Acknowledgement of Country

We acknowledge the Traditional Owners and local communities of the lands on which Gold Road operates.

We acknowledge the unique and continuing connection of those peoples to those lands and the custodial responsibilities of those peoples to ensure the wellbeing of those lands, the inhabitants, their culture and traditions.

Consistent with our values, we are committed to caring for the wellbeing of all, acting with integrity, respecting human rights and developing sustainable exploration and mining operations. Gold Road seeks to create positive social impacts by promoting respect for human rights across all of our operations.

Chairman's Letter

Dear Shareholder

It is my pleasure to present this Annual Report as I reflect on a year during which your Company built on its strong foundations to optimally position us well for the future.

Importantly, the achievements in 2024 were accomplished without compromising our unwavering focus on safe and responsible production, sustainable practices and value-creating growth.

Broadly speaking, Gold Road's strategy has two components:

- Continue to optimise the operations of the Gruyere gold mine, our 50:50 joint venture with operator Gold Fields; and
- Achieve sustainable growth in shareholder value, by creating and developing both organic and inorganic growth opportunities

Regarding the **first component**, mixed results were achieved in 2024.

In 2024, we marked five years of production from Gruyere, a truly world-class asset.

However, Gruyere failed to build on its 2023 321,984 ounce record output, delivering 287,270 ounces in 2024 (Gold Road share: 143,635 ounces)¹. The weaker performance was due to several operational challenges, particularly in the first half of the year, when an unprecedented rainfall event significantly hindered operations.

Pleasingly, Gruyere's performance steadily improved as the year progressed, ending with a record December quarter, during which the mine produced 91,631 ounces of gold¹.

This step-up in performance, combined with the waste stripping and mine bench positioning undertaken in the second half of 2024, has given the Gruyere JV partners high confidence in the achievement of the ambitious operational targets which have been set for 2025 and beyond².

I acknowledge the frustrations that many shareholders felt during the first part of 2024, at Gruyere's failure to deliver to its full potential. That said, after the performance achieved in the second half of 2024, Gold Road's management and Board remains confident of the long-term, sustainable value still to come from this world-class operation, which only produced its first bar of gold in 2019.

Performance on the **second component** of our strategy during 2024 was highly successful, with several notable milestones being achieved.

As we reported in January 2025, Gruyere – and therefore Gold Road – retains an enviable gold inventory that will sustain high levels of production for years to come. There are few ASX-listed gold producers with our market capitalisation that can claim a Mineral Resource of 4.81 million ounces and Ore Reserves of 1.92 million ounces (50% attributable)³. Pleasingly, after mining depletion, both attributable Mineral Resources and attributable Ore Reserves increased over 2024.

¹ ASX announcement dated 6 January 2025

² ASX announcement dated 28 January 2025

³ ASX announcement dated 23 January 2025

The annual Resource and Reserve Statement, as at 31 December 2024, also included for the first time an Ore Reserve for Gold Road's 100% owned Gilmour Deposit³, which is a significant outcome for Shareholders and an excellent return on the exploration expenditure across our 100% owned Yamarna Project.

As shareholders are aware, Gold Road holds a 17.3% stake in De Grey Mining Limited (ASX: DEG), acquired through the successful takeover of DGO Gold in 2022. As shareholders are also aware, Northern Star Resources announced a takeover of De Grey on 2 December 2024 by means of a proposed scheme of arrangement, which is expected to complete in April 2025, in the absence of an alternative superior offer.

At the time of writing and following the above announcement, our De Grey shareholding was valued at \$815 million⁴ vs the original investment cost of \$412 million. This substantial increase in value represents yet another strong vindication of the Gold Road team's rigorous and disciplined approach to investment decisions, delivering strong value accretion to Shareholders.

Also during 2024, tangible progress was made in advancing the Golden Highway Project, as well as commencing a deep drilling program to assess the potential for a future Gruyere Underground Project. These two projects, together with the Gilmour Project referred to above, have the potential to both significantly extend the life of Gruyere, as well as driving Gruyere to be much more robust, by creating greater operational flexibility.

Along with the Gold Road Board, I am excited about what 2025 will deliver for our business, not just at Gruyere but across your Company's ever-expanding portfolio of growth opportunities.

