Infill Reverse Circulation ('RC') drilling was completed at Hornet, in preparation for the open pit mining sequence, due to commence in quarter four FY25. A total of 4,158 metres of RC drilling was completed into the Inferred mineral resource, within the Mary fault mineralisation (figure 1). For the Mary Fault position, a dense drill spacing of 5 metres by 5 metres was required to determine continuity of mineralisation. Drilling results are positive with a high-grade mineralised zone defined (figure 2 and table 1). These drilling results will be included in a Mineral Resource update and form part of an updated mining sequence.

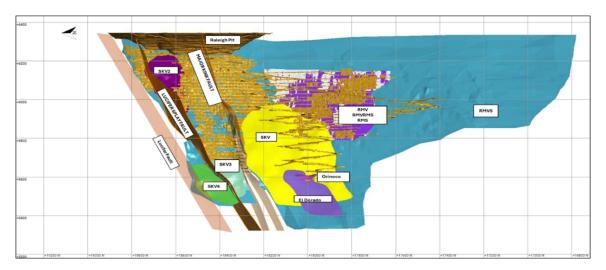

A plan view of the Hornet RC drilling completed within the quarter, showing historic drilling, the Hornet open pit design and the Mary Fault mineralisation.

A cross section of the Hornet infill RC drilling into the Mary Fault mineralisation.

A re-interpretation of the ore zone at Raleigh was completed, with new mineralised structures identified in the hanging wall of the Raleigh Main Vein ('RMV'). These new lodes are associated with the Skinners Vein structure and a are labelled SKV2, SKV3, SKV4, Orinoco and El Dorado lodes (Figure 1). The Skinners Vein has been extended down dip to beneath the 5500RL. The new interpretation of the hanging-wall mineralisation is based on reviewing historic drill hole data and applying learnings from the nearby Kundana ore zones.

### Seven Mile Hill (Rand's Interest 50%)

Desk top targeting was completed by an external geology consultant based on a review of previous assay results. A Program of Work has been completed and submitted to DEMIRS for exploration on the Seven Mile tenements during the current financial year.

Rand completed two drill holes for 651 metres, comprising:

- Rotary mud drilling in the clay zone for 132 metres; and
- Diamond drilling for 519 metres.

The drilling was conducted on P26/4173 following erratic gold intercepts from shallower RC drilling. The program is to enable a better structural understanding and identify deeper high-grade gold mineralisation.

The core is currently being cut in preparation for gold assays.

## Auditor's Responsibilities for the Review of the Financial Report

Our responsibility is to express a conclusion on the half-year financial report based on our review. ASRE 2410 requires us to conclude whether we have become aware of any matter that makes us believe that the half-year financial report is not in accordance with the Corporations Act 2001 including: giving a true and fair view of the consolidated entity's financial position as at 31 December 2024 and its performance for the half year ended on that date; and complying with Accounting Standard AASB 134 Interim Financial Reporting and the Corporation Regulations 2001.

A review of a half-year financial report consists of making enquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with Australian Auditing Standards and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.
