenue or capital in nature.

Regarding the landholder duty considerations for the sale/disposal of the ADSs or underlying shares, please refer to the below comments under “Landholder Duty”.

Regarding the goods and services tax considerations for the sale/disposal of the ADSs or underlying shares, please refer to the below comments under “Goods and Services Tax”.

Tax on Sales or other Dispositions of Shares or ADSs—Capital Gains Tax

Non-Australian Holders who are treated as the owners of the underlying shares on the basis that they are absolutely entitled to those shares will not be subject to Australian capital gains tax on the gain made on a sale or other disposal of ordinary shares, provided the shares are not “taxable Australian property.” Taxable Australian property includes “indirect Australian real property interests,” which are interests in a company where:

- that Non-Australian Holder, together with its associates (as defined in the relevant Australian tax legislation), holds 10% or more of that company’s issued shares, at the time of disposal or for a 12-month period during the two years prior to disposal; and
- more than 50% of that company’s assets held directly or indirectly, determined by reference to market value, consists of Australian real property (which includes land and leasehold interests) or Australian mining, quarrying or prospecting rights at the time of disposal.

Australian capital gains tax applies to net capital gains at a taxpayer’s marginal tax rates. Net capital gains are calculated after reduction for capital losses, which may only be offset against capital gains.

If a Non-Australian Holder of ADSs was not absolutely entitled to the underlying shares, and the ADSs were held on capital account, the same principles would apply in determining whether a gain on the sale or disposal of the ADSs would be subject to Australian capital gains tax. That is, a Non-Australian Holder should not be directly subject to Australian capital gains tax on the sale or disposal of the ADSs provided the ADSs are not “taxable Australian property.”

The 50% capital gains tax discount is not available to Non-Australian Holders on gains from assets where they were non-Australian tax residents during the entire holding period. An apportioned discount rate may be available where the holder has been both a Non-Australian Holder and an Australian Tax Resident throughout the holding period. Companies are not entitled to a capital gains tax discount.

Broadly, where there is a disposal of “taxable Australian property,” which includes indirect Australian real property interests, the purchaser will be required to withhold and remit to the Australian Taxation Office, or the ATO, 12.5% of the proceeds from the sale. A transaction is excluded from the withholding requirements in certain circumstances, including where the transaction has a market value of \$750,000 or less, or is an on-market transaction conducted on an approved stock exchange, a securities lending arrangement, or is conducted using a broker operated crossing system. There may also be an exception to the requirement to withhold where a Non-Australian Holder provides a declaration that their ordinary shares are not “indirect Australian real property interests.”

Tax on Sales or other Dispositions of ADSs—Revenue Account

Non-Australian Holders who hold their ADSs on revenue account may have the gains made on the sale or other disposal of the ADSs included in their assessable income under the ordinary income provisions of the income tax law if the gains are sourced in Australia. In the case of gains which are ordinary income, there are no express provisions which treat holders of ADSs as the owners of the underlying shares where they are absolutely entitled to those shares.

Non-Australian Holders assessable under these ordinary income provisions in respect of gains made on ADSs held on revenue account would be assessed for such gains at the Australian tax rates for non-Australian residents, which start at a marginal rate of 32.5% for individuals and would be required to file an Australian tax return. Some relief from Australian income tax may be available to a Non-Australian Holder who is resident of a country with which Australia has a double taxation treaty, qualifies for the benefits of the treaty and does not, for example, derive the gain in carrying on business through a permanent establishment (or similar taxable nexus) in Australia.

To the extent an amount would be included in a Non-Australian Holder’s assessable income under both the capital gains tax provisions and the ordinary income provisions, the capital gain amount may be reduced, so that the holder may not be subject to double Australian tax on any part of the gain.

The statements under “—Tax on Sales or Other Dispositions of Shares—Capital Gains Tax” regarding a purchaser being required to withhold 12.5% tax on the acquisition of certain taxable Australian property are also relevant where the disposal of the ADSs by a Non-Australian Holder is likely to generate gains on revenue account, rather than a capital gain.

Dual Residency

If a holder of ADSs is a resident of both Australia and another jurisdiction (such as the United States) under those countries’ domestic taxation laws, that holder may be subject to tax as an Australian resident. If, however, the holder is determined to be a resident of that other jurisdiction for the purposes of the applicable double tax treaty, for example the Double Taxation Convention between the United States and Australia and qualifies for the benefit of that treaty, the Australian tax may be subject to limitation by that double tax treaty. Holders should obtain specialist taxation advice in these circumstances.

Landholder Duty

We understand the only landholdings in Australia are located in Queensland. Generally landholdings includes resource authorities, leases over land and things fixed to the land. Where the market value of all landholdings in Queensland in NOVONIX Limited and its subsidiaries are AUD\$2,000,000 or greater NOVONIX Limited will be a landholder in Queensland.

A liability to duty should not arise in Queensland for an investor on a transfer or issue of ordinary shares or ADSs in NOVONIX Limited, provided that a single Investor (alone or together with any associates or under related transactions) does not acquire a ‘significant interest’. Where a company is listed on a recognized exchange a ‘significant interest’ is an interest of 90% or more.

Australian Death Duty

Australia does not have estate or death duties. As a general rule, no capital gains tax liability is realized upon the inheritance of a deceased person’s shares. The disposal of inherited shares by beneficiaries may, however, give rise to a capital gains tax liability if the gain falls within the scope of Australia’s jurisdiction to tax. Holders should obtain specialist taxation advice in these circumstances.

Goods and Services Tax

No Australian goods and services tax should be payable on the transfer or issue of ADSs or ordinary shares.

THE DISCUSSION ABOVE IS A SUMMARY OF THE AUSTRALIAN TAX CONSEQUENCES OF AN INVESTMENT IN OUR ORDINARY SHARES OR ADSs AND IS BASED UPON LAWS AND RELEVANT INTERPRETATIONS THEREOF IN EFFECT AS OF THE DATE OF THIS annual report, ALL OF WHICH ARE SUBJECT TO CHANGE, POSSIBLY WITH RETROSPECTIVE EFFECT. EACH PROSPECTIVE INVESTOR IS URGED TO CONSULT ITS OWN TAX ADVISOR ABOUT THE TAX CONSEQUENCES TO IT OF AN INVESTMENT IN OUR ORDINARY SHARES OR ADSs IN LIGHT OF THE INVESTOR’S OWN CIRCUMSTANCES.

BEPS Pillar Two

The Organization for Economic Co-operation and Development (“OECD”) has released the Base Erosion and Profit Shifting framework 2.0 (“Pillar Two”) to introduce a global minimum corporate tax of 15% for companies with global revenues and profits above certain thresholds. As of December 31, 2024, Canada and Australia have enacted legislation related to the global minimum tax rules under Pillar Two. The United States has not yet enacted legislation to adopt Pillar Two. After considering the applicable tax law changes associated with Pillar Two legislation, we do not believe the Company falls within the scope of this legislation due to not exceeding the minimum revenue standard (EUR 750 million). At this time there are no recorded tax effects for Pillar Two.

F. Dividends and Paying Agents

G. Statement by Experts

Not applicable.

H. Documents on Display

We are subject to the periodic reporting and other informational requirements of the Securities Exchange Act of 1934, as amended (the "Exchange Act"). Under the Exchange Act, we are required to file reports and other information with the SEC. Specifically, we are required to file annually a Form 20-F within 120 days of the end of each fiscal year. The SEC maintains a website at www.sec.gov that contains reports, proxy and information statements, and other information regarding registrants that make electronic filings with the SEC using its EDGAR system. As a foreign private issuer, we are exempt from the rules under the Exchange Act prescribing the furnishing and content of quarterly reports and proxy statements, and officers, directors and principal shareholders are exempt from the reporting, and short swing profit recovery provisions contained in Section 16 of the Exchange Act.

In addition, because our ordinary shares are traded on the ASX, we file annual and semi-annual reports with, and furnish information to, the ASX, as required under the ASX Listing Rules and the Corporations Act. Copies of our filings with the ASX can be retrieved electronically at www.asx.com.au. We also maintain a web site at www.novonixgroup.com. The information contained on our website or available through our website is not incorporated by reference into and should not be considered a part of this annual report on Form 20-F, and the reference to our website in this annual report on Form 20-F is an inactive textual reference only.

I. Subsidiary Information

Not applicable.

J. Annual Report to Security Holders

If we are required to provide an annual report to security holders in response to the requirements of Form 6-K, we will submit the annual report to security holders in electronic format in accordance with the EDGAR Filer Manual.

Item 11. Quantitative and Qualitative Disclosures about Market Risk

We are exposed to a variety of risks in the ordinary course of our business, including, but not limited to, credit risk, liquidity risk and interest rate risk. We regularly assess each of these risks to minimize any adverse effects on our business as a result of those factors. For discussion and sensitivity analyses of our exposure to these risks, see Note 31 - *Financial Risk Management* to the consolidated financial statements included in this annual report.

Item 12. Description of Securities Other than Equity Securities

A. Debt Securities

Not applicable.

B. Warrants and Rights

Not applicable.

C. Other Securities.

Not applicable.

D. American Depositary Shares Fees and Expenses

<i>Persons depositing or withdrawing Shares or ADSs must pay:</i>	<i>For:</i>
\$5.00 (or less) per 100 ADSs (or portion of 100 ADSs)	Delivery of ADSs, including deliveries resulting from a distribution of shares or rights or other property
	Surrender of ADSs for the purpose of withdrawal, including if the deposit agreement terminates
\$.05 (or less) per ADS a fee equivalent to the fee that would be payable if securities distributed to you had been shares and the shares had been deposited for issuance of ADSs	Any cash distribution to ADS holders Distribution of securities distributed to holders of deposited securities (including rights) that are distributed by the depositary to ADS holders
\$.05 (or less) per ADS per calendar year registration or transfer fees.	Depository services
Expenses of the depositary	Transfer and registration of shares on our share register to or from the name of the depositary or its agent when you deposit or withdraw shares Cable (including SWIFT) and facsimile transmissions (when expressly provided in the deposit agreement)
Converting foreign currency to U.S. dollars	Converting foreign currency to U.S. dollars
Taxes and other governmental charges the depositary or the custodian has to pay on any ADSs or shares underlying ADSs, such as stock transfer taxes, stamp duty or withholding taxes	As necessary
Any charges incurred by the depositary or its agents for servicing the deposited securities.	As necessary

The depositary collects its fees for delivery and surrender of ADSs directly from investors depositing shares or surrendering ADSs for the purpose of withdrawal or from intermediaries acting for them. The depositary collects fees for making distributions to investors by deducting those fees from the amounts distributed or by selling a portion of distributable property to pay the fees. The depositary may collect its annual fee for depository services by deduction from cash distributions or by directly billing investors or by charging the book-entry system accounts of participants acting for them. The depositary may collect any of its fees by deduction from any cash distribution payable (or by selling a portion of securities or other property distributable) to ADS holders that are obligated to pay those fees. The depositary may generally refuse to provide fee-attracting services until its fees for those services are paid.

From time to time, the depositary may make payments to us to reimburse us for costs and expenses generally arising out of establishment and maintenance of the ADS program, waive fees and expenses for services provided to us by the depositary or share revenue from the fees collected from ADS holders. In performing its duties under the deposit

agreement, the depositary may use brokers, dealers, foreign currency dealers or other service providers that are owned by or affiliated with the depositary and that may earn or share fees, spreads, or commissions.

The depositary may convert currency itself or through any of its affiliates, or the custodian or we may convert currency and pay U.S. dollars to the depositary. Where the depositary converts currency itself or through any of its affiliates, the depositary acts as principal for its own account and not as agent, advisor, broker, or fiduciary on behalf of any other person and earns revenue, including, without limitation, transaction spreads, that it will retain for its own account. The revenue is based on, among other things, the difference between the exchange rate assigned to the currency conversion made under the deposit agreement and the rate that the depositary or its affiliate receives when buying or selling foreign currency for its own account. The depositary makes no representation that the exchange rate used or obtained by it or its affiliate in any currency conversion under the deposit agreement will be the most favorable rate that could be obtained at the time or that the method by which that rate will be determined will be the most favorable to ADS holders, subject to the depositary's obligation to act without negligence or bad faith. The methodology used to determine exchange rates used in currency conversions made by the depositary is available upon request. Where the custodian converts currency, the custodian has no obligation to obtain the most favorable rate that could be obtained at the time or to ensure that the method by which that rate will be determined will be the most favorable to ADS holders, and the depositary makes no representation that the rate is the most favorable rate and will not be liable for any direct or indirect losses associated with the rate. In certain instances, the depositary may receive dividends or other distributions from us in U.S. dollars that represent the proceeds of a conversion of foreign currency or translation from foreign currency at a rate that was obtained or determined by us and, in such cases, the depositary will not engage in, or be responsible for, any foreign currency transactions, neither the depositary nor the Company makes any representation that the rate obtained or determined by us is the most favorable rate, and neither the depositary nor the Company will be liable for any direct or indirect losses associated with the rate.

PART II

Item 13. Defaults, Dividend Arrearages and Delinquencies.

Not applicable.

Item 14. Material Modifications to the Rights of Security Holders and Use of Proceeds.

Not applicable.

Item 15. Controls and Procedures

Disclosure controls and procedures

Evaluation of Disclosure Controls and Procedures

Under the supervision and with the participation of our management, including our principal executive officer and principal financial officer, we conducted an evaluation (pursuant to Rule 13a-15(b) of the Exchange Act) of the effectiveness of our disclosure controls and procedures, as defined in Rule 13a-15(e) under the Exchange Act as of December 31, 2024.

Disclosure controls and procedures are controls and other procedures that are designed to ensure that information required to be disclosed in our reports filed or submitted under the Exchange Act is recorded, processed, summarized, and reported, within the time periods specified in the SEC's rules and forms. Disclosure controls and procedures include controls and procedures designed to ensure that information required to be disclosed in our company's reports filed under the Exchange Act is accumulated and communicated to management, including our interim Chief Executive Officer and Chief Financial Officer, to allow timely decisions regarding required disclosure.

Based on the evaluation of our disclosure controls and procedures, our interim Chief Executive Officer and Chief Financial Officer concluded that our disclosure controls and procedures were not effective as of December 31, 2024, due to the material weaknesses identified and described below.

Notwithstanding the assessment that our disclosure controls and procedures are not effective and that material weaknesses existed as of December 31, 2024, we believe that we have performed sufficient supplementary procedures to ensure that the consolidated financial statements for the periods covered by and included in this annual report on Form 20-F fairly state, in all material respects, our financial position, results of operations and cash flows for the periods presented in conformity with IFRS.

Management's annual report on internal control over financial reporting

Our management is responsible for establishing and maintaining adequate internal control over financial reporting, as defined in Rules 13a-15 (f) under the Exchange Act. Our management, with the participation of our interim Chief Executive Officer and our Chief Financial Officer, evaluated the effectiveness of our internal control over financial reporting based on criteria established in the framework in Internal Control—Integrated Framework (2013) issued by the Committee of Sponsoring Organizations ("COSO") of the Treadway Commission. Based on this evaluation, our management has concluded that our internal control over financial reporting was not effective as of December 31, 2024, because of the material weaknesses described below.

Material Weaknesses in Internal Control over Financial Reporting

We previously disclosed in our annual report on 20-F for the year ended December 31, 2023, certain control deficiencies in the design and implementation of our internal control over financial reporting that constituted material weaknesses. These material weaknesses have not been remediated as of December 31, 2024.

A material weakness is a deficiency, or a combination of deficiencies, in internal control over financial reporting such that there is a reasonable possibility that a material misstatement of our financial statements will not be prevented or detected on a timely basis.

The material weaknesses in internal control over financial reporting are summarized below:

- Limited personnel in our accounting and finance functions have resulted in our inability to establish sufficient segregation of duties across the key business and financial processes of our organization.
- Lack of appropriately designed, implemented, and documented procedures and controls to allow us to achieve complete, accurate and timely financial reporting, including controls over the preparation and review of account reconciliations and journal entries, and controls over information technology including access and program change management to ensure access to financial data is adequately restricted to appropriate personnel.

This annual report does not include an attestation report of our independent registered public accounting firm due to an exemption from the auditor attestation requirements of the Sarbanes-Oxley Act as available to emerging growth companies.

Remediation Plan

The status of the remediation measures we have implemented to improve our internal control over financial reporting to address the underlying causes of the material weaknesses are summarized below:

- During 2024, we continued to design and implement additional internal controls that are relevant to the preparation of our financial statements. Key Finance and Accounting personnel. These internal resources have been supplemented with additional external advisory assistance, which will continue to provide ongoing support regarding complex accounting matters, judgmental areas, and changes in accounting standards. New roles and responsibilities have been implemented to reduce the risk created by segregation of duties in some areas, complemented by the implementation of an enhanced ERP system in 2023 that will support automated enforcement of segregated roles and responsibilities. However, as of December 31, 2024, the segregation of duties material weakness has not been fully remediated. As the Company grows, the number of skilled and experienced employees is expected to increase, which will enable the Company to implement adequate segregation of duties within the internal control framework.
- During 2024, the Company made progress on many of its remedial actions with a focus on enhancing business processes and controls as the Company continues to mature. This included completion of formalized individual risk and control matrices for substantially all of the business processes of the Company and all domains of information technology general controls ("ITGCs"). However, many of these remedial actions, most importantly the new control activities, were not fully designed and implemented and/or operated contemporaneously and continuously as of December 31, 2024, and therefore the material weakness was not fully remediated at year-end. The Company plans to continue the refinement of the control environment by designing and implementing controls to mitigate the business risks and assess the operating effectiveness of the internal controls over financial reporting. We will continue to devote significant time and attention to these remediation efforts. However, the material weaknesses cannot be considered remediated until the applicable controls operate for a sufficient period of time and management has concluded, through testing, that these controls are operating effectively.