Gold Road remains unhedged at the right time in the gold price cycle. This allowed the Company to report another record full-year net profit after tax of \$142.7 million (2023: \$115.7 million) and enabled the Board to determine a fully franked final dividend of 1.5 cents to complement the interim fully franked payout of 0.5 cents per share declared in August.

This was the fourth successive year that Gold Road, which in ASX terms remains a relatively young company, rewarded Shareholders with both an interim and a final dividend. The Board takes its responsibilities as guardians of shareholder funds seriously and is steadfast in its commitment to a disciplined approach to capital management.

On behalf of the Board, I thank our Managing Director and CEO, Duncan Gibbs, and his leadership team for their persistent and sustained efforts in 2024, despite the discouraging events of the first part of the year. Further, I extend thanks to my fellow Board members for their support and sage advice during the year.

Thank you to our Shareholders for your ongoing and passionate support of our Company. I look forward to catching up with many of you at Gold Road's forthcoming AGM in Perth.

Managing Director's Report

Dear Shareholder

I am pleased to report on a year of progress for Gold Road that has left the Company well-placed to enhance shareholder value.

As a leadership team we remained focused on driving value through operational performance, pioneering gold discoveries and strategic investments. In 2024 we made progress on every front notwithstanding a challenging year at Gruyere, our most significant asset.

The physical and psychosocial safety of our team remains the top priority. I am pleased to report that we had zero lost time injuries and made substantial progress in improving our TRIFR rate to 4.6 at year end (2023: 19.24). With the expansion of Gold Road's exploration footprint beyond the Yamarna Greenstone Belt to other parts of Western Australia as well as northeast Queensland, we have introduced appropriate safeguards to protect our people.

We remained committed to managing Gold Road's business in a sustainable and responsible manner. Gold Road retained its position among approximately 60 listed companies in the Australian Dow Jones Sustainability Index and was also recognised for its sustainability efforts in the S&P Global 2025 Sustainability Yearbook. At the same time, we continued advancing our 40:40 vision of gender equality, increasing the number of women in leadership roles. Gold Road retains a positive relationship with the Traditional Owners on whose land Gruyere and our 100% owned Yamarna discoveries are located, and is establishing strong connections with other First Nations groups across Australia.

As the Chairman noted, 2024 was a challenging year for Gruyere.

A wet weather event early in the year compounded operational challenges at Gruyere ultimately leading Gold Road to revise down our full-year production guidance. Notwithstanding a strong end to 2024 that included a record-breaking December quarter, Gruyere fell just short of achieving its full-year target.

I encourage you to read the Review of Operations section for more detail on Gruyere's performance.

Gruyere produced 287,270 ounces (100%) marginally below guidance of 290,000 – 305,000 ounces. Gold Road's 50% share, or 143,635 ounces (2023: 160,992 ounces), came at an average All-in Sustaining Cost of A\$2,211 per attributable ounce (2023: A\$1,662 per ounce), compared to guidance of between A\$2,050 – A\$2,200 per attributable ounce⁵.

Our average gold sales price over the year was A\$3,672 per ounce (2023: A\$2,924 per ounce). Gold Road's attributable operating cash flow from Gruyere was \$362.5 million (2023: \$304.3 million) and free cash flow of \$91.7 million (2023: \$140.2 million).

Profit for the year increased to \$142.7 million (2023: \$115.7 million) as higher revenue for the year was offset by increases in our cost base generally as a result of the macro inflationary environment, higher levels of depreciation and amortisation driven by higher levels of depletion of the Stage 4 capitalised waste in the pit and an increase in income tax expense attributed to the higher profitability levels.

As at 31 December 2024, Gold Road's cash and equivalents stood at A\$173.9 million (2023: A\$149.9 million) while the Company has no debt.

⁵ ASX announcements dated 6 January 2025 and 29 January 2025

Five years since Gruyere's first gold pour, the Open Pit Mineral Resource totals 7.14 million ounces (100%) and the Ore Reserve is 3.45 million ounces (100%).

As announced in January 2025, the Gruyere JV partners expect 2025 full-year production of 325,000 – 355,000 ounces (100%)⁶. The recently reported 3-year production outlook aligns with the long-held ambition to deliver in the order of 350,000 ounces per annum from Gruyere. The increased production profile will be accompanied by extra investment in 2025 in waste stripping and to support a lift in mining rates, tailings dam, and the process plant.