Attestation report of the registered public accounting firm

This annual report does not include an attestation report of our independent registered public accounting firm due to an exemption from the auditor attestation requirements of the Sarbanes-Oxley Act as available to emerging growth companies.

Changes in internal control over financial reporting

Except for the improvements to our internal control over financial reporting to remediate the material weaknesses discussed above, there have been no changes in our internal control over financial reporting during the fiscal year ended December 31, 2024, that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

Item 16. [RESERVED]

Item 16A. Audit Committee Financial Expert

The Board of Directors has determined that Mr. Anthony Bellas qualifies as an “audit committee financial expert,” as such term is defined in the rules of the SEC, and all of the members of the Audit and Risk Management Committee are independent, as independence is defined under the rules of the SEC and Nasdaq applicable to foreign private issuers.

Item 16B. Code of Ethics

Our Corporate Governance Charter contains a code of conduct applicable to all our directors and is available on our website at <https://ir.novonixgroup.com/corporate-governance/documents-charters>. Our Board of Directors has also adopted a Code of Conduct applicable to our officers, senior executives, employees, consultants, and contractors, which is also available on our website at www.novonixgroup.com. We will post on our website all disclosures to the extent required by the rules of the SEC and/or the listing standards of Nasdaq concerning amendments to, or waivers from, any provision of the Code of Conduct applicable to our directors and executive officers. The reference to our website address does not constitute incorporation by reference of the information contained at or available through our website, and you should not consider it to be a part of, this annual report.

Item 16C. Principal Accountant Fees and Services

Audit Fees

The information set forth in Note 8 to the Company's Consolidated Financial Statements included in "*Item 18. Financial Statements*" of this annual report is incorporated herein by reference.

Audit-Related Fees

The information set forth in Note 8 to the Company's Consolidated Financial Statements included in "*Item 18. Financial Statements*" of this annual report is incorporated herein by reference.

Tax Fees

The information set forth in Note 8 to the Company's Consolidated Financial Statements included in "*Item 18. Financial Statements*" of this annual report is incorporated herein by reference.

All Other Fees

The information set forth in Note 8 to the Company's Consolidated Financial Statements included in "*Item 18. Financial Statements*" of this annual report is incorporated herein by reference.

Pre-Approval Policies and Procedures

The Audit and Risk Management Committee has adopted policies and procedures relating to the approval of all audit and non-audit services that are to be performed by our independent registered public accounting firm. These policies provide that we will not engage our independent registered public accounting firm to render audit or non-audit services unless the service is specifically approved in advance by the Audit and Risk Management Committee, or the engagement is entered into pursuant to the pre-approval procedure described below.

From time to time, the Audit and Risk Management Committee pre-approves specified types of services that are expected to be provided to us by our independent registered public accounting firm during the next 12 months. Any such pre-approval is detailed as to the particular service or type of services to be provided and is also generally subject to a maximum dollar amount. In fiscal 2024, our Audit and Risk Management Committee approved all the services provided by PricewaterhouseCoopers Australia, our external auditors.

Item 16D. Exemptions from the Listing Standards for Audit Committees

Not applicable.

Item 16E. Purchases of Equity Securities by the Issuer and Affiliated Purchasers

Not applicable.

Item 16F. Change in Registrant's Certifying Accountant

Not applicable.

Item 16G. Corporate Governance

Under Nasdaq Listing Rule 5615(a)(3), a foreign private issuer, such as our company, is permitted to follow certain home country corporate governance practices instead of certain provisions of the Nasdaq listing rules. A foreign private issuer electing to follow a home country practice instead of any such Nasdaq rule must submit to Nasdaq, in advance, a written statement from an independent counsel in such issuer's home country certifying that the issuer's practices are not prohibited by the home country's laws. We submitted such a written statement to Nasdaq. See "*Item 6. Directors, Senior Management and Employees—C. Board Practices— Foreign Private Issuer Exemption*" for a concise summary of any significant ways in which our corporate governance practices differ from those followed by domestic companies under the Nasdaq listing rules.

Item 16H. Mine Safety Disclosure

Not applicable.

Item 16I. Disclosure Regarding Foreign Jurisdictions that Prevent Inspections

Not applicable.

Item 16J. Insider Trading policies

Our Securities Trading Policy sets forth requirements and procedures governing the purchase, sale, and other dispositions of the Company's securities by directors, senior management, and employees that are reasonably designed to promote compliance with applicable insider trading laws, rules and regulations, and listing standards applicable to the Company. The Securities Trading Policy is filed as an exhibit to this annual report.

Item 16K. Cybersecurity

Risk Management and Strategy

We believe an effective cybersecurity program is critical to guard the confidentiality, integrity, and availability of our information systems and data residing in those systems. We have built and continue to evolve processes for assessing, identifying, and managing material risks from cybersecurity threats. We have embedded the oversight and management of cybersecurity risk within our enterprise risk management framework to help drive a company-wide culture of cybersecurity risk management, and we have established policies and procedures as well as a reporting line of governance that guide our cybersecurity risk management program.

The Company's Information Technology Department uses cybersecurity risk assessments, security monitoring tools, phishing testing, security training, system scanning, and penetration testing, among other technology and human resources, to monitor and identify cybersecurity threats and incidents. We engage a third party to perform a 24/7 cybersecurity monitoring, detection and response service. With the third party's assistance, our Information Technology Department track metrics that demonstrate our cybersecurity risk posture, including identified cybersecurity threats and risks, security awareness proficiency of employees, and system vulnerabilities and patching requirements.

We require all third-party vendors that may have access to Company, employee, customer, or other third-party data to undergo a vetting process prior to being approved and onboarded. The vetting process includes a review of the vendor's relevant policies and procedures, technology architecture, business practices and cybersecurity profile. Third-party vendor agreements include confidentiality obligations and specify data elements that the third party has access to, how the third party protects the data, and procedures for the return or destruction of protected data. The vendor also must report all cybersecurity incidents immediately to the Company's responsible functional manager and to the Director of Information Technology.

In addition to the above processes and resources, we maintain a cybersecurity incident response process. Within the Information Technology department, we have an Incident Response Team, which maintains and is responsible for communicating any cybersecurity incidents in accordance with a written incident response plan (the "Incident Response Plan"). The Incident Response Plan defines responsibilities and immediate actions necessary to mitigate risk, report on the incident to management, and identify necessary steps to remediate the incident and prevent future incidents. The Incident Response Team is responsible for identifying and assessing the impact of several factors, including duration of the breach or other incident, the number of systems and users affected, the actual or potential system downtime and associated financial impact, as well as the cost and timing of system and data recovery. Our Director of Information Technology is responsible for reporting cybersecurity incidents immediately to our senior management team. Depending on the nature and severity of an incident, the incident may also need to be reported to our Management Disclosure Committee to determine whether the incident is or is reasonably likely to become material and whether the Company must disclose the incident publicly, as well as to the Audit and Risk Management Committee and the Board of Directors.

Governance

Our Board of Directors recognizes the importance of managing the risk of cybersecurity threats to the Company. The Board is responsible for overseeing our enterprise risk management activities in general, and each of our Board committees assists the Board in the role of risk oversight. The Audit and Risk Management Committee is responsible for, among other things, overseeing our compliance with internal controls and our management of enterprise risks, including cybersecurity risks and risk mitigation framework.

The Audit and Risk Management Committee meets at least twice each year and as often as necessary to fulfill its responsibilities. Our senior management team, which includes our CEO, CFO, Chief Legal and Administrative Officer, and our Chief Operating Officer, together with the Director of Information Technology, reports on a regular basis to the Audit and Risk Management Committee on cybersecurity risks and trends and other information necessary to assess such risks and oversee the development and performance of our risk mitigation processes.

The Director of Information Technology leads our Information Technology Department and is responsible for overseeing our information security program. Reporting to our Chief Operating Officer, the Director of Information Technology has over 30 years of industry experience, including serving in similar roles leading and overseeing information and data security at other public companies. The Director of Information Technology is responsible for assessing and managing cybersecurity risks, as well as communicating cybersecurity incidents, matters and trends to Company management, the Audit and Risk Management Committee, and the Board of Directors. Team members who support our information security program have relevant educational and industry experience and regularly report to the Director of Information Technology. Our Information Technology Department regularly reports to senior management and other relevant teams on various cybersecurity threats, assessments, and findings.

We face risks from cybersecurity threats that could have a material adverse effect on our business, strategy, financial condition, results of operations, cash flows or reputation. However, to date, we have not experienced any cybersecurity incidents that have had or are reasonably likely to have such a material adverse effect. See *Item 3. Key Information—D. Risk Factors* (“***Our systems and data may be subject to disruptions or other security incidents, and we may face alleged violations of laws, regulations, or other obligations relating to handling our employees' personal data or confidential data of our customers and other business partners that could result in liability and adversely impact our reputation and future sales.***”).

PART III

Item 17. Financial Statements.

The Company has elected to furnish the financial statements and related information specified in "*Item 18. Financial Statements*" of this annual report.

Item 18. Financial Statements.

The consolidated financial statements and related notes required by this Item 18 are included in this annual report on Form 20-F beginning on page F-1.

Note 1 Summary of Material Accounting Policy Information

Corporate Information

NOVONIX Limited ("NOVONIX," the "Company," or the "Group") is a battery technology and materials business that provides advanced products and mission critical services to leading battery manufacturers, materials companies, automotive original equipment manufacturers ("OEMs") as well as consumer electronics manufacturers at the forefront of the global electrification economy. NOVONIX Limited is referred to in these financial statements as the "Parent Entity".

NOVONIX was incorporated under the laws of Australia in 2012 under the name Graphitecorp Pty Limited. In 2015, the Company completed an initial public offering of its ordinary shares and the listing of its ordinary shares on the Australian Securities Exchange, or the ASX, and changed the Company's name to GRAPHITECORP Limited. In 2017, the Company changed its name to NOVONIX Limited.

The Company's principal place of business is located at Level 38, 71 Eagle Street, Brisbane, Queensland 4000, Australia, and the Company's registered office is located at Level 11, 66 Eagle Street, Brisbane Queensland, Australia.

The financial statements were authorized for issue by the Directors on February 28, 2025. The Directors have the power to amend and reissue the financial statements.

Basis of Preparation

These general-purpose consolidated financial statements of the Company have been prepared in accordance with International Financial Reporting Standards ("IFRS") as issued by the International Accounting Standards Board ("IASB"). Material accounting policies adopted in the preparation of these consolidated financial statements are presented below and have been consistently applied unless stated otherwise.

Except for cash flow information, the consolidated financial statements have been prepared on an accruals basis and are based on historical costs, modified, where applicable, by the measurement at fair value of selected non-current assets, financial assets and financial liabilities.

Applying Materiality

Management provides the specific accounting policies and disclosures required by IFRS unless the information is not applicable or is considered immaterial to the decision-making of the primary users of these financial statements.

Going Concern

The consolidated financial statements have been prepared on a going concern basis, which contemplates continuity of normal business activities and the realization of assets and settlement of liabilities in the normal course of business.

For the year ended December 31, 2024, the Company incurred a net loss of \$74.8 million (year ended December 31, 2023: \$46.2 million) and net operating cash outflows of \$40.4 million (year ended December 31, 2023: \$36.2 million). As of December 31, 2024, the Company has a cash balance of \$42.6 million (December 31, 2023: \$78.7 million) and net current assets of \$11.1 million (December 31, 2023: \$51.9 million).

The net loss and cash outflows incurred during the period principally relate to the Company continuing to execute its expansion plans to reach a production capacity of 150,000 tpa. This will involve significant capital expenditure to scale operations in line with customer offtake agreements, as well as current and future customer demand. The funding of these expansionary activities will require additional funding beyond the existing cash balance as of December 31, 2024, and forecasted customer inflows, in the twelve months from the date of approval of these financial statements. These conditions give rise to a material uncertainty which may cast significant doubt (or raise substantial doubt as contemplated by Public Company Accounting Oversight Board ("PCAOB") standards) over the Company's ability to continue as a going

concern. Should the Company be unable to continue as a going concern, it may be unable to realize its assets and discharge its liabilities in the normal course of business, and at amounts stated in the financial report.

The ability of the Company to continue as a going concern is principally dependent upon one or more of the following

- continuing to be able to claim balances against the USD\$100 grant from the Office of Manufacturing & Energy Supply Chains ("MESC") of the U.S. Department of Energy ("DOE"). During the year ended December 31, 2024, the Company submitted \$19.2 million in reimbursement requests to the DOE Office of MESC for investments made at its Riverside facility in Chattanooga, Tennessee. An additional \$5.1 million in reimbursement requests have been submitted to the DOE to the date of issuance of the financial statements.
- the ability of the Company to raise funds as and when necessary, from either customers, governments, and/or investors in the form of debt or equity;
- the successful and profitable growth of the battery materials, battery consulting, and battery technology businesses; and
- the ability of the Company to meet its cash flow forecasts.

The directors believe that the going concern basis of preparation is appropriate as the Company has a strong history of being able to raise capital from debt and equity sources, including through the issue of:

- \$25.8 million equivalent to 68.6 million ordinary shares to eligible shareholders pursuant to a share purchase plan in January 2025;
- \$5 million equivalent to 12.8 million ordinary shares to Phillips 66 in a conditional placement that in January 2025;
- \$26.6 million equivalent to 74.1 million ordinary shares in a fully underwritten institutional placement in November 2024; and
- \$30 million of unsecured convertible loan notes to LG Energy Solution, Ltd. ("LG Energy Solution" or "LGES")) in June 2023 (Note 22 - *Unsecured convertible loan notes and derivative financial instruments*).

The Company is continuing to actively engage with strategic partners, customers, investors, and government agencies, to source additional funding to support the Company's growth and fund the planned expansionary activities.

In addition, in April 2024, the Company was selected to receive a US\$103 million tax credit (the "48C tax credit") under the Qualifying Advanced Energy Project Allocation Program (the "48C program"), to support production of critical battery materials from its Riverside facility in Chattanooga, Tennessee. No funds have been claimed against the 48C tax credit mainly as the qualifying asset has not been placed in service as of December 31, 2024, and to the date of issuance of the financial statements.

These consolidated financial statements do not include any adjustments relating to the recoverability and classification of recorded asset amounts or the amounts or classification of liabilities and appropriate disclosures that may be necessary should the Company be unable to continue as a going concern.

Principles of Consolidation

These consolidated financial statements incorporate the assets and liabilities of all subsidiaries of NOVONIX Limited as of December 31, 2024, and the results of all subsidiaries for the year then ended.

Subsidiaries are all those entities over which the Company has control. The Company controls an entity when the Company is exposed to, or has rights to, variable returns from its involvement with the entity and has the ability to affect those returns through its power to direct the activities of the entity. Subsidiaries are fully consolidated from the date on which control is transferred to the Company. They are de-consolidated from the date that control ceases.

Intercompany transactions, balances and unrealized gains on transactions between entities in the Company are eliminated. Unrealized losses are also eliminated unless the transaction provides evidence of the impairment of the asset transferred. The accounting policies of subsidiaries have been changed where necessary to ensure consistency with the policies adopted by the Company.

Where equity instruments are issued in a business combination, the fair value of the instruments is their published market price as at the date of exchange. Costs arising from a business combination are expensed when incurred. The consideration transferred also includes the fair value of any asset or liability resulting from a contingent consideration arrangement.

With limited exceptions, all identifiable assets acquired, and liabilities and contingent liabilities assumed in a business combination are measured initially at their fair values at the acquisition date. The excess of the consideration transferred, amount of any non-controlling interest in the acquired entity, over the net fair value of the Company's share of the identifiable net assets acquired is recognized as goodwill. If the consideration transferred of the acquisition is less than the Company's share of the net fair value of the identifiable net assets of the subsidiary, the difference is recognized as a gain in the profit and loss in the Consolidated Statement of Profit or Loss and Other Comprehensive Income, but only after a reassessment of the identification and measurement of the net assets acquired.

Where settlement of any part of the cash consideration is deferred, the amounts payable in the future are discounted to their present value, as at the date of exchange. The discount rate used is the entity's incremental borrowing rate, being the rate at which a similar borrowing could be obtained from an independent financier under comparable terms and conditions.

Fair Value Measurements

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. For some assets and liabilities, observable market transactions or market information is available. For other assets and liabilities, observable market transactions or market information might not be available. When a price for an identical asset or liability is not observable, another valuation technique is used. To increase consistency and comparability in fair value measurements, there are three levels of the fair value hierarchy based on the inputs used:

- Level 1 – Inputs are unadjusted quoted prices in active markets for identical assets or liabilities,
- Level 2 – Inputs are inputs other than quoted prices included within Level 1, which are observable for the asset or liability either directly or indirectly,
- Level 3 – Inputs are unobservable inputs for the asset or liability.

The Company recognizes transfers between levels of the fair value hierarchy at the end of the reporting period during which the change has occurred.

Income Tax Expense (Benefit)

The income tax expense or benefit for the period is the tax payable on that period's taxable income based on the applicable income tax rate for each jurisdiction, adjusted by the changes in deferred tax assets and liabilities attributable to temporary differences, unused tax losses and the adjustment recognized for prior periods, where applicable.

Deferred tax assets and liabilities are recognized for temporary differences at the tax rates expected to be applied when the assets are recovered or liabilities are settled, based on those tax rates that are enacted or substantively enacted, except for:

- When the deferred income tax asset or liability arises from the initial recognition of goodwill or an asset or liability in a transaction that is not a business combination and that, at the time of the transaction, affects neither the accounting nor taxable profits; or
- When the taxable temporary difference is associated with interests in subsidiaries, associates or joint ventures and the timing of the reversal can be controlled, and it is probable that the temporary difference will not reverse in the foreseeable future.

Deferred tax assets are recognized for deductible temporary differences and unused tax losses only if it is probable that future taxable amounts will be available to utilize those temporary differences and losses.

The carrying amount of recognized and unrecognized deferred tax assets are reviewed at each reporting date. Deferred tax assets recognized are reduced to the extent that it is no longer probable that future taxable profits will be available for the carrying amount to be recovered. Previously unrecognized deferred tax assets are recognized to the extent that it is probable that there are future taxable profits available to recover the asset.

Deferred tax assets and liabilities are offset only where there is a legally enforceable right to offset current tax assets against current tax liabilities and deferred tax assets against deferred tax liabilities; and they relate to the same taxable authority on either the same taxable entity or different taxable entities which intend to settle simultaneously.

Revenue Recognition

Revenue from contracts with customers is recognized when control of the goods is transferred, or services are provided to the customer at an amount that reflects the consideration to which the Company expects to be entitled in exchange for those goods or services.

Sales of Goods

Revenue for the hardware is recognized at a point in time when the hardware is delivered and the legal title has passed.

Consulting Services

The consulting division provides battery cell design, implementation and support services under fixed-price and variable price contracts. Revenue from providing services is recognized in the accounting period in which the services are rendered. For fixed-price contracts, revenue is recognized based on the actual service provided to the end of the reporting period relative to the remaining services under the contract because the customer receives and uses the benefits simultaneously. This is determined based on the actual labor hours spent relative to the total expected labor hours.

Where the contracts include multiple performance obligations, the transaction price will be allocated to each performance obligation based on the stand-alone selling prices. Where these are not directly observable, they are estimated based on expected cost-plus margin.

Contract Balances

Trade and Other Receivables

A receivable is recognized when the Company's right to consideration is unconditional, which is generally when goods are delivered or services are performed, as only the passage of time is required before payment is due.

Contract Liabilities

A contract liability is the obligation to transfer goods or provide services to a customer for which the Company has received consideration (or an amount of consideration is due) from the customer. If a customer pays consideration before the Company transfers goods or services to the customer, a contract liability is recognized when the payment is made, or the payment is due (whichever is earlier). Contract liabilities are recognized as revenue when the Company performs under the contract.

Other Income

Interest

Interest income is recognized as interest accrues using the effective interest method. This is a method of calculating the amortized cost of a financial asset and allocating the interest income over the relevant period using the effective interest rate, which is the rate that discounts estimated future cash receipts through the expected life of the financial asset to the net carrying amount of the financial asset.

Grant Revenue

Grants from government bodies, including transferable 48C tax credits, are recognized where there is a reasonable assurance that the grant will be received, and the Company will comply with all attached conditions. When a grant relates to an expense item, it is recognized as income on a systematic basis over the periods that the related expenses, for which it is intended to compensate, are expensed. Where a grant relates to an asset, it is recognized as an adjustment to the carrying amount of the related asset.

Operating Segments

Operating segments are presented using the 'management approach', where the information presented is on the same basis as the internal reports provided to the Chief Operating Decision Makers ("CODMs"). The CODMs are responsible for the allocation of resources to operating segments and assessing their performance.

Current and Non-Current Classification

Assets and liabilities are presented in the balance sheet based on current and non-current classification.

An asset is classified as current when: it is either expected to be realized or intended to be sold or consumed in normal operating cycle; it is held primarily for the purpose of trading; it is expected to be realized within 12 months after the reporting period; or the asset is cash or cash equivalent unless restricted from being exchanged or used to settle a liability for at least 12 months after the reporting period. All other assets are classified as non-current.

A liability is classified as current when: it is either expected to be settled in normal operating cycle; it is held primarily for the purpose of trading; it is due to be settled within 12 months after the reporting period; or there is no right to defer the settlement of the liability for at least 12 months after the reporting period. All other liabilities are classified as non-current.

Deferred tax assets and liabilities are always classified as non-current.

Cash and Cash Equivalents

Cash and cash equivalents include cash on hand, deposits held at call with financial institutions, other short-term, highly liquid investments with original maturities of three months or less that are readily convertible to known amounts of cash and which are subject to an insignificant risk of changes in value.

Inventories

Inventories are measured at the lower of cost and net realizable value. Cost is determined based on the standard cost method, which approximates first-in, first-out. The cost of manufactured products includes direct materials.

Exploration and Evaluation Assets

Exploration and evaluation expenditure incurred is accumulated in respect of each identifiable area of interest. Such expenditures comprise net direct costs and an appropriate portion of related overhead expenditure but do not include overheads or administration expenditure not having a specific nexus with a particular area of interest. These costs are only carried forward to the extent that they are expected to be recouped through the successful development of the area or where activities in the area have not yet reached a stage which permits reasonable assessment of the existence of economically recoverable reserves and active or significant operations in relation to the area are continuing.

A regular review has been undertaken on each area of interest to determine the appropriateness of continuing to carry forward costs in relation to that area of interest.

An impairment charge is recognized when the Directors are of the opinion that the carried forward net cost may not be recoverable or the right of tenure in the area lapses.

When production commences, the accumulated costs for the relevant area of interest are amortized over the life of the area according to the rate of depletion of the economically recoverable reserves.

Borrowings

Borrowings are initially recognized at fair value, net of transaction costs incurred. Borrowings are subsequently measured at amortized cost. Any difference between the proceeds (net of transaction costs) and the redemption amount is recognized in profit or loss over the period of the borrowings using the effective interest method.

The fair value of the liability (borrowings) portion of a convertible bond is determined using a market interest rate for an equivalent non-convertible bond. This amount is recorded as a liability on an amortized cost basis until extinguished on conversion or maturity of the bonds. The remainder of the proceeds is allocated to the conversion option. Alternatively, the fair value of the conversion option is determined using Monte Carlo Simulation methodology, with the remainder of the proceeds allocated to the liability (borrowings) portion.

Convertible Loan Notes

Convertible loan notes are initially measured at fair value less transaction costs.

Amortized cost is calculated as the amount at which the loan note is measured at initial recognition less principal repayments and adjusted for any cumulative amortization of the difference between that initial amount and the maturity amount calculated using the effective interest method.

The effective interest method is used to allocate interest expense over the relevant period and is equivalent to the rate that discounts estimated future cash payments over the expected life of the financial instrument to the net carrying amount of the financial liability.

Non-derivative financial liabilities, other than financial guarantees, are subsequently measured at amortized cost. Gains or losses are recognized in profit or loss through the amortization process and when the financial liability is derecognized.

Convertible notes are classified as current liabilities unless, at the end of the reporting period, the Company has a right to defer settlement of the liability for at least 12 months after the reporting period. Where convertible notes can be settled, at the option of the counterparty, by the transfer of the entity's own equity instruments, such settlement terms do not affect the classification of the liability as current or non-current where the option is classified as an equity instrument. With respect to the Company's convertible notes, the conversion option is accounted for as a derivative liability and can

be exercised by the holder at any time - as disclosed in Note 22. As such, the conversion feature must be considered when assessing whether the Company has a right to defer settlement.

Property, Plant, and Equipment

Property, plant, and equipment is stated at historical cost less accumulated depreciation and impairment. Historical cost includes expenditure that is directly attributable to the acquisition of the items.

Depreciation is calculated on a straight-line basis to write off the net cost of each item of property, plant and equipment (excluding land) over their expected useful lives as follows:

Buildings	25 - 39 years
Plant and equipment	3 - 20 years

The residual values, useful lives and depreciation methods are reviewed, and adjusted if appropriate, at each reporting date.

An item of plant and equipment is derecognized upon disposal or when there is no future economic benefit to the Company. Gains and losses between the carrying amount and the disposal proceeds are taken to profit or loss.

Trade and Other Payables

These amounts represent liabilities for goods and services provided to the Company prior to the end of the financial year and which are unpaid. Due to their short-term nature, they are measured at amortized cost and are not discounted. The amounts are unsecured and are usually paid within 30 days of recognition.

Leases

Lease terms are negotiated on an individual basis and contain a wide range of different terms and conditions. The lease agreements do not impose any covenants other than the security interests in the leased assets that are held by the lessor. Leased assets may not be used as security for borrowing purposes.

Assets and liabilities arising from a lease are initially measured on a present value basis. Lease liabilities include the net present value of the following lease payments:

- fixed payments (including in-substance fixed payments), less any lease incentives receivable,
- variable lease payments that are based on an index or a rate, initially measured using the index or rate as at the commencement date,
- amounts expected to be payable by the Company under residual value guarantees,
- the exercise price of a purchase option if the Company is reasonably certain to exercise that option,
- payments of penalties for terminating the lease, if the lease term reflects the Company exercising that option.

Lease payments to be made under reasonably certain extension options are also included in the measurement of the liability.

The lease payments are discounted using the interest rate implicit in the lease. If that rate cannot be readily determined, which is generally the case for leases in the Company, the lessee's incremental borrowing rate is used, being the rate that the individual lessee would have to pay to borrow the funds necessary to obtain an asset of similar value to the right-of-use asset in a similar economic environment with similar terms, security and conditions.

To determine the incremental borrowing rate, the Company:

- where possible, uses recent third-party financing received by the individual lessee as a starting point, adjusted to reflect changes in financing conditions since third party financing was received,
- uses a build-up approach that starts with a risk-free interest rate adjusted for credit risk for leases held by NOVONIX Limited, which does not have recent third-party financing,
- makes adjustments specific to the lease, e.g., term, country, currency and security.

The Company is exposed to potential future increases in variable lease payments based on an index or rate, which are not included in the lease liability until they take effect. When adjustments to lease payments based on an index or rate take effect, the lease liability is reassessed and adjusted against the right-of-use asset.

Lease payments are allocated between principal and finance cost. The finance cost is charged to profit or loss over the lease period so as to produce a constant periodic rate of interest on the remaining balance of the liability for each period.

Right-of-use assets are measured at cost comprising the following:

- the amount of the initial measurement of lease liability,
- any lease payments made at or before the commencement date less any lease incentives received,
- any initial direct costs,
- restoration costs.

Right-of-use assets are generally depreciated over the shorter of the asset's useful life and the lease term on a straight-line basis. If the Company is reasonably certain to exercise a purchase option, the right-of-use asset is depreciated over the underlying asset's useful life. The Company does not revalue the right-of-use buildings held by the Company.

Payments associated with short-term leases of equipment and vehicles and all leases of low-value assets are recognized on a straight-line basis as an expense in profit or loss. Short-term leases are leases with a lease term of 12 months or less. Low-value assets comprise IT equipment and small items of office furniture.

Extension options are included in property and equipment leases across the Company. These are used to maximize operational flexibility in terms of managing the assets used in the Company's operations. The extension options held are exercisable only by the Company and not by the lessor.

When the Company revises its estimate of the term of any lease (because, for example, it re-assesses the probability of a lessee extension or termination option being exercised), it adjusts the carrying amount of the lease liability to reflect the payments to make over the revised term, which are discounted using a revised discount rate. The carrying value of lease liabilities is similarly revised when the variable element of future lease payments dependent on a rate or index is revised, except the discount rate remains unchanged. In both cases an equivalent adjustment is made to the carrying value of the right-of-use asset, with the revised carrying amount being amortized over the remaining (revised) lease term. If the carrying amount of the right-of-use asset is adjusted to zero, any further reduction is recognized in profit or loss.

When the Company renegotiates the contractual terms of a lease with the lessor, the accounting depends on the nature of the modification:

- if the renegotiation results in one or more additional assets being leased for an amount commensurate with the standalone price for the additional rights-of-use obtained, the modification is accounted for as a separate lease in accordance with the above policy,
- in all other cases where the renegotiated increases the scope of the lease (whether that is an extension to the lease term, or one or more additional assets being leased), the lease liability is remeasured using the discount rate applicable on the modification date, with the right-of-use asset being adjusted by the same amount,

- if the renegotiation results in a decrease in the scope of the lease, both the carrying amount of the lease liability and right-of-use asset are reduced by the same proportion to reflect the partial of full termination of the lease with any difference recognized in profit or loss. The lease liability is then further adjusted to ensure its carrying amount reflects the amount of the renegotiated payments over the renegotiated term, with the modified lease payments discounted at the rate applicable on the modification date. The right-of-use asset is adjusted by the same amount.

Specific details about the Company's leasing policy are provided in Note 20.

Investments and Other Financial Assets

Classification

The Company classifies its financial assets in the following measurement categories:

- those to be measured subsequently at fair value (either through OCI or through profit or loss),
- those to be measured at amortized cost.

The classification depends on the entity's business model for managing the financial assets and the contractual terms of the cash flows.

For assets measured at fair value, gains and losses will either be recorded in profit or loss or OCI. For investments in equity instruments that are not held for trading, this will depend on whether the Company has made an irrevocable election at the time of initial recognition to account for the equity investment at fair value through other comprehensive income (FVOCI).

Recognition and Derecognition

Regular way purchases and sales of financial assets are recognized on trade date, being the date on which the Company commits to purchase or sell the asset. Financial assets are derecognized when the rights to receive cash flows from the financial assets have expired or have been transferred and the Company has transferred substantially all the risks and rewards of ownership.

Measurement

At initial recognition, the Company measures a financial asset at its fair value plus, in the case of a financial asset not at fair value through profit or loss (FVPL), transaction costs that are directly attributable to the acquisition of the financial asset. Transaction costs of financial assets carried at FVPL are expensed in profit or loss.

The Company subsequently measures all equity investments at fair value. Where the Company's management has elected to present fair value gains and losses on equity investments in OCI, there is no subsequent reclassification or fair value gains and losses to profit or loss following the derecognition of the investment. Dividends from such investments continue to be recognized in the consolidated statement of profit or loss and other comprehensive (loss) income as other income when the Company's right to receive payment is established.

Changes in fair value of financial assets at FVPL are recognized in other gains/(losses) in the Consolidated Statement of Profit or Loss and Other Comprehensive Income as applicable. Impairment losses (and reversal of impairment losses) on equity investments measured at FVOCI are not reported separately from other changes in fair value.

Employee Benefits

Short-Term Employee Benefits

Liabilities for wages and salaries, including non-monetary benefits, annual leave and long service leave expected to be settled within 12 months of the reporting date are measured at the amounts expected to be paid when the liabilities are settled.

Short-term incentives are payable on achievement of mutually agreed KPIs each fiscal year with short-term incentives being payable in either cash or by way of the issue of fully paid ordinary shares. The Company has historically paid short-term incentives in cash.

Other Long-Term Employee Benefits

The liability for long service leaves not expected to be settled within 12 months of the reporting date is measured as the present value of expected future payments to be made in respect of services provided by employees up to the reporting date using the projected unit credit method. Consideration is given to expected future wage and salary levels, experience of employee departures and periods of service. Expected future payments are discounted using market yields at the reporting date on corporate bonds with terms to maturity and currency that match, as closely as possible, the estimated future cash outflows.

Share-Based Payments

Equity-settled share-based compensation benefits are provided to employees. Equity-settled transactions are awards of shares, options or performance rights over shares, that are provided to employees in exchange for the rendering of services.

The cost of equity-settled transactions is measured at fair value on grant date. Fair value is determined using various valuation methods including Black Scholes, Binomial and the Monte Carlo Simulation method that takes into account the exercise price, the term of the performance right, the impact of dilution, the share price at grant date and expected price volatility of the underlying share, the expected dividend yield and the risk-free interest rate for the term of the performance right award.

The cost of equity-settled transactions is recognized as an expense with a corresponding increase in equity over the vesting period. The cumulative charge to profit or loss is calculated based on the grant date fair value of the award, the best estimate of the number of awards that are likely to vest and the expired portion of the vesting period. The amount recognized in profit or loss for the period is the cumulative amount calculated at each reporting date less amounts already recognized in previous periods.

Market conditions are taken into consideration in determining fair value. Therefore, any awards subject to market conditions are considered to vest irrespective of whether or not that market condition has been met, provided all other conditions are satisfied.

If equity-settled awards are modified, as a minimum an expense is recognized as if the modification has not been made. An additional expense is recognized, over the remaining vesting period, for any modification that increases the total fair value of the share-based compensation benefit as at the date of modification.

Share-based payment expenses are recognized over the period during which the employee provides the relevant services. This period may commence prior to the grant date. In this situation, the entity estimates the grant date fair value of the equity instruments for the purposes of recognizing the services received during the period between service commencement date and grant date. Once the grant date has been established, the earlier estimate is revised so that the amount recognized for services received is ultimately based on the grant date fair value of the equity instruments.

If the non-vesting condition is within the control of the Company or employee, the failure to satisfy the condition is treated as a cancellation. If the condition is not within the control of the Company or employee and is not satisfied during the vesting period, any remaining expense for the award is recognized over the remaining vesting period, unless the award is forfeited.

If equity-settled awards are cancelled, it is treated as if it has vested on the date of cancellation, and any remaining expense is recognized immediately. If a new replacement award is substituted for the cancelled award, the cancelled and new award is treated as if they were a modification.

Issued Capital

Ordinary shares are classified as equity.

Incremental costs directly attributable to the issue of new shares or options are shown in equity as a deduction, net of tax, from the proceeds.

Impairment of Non-Financial Assets

At the end of each reporting period, the Company assesses whether there is any indication that an asset may be impaired. The assessment will include the consideration of external and internal sources of information, including dividends received from subsidiaries, associates or joint ventures deemed to be out of pre-acquisition profits. If such an indication exists, an impairment test is carried out on the asset by comparing the recoverable amount of the asset, being the higher of the asset's fair value less costs of disposal and value in use, to the asset's carrying amount. Any excess of the assets carrying amount over its recoverable amount is recognized immediately in profit or loss, unless the asset is carried at a revalued amount in accordance with another Standard. Any impairment loss of a revalued asset is treated as a revaluation decrease in accordance with that other Standard.

Where it is not possible to estimate the recoverable amount of an individual asset, the Company estimates the recoverable amount of the cash-generating unit to which the asset belongs.

Impairment testing is performed annually for goodwill, intangible assets with indefinite lives and intangible assets not yet available for use.

Intangible Assets Other than Goodwill

Technology

Technology is recognized at fair value on the date of acquisition. It has a finite life and is subsequently carried at cost less any accumulated amortization and any impairment losses. Technology is amortized over its useful life of 5 years.