In 2024, the Gruyere JV commissioned independent consultancy SRK to review the mine's underground potential beyond the open pit's planned closure in 2032. Completed in late 2024, the review, based on an assumed extension of the ore body at depth, provided the confidence to proceed with a major 2025 drilling program. This drilling will target an extension of the resource to a depth of approximately 1,200 metres below surface and the definition resources in the top 400 metres below the final pit into the Indicated category.

Gold Road also made major progress during 2024 to expand our 100%-owned growth profile.

A Pre-feasibility Study and maiden Ore Reserve were prepared for the Gilmour Deposit, which lies approximately 60 kilometres southwest of Gruyere. As announced on 20 January 2025, the Pre-feasibility Study delivers a A\$231 million after-tax net present value (at a A\$3,500 gold price) for a five-year mine life at Gilmour, producing on average 50,300 ounces a year to be processed at Gruyere.

Gold Road undertook initial drill programs at its Balter prospect, in the Gascoyne region of Western Australia, and at the Greenvale project in northeastern Queensland. The drill programs were cut short due to inclement weather at the end of the year. Drilling is set to resume at Balter and Greenvale early in the second quarter 2025.

At 31 December 2024, the value of our listed investments was A\$741.7 million⁷ (2023: A\$465 million), dominated by our 17.3% stake in De Grey Mining Ltd.

Based on current guidance we anticipate Gruyere will pass the 2 million ounce milestone in 2026. Once this milestone is reached, Gold Road will start receiving a 1.5% net smelter royalty from Gold Fields.

In closing, I wish to thank my leadership team for their efforts and commitment towards the execution of our strategy. I also thank the Chairman and the Board for their continued support and guidance.

Gold Road has emerged stronger from a challenging 2024 with positive momentum to deliver sustained value. I look forward to updating Shareholders on our progress throughout 2025.

Duncan Gibbs
Managing Director and CEO

Balter Project,
Western Australia

Overview

The Board of Directors (the **Board**) of Gold Road Resources Limited (**Gold Road** or the **Company**) support the establishment and continual development of good corporate governance for the Company, representing its shareholders and promoting and protecting its interests. The Board believes that high standards of governance create a corporate culture that values integrity and ethical behaviour.

As a basis for the oversight of corporate governance, Gold Road has adopted systems of control and accountability as illustrated in Gold Road's Corporate Governance framework.

The policies and procedures within these systems of control and accountability are set out in the Governance Policy Structure on the Company's website goldroad.com.au. The Board is committed to enacting the policies and procedures with openness and integrity, with the intent of providing a strong framework and practical means for ensuring good governance outcomes which meet the expectations of stakeholders.

The Gold Road Constitution and the Board Charter are available on the Company's website goldroad.com.au

Corporate Governance Framework

ASX Corporate Governance Council's Principles and Recommendations

Gold Road complies with the 4th edition ASX Corporate Governance Council's Principles and Recommendations. Gold Road maintains a Board diversity target of 30% female representation and has met the recommended metric since June 2020. As at 31 December 2024, Gold Road's Board comprised 60% males and 40% females. Further information about the Company's corporate governance practices and the **2024 Corporate Governance Statement** are available on our website goldroad.com.au together with the **ASX Appendix 4G** (a checklist cross referencing the ASX Recommendations to disclosures in this Statement).

Managing Risk

At Gold Road, we believe that effective risk identification and management is fundamental to ensuring our business is well positioned to achieve our strategic objectives. Our approach to risk management is governed by our Enterprise Risk Management Framework which includes our internal Risk Appetite Statement and Risk Management Policy. Our risks are regularly assessed and managed at a Company-wide level and at functional and operational levels.

Risk appetite is approved by our Board and is set out in our internal Risk Appetite Statement. Our internal Risk Appetite Statement outlines the residual risks that the Company is prepared to take in pursuit of our strategic objectives and in alignment with our values. Our Board also approves our Risk Management Policy with both documents aligned to *AS ISO 31000:2018 Risk Management Principles and Guidelines*. Potential risks that may adversely affect the Company are identified and managed in accordance with our Risk Appetite Statement and Risk Management Policy. The Risk and ESG Board Committee provides oversight of the Enterprise Risk Management Framework. The Risk Management Policy and Charters for each Board Committee detailing risk accountabilities, are available on our website goldroad.com.au.