Software

Software is measured at cost (at acquisition or development costs) and amortized on a straight-line basis over its useful life, generally 3 years. Maintenance cost of software is expensed as incurred. Development costs directly attributable to the design and creation of software that are identifiable and unique, and that may be controlled by the Company, are recognized as an intangible asset providing the following conditions are met:

- It is technically feasible for the intangible asset to be completed so that it will be available for use or sale,
- Management intends to complete the asset for use or sale,
- The Company has the capacity to use or sell the asset,
- It is possible to show evidence of how the intangible asset will generate probable future economic benefits,
- Adequate technical, financial, and other resources are available to complete the development and to use or sell the intangible asset,
- The outlay attributable to the intangible asset during its development can be reliably determined.

Directly attributable costs capitalized in the value of the software include the cost of personnel developing the programs.

Costs that do not meet the criteria listed above are recognized as an expense as incurred. An example of this is *Software as a Service* ("SaaS"). The cloud computing is a model for delivering information technology services through web-based tools and applications. In such contracts, the customer generally does not obtain a software license or have a right to take possession of the software. The contract conveys to the customer the right to receive access to the supplier's application software over the contract term. That right to receive access does not provide the customer with a software asset and, therefore, the access to the software is a service that the customer receives over the contract term.

Goodwill

Goodwill acquired on a business combination is initially measured at cost, being the excess of the consideration transferred for the business combination over the Company's interest in the net fair value of the acquiree's identifiable assets, liabilities and contingent liabilities.

Following initial recognition, goodwill is measured at cost less any accumulated impairment losses.

Goodwill is reviewed for impairment, annually, or more frequently, if events or changes in circumstances indicate that the carrying value may be impaired (Note 17 - *Intangible Assets*).

As at the acquisition date, any goodwill acquired is allocated to each of the cash-generating units that are expected to benefit from the combination's synergies.

Impairment is determined by assessing the recoverable amount of the cash-generating unit to which the goodwill relates.

Where the recoverable amount of the cash-generating unit is less than the carrying amount, an impairment loss is recognized.

Where goodwill forms part of a cash-generating unit and part of the operation within that unit is disposed, the goodwill associated with the disposed operation is included in the carrying amount of the operation when determining the gain or loss on disposal of the operation.

Disposed goodwill in this circumstance is measured on the basis of the relative values of the disposed operation and the portion of the cash-generating unit retained.

Research and Development Costs

Research and development costs primarily represent the Company's investment in research and development activities for the all-dry, zero-waste cathode synthesis project. At present, the Company's research and development activities are conducted through our two core businesses: BTS and NAM; cathode falls under BTS R&D.

Research expenditures are recognized as an expense when incurred. Costs incurred on development projects (relating to the design and testing of enhancements or extensions of products from the all-dry, zero-waste cathode synthesis project) are recognized as intangible assets when:

- the technical feasibility of completing the intangible asset so that it will be available for use or sale,
- the intention to complete the intangible asset and use it or sell it,
- the ability to use or sell the intangible asset,
- how the intangible asset will generate probable future economic benefits,
- the availability of adequate technical, financial, and other resources to complete the development and to use or sell the intangible asset,
- the ability to measure reliably the expenditure attributable to the intangible asset during its development.

The expenditures capitalized comprise all directly attributable costs, including costs of materials, services, direct labor and an appropriate proportion of overhead. Other development expenditures that do not meet these criteria are recognized as an expense when incurred. Development costs previously recognized as an expense are not recognized as an asset in a subsequent period. Capitalized development costs are recorded as intangible assets and amortized from the point at which the asset is ready for use on a straight-line basis over its useful life.

Borrowing Costs

Borrowing costs are recognized in profit or loss in the period in which they are incurred.

Foreign Currency Transactions and Balances

Functional and Presentation Currency

The functional currency of each of the Company's entities is the currency of the primary economic environment in which that entity operates. Effective July 1, 2022, the Company's reporting currency is the U.S. dollar. The Company changed its reporting currency from Australian dollars to U.S. dollars to enhance the relevance of the Company's financial information and comparability with its industry peer group.

Transactions and Balances

Foreign currency transactions are translated into functional currency using the exchange rates prevailing at the date of the transaction. Foreign currency monetary items are translated at the year-end exchange rate. Non-monetary items measured at historical cost continue to be carried at the exchange rate at the date of the transaction. Non-monetary items measured at fair value are reported at the exchange rate at the date when fair values were determined.

Exchange differences arising on the translation of monetary items are recognized in profit or loss, except where deferred in equity as a qualifying cash flow or net investment hedge.

Exchange differences arising on the translation of non-monetary items are recognized directly in other comprehensive income to the extent that the underlying gain or loss is recognized in other comprehensive income; otherwise, the exchange difference is recognized in profit or loss.

Group Companies

The financial results and position of foreign operations, whose functional currency is different from the Company's presentation currency, are translated as follows:

- Assets and liabilities are translated at exchange rates prevailing at the end of the reporting period,
- Income and expenses are translated at the average exchange rates for the period,
- Accumulated losses are translated at the exchange rates prevailing at the date of the transaction.

Exchange differences arising on translation of foreign operations with functional currencies other than U.S. dollars are recognized in other comprehensive income and included in the foreign currency translation reserve in the consolidated balance sheet. The cumulative amount of these differences is reclassified into profit or loss in the period in which the operation is disposed of.

Earnings Per Share

Basic Earnings Per Share

Basic earnings per share is calculated by dividing the profit attributable to the owners of the Company, excluding any costs of servicing equity other than ordinary shares, by the weighted average number of ordinary shares outstanding during the financial year, adjusted for bonus elements in ordinary shares issued during the financial year.

Diluted Earnings Per Share

Diluted earnings per share adjusts the figures used in the determination of basic earnings per share to take into account the after-income tax effect of interest and other financing costs associated with dilutive potential ordinary shares and the weighted average number of shares assumed to have been issued for no consideration in relation to dilutive potential ordinary shares.

Goods and Services Tax ('GST') and Other Similar Taxes

Revenues, expenses and assets are recognized net of the amount of associated GST, unless the GST incurred is not recoverable from the tax authority. In this case it is recognized as part of the cost of the acquisition of the asset or as part of the expense.

Receivables and payables are stated inclusive of the amount of GST receivable or payable. The net amount of GST recoverable from, or payable to, the tax authority is included in other receivables or other payables in the balance sheet.

Cash flows are presented on a gross basis. The GST components of cash flows arising from investing or financing activities which are recoverable from, or payable to the tax authority, are presented as operating cash flows.

Commitments and contingencies are disclosed net of the amount of GST recoverable from, or payable to, the tax authority.

Assets Held for Sale

Non-current assets, or disposal groups comprising assets and liabilities, are classified as held-for-sale if it is highly probable that they will be recovered primarily through sale rather than through continuing use.

Such assets, or disposal groups, are generally measured at the lower of their carrying amount and fair value less costs to sell. Any impairment loss on a disposal group is allocated first to goodwill, and then to the remaining assets and liabilities on a pro rata basis, except that no loss is allocated to inventories, financial assets, deferred tax assets, employee benefit assets, investment property or biological assets, which continue to be measured in accordance with the Company's other accounting policies. Impairment losses on initial classification as held-for-sale or held-for-distribution and subsequent gains and losses on remeasurement are recognized in profit or loss.

Once classified as held-for-sale, intangible assets and property, plant and equipment are no longer amortized or depreciated, and any equity-accounted investee is no longer equity accounted.

New and Amended Standards and Interpretations

The following amendments are effective for the period beginning January 1, 2024 and are applicable to the consolidated financial statements of the Company:

- Classification of Liabilities as Current or Non-Current (Amendments to IAS 1); and
- Segment reporting (Amendments to IFRS 8).

A summary of the changes to the accounting standards and on how the amendments affected the consolidated financial statements is presented below.

Classification of Liabilities as Current or Non-Current (Amendments to IAS 1)

The IASB issued amendments to IAS 1 on the Classification of Liabilities as Current or Non-current in January 2020. The amendments clarify the following:

- An entity's right to defer settlement of a liability for at least twelve months after the reporting period must have substance and must exist at the end of the reporting period.
- If an entity's right to defer settlement of a liability is subject to covenants, such covenants affect whether that right exists at the end of the reporting period only if the entity is required to comply with the covenant on or before the end of the reporting period.
- The classification of a liability as current or non-current is unaffected by the likelihood that the entity will exercise its right to defer settlement.
- In case of a liability that can be settled, at the option of the counterparty, by the transfer of the entity's own equity instruments, such settlement terms do not affect the classification of the liability as current or non-current only if the option is classified as an equity instrument.

These amendments have no effect on the measurement of any items in the consolidated financial statements of the Company. However, the classification of the convertible loan notes has changed from non-current to current as result of the application of the amendments for the current financial year as well as the comparative period, Note 22- Unsecured Convertible Loan notes and Derivative Financial Instruments for further details.

In July 2024, the IFRS Interpretations Committee (the Committee) published an agenda decision in response to a number of questions asked about how IFRS 8.23 should be applied in practice. IFRS 8.23 requires entities to disclose specific income and expenses included in the segment profit amount provided to the Chief Operating Decision Maker (CODM), irrespective of whether these items are separately presented to the CODM. 'Material items of income and expense' to be disclosed does not only mean those items that are qualitatively material because they are unusual/and or non-recurring in nature; material items mean any items that are material, regardless of the reason for the assessment. Determining the appropriate level of detail in preparing disclosures relating to reportable segments requires judgment, considering the entity's specific circumstances, the core principles outlined in IAS 1 Presentation of Financial Statements. The adoption of the interpretation did not have a material impact on the consolidated financial statements. Refer to Note 25 - Operating Segments for further details.

The Company noted that no other new IFRS Accounting Standards amendments or interpretations that became effective in 2024 had a material impact on the Company's consolidated financial statements.

Standards and Interpretations not yet Effective

The Company has decided not to early adopt new standards, amendments to standards, and interpretations which have been issued by the IASB that are effective in future accounting periods, which include:

- Lack of Exchangeability (Amendment to IAS 21 The Effects of Changes in Foreign Exchange Rates), effective for the annual period beginning January 1, 2025;
- Amendments to the Classification and Measurement of Financial Instruments (Amendments to IFRS 9 Financial Instruments and IFRS 7), effective for the annual period beginning January 1, 2026;

- Contracts Referencing Nature-dependent Electricity (Amendments to IFRS 9 and IFRS 7), effective for the annual period beginning January 1, 2026;
- IFRS 18 Presentation and Disclosure in Financial Statements, effective for the annual period beginning January 1, 2027; and
- IFRS 19 Subsidiaries without Public Accountability: Disclosures, effective for the annual period beginning January 1, 2027.

The Company is currently assessing the effect of these new accounting standards and amendments.

Critical Accounting Estimates and Judgments

The preparation of the financial statements requires the use of certain critical accounting estimates. It also requires management to exercise its judgment in the process of applying the Company's accounting policies. The areas involving a higher degree of judgment or complexity, or areas where assumptions and estimates are significant to the financial statements, are disclosed below.

Valuation of Unsecured Convertible Notes and Embedded Derivatives

The fair value of the conversion feature is determined using a Monte Carlo Simulation, taking into account the terms and conditions upon which the convertible loan notes were issued. The key assumptions include:

- The probability of the timing of when the parties will enter into a purchase order for material, which will lead to the mandatory conversion of all loan notes into ordinary shares,
- The risk-free rate,
- The volatility of the NOVONIX share price.

Impairment of Goodwill and Identifiable Intangible Assets

The Company determines whether goodwill is impaired on an annual basis. This assessment requires an estimation of the recoverable amount of the cash-generating units to which the goodwill is allocated.

Share Based Payment Transactions

The Company has issued options where individual tranches have variable vesting dates due to the performance conditions being linked to the achievement of incremental production targets. At each reporting period, an estimate is made of the expected vesting dates for each of the tranches based on the expectation of when performance conditions will be met, and where necessary, an adjustment to the share-based payment expense is recognized.

Fair Value of Financial Instruments Carried at Fair Value through Profit Loss

The fair value of financial instruments that are not traded in an active market is determined using valuation techniques. The Company uses its judgment to select a variety of methods and make assumptions that are mainly based on market conditions existing at the end of each reporting period. For details of the key assumptions used and the impact of changes to these assumptions see Note 15 - *Financial Assets at Fair Value Through Profit or Loss*.

Government Grants

In April 2024, the Company was selected to receive a \$103 million tax credit (the "48C tax credit") under the Qualifying Advanced Energy Project Allocation Program (the "48C program"), to support production of critical battery materials from its Riverside facility in Chattanooga, Tennessee. The Company has applied judgment to determine whether there is reasonable assurance that the conditions associated with the 48C tax credits will be completed and the grant will be

received. The Company has determined that at the reporting date there is no reasonable assurance that the conditions associated with the 48C tax credit will be completed. As such, the grant is not recognized in the financial statements.

Other areas of critical accounting estimates and judgments include:

- unused tax losses for which no deferred tax asset has been recognized (See Note 6 – *Income Tax (Benefit) Expense*).
- the impairment testing of goodwill (See Note 17 – *Intangible Assets*).

Note 2 Parent Entity Financial Information

The following information has been extracted from the books and records of the parent and has been prepared in accordance with International Financial Reporting Standards.

(in U.S. Dollars)	As of December 31,	As of December 31,

Guarantees

NOVONIX Limited has not entered into any guarantees, in the current or previous reporting period, in relation to the debts of its subsidiaries.

Contingent liabilities

At December 31, 2024, NOVONIX Limited did not have any contingent liabilities (December 31, 2023: Nil).

Contractual Commitments

At December 31, 2024, NOVONIX Limited did not have any contractual commitments (December 31, 2023: Nil).

Note 3 Revenue

Revenue

The Company derives revenue from the transfer of goods and provision of services in the following major product lines and segments:

Year Ended December 31, 2024 (in U.S.\$)	Graphite Exploration	Battery Technology	Battery Materials	Total
Hardware sales	\$ —	\$ 1,805,745	\$ —	\$ 1,805,745

	<u>\$ —</u>	<u>\$ 6,101,155</u>	<u>\$ —</u>	<u>\$ 6,101,155</u>

Revenues from external customers come from the sale of battery testing hardware equipment and the provision of battery testing and development consulting services.

Assets and Liabilities Related to Contracts with Customers

The Company has recognized the following assets and liabilities related to contracts with customers:

(in U.S. Dollars)	At December 31, 2024	At December 31, 2023
Contract liabilities – Hardware sales	\$ —	\$ 56,653
Contract liabilities – Services sales	126,056	228,568
Total other current liabilities	<u>\$ 126,056</u>	<u>\$ 285,221</u>

Revenue Recognized in Relation to Contract Liabilities

The following table shows how much of the revenue recognized in the current reporting period relates to brought-forward contract liabilities.

(in U.S. Dollars)	Year Ended December 31, 2024	Year Ended December 31, 2023	Six Months Ended December 31, 2022	Year Ended June 30, 2022
Revenue recognized that was included in the contract liability balance at the beginning of the period				
Hardware sales	<u>\$ 285,221</u>	<u>\$ 71,985</u>	<u>\$ 2,715</u>	<u>\$ 232,800</u>

The Company had no contract assets as of December 31, 2024, and December 31, 2023. See Note 10, *Trade and other receivables*, for trade receivables.

The Company had no remaining performance obligations which have an original expected term of more than one year.

Note 4 Other Income, Net

	Year Ended December 31,		Six Months Ended December 31,	Year Ended June 30,
(in U.S. dollars)	2024	2023	2022	2022
Interest income	\$ 1,370,929	\$ 1,611,128	\$ 19,416	\$ 8,314
Manufacturing and Energy Supply Chains Grant	470,783	—	—	—
Other grant funding	1,827,882	1,161,992	260,536	982,767
Fair value gain on borrowings (refer Note 21)	—	—	—	219,557
Research and development tax incentive	593,521	689,089	—	—
Other	10,064	147,691	35,154	385,482
Total	\$ 4,273,179	\$ 3,609,900	\$ 315,106	\$ 1,596,120

In November 2023, the Company was selected to receive a \$100 million grant from the U.S. Department of Energy ("DOE") office of Manufacturing and Energy Supply Chains ("MESC") to enhance domestic production of high-performance synthetic graphite anode materials at its Riverside facility in Chattanooga, Tennessee. During the year ended December 31, 2024, the Company submitted reimbursement requests totaling \$19,156,398 against the available grant funds. In accordance with the schedule of expenditures, \$470,783 relates to payroll and salary related expense claims which have been accounted for as other income and \$18,677,454 relates to capital expenditure claims which have been offset against the related Construction in Progress additions in Property, Plant and Equipment (Note 14).

Note 5 Loss before Income Taxes

Loss before income taxes includes the following specific expenses:

	Year Ended December 31,		Six Months Ended December 31,	Year Ended June 30,

Set-off of deferred tax liabilities pursuant to set-off provisions	3,719,657	4,970,299	2,913,574	1,495,735
Net deferred tax liabilities	\$ —	\$ —	\$ —	\$ —

Deferred tax assets are only recognized for deductible temporary differences and unused tax losses if it is probable that future taxable amounts will be available to utilize those temporary differences and losses. An amount of \$116,289 has been recognized in relation to the deferred tax assets of NOVONIX Corp, as it has been determined that future taxable amounts will be available to utilize temporary differences.

Unused losses which have not been recognized as an asset, will only be obtained if:

- the Company derives future assessable income of a nature and of an amount sufficient to enable the losses to be realized,
- the Company continues to comply with the conditions for deductibility imposed by the law,
- no changes in tax legislation adversely affect the Company in realizing the losses.

As of December 31, 2024, the Company has no tax-related contingent liabilities for uncertain tax treatment.

The Company is not under examination in any of its tax-filing jurisdictions.

The net operating losses in the United States, Canada, and Australia of \$150,819,578 are principally indefinite-lived; however, \$15,224,909 is subject to expiration with the earliest expiration beginning in 2042.

Offsetting within Tax Consolidated Entity

NOVONIX Limited and its wholly-owned Australian subsidiaries have applied the tax consolidation legislation which means that these entities are taxed as a single entity. As a consequence, the deferred tax assets and deferred tax liabilities of these entities have been offset in the consolidated financial statements.

Note 7 Key Management Personnel Compensation

The totals of remuneration paid to key management personnel (KMP) of the Company are as follows:

(in U.S. dollars)	Year Ended December 31,		Six Months Ended	Year Ended June 30,
	2024	2023	December 31, 2022	2022
Short-term employee benefits	\$ 3,229,618	\$ 2,514,689	\$ 1,457,899	\$ 3,202,116
Post-employment benefits	56,853	45,092	20,997	144,594
Termination benefits	—	—	—	—
Share-based compensation	3,484,966	2,228,316	4,006,327	12,118,927
Total KMP compensation	<u>\$ 6,771,437</u>	<u>\$ 4,788,097</u>	<u>\$ 5,485,223</u>	<u>\$ 15,465,637</u>

Short-term employee benefits

These amounts include fees and benefits paid to the non-executive Chairman as well as all salary, paid leave benefits and fringe benefits paid to Executive Directors.

Post-employment benefits

These amounts are the superannuation contributions made during the year.

Share-based compensation

These amounts represent the expense related to the participation of KMP in equity-settled benefit schemes as measured by the fair value of the options and performance rights on grant date.

Note 8 Auditor's Remuneration

The following fees were paid or payable for services provided by PricewaterhouseCoopers Australia (PwC) as the auditor of the Company:

(in U.S. dollars)	Year End December 31,		Six Months Ended	Year Ended June
	2024	2023	December 31, 2022	30, 2022
Audit fees	\$ 423,235	\$ 412,793	\$ 471,568	\$ 266,000
Audit-related fees	10,391	—	—	—
Other fees in relation to prior year's audit	42,222	8,382	—	—
Other assurance services	13,811	13,291	—	—
All other fees	—	—	—	276,498
Total	<u>\$ 489,659</u>	<u>\$ 434,466</u>	<u>\$ 471,568</u>	<u>\$ 542,498</u>

¹ Audit-related fees related to services performed in respect of the US IPO and US filing processes during the six months ended December 31, 2022, and year ended June 30, 2022.

Note 9 Earnings per Share

	Years Ended December 31,		Six Months Ended December 31,	Years Ended June 30,
(in U.S. dollars)	2024	2023	2022	2022

Weighted average number of shares used as the denominator

	Year Ended December 31,		Six Months Ended December 31,	Year Ended June 30,
	2024	2023	2022	2022
Weighted average number of ordinary shares used as the denominator in calculating basic and diluted net loss per share	496,862,010	487,474,460	486,616,365	464,437,628

Information concerning the classification of securities

Options and Rights

Options, rights and convertible notes (refer to Note 22 - *Unsecured convertible loan notes and derivative financial instruments*) on issue during the year ended December 31, 2024, and 2023, six months ended December 31, 2022, and year ended June 30, 2022 are not included in the calculation of diluted earnings per share because they are antidilutive. These options, rights and convertible notes could potentially dilute basic earnings per share in the future. Details relating to options and rights are set out in Note 28 - *Share-based Payments*.

Note 10 Trade and Other Receivables

	December 31, 2024	December 31, 2023
(in U.S. dollars)		
Trade debtors	\$ 1,627,393	\$ 3,034,897
MESC grant funds receivable	6,323,492	—
Loss allowance	(252,429)	—
Other receivables	459,717	529,436
Total trade and other receivables	<u>\$ 8,158,173</u>	<u>\$ 3,564,333</u>

At December 31, 2024, the Company had \$6.3 million in claims receivable against the \$100 million MESC grant from the DOE which have been subsequently fully collected prior to the issuance of these consolidated financial statements.

Credit Risk

The Company has no significant concentration of credit risk with respect to any counterparties or on a geographical basis. Amounts are considered as “past due” when the debt has not been settled, in line with the terms and conditions agreed between the Company and the customer to the transaction.

The Company assesses impairment of trade and other receivables using the simplified approach of the expected credit loss (ECL) model under IFRS 9, *Financial Instruments*.

The balance of receivables that remain within initial trade terms are considered to be of high credit quality.

Note 11 Prepayments

	December 31, 2024	December 31, 2023
(in U.S. dollars)		
Prepayments of inventory components	\$ 393,788	\$ 753,973
Prepaid general and administrative expenses	1,307,000	1,105,824
Total	<u>\$ 1,700,788</u>	<u>\$ 1,859,797</u>

Prepaid general and administrative expenses consisted primarily of prepaid property insurance premiums for our Riverside facility of \$617,947 and \$745,693 at December 31, 2024, and December 31, 2023, respectively.

Note 12 Escrow Reserves

	December 31, 2024	December 31, 2023
(in U.S. dollars)		
Escrow reserves	\$ 1,452,187	\$ 794,500

The reserves are funds deposited with the Lender for capital expenditures, insurance, tax, and production as additional collateral for the loan obtained in relation to the purchase of the new facility in Chattanooga, Tennessee. Reserves are released as the conditions of the loan are satisfied. All conditions are expected to be satisfied within 12 months from the balance sheet date.

During the year and in accordance with all applicable loan conditions, the Company received the remaining disbursement of the capital expenditure and earnout reserves as the scheduled capital expenditure work was completed, installed, and being utilized by the Company in the ordinary course of business.

Note 13 Inventory

(in U.S. dollars)	December 31,	December 31,
	2024	2023
Raw materials	\$ 10,083	\$ 507,326
Components and assemblies	1,240,568	1,403,873
Finished goods – at cost	133,253	89,609
Total Inventory	<u>\$ 1,383,904</u>	<u>\$ 2,000,808</u>

Amounts Recognized in Profit or Loss

Inventories recognized as an expense during the year ended December 31, 2024, amounted to \$0.7 million. Inventories recognized as an expense during the year ended December 31, 2023, amounted to \$1.1 million. These were included in product manufacturing and operating costs (exclusive of depreciation presented separately) in the consolidated statements of profit or loss and other comprehensive (loss) income.

Note 15 Financial Assets at Fair Value Through Profit or Loss

Classification of Financial Assets at Fair Value through Profit or Loss

The Company classifies equity investments for which it has not elected to recognize fair value gains and losses through OCI as financial assets at fair value through profit or loss (FVPL).

Financial assets measured at FVPL include the following:

(in U.S. dollars)	December 31,	December 31,
	2024	2023
US unlisted equity securities	\$ —	\$ 16,666,665

On January 31, 2022, NOVONIX Limited entered into a Securities Purchase Agreement with KORE Power, Inc. ("KORE Power") a U.S. based developer of battery cell technology for the clean energy industry, under which NOVONIX Limited acquired 3,333,333 shares of KORE Power Common Stock at an issue price of \$7.50 per share, representing approximately 5% of the common equity of KORE Power. The consideration for the shares in KORE Power totaled \$25 million (AUD \$35,131,550) and was settled through a combination of 50% cash and 50% through the issue of 1,974,723 ordinary shares in NOVONIX Limited.

The equity investment was revalued in 2022 to \$5.00 per share, which was the share price for a significant capital raise undertaken by KORE Power in November 2022. At December 31, 2024, the investment in KORE Power represents approximately 3.7% of the common equity of KORE Power.

Amounts Recognized in Profit or Loss

During the year ended December 31, 2024, the Company recognized a loss in the consolidated statement of profit or loss and other comprehensive income related to equity investments held at FVPL as a result of the fair value measurement described in the Valuation Techniques using Significant Unobservable Inputs – Level 3 section below.

Fair Value Hierarchy

U.S. unlisted equity securities are classified as a Level 3 fair value in the fair value hierarchy as one or more of the significant inputs is not based on observable market data.

The following table presents the changes in level 3 instruments during the year ended December 31, 2024 (in U.S. dollars):

	December 31,	December 31,
	2024	2023
Opening balance	\$ 16,666,665	\$ 16,490,271
Changes during the period:		
Loss on equity investment securities at fair value through profit or loss	(15,308,187)	—
Exchange difference	(1,358,478)	176,394
Balance at December 31, 2024	\$ —	\$ 16,666,665

There were no transfers between levels 1, 2 or 3 for recurring fair value measurements during the year. The Company's policy is to recognize transfers into and out of fair value hierarchy levels as at the end of the reporting period.

Valuation Techniques using Significant Unobservable Inputs – Level 3

This category includes assets where the valuation incorporates significant inputs that are not based on observable market data (unobservable inputs). Unobservable inputs are those not readily available in an active market due to market illiquidity or complexity of the product. These inputs are generally derived and extrapolated from observable inputs to match the risk profile of the financial instrument, and are calibrated against current market assumptions, historic transactions and economic models, where available.

In 2022, the primary approach used in the determination of the fair value of the investment in KORE Power was with reference to the pricing of significant external capital raising activity undertaken by KORE Power. The most recent significant external capital raising undertaken by KORE Power was in November 2022 and no further capital raising has occurred in the year ended December 31, 2023.

In December 2024, the Company considered available information produced by management of KORE Power as well as factors impacting KORE Power's operations and concluded that the fair value of the investment had been reduced to nil. This was further confirmed by KORE Power's decision to cancel its plans to develop its KOREPlex battery manufacturing facility in Buckeye, Arizona and the resignation of its CEO, announced on January 31, 2025.

Note 16 Exploration and Evaluation Assets

	December 31, 2024	December 31, 2023
(in U.S. dollars)		
Exploration and evaluation assets – at cost	\$ —	\$ —
The capitalized exploration and evaluation assets carried forward above have been determined as follows:		
Balance at the beginning of the period	\$ —	\$ 2,212,013
Expenditure incurred during the period	—	16,691
Exchange differences	—	(8,752)
Assets classified as held for sale	—	(2,219,952)
Balance at the end of the period	\$ —	\$ —
(in U.S. dollars)	December 31, 2024	December 31, 2023
Assets classified as held for sale	\$ 2,044,673	\$ 2,219,952
Balance at the beginning of the period	\$ 2,219,952	\$ —
Expenditure incurred during the period	36,604	—
Exchange differences	(211,883)	—
Assets classified as held for sale	—	2,219,952
Balance at the end of the period	\$ 2,044,673	\$ 2,219,952

The Company holds tenement rights to a high-grade natural flake graphite deposit located in Northern Queensland, Australia. In October 2023, the Company decided to pursue potential opportunities to realize the value of these assets through a strategic transaction. All tenement rights remain current, exploration activity is continuing to the extent required under the tenement rights, a resource, principally high-grade graphite, has been identified, and the assets are available for sale in their current conditions. In April 2024, the Company signed a Share Sale and Purchase Agreement under which its wholly owned subsidiary, MD South Tenements Pty Ltd, which holds the Mount Dromedary natural graphite exploration interests, will be divested to Axon Graphite Limited ("Axon Graphite"), a wholly owned subsidiary of Lithium Energy Limited ("Lithium Energy"). As a consideration for the transaction, the Company will receive shares in Axon

Graphite, subject to the completion of the parties' due diligence enquiries, completion of the initial public offering ("IPO") of Axon Graphite, and receipt of approval and admission of Axon Graphite to the Australian Securities Exchange ("ASX"). On September 9, 2024, the Company and Lithium Energy provided an update on the spin-out and IPO and ASX listing of Axon Graphite, which encompasses the merger of the high-grade natural graphite assets of Lithium Energy (known as the Burke and Corella Deposits) and the Company (known as the Mt Dromedary Deposit) to form a distinct vertically integrated Battery Anode Material business in Queensland, Australia. The timing of this strategic transaction is out of management's control.

Note 17 Intangible Assets

Balance at December 31, 2024	<u>\$ 11,975,024</u>	<u>\$ —</u>	<u>\$ —</u>	<u>\$ 11,975,024</u>

Intangible assets, other than goodwill, have finite useful lives. The current amortization charges for intangible assets are included under depreciation and amortization expense in the statement of profit or loss and other comprehensive (loss) income. Goodwill has an indefinite useful life.

The Company performs its annual impairment testing on June 30 each year. For the purposes of impairment testing, the cash generating unit has been defined as the business to which the goodwill relates where individual cash flows can be ascertained for the purposes of discounting future cash flows.

For the 2024 annual impairment test, the recoverable amount of the Cash Generation Unit ("CGU") was determined based on a 'Fair Value Less Costs to Sell' ("FVLCS") calculation, based on the current Riverside Project Plan which assumes that commercial offtake will commence in 2025. The calculation of FVLCS involves the use of significant estimates and assumptions which include volume, growth rates and gross margins used to calculate projected future cash flows. The valuation is considered to be level 3 in the fair value hierarchy due to unobservable inputs used in the valuation. The

present value of the expected cash flows is determined by applying an appropriate discount rate, which reflects the risks specific to the CGU.

The recoverable amount of the NOVONIX Anode Materials CGU ("NAM CGU") was deemed to be in excess of the carrying value of the NAM CGU, and therefore no impairment was recognized as of June 30, 2024.

The calculations use cashflow projections based on financial budgets approved by management and the Board covering a 10-year period which management has determined is appropriate to reflect existing binding customer contracts and the ramp up in production to get to full capacity by 2028, at which point the operations of the business will normalize.

The key assumptions used in the FVLCS calculations are: (i) post-tax discount rate of 11.5%, (ii) revenue sales prices initially range from USD \$7-10/Kg in line with the Company's previously disclosed estimates for production economics (which reflect the contracts signed with various customers to supply up to 157,000 tonnes of anode material over the period 2026 to 2034), with inflationary and other expected pricing increases assumed thereafter, (iii) sales volume growth rates are based on current and expected customer demand, reflecting the ramp up of production equipment commissioning and product being available for sale with no incremental production volume growth expected after full production capacity of 20,000 tpa is reached, (iv) operating costs of \$6-8/Kg, based on the current Riverside Project Plan and adjusted for inflationary increases; and (v) terminal value used to extrapolate cash flows beyond the forecast period of 2.5% based on future expectations for growth in the context of inflation expectations in the country in which the NAM CGU operates.

Management recognizes that there are various reasons that estimates used in these assumptions may vary. Management does not believe that there are reasonably possible changes in any one key assumption that would result in the carrying amount of the NAM CGU to exceed its recoverable amount.

The directors have assessed impairment triggers since the annual impairment test was performed at June 30, 2024, and have not identified any indicators of impairment at December 31, 2024.

For the 2023 annual impairment test, the recoverable amount of the NAM CGU was determined based on an FVLCS basis. To determine the recoverable amount, the FVLCS was calculated with reference to the allocated portion of the Company's enterprise value (EV). The EV model calculation considered the following:

- The market capitalization of the Company on the (ASX:NVX) as of June 30, 2023;
- The volatility of the share price of the Company as of June 30, 2023; and
- The issuance of the convertible notes in June 2023 given that the convertible loan note issuance is directly associated with the planned future expansion of the NAM CGU.

The recoverable amount of the NOVONIX Anode Materials CGU is deemed to be in excess of the carrying value of the CGU, and therefore no impairment has been recognized at December 31, 2024.

Note 18 Trade and other Payables

	December 31, 2024	December 31, 2023
(in U.S. dollars)		
Unsecured liabilities:		
Trade payables	\$ 998,258	\$ 1,342,369
Sundry payables and accrued expenses	7,171,820	4,102,800
Employee entitlements	354,063	314,892
Total	\$ 8,524,141	\$ 5,760,061

Note 19 Contract Liabilities

	December 31, 2024	December 31, 2023
(in U.S. dollars)		
Current - contract liabilities	\$ 126,056	\$ 285,221
Non-current - other liabilities	3,000,000	3,000,000
Total	\$ 3,126,056	\$ 3,285,221

During the 2021 financial year, the Company received grant funds of \$3,000,000 from the Department of Economic and Community Development in the State of Tennessee, USA. The grant funds are conditional upon the Company creating, filling, and maintaining 290 jobs in the State of Tennessee.

The grant becomes fully earned once 90% of the performance target is achieved by March 2026, and is repayable in full if a minimum of 50% of the performance target is not achieved by March 2026. The grant is proportionately repayable between 50% and 90% of the performance target being achieved.

Accordingly, as at December 31, 2024, and 2023, the full amount of the grant has been deferred and classified as a contract liability and will be either released to income (in full or proportionately) or repayable (in full or proportionately) depending on the performance target achieved by March 2026. Income has not been recognized at December 31, 2024, as the Company can not reliably measure compliance of the conditions attaching to the grant with "reasonable assurance" to determine the grant has become receivable.

Note 20 Leases

This note provides information for leases where the Company is the lessee.

Amounts Recognized in the Balance Sheet

	December 31, 2024	December 31, 2023
(in U.S. dollars)		
Right-of-use assets - Buildings	\$ 6,356,771	\$ 4,484,521
Lease liabilities		
Current	\$ 522,297	\$ 345,933
Non-current	6,488,119	4,479,627
Total	\$ 7,010,416	\$ 4,825,560

In March 2024, the Company extended its lease term for a period of five years, which resulted in a revaluation of the right-of-use assets during the 2024 fiscal year. The movement of \$1,935,600 during the year ended December 31, 2024, relates to the allocation of revised lease payments due to the extended lease term. Refer to Note 31, *Financial risk management*, for a maturity analysis of lease liabilities.

Amounts recognized in the statement of profit or loss and other comprehensive (loss) income

(in U.S. dollars)	Year Ended		Six Months	
	December 31,		Ended December	
	2024	2023	31,	Year Ended June
			2022	30,
				2022
Depreciation of right-of-use assets - Buildings	\$ 618,651	\$ 430,514	\$ 215,257	\$ 430,514
Interest expense	\$ 276,728	\$ 212,354	\$ 111,593	\$ 233,229

The total cash outflow for leases in the years ended December 31, 2024 and 2023, are \$573,600 and \$565,732, respectively. The Company had no short-term leases at December 31, 2024, and 2023.

Secured Liabilities and Assets Pledged as Security

On December 1, 2017, the Company purchased freehold land and buildings at 177 Bluewater Road, Bedford Canada for CAD\$1,225,195 and from where the consulting services business now operates. The Company entered into a loan facility of CAD \$2,680,000 to purchase the land and buildings secured by a first mortgage over the property. At December 31, 2024, the facility had been fully drawn down. The total liability at December 31, 2024, is \$1,601,796 (CAD \$2,304,712). The facility is repayable in monthly installments ending September 15, 2044. The carrying amount of this asset at December 31, 2024 and December 31, 2023 was \$2,145,772 and \$2,842,406, respectively.

On May 28, 2021, the Company purchased commercial land and buildings in Nova Scotia, Canada for CAD\$3,550,000 from which the hardware and cathode businesses operates. The Company entered into a loan facility to purchase the land and buildings. The total available under the facility is CAD \$4,985,000 and it has been drawn down to CAD\$4,923,000 as at December 31, 2023. The total liability at December 31, 2024 is \$3,177,058 (CAD \$4,571,428). The full facility is repayable in monthly installments, commencing December 2022 and ending in January 2048. The Company's freehold land and buildings at 110 Simmonds Drive, Dartmouth, Canada are pledged as collateral against the bank loan. The carrying amount of this asset at December 31, 2024, and December 31, 2023 was \$3,284,556 and \$3,329,187, respectively.

On January 24, 2022, the Company entered into a loan facility to purchase equipment. The total amount available under the facility is CAD \$500,00 and has been fully drawn down at December 31, 2024. The total liability at December 31, 2024 was \$213,785 (CAD \$307,600). The facility is repayable in monthly installments, commencing in December 2023 and ending in January 2034. Equipment being purchased with the loan funds are pledged as collateral against the loan.

On July 28, 2021, the Company purchased commercial land and buildings in Chattanooga, USA for \$42,600,000 to expand the NAM business. The Company entered into a loan facility with PNC Real Estate for \$30,100,000 to purchase the land and buildings. The loan has been fully drawn down at December 31, 2024. The total liability at December 31, 2024, is \$27,691,183. The facility is repayable in monthly installments, which commenced in September 2021 and ending in August 2031. The land and buildings at 1029 West 19th Street, Chattanooga, USA have been pledged as security for the loan, with a carrying amount of \$38,174,386 and \$39,202,599 at December 31, 2023 and December 31, 2022, respectively. Lastly, the Company has pledged additional collateral with the Lender for capital expenditures, insurance, tax, and production, Note 12.

Loan Covenants

This loan imposes certain covenants to ensure that the following financial ratios are met:

- net assets of \$30.1 million to be maintained (exclusive of the land and buildings secured by this loan and minimum liquidity of \$3.1 million)
- a debt service coverage ratio of 1.2 to 1 is to be maintained.

Compliance with Loan Covenants

The Company has complied with the financial covenants of its borrowing facilities during the years ended December 31, 2024 and 2023.

Other Loans

ACOA Loans

In December 2017, the Company entered into a contribution agreement with Atlantic Canada Opportunities Agency ("ACOA"), for CAD\$500,000. At December 31, 2024, CAD\$500,000 of the facility has been drawn down. The funding was to assist with expanding the market to reach new customers through marketing and product improvements. The facility is repayable in monthly installments which commenced in September 2019 and ending in May 2027.

In October 2018, the Company entered into another contribution agreement with ACOA, for CAD\$500,000. At December 31, 2024, CAD\$500,000 of the facility has been drawn down. The funding was to assist in establishing a battery cell manufacturing facility. The facility is repayable in monthly installments which commenced in January 2021 and ending in December 2026.

In July 2021, the Company entered into a further contribution agreement with ACOA, for CAD\$250,000. At December 31, 2024, the facility has been fully drawn down. The funding was to assist in expanding the BTS operations. The facility is repayable in monthly installments commencing in January 2024 and ending in December 2026.

In December 2021, the Company entered into a further contribution agreement with ACOA for CAD\$1,000,000. At December 31, 2024, it has been fully drawn down. The funding will be used to will assist with purchasing equipment for the cathode pilot line and expansion of cell making capabilities. The facility is repayable in monthly installments commencing in January 2025 and ending in December 2036.

In March 2023, the Company entered into a further contribution agreement with ACOA for CAD\$886,000. At December 31, 2024, the facility has been fully drawn down. The funding will be used to will assist with purchasing equipment for the cathode pilot line and expansion of cell making capabilities. The facility is repayable in monthly installments commencing in January 2025 and ending in December 2036.

Fair Value

For all borrowings, other than the ACOA loan noted at (ii) above, the fair values are not materially different to their carrying amounts, since the interest payable on those borrowings is either close to current market rates or the borrowings are of a short-term nature.

The ACOA loans are interest free. The initial fair value of the ACOA loans were determined using a market interest rate for equivalent borrowings at the issue date. This resulted in a day one gain of \$100,152 in FY2018 (December 2017 loan), a day one gain of \$114,106 in FY2019 (October 2018 loan) and a day one gain of \$219,557 in the year ended June 30, 2022.

Note 22 Unsecured Convertible Loan notes and Derivative Financial Instruments

On June 21, 2023, the Company issued 45,221,586 convertible loan notes, with a face value of AUD\$1.00 per note, a coupon rate of 4%, and a maturity date of June 7, 2028, for proceeds of \$30 million to LGES. The notes have a conversion price of AUD\$1.60 per ordinary share. The convertible notes will mandatorily convert into ordinary shares upon acceptance of the first purchase order under the purchase agreement with LGES, although LGES may elect to convert some or all the notes prior to such time. No interest would be payable on the notes in these circumstances.

The convertible notes may be redeemed or converted (at the election of LGES) on the maturity date, in which case interest is payable in cash (in respect of a redemption) or "in-kind" (in the case of conversion). The conversion option with LGES is accounted for as a derivative instrument.

As the Company does not have the right to defer settlement of the liability, adoption of the amendments to IAS 1 resulted in the Company updating its accounting policy for the classification of convertible notes as indicated in Note 1 - Summary of Material Accounting Policy Information. This new policy is applied retrospectively and resulted in a change in the classification of convertible notes and associated derivative financial instruments from non-current to current. The effects of the adoption of IAS 1 in the balance sheet as of December 31, 2023, as previously reported, are detailed in the table below:

(in U.S. dollars)	As presented December 31, 2023	Reclassification	Reclassified December 31, 2023
Current liabilities			
Borrowings	1,341,689	28,554,210	29,895,899
Derivative Financial Instruments	—	866,278	866,278
Total current liabilities	<u>\$ 1,341,689</u>	<u>\$ 29,420,488</u>	<u>\$ 30,762,177</u>
Non-current liabilities			
Borrowings	63,220,501	(28,554,210)	34,666,291
Derivative Financial Instruments	866,278	(866,278)	—
Total non-current liabilities	<u>\$ 64,086,779</u>	<u>\$ (29,420,488)</u>	<u>\$ 34,666,291</u>

The effect of the adoption of the amendments to IAS 1 have no impact on the consolidated statement of profit and loss and other income, or net assets of the Company as previously reported.

The convertible notes are presented in the consolidated balance sheet as follows:

Borrowings (current liabilities)
(in U.S. dollars)

	December 31, 2024	December 31, 2023
Opening balance	\$ 28,554,210	—
Initial recognition	—	27,640,052
Costs of issue of convertible notes	—	(43,614)
Interest expense*	1,806,365	957,772
Balance at December 31, 2024	<u>\$ 30,360,575</u>	<u>\$ 28,554,210</u>

* Interest expense, for the year ended December 31, 2024, is calculated by applying the effective interest rate of 6.564% to the liability component.

Derivative Financial Instruments (current liabilities)
(in U.S. dollars)

	December 31, 2024	December 31, 2023
Opening balance	\$ 866,278	—
Initial Recognition	—	2,359,948
Costs of issue of convertible notes	—	(3,724)
Fair value loss (gain)	4,536,546	(1,525,320)
Effect of foreign currency movements	(34,200)	35,374
Balance at December 31, 2024	<u>\$ 5,368,624</u>	<u>\$ 866,278</u>

The fair value of the conversion option (derivative financial liability) was determined using Monte Carlo Simulation methodology. The derivative financial liability is carried at fair value at each reporting date, with gains or losses being recognized in the consolidated statement of profit or loss and other comprehensive income. The remainder of the proceeds were allocated to borrowings with the liability recognized at amortized cost until extinguished on conversion or maturity of the notes. Interest is applied using the effective interest rate.

Fair Value Hierarchy

The derivative financial liability is classified as a Level 3 fair value in the fair value hierarchy as one or more of the significant inputs is not based on observable market data.

The valuation model is highly sensitive to the probability weights applied to the timing of the placement of the purchase order, which is a significant unobservable input. In the event the purchase order is placed before maturity date of the notes, the interest rate would become zero-coupon and, the fair value of the derivative would decrease by \$0.9 million.

Note 23 Contributed Equity

Share capital

Exercise of Performance Rights

During the year ended December 31, 2024, 110,686 ordinary shares were issued to non-KMP employees, and 1,518,701 were issued to KMP on the exercise of vested performance rights (Chris Burns 759,931; Nick Liveris 359,422; Rashda Buttar 295,479; Darcy MacDougald 103,869).

During the year ended December 31, 2023, 699,961 ordinary shares were issued to non-KMP employees, and 89,160 were issued to KMP Rashda Buttar, on the exercise of vested performance rights.

Exercise of Options

On July 16, 2024, 12,000,000 options were exercised at AUD \$0.50 per share using the cashless exercise mechanism, resulting in the issue of 3,415,759 ordinary shares.

On April 18, 2024, 33,334 options were exercised at AUD \$0.50 per share.

On October 24, 2023, 150,000 options were exercised at AUD\$0.55 per share.

On August 29, 2023, 500,000 options were exercised at AUD \$0.70 per share.

On March 23, 2023, 66,666 options were exercised at AUD\$0.90 per share.

On March 15, 2023, 33,333 options were exercised at AUD\$0.50 per share.

Exercise of Share Rights

On August 29, 2023, 419,719 ordinary shares were issued to Directors on the vesting of share rights (See Note 28 - *Share-based Payments*).

On July 7, 2022, 302,539 ordinary shares were issued to Directors on the vesting of share rights (See Note 28 – *Share-based Payments*).

Capital Management

The Company's objectives when managing capital are to safeguard its ability to continue as a going concern, so that it can continue to provide returns for shareholders, benefits for other stakeholders and to maintain an optimal capital structure to reduce the cost of capital.

The capital structure of the Company includes equity attributable to equity holders, comprising of issued capital, reserves and accumulated losses. In order to maintain or adjust the capital structure, the Company may issue new shares, sell assets to reduce debt or adjust the level of activities undertaken by the company.

The Company monitors capital on the basis of cash flow requirements for operational, and exploration and evaluation expenditure. The Company will continue to use capital market issues to satisfy anticipated funding requirements.

The Company has no externally imposed capital requirements. The Company's strategy for capital risk management is unchanged from prior years.

Note 24 Reserves

	December 31, 2024	December 31, 2023
(in U.S. dollars)		
Share-based payment reserve	\$ 45,642,323	\$ 42,462,654
Foreign currency translation reserve	(20,442,256)	(16,626,921)
Convertible loan note reserve	4,523,095	4,523,095
	<u>\$ 29,723,162</u>	<u>\$ 30,358,828</u>

Share-based Payment Reserve

	December 31, 2024	December 31, 2023
(in U.S. dollars)		
Share-based payment reserve	\$ 45,642,323	\$ 42,462,654
Movements:		
Opening balance	42,462,654	37,161,498
Performance rights cash settled in current period (See Note 28 – Share-based Payments)	(603,932)	(296,432)
Cashless exercise of options	(1,605,677)	—
Equity settled share-based payments	5,523,560	5,621,960
Exchange differences	(134,282)	(24,372)
Closing balance	<u>\$ 45,642,323</u>	<u>\$ 42,462,654</u>

The share-based payment reserve includes items recognized as expenses on valuation of director, employee and contractor options and performance rights.

Foreign Currency Translation Reserve

	December 31, 2024	December 31, 2023
(in U.S. dollars)		
Foreign currency translation reserve	\$ (20,442,256)	\$ (16,626,918)
Movements:		
Opening balance	(16,626,918)	(15,136,944)
Exchange differences on translation of foreign operations	(3,813,897)	(1,489,974)
Closing balance	<u>\$ (20,440,815)</u>	<u>\$ (16,626,918)</u>

The foreign currency translation reserve includes exchange differences arising on translation of a foreign-controlled subsidiary.

Note 25 Operating Segments

The Company has identified its operating segments based on the internal reports that are reviewed and used by the Executive Key Management Personnel Board of Directors (Chief Operating Decision Makers or “CODM”) in assessing performance and determining the allocation of resources. The Company is managed primarily on an operational basis. Operating segments are determined on the basis of financial information reported to the Board.

The CODM has identified three operating segments being Battery Materials, Battery Technology and Graphite Exploration. The Battery Materials segment develops and manufactures battery anode materials, and the Battery Technology segment develops battery cell testing equipment, performs consulting services and carries out research and development in battery development. The Graphite Exploration segment manages the maintenance and future development of Mount Dromedary natural graphite deposit. The Company will reassess reportable segments if and when the assets held for sale are sold. See Note 16 - *Exploration and Evaluation Assets*.

Basis of Accounting for Purposes of Reporting by Operating Segments

- **Accounting policies adopted:** Unless stated otherwise, all amounts reported to the Board, being the chief operating decision makers, with respect to operating segments, are determined in accordance with accounting policies that are consistent with those adopted in the annual consolidated financial statements of the Company.
- **Segment assets:** Where an asset is used across multiple segments, the asset is allocated to the segment that receives the majority of the economic value from the asset. In most instances, segment assets are clearly identifiable on the basis of their nature and physical location.
- **Segment liabilities:** Liabilities are allocated to segments where there is a direct nexus between the incurrence of the liability and the operations of the segment. Borrowings and tax liabilities are generally considered to relate to the Company as a whole and are not allocated. Segment liabilities include trade and other payables.
- **Unallocated items:** The following items for revenue, expenses, assets and liabilities are not allocated to operating segments as they are not considered part of the core operations of any segment:
 - Interest income
 - Corporate administrative and other expenses
 - Income tax expense
 - Corporate share-based payment expenses
 - Corporate marketing and project development expenses
 - Corporate cash and cash equivalents
 - Corporate trade and other payables
 - Corporate trade and other receivables

Geographical Segments

For the purposes of segment reporting, all segment activities relating to Graphite Exploration are carried out in Australia and all segment activities relating to Battery Materials and Battery Technology are carried out in North America.

For the year ended December 31, 2024, North America, Asia, Australia, and Europe accounted for 71%, 22%, 3%, and 4% of revenues, respectively. For the year ended December 31, 2023, North America, Asia, Australia, and Europe accounted for 82%, 8%, 6% and 4% of revenues, respectively. For the six months ended December 31, 2022, North America, Asia, Australia, and Europe accounted for 85%, 11%, 3% and 1% of revenues, respectively. For the year ended June 30, 2022, North America, Asia, and Europe accounted for 79%, 17% and 4% of revenues, respectively.

For the year December 31, 2024, the Company had two customers, included in the consulting services revenue stream that accounted for approximately 13% and 12% of total revenues, respectively and one major customer, included in the hardware sales revenue stream, that accounted for 16% of total revenue. For the year ended December 31, 2023, the Company had two customers, included in consulting services revenue stream, that accounted for approximately 17% and 15% of total revenues, respectively. For the six months December 31, 2022, the Company had three major customers, included in the consulting services revenue stream, that accounted for approximately 27%, 22%, and 11% of total revenue, respectively and two major customers, included in the hardware revenue stream, that accounted for approximately 25% and 12% of total revenues, respectively. For the year ended June 30, 2022, the Company had two customers, included in the consulting services revenue stream, that accounted for approximately 15%, and 12% of total revenues, respectively and one major customer, included in the hardware and consulting services revenue streams, that accounted for 11% of total revenue.

Non-cash Investing and Financing Activities

Non-cash investing and financing activities disclosed in other notes are:

- Right of use assets – See Note 20 - *Leases*
- Options and shares issued to employees – See Note 28 – *Share-based Payments*

Note 27 Interests in Subsidiaries

Information about Principal Subsidiaries

The Company's material subsidiaries at December 31, 2023, are set out in the following table. Unless otherwise stated, each entity has share capital consisting solely of ordinary shares that are held by the Company, and the proportion of ownership interest held equals the voting rights held by the Company. The country of incorporation or registration is also their principal place of business. The functional currency of each of the Company's entities is the currency of the primary economic environment in which that entity operates. The consolidated financial statements are presented in U.S. dollars (See Note 1 – *Summary of Material Accounting Policy Information*).

Name of entity	Place of business / country of incorporation	Functional Currency	Ownership interest held of the Company		Principal activities
			2024 %	2023 %	
MD South Tenements Pty Ltd	Australia	AUD	100%	100%	Graphite exploration
NOVONIX Battery Technology Solutions, Inc.	Canada	CAN	100%	100%	Battery technology services
NOVONIX Corp	USA	USD	100%	100%	Investment and management
NOVONIX Anode Materials, LLC	USA	USD	100%	100%	Battery materials development and production
NOVONIX 1029, LLC	USA	USD	100%	100%	Real estate borrower

Note 28 Share-based payments

Performance Rights and Options

Employees of the Company participate in the Company's long-term incentive program ("LTIP") comprising grants of performance rights and options with varying vesting conditions. The performance rights and options carry no dividend or voting rights. Performance rights and options may vest immediately or dependent on the recipient remaining in employment, or achievement of performance-related vesting conditions, by the vesting date. Upon vesting, each performance right and option is convertible into one ordinary share of NOVONIX Limited. If an executive ceases employment before the rights or options vest, the rights or options will be forfeited, except in limited circumstances that they are approved by the Board on a case-by-case basis.

Share Rights

Non-executive Directors participate on an annual grant of equity awards using a value-based approach, which the Board has adopted by issuing Share Rights to Non-executive Directors of the Company each financial year with a fixed US dollar value. As a sign of the Board's long-term commitment to investors and the Company, effective January 1, 2024, Directors reduced the value of share rights they received from \$110,000 to \$55,000.

The share rights carry no dividend or voting rights. Upon vesting, each share right is convertible into one ordinary share of NOVONIX Limited. If a non-executive director ceases to hold office before the share rights vest, the rights will convert on a prorate basis.

The following table presents the composition of share-based payments expense for the years ended December 31, 2024 and 2023, six-months ended December 31, 2022, and the year ended June 30, 2022.

(in U.S. dollars)	Year Ended December 31,		Six Months Ended	Year Ended June 30,

Movement in share-based payments reserve	<u>\$ 3,179,669</u>	<u>\$ 5,301,155</u>	<u>\$ 5,135,987</u>	<u>\$ 12,028,757</u>

SHARE RIGHTS

A summary of movements of all share rights issued is as follows:

	Number on issue
Share rights outstanding at January 1, 2023	436,403
Granted	65,405
Forfeited	(16,684)
Exercised	(419,719)
Share rights outstanding at December 31, 2023	65,405
Share rights exercisable at January 1, 2024	65,405
Granted	632,890
Forfeited	—
Exercised	(65,405)
Share rights outstanding at December 31, 2024	632,890
Share rights exercisable at December 31, 2024	632,890

During the year ended December 31, 2024, share rights were granted to non-executive Directors, as set out in the table below. The share rights are convertible to ordinary shares on a 1:1 basis and vest on receipt of Shareholder approval. The value of each share right was determined with reference to the market value of the underlying securities on grant date. An expense of \$402,966 was recognized for the year ended December 31, 2024. During the year ended December 31, 2023, share rights were granted to a non-executive Director, Ron Edmonds, subject to shareholder approval at the 2024 Annual General Meeting. The share rights are convertible to ordinary shares on a 1:1 basis and vest on receipt of Shareholder approval. The value of each share right was determined with reference to the market value of the underlying securities on grant date. An expense of \$31,943 was recognized for the year ended December 31, 2023.

Further details of the share rights granted during the year December 31, 2024, are set out in the table below:

Name	Grant date	Number	Vesting date	Fair value (AUD)	Expiry	Expense recognized (USD)
Anthony Bellas	January 1, 2024	109,749	December 31, 2024	\$ 0.97	December 31, 2025	\$ 69,878
Sharan Burrow	January 1, 2024	84,145	December 31, 2024	\$ 0.97	December 31, 2025	\$ 53,576
Ron Edmonds	January 1, 2024	109,749	December 31, 2024	\$ 0.97	December 31, 2025	\$ 69,878
Robert Natter	January 1, 2024	109,749	December 31, 2024	\$ 0.97	December 31, 2025	\$ 69,878
Jean Oelwang	January 1, 2024	109,749	December 31, 2024	\$ 0.97	December 31, 2025	\$ 69,878
Phillips 66	January 1, 2024	109,749	December 31, 2024	\$ 0.97	December 31, 2025	\$ 69,878
Total expense recognized						\$ 402,966

PERFORMANCE RIGHTS

For executive LTI awards granted in 2024, all performance rights vest based on corporate performance, with others vesting solely based on time. Payouts are measured based on achievement of relative TSR (versus a peer group of 20 companies primarily focused on the diversified metals and electronic equipment industries) over a three-year performance period and are capped at the target opportunity. Performance rights require a minimum level of relative TSR (35th percentile) to achieve any payout, regardless of revenue earned, and a relative TSR of at least 60th percentile to pay out at the highest level.

Performance rights granted in 2024 also include a revenue modifier based on the attainment of a three-year revenue goal (with the payout still capped at the target opportunity).

The number of FY24 Performance Rights that will vest upon satisfaction of the TSR Measure (specified above) will be adjusted based on the Company meeting certain revenue milestones in respect of the 2026 Financial Year (assessed as at December 31, 2026).

Notwithstanding the Revenue Target Modifier, the total number of Performance Rights that can vest shall not exceed the number of Performance Rights representing the target opportunity.

Other Performance rights outstanding prior to December 31, 2024, are vesting, based on the achievement of performance criteria, such as corporate goals (achievement of revenue targets for a specified period of time) , and those vesting only based on continued service over time.

A summary of movements of all performance rights issued is as follows:

	Number on issue
	2024
Performance rights outstanding at January 1, 2023	11,011,895
Granted	4,631,721
Forfeited	(962,688)
Exercised	(1,252,558)
Performance rights outstanding at December 31, 2023	13,428,370
Granted	16,287,972
Forfeited	(5,819,922)
Exercised	(2,879,589)
Performance rights outstanding at December 31, 2024	21,016,831
Performance rights vested at December 31, 2024	—

Performance Rights Granted in the Current Period

During the years ended December 31, 2024 and 2023, performance rights (convertible to ordinary shares on a 1:1 basis) were granted to Key Management Personnel, other employees and contractors as set out in the table below. The value of each performance right was determined with reference to the market value of the underlying securities on grant date.

Further details of the performance rights are set out in the table below:

Name	Grant date	Number	Vesting date	Fair value (AUD)	Expiry	Expense recognized (USD)
Rashda Buttar	April 18, 2024	1,075,930	December 31, 2026	\$ 0.89	Cessation of employment	\$ 210,918

Performance Rights Net Settled for Withholding Tax Obligations

The Company has an obligation to withhold tax on the vesting of performance rights for employee's resident in the USA and Canada. As consideration for the withholding tax, the Company reduces the number of shares to be issued to the employees (net settled).

During the year ended December 31, 2024, the Company net settled the following share-based payments:

Name	Performance rights vested & exercised	Net settled shares	Withholding obligation (USD)
Non-KMP employees	1,295,643	818,740	\$ 235,153
Chris Burns	759,931	349,568	196,487
Rashda Buttar	295,479	165,208	63,723
Nick Liveris	359,422	192,002	79,103
Darcy MacDougald	169,114	103,869	29,466
		Total	\$ 603,932

OPTIONS

A summary of movements of all options issued is as follows:

	Number on issue	Weighted Average Exercise Price (AUD)
Options outstanding as of January 1, 2023	29,093,334	\$ 0.52
Granted to employees	—	—
Forfeited	(133,334)	\$ 1.30
Exercised	(749,999)	\$ 0.68
Options outstanding as of December 31, 2023	28,210,001	\$ 0.50
Vested options outstanding as of December 31, 2023	12,676,667	\$ 0.50
Forfeited	(5,010,000)	\$ 0.50
Exercised	(12,033,334)	\$ 0.50
Options outstanding as of December 31, 2024	11,166,667	\$ 0.50
Vested options outstanding as of December 31, 2024	666,667	\$ 0.50

The weighted average remaining contractual life of options outstanding at December 31, 2024 was 4.3 years, and at December 31, 2023 was 3.4 years.

The exercise price for options outstanding at December 31, 2024, was AUD\$0.50, and at December 31, 2023 the range of exercise prices was AUD\$0.50 to AUD\$0.55.

There were no options granted during the years ended December 31, 2024 and 2023.

Note 29 Related Party Transactions

During the year ended December 31, 2024 there were the following related party transactions:

- On April 18, 2024, 3,658,161 performance rights were granted to Chris Burns as an LTI. The performance rights (convertible to ordinary shares on a 1:1 basis) vest on December 31, 2026. The performance rights vest subject to the achievement of performance conditions. An expense of \$716,966 was recognized during the year ended December 31, 2024, relating to these performance rights.
- On April 18, 2024, 1,075,930 performance rights were granted to Rashda Buttar as an LTI. The performance rights (convertible to ordinary shares on a 1:1 basis) vest on December 31, 2026. The performance rights vest subject to the achievement of performance conditions. An expense of \$210,918 was recognized during the year ended December 31, 2024, relating to these performance rights.
- On April 18, 2024, 1,398,709 performance rights were granted to Nick Liveris as an LTI. These performance rights lapsed on cessation of Nick Liveris' employment with the Company, and accordingly no expense was recognized during the year ended December 31, 2024, relating to these performance rights.
- On April 18, 2024, 1,075,930 performance rights were granted to Darcy MacDougald as an LTI. The performance rights (convertible to ordinary shares on a 1:1 basis) vest on December 31, 2026. The performance rights vest subject to the achievement of performance conditions. An expense of \$210,873 was recognized during the year ended December 31, 2024, relating to these performance rights.
- On April 18, 2024, 109,749 share rights were granted to Tony Bellas. The share rights (convertible to ordinary shares on a 1:1 basis) vest on December 31, 2024. An expense of \$69,893 was recognized during the year ended December 31, 2024, relating to these share rights.

- On April 18, 2024, 109,749 share rights were granted to Robert Natter. The share rights (convertible to ordinary shares on a 1:1 basis) vest on December 31, 2024. An expense of \$69,893 was recognized during the year ended December 31, 2024, relating to these share rights.
- On April 18, 2024, 109,749 share rights were granted to Phillips 66 Company. The share rights (convertible to ordinary shares on a 1:1 basis) vest on December 31, 2024. An expense of \$69,893 was recognized during the year ended December 31, 2024, relating to these share rights.
- On April 18, 2024, 109,749 share rights were granted to Jean Oelwang. The share rights (convertible to ordinary shares on a 1:1 basis) vest on December 31, 2024. An expense of \$69,893 was recognized during the year ended December 31, 2024, relating to these share rights.
- On April 18, 2024, 109,749 share rights were granted to Ron Edmonds. The share rights (convertible to ordinary shares on a 1:1 basis) vest on December 31, 2024. An expense of \$69,893 was recognized during the year ended December 31, 2024, relating to these share rights.
- On April 18, 2024, 84,145 share rights were granted to Sharan Burrow. The share rights (convertible to ordinary shares on a 1:1 basis) vest on December 31, 2024. An expense of \$53,587 was recognized during the year ended December 31, 2024, relating to these share rights.
- On October 8, 2024, 1,144,130 performance rights were granted to Robert Long as an LTI. The performance rights (convertible to ordinary shares on a 1:1 basis) vest on December 31, 2026. The performance rights vest subject to the achievement of performance conditions. An expense of \$74,794 was recognized during the year ended December 31, 2024, relating to these performance rights.
- During the year ended December 31, 2024, Phillips 66 were paid fees totaling \$57,500 for Mr Suresh Vaidyanathan's services to the Company as a Director. Mr. Suresh Vaidyanathan is not permitted to receive remuneration in his personal capacity under the terms of his employment with Phillips 66 and terms of engagement with the Company. Accordingly, all fees earned by them are paid directly to Phillips 66.

During the year ended December 31, 2023 there were the following related party transactions:

- On April 5, 2023, 1,604,871 performance rights were granted to Chris Burns as an LTI. The performance rights (convertible to ordinary shares on a 1:1 basis) vest on December 31, 2025. 50% of the performance rights vest subject to continued employment over the vesting period, and 50% vest subject to the achievement of performance conditions. An expense of \$119,312 was recognized during the six-months ended June 30, 2023 relating to these performance rights.
- On April 5, 2023, 253,401 performance rights were granted to Rashda Buttar as an LTI. The performance rights (convertible to ordinary shares on a 1:1 basis) vest on December 31, 2025. 50% of the performance rights vest subject to continued employment over the vesting period, and 50% vest subject to the achievement of performance conditions. An expense of \$18,839 was recognized during the six-months ended June 30, 2023, relating to these performance rights.
- On April 5, 2023, 549,035 performance rights were granted to Nick Liveris as an LTI. The performance rights (convertible to ordinary shares on a 1:1 basis) vest on December 31, 2025. 50% of the performance rights vest subject to continued employment over the vesting period, and 50% vest subject to the achievement of performance conditions. An expense of \$40,818 was recognized during the six-months ended June 30, 2023, relating to these performance rights.
- During the year ended December 31, 2023, Phillips 66 were paid fees totaling \$59,534 for Ms. Zhanna Golodryga's and Mr. Suresh Vaidyanathan's services to the Company as Directors. Ms. Zhanna Golodryga and Mr. Suresh Vaidyanathan are not permitted to receive remuneration in their personal capacity under the terms of their employment with Phillips 66 and terms of engagement with the Company. Accordingly, all fees earned by them are paid directly to Phillips 66.

There were no other related party transactions during the year ended December 31, 2024, or prior fiscal years. For details of disclosures relating to key management personnel, see Note 7 - *Key Management Personnel Compensation*.

Note 30 Commitments and Contingencies

Exploration Commitments

(in U.S. dollars)	<u>December 31,</u> <u>2024</u>	<u>December 31,</u> <u>2023</u>
Commitments for payments under exploration permits in existence at the reporting date but not recognized as liabilities payable	\$ 470,763	\$ 2,000

So as to maintain current rights to tenure of various exploration tenements, the Company will be required to outlay amounts in respect of tenement exploration expenditure commitments. These outlays, which arise in relation to granted tenements are noted above. The outlays may be varied from time to time, subject to approval of the relevant government departments, and may be relieved if a tenement is relinquished.

Exploration commitments are calculated on the assumption that each of these tenements will be held for its full term. But, in fact, commitments will decrease materially as exploration advances and ground that is shown to be unprospective is progressively surrendered. Expenditure commitments on prospective ground will be met out of existing funds, farm-outs, and new capital raisings.

Capital Commitments

Significant capital expenditure contracted for at the end of the reporting period but not recognized as liabilities is as follows:

(in U.S. dollars)	<u>December 31,</u> <u>2024</u>	<u>December 31,</u> <u>2023</u>
Property, plant and equipment	\$ 52,968,336	\$ 9,321,453

The capital commitments relate to purchases of property, plant and equipment in connection with the expansion of our business and development of our technologies in the NAM and BTS business segments and are expected to be recognized within the next twelve months.

Legal Proceedings

The Company is currently not a party to any material legal proceedings. From time to time, the Company may become involved in legal proceedings arising in the ordinary course of business. Such claims or legal actions, even if without merit, could result in the expenditure of significant financial and management resources and potentially result in civil liability for damages.

Note 31 Financial Risk Management

This note explains the Company's exposure to financial risks and how these risks could affect the Company's future financial performance. The current year profit or loss information has been included where relevant to add further context.

The totals for each category of financial instruments, measured in accordance with IAS 39: *Financial Instruments: Recognition and Measurement*, as detailed in the accounting policies to these consolidated financial statements, are as follows:

		December 31, 2024	December 31, 2023
(in U.S. dollars)	Notes		
Financial assets			
Cash and cash equivalents		\$ 42,557,621	\$ 78,713,885
Trade and other receivables	10, 12	9,610,361	4,358,833
Financial assets at fair value through profit or loss	15	—	16,666,665
Total financial assets		52,167,982	99,739,383
Financial liabilities			
Trade payables	18	998,258	1,342,369
Lease liabilities	20	7,010,416	4,825,560
Borrowings	21	64,444,081	64,562,190
Total financial liabilities		\$ 72,452,755	\$ 70,730,119

The Board has overall responsibility for the determination of the Company's risk management objectives and policies. The overall objective of the Board is to set policies that seek to reduce risk as far as possible without unduly affecting the Company's competitiveness and flexibility.

Market Risk

Market risk is the risk that the change in market prices, such as foreign exchange rates, interest rates and equity prices will affect the Company's income or the value of its holdings of financial instruments. The Company is exposed to price risk for its investment in KORE Power (Note 15).

Foreign Currency Risk

Foreign exchange risk arises from future transactions and recognized assets and liabilities denominated in a currency that is not the functional currency of the relevant Company entity. Exposure to foreign currency risk may result in the fair value or future cash flows of a financial instrument fluctuating due to movement in foreign exchange rates of currencies in which the Company holds financial instruments which are other than the USD.

With instruments being held by overseas operations, fluctuations in the Canadian dollar may impact on the Company's financial results.

The following table shows the foreign currency risk as on the financial assets and liabilities of the Company's operations denominated in currencies other than the functional currency of the operations.

The Company's exposure to foreign currency risk at the end of the reporting period, expressed in U.S. dollars, was as follows:

	December 31, 2024 CAD	December 31, 2023 CAD	December 31, 2024 USD	December 31, 2023 USD
Cash at bank	\$ —	\$ —	\$ 2,351,324	\$ 32,748,324
Trade receivables	—	—	1,507,778	2,427,380
Trade payables	3,623	—	50,778	37,283

Cash Flow and Fair Value Interest Rate Risk

The Company's main interest rate risk arises from long-term borrowings with variable rates, which expose the Company to cash flow interest rate risk. During the year ended December 31, 2024, the Company's borrowings at variable rates were denominated in Canadian and U.S. dollars.

As the Company has interest-bearing cash assets, the Company's income and operating cash flows are exposed to changes in market interest rates. The Company manages its exposure to changes in interest rates by using fixed term deposits.

At December 31, 2024, if interest rates had changed by +/- 100 basis points from the year-end rates with all other variables held constant, post-tax profit / (loss) for the year ended December 31, 2023, would have been \$98,738 (\$445,024 for the year ended December 31, 2023) lower/higher, as a result of higher/lower interest income from cash and cash equivalents.

Credit Risk

Credit risk is managed on a Company basis. Credit risk arises primarily from cash and cash equivalents and deposits with banks and financial institutions, and trade and other receivables. For banks and financial institutions, only independently rated parties with a minimum rating of 'AAA' are accepted.

For trade and other receivables, amounts are considered as "past due" when the debt has not been settled, in line with the terms and conditions agreed between the Company and the customer to the transaction. Due to a strong credit approval process, the Company has a minimal history of bad debt write-offs.

The balance of receivables that remain within initial trade terms are considered to be of high credit quality. The credit quality of financial assets that are neither past due nor impaired can be assessed by reference to external credit ratings (if available).

Liquidity Risk

Prudent liquidity risk management implies maintaining sufficient cash and marketable securities to meet obligations when due.

The Company manages liquidity risk by continuously monitoring forecast and actual cash flows. No finance facilities were available to the Company at the end of the reporting period.

All financial assets mature within one year. The maturity of all financial liabilities is set out in the table below.

Financing Arrangements

The Company's undrawn borrowing facilities as at December 31, 2024 totals \$62,000 which relates to the loan facilities secured over commercial land and buildings (See Note 21 - *Borrowings*).

Maturities of Financial Liabilities

As of December 31, 2024, the contractual maturities of the Company's non-derivative financial liabilities were as follows:

Contractual maturities of financial liabilities	Less than 6 months	6 – 12 months	Between 1 and 2 years	Between 2 and 5 years	Over 5 years	Total contractual cash flows	Carrying amount
At December 31, 2024	US\$	US\$	US\$	US\$	US\$	US\$	US\$
Trade and other payables	\$ 8,524,141	\$ —	\$ —	\$ —	\$ —	\$ 8,524,141	\$ 8,524,141
Lease liabilities	404,400	404,400	841,152	2,730,770	4,178,969	8,559,691	7,010,416
Borrowings*	1,392,972	1,390,774	2,766,961	41,890,779	31,699,815	79,141,300	64,444,081
Total non-derivatives	\$ 10,321,513	\$ 1,795,174	\$ 3,608,113	\$ 44,621,549	\$ 35,878,784	\$ 96,225,132	\$ 79,978,638

* Includes convertible notes (note 22) with terms that allow for redemption in cash at maturity (June 2028) at the option of the holder.

Note 32 Events after the Reporting Date

Since December 31, 2024, the Company has:

- issued 53,887,112 fully paid ordinary shares under a Share Purchase Plan at AUD\$0.60 per share, raising AUD\$32,332,267.
- issued 12,771,392 fully paid ordinary shares under an Institutional Placement to Phillips 66 Company at AUD\$0.60 per share, raising USD\$5million
- on January 21, 2025, announced the planned transition in our CEO role, with Dr. Chris Burns stepping down as Chief Executive Officer effective January 24, 2025. Dr. Burns will continue to support the Company in an advisory capacity, serving as Special Advisor to the Board, in order to provide continuity, support ongoing operations of the Company and ensure a smooth transition. The Board has appointed Mr. Robert Long, our Chief Financial Officer, to serve as interim CEO, effective January 24, 2025, until a permanent CEO is appointed. Mr. Long will work closely with the Board to ensure a smooth transition and maintain our momentum and focus on our key strategic goals.

There have been no other matters or circumstances that have arisen since the end of the twelve months ended December 31, 2024, which significantly affected or could significantly affect the operations of the Company, the results of those operations or the state of affairs of the Company in future financial years.

Note 33 Unaudited Half Year Report

The Company did not apply the amendments to IAS 1 in the unaudited Half-Year Report for the six months ended June 30, 2024, and therefore, the convertible notes of \$29,452,429 and the related derivative financial instruments of \$426,553 were incorrectly presented as non-current liabilities instead of current liabilities. As a result of the correction of an error to reflect the adoption of the amendments to IAS 1, current borrowings and current derivative financial liabilities should have been \$30,856,176 and \$426,553, respectively. The effect of the adoption of the amendments to IAS 1 have no impact on the consolidated statement of profit and loss and other income, or net assets of the Company as previously reported.

AUSTRALIAN DISCLOSURE REQUIREMENTS

Consolidated Entity Disclosure Statement

The following table contains details of each entity within the company's consolidated group:

Entity Name	Entity Type	% of share capital held	Place of incorporation	Australian resident or foreign resident	Foreign jurisdiction of foreign residents
NOVONIX Limited	Body Corporate	N/A	Australia	Australia	N/A
NOVONIX BTS Holding 1 Limited	Body Corporate	100%	Canada	Foreign	Canada

NOVONIX Enterprise South HoldCo LLC	Body Corporate	100%	United States	Foreign	United States

Basis of preparation

This Consolidated Entity Disclosure Statement (CEDs) has been prepared in accordance with the Corporations Act 2001 and includes information for each entity that was part of the consolidated entity at the end of the financial year in accordance with IFRS 10 *Consolidated Financial Statements*.

Determination of tax residency

Section 295(3A)(vi) of the *Corporations Act 2001* defines tax residency as having the meaning in the *Income Tax Assessment Act 1997*. The determination of tax residency involves judgment as there are different interpretations that could be adopted, and which could give rise to a different conclusion on residency.

In determining tax residency, the consolidated entity has applied the following interpretations:

- Australian tax residency: The consolidated entity has applied current legislation and judicial precedent, including having regard to the Tax Commissioner's public guidance in Tax Ruling TR 2018/5.
- Foreign tax residency: Where necessary, the consolidated entity has used independent tax advisers in foreign jurisdictions to assist in its determination of tax residency to ensure applicable foreign tax legislation has been complied with (see section 295(3A)(vii) of the *Corporations Act 2001*).

Auditor's Independence Declaration

As lead auditor for the audit of NOVONIX Limited for the year ended 31 December 2024, I declare that to the best of my knowledge and belief, there have been:

- (a) no contraventions of the auditor independence requirements of the *Corporations Act 2001* in relation to the audit; and
- (b) no contraventions of any applicable code of professional conduct in relation to the audit.

This declaration is in respect of NOVONIX Limited and the entities it controlled during the period.

A handwritten signature in black ink that reads 'Michael Crowe'.

Directors' Declaration

In the Directors' opinion:

- (a) the financial statements and notes set out on pages F-1 to F-62 are in accordance with the Corporations Act 2001, including:
 - (i) complying with Accounting Standards, the Corporations Regulations 2001 and other mandatory professional reporting requirements, and
 - (ii) giving a true and fair view of the consolidated entity's financial position as at 31 December 2024 and of its performance for the financial period ended on that date, and
 - (iii) the consolidated entity disclosure statement is true and correct, and
- (b) there are reasonable grounds to believe that the Company will be able to pay its debts as and when they become due and payable.

Note 1 confirms that the financial statements also comply with International Financial Reporting Standards as issued by the International Accounting Standards Board.

The Directors have been given the declarations by the Managing Director and Chief Financial Officer required by section 295A of the Corporations Act 2001.

This declaration is made in accordance with a resolution of the Directors.

R Natter
Director

Brisbane, February 28, 2025

Independent auditor's report

To the members of NOVONIX Limited

Report on the audit of the financial report

Our opinion

In our opinion:

The accompanying financial report of NOVONIX Limited (the Company) and its controlled entities (together the Group) is in accordance with the *Corporations Act 2001*, including:

- (a) giving a true and fair view of the Group's financial position as at 31 December 2024 and of its financial performance for the year then ended
- (b) complying with Australian Accounting Standards and the *Corporations Regulations 2001*.

What we have audited

The financial report comprises:

- the consolidated balance sheet as at 31 December 2024
- the consolidated statement of profit or loss and other comprehensive income for the year then ended
- the consolidated statement of changes in equity for the year then ended
- the consolidated statement of cash flows for the year then ended
- the notes to the consolidated financial statements, including material accounting policy information and other explanatory information
- the consolidated entity disclosure statement as at 31 December 2024
- the directors' declaration.

Basis for opinion

We conducted our audit in accordance with Australian Auditing Standards. Our responsibilities under those standards are further described in the *Auditor's responsibilities for the audit of the financial report* section of our report.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Independence

We are independent of the Group in accordance with the auditor independence requirements of the *Corporations Act 2001* and the ethical requirements of the Accounting Professional & Ethical Standards Board's APES 110 *Code of Ethics for Professional Accountants (including Independence Standards)* (the Code) that are relevant to our audit of the financial report in Australia. We have also fulfilled our other ethical responsibilities in accordance with the Code.

Material uncertainty related to going concern

We draw attention to Note 1 in the financial report, which indicates that the Group incurred a net loss of \$74.8 million and net operating cash outflows of \$40.4 million during the year ended 31 December 2024, and is dependent upon raising additional funding to finance its ongoing expansionary activities. These conditions, along with other matters set forth in Note 1, indicate that a material uncertainty exists that may cast significant doubt on the Group's ability to continue as a going concern. Our opinion is not modified in respect of this matter.

Our audit approach

An audit is designed to provide reasonable assurance about whether the financial report is free from material misstatement. Misstatements may arise due to fraud or error. They are considered material if individually or in aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of the financial report.

We tailored the scope of our audit to ensure that we performed enough work to be able to give an opinion on the financial report as a whole, taking into account the geographic and management structure of the Group, its accounting processes and controls and the industry in which it operates.

Audit Scope

- Our audit focused on where the Group made subjective judgements; for example, significant accounting estimates involving assumptions and inherently uncertain future events.
- In designing the scope of our audit, we considered the structure of the Group, which includes three continuing business segments being Battery Materials (NAM), Battery Technology (BTS), and Graphite Exploration (MDG) as well as Corporate and Other operations.

Key audit matters

Key audit matters are those matters that, in our professional judgement, were of most significance in our audit of the financial report for the current period. The key audit matters were addressed in the context of our audit of the financial report as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters. Further, any commentary on the outcomes of a particular audit procedure is made in that context. We communicated the key audit matters to the Audit and Risk Management Committee.

In addition to the matter described in the *Material uncertainty related to going concern* section, we have determined the matters described below to be the key audit matters to be communicated in our report.

Key audit matter

How our audit addressed the key audit matter

Assessment of the fair value of the investment in KORE Power Inc
(Refer to note 15 Financial assets at fair value through profit or loss)

The Group has 3,333,333 shares in KORE Power Inc. ("KORE Power"), which represents approximately 3.7% of the common equity of KORE Power. At 31 December 2024, the investment has been remeasured to nil from \$16.7 million at 1 January 2024.

The investment is accounted for as a financial asset measured at fair value through profit or loss and is classified as Level 3 in the fair value hierarchy as the valuation incorporates significant inputs that are not based on observable market data.

This was a key audit matter because of the:

- Significance of the investment to the Consolidated balance sheet and the remeasurement to the Consolidated statement of profit or loss and other comprehensive income; and
- Judgement required by the Group in assessing the fair value of the KORE Power investment.

Our procedures in relation to assessing the fair value of the investment in KORE Power included, amongst others:

- evaluating the Group's assessment of fair value at 31 December 2024, including assessing the appropriateness of the data and assumptions included in management's fair value assessment by considering the events that occurred during the year which had an impact on the valuation of the KORE Power investment and comparing to publicly available information on KORE Power, including publicly available information released subsequent to the year end;
- enquiring of the Group's Board of Directors as it relates to their views on the determination of fair value and whether any amount of the investment could be recovered through the sale of the shares or other means; and
- assessing the appropriateness of the related disclosures in the notes to the consolidated financial statements against the requirements of Australian Accounting Standards.

Assessment of the fair value of the unsecured convertible loan notes issued to LG Energy Solution, Ltd.
(Refer to note 22 Unsecured convertible loan notes and derivative financial instruments)

On 21 June 2023, the Group issued 45,221,586 unsecured convertible loan notes (the "convertible notes"), with a face value of AUD \$1.00 per note, a coupon rate of 4% and a maturity date of 7 June 2028 for proceeds of US\$30.0 million to LG Energy Solutions, Ltd (LGES).

For accounting purposes, the convertible notes were initially measured at fair value less transaction costs, and subsequently carried at amortised cost. The conversion option is an embedded financial derivative that is measured at fair value at each reporting date, utilising a valuation model based on a market approach.

At 31 December 2024, these financial liabilities were classified as Level 3 in the fair value hierarchy as the valuation incorporates significant inputs that are not based on observable market data.

Our procedures in relation to the accounting of the convertible notes and the associated financial derivative included:

- assessing the appropriateness of the valuation methodology adopted by the Group, with the assistance of PwC valuation experts;
- evaluating the accuracy of the modelled valuation of both the financial liability and embedded derivative components of the convertible notes at the balance date, with the assistance of PwC valuation experts;
- evaluating the appropriateness of the significant inputs and assumptions used in the valuation model, including the Group's assumption on the probability weights applied to the timing of the placement of the purchase order;
- assessing whether the subsequent measurement of both the financial liability and embedded derivative components of the convertible notes were in accordance with the requirements of Australian Accounting Standards; and
- assessing the appropriateness of the related

Key audit matter

How our audit addressed the key audit matter

This was a key audit matter because of the:

- Significance of the amounts to the Consolidated balance sheet;
- Complexity in applying relevant Australian Accounting Standards to account for the convertible notes; and
- Judgements applied in the valuation of both the financial liability and embedded derivative components of the convertible notes.

disclosures in the notes to the consolidated financial statements against the requirements of Australian Accounting Standards.

Impairment assessment of the NOVONIX Anode Materials cash generating unit (Refer to note 17 Intangible assets)

At 31 December 2024, the Group had \$12.0 million of goodwill relating to the NOVONIX Anode Materials ("NAM") cash generating unit ("CGU").

As required by Australian Accounting Standards, the Group is required to test goodwill for impairment annually and consider definite lived non-current assets for impairment indicators.

The Group performed their annual impairment testing for the NAM CGU at 30 June 2024, and an impairment indicators assessment was then performed at the year end.

This was a key audit matter because of the:

- Significance of the goodwill balance to the Consolidated balance sheet; and
- Degree of judgement involved in determining the key assumptions in the models, including forecast performance, growth rates and the discount rate.

Our procedures in relation to the impairment assessment of the NAM CGU included:

- evaluating the Group's assessment of impairment indicators for the NAM CGU by considering the Group's operational activities during the past year and external factors;
- evaluating the Group's impairment valuation methodology and their documented basis for significant assumptions utilised in the impairment model;
- testing the mathematical accuracy, on a sample basis, of the calculations in the impairment model;
- assessing whether the NAM CGU appropriately included assets, liabilities and cash flows directly attributable to the NAM CGU;
- comparing the key inputs and assumptions underpinning the impairment model, where possible, to the Board approved budget and other relevant evidence obtained throughout the course of the audit, including relevant market data;
- assessing whether the discount rate appropriately reflects the risks of the CGU, with the assistance of PwC valuation experts; and
- evaluating the appropriateness of the disclosures in the notes to the consolidated financial statements, including those regarding the key assumptions, in light of the requirements of Australian Accounting Standards.

Key audit matter

Accounting for Construction work in progress assets

(Refer to note 14 Property, plant and Equipment – Construction work in progress)

The Group has continued to invest in engineering works, modifications, and furnace technology.

The consolidated balance of Construction work in progress at 1 January 2024 was \$72.0 million. During the year, a further \$14.6 million was spent, bringing the total balance to \$86.0 million.

The Group capitalises costs in line with the requirements of Australian Accounting Standards.

This was a key audit matter because of the:

- Significance of the Construction work in progress balance to the Consolidated balance sheet, including the additions made during the year;
- Judgement applied in determining whether costs met the criteria for capitalisation and / or remain required for the project to which they relate; and
- Consideration of the timing of when the assets should be transferred from Construction work in progress to the appropriate Property, plant and equipment class to commence depreciation.

How our audit addressed the key audit matter

Our procedures in relation to assessing costs capitalised to Construction work in progress included:

- developed an understanding of and evaluated the Group's cost capitalisation policy;
- compared costs capitalised to Construction work in progress to supporting documentation on a sample basis, including assessing whether the costs meet the criteria for capitalisation with reference to Australian Accounting Standards;
- assessed for a sample of items that have been in Construction work in progress for over 12 months that these assets are recoverable and still intended to be in use in the future;
- obtained representations from management of the Group on the future intended use and recoverability of the assets in Construction work in progress; and
- assessed for a sample of items in Construction work in progress whether the items were not in use at year-end, and therefore have appropriately not yet been capitalised to the appropriate Property, plant and equipment asset class and were not depreciated during the year.

Other information

The directors are responsible for the other information. The other information comprises the information included in the annual report for the year ended 31 December 2024, but does not include the financial report and our auditor's report thereon.

Our opinion on the financial report does not cover the other information and accordingly we do not express any form of assurance conclusion thereon through our opinion on the financial report. We have issued a separate opinion on the remuneration report.

In connection with our audit of the financial report, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial report or our knowledge obtained in the audit, or otherwise appears to be materially misstated.

If, based on the work we have performed on the other information that we obtained prior to the date of this auditor's report, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Responsibilities of the directors for the financial report

The directors of the Company are responsible for the preparation of the financial report in accordance with Australian Accounting Standards and the *Corporations Act 2001*, including giving a true and fair view, and for such internal control as the directors determine is necessary to enable the preparation of the financial report that is free from material misstatement, whether due to fraud or error.

In preparing the financial report, the directors are responsible for assessing the ability of the Group to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the directors either intend to liquidate the Group or to cease operations, or have no realistic alternative but to do so.

Auditor's responsibilities for the audit of the financial report

Our objectives are to obtain reasonable assurance about whether the financial report as a whole is free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with the Australian Auditing Standards will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of the financial report.

A further description of our responsibilities for the audit of the financial report is located at the Auditing and Assurance Standards Board website at: https://auasb.gov.au/media/bwvjcgre/ar1_2024.pdf. This description forms part of our auditor's report.

Report on the remuneration report

Our opinion on the remuneration report

We have audited the remuneration report included in the directors' report for the year ended 31 December 2024.

In our opinion, the remuneration report of NOVONIX Limited for the year ended 31 December 2024 complies with section 300A of the *Corporations Act 2001*.

Responsibilities

The directors of the Company are responsible for the preparation and presentation of the remuneration report in accordance with section 300A of the *Corporations Act 2001*. Our responsibility is to express an opinion on the remuneration report, based on our audit conducted in accordance with Australian Auditing Standards.