Gold Road's risk management system ranks risks across the business on likelihood, severity of consequence, risk velocity and alignment with the Company's risk appetite. Our risk categories include Business continuity, Financial, People and Organisational Culture, Health, Safety and Wellbeing, Environment, Social/Cultural Heritage, Legal and Compliance, and Reputation.

Risks can be assessed against several risk categories such as Climate Change, which is assessed against the Environmental, Financial and Reputation risk categories.

Risks are assessed at either Strategic or Operational levels, and each risk is assigned a Risk Owner (at management level), with risks and risk controls documented in the Company's Enterprise Risk Management software application. Regular risk reviews and verifications are undertaken by management and the Board to ensure that risks are being effectively managed.

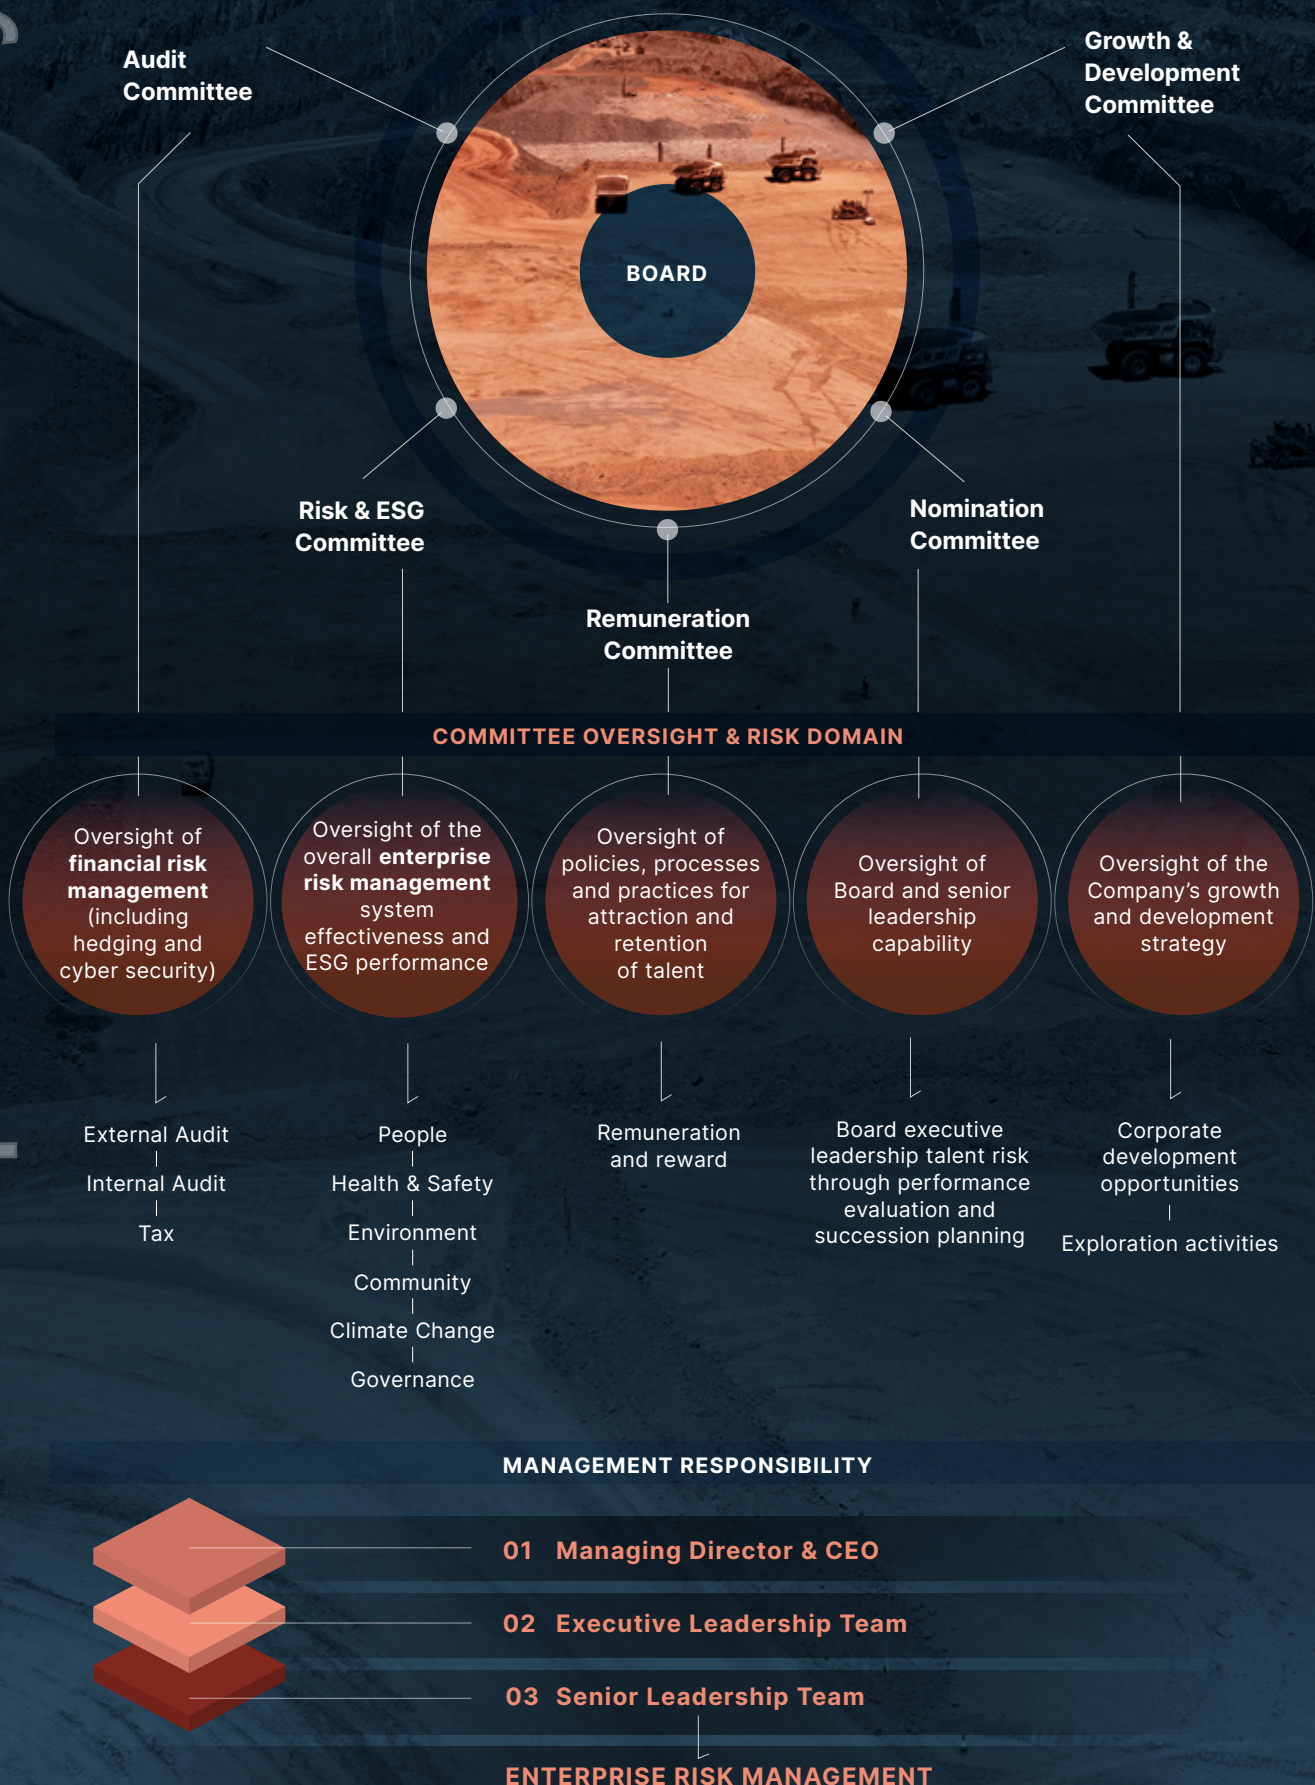

Emerging risks and trends are proactively discussed at Executive Leadership Team meetings, with review and further inputs at Committee and Board meetings. The Risk and ESG Board Committee coordinates risk 'deep dives' and education sessions.

Risk deep dives covered in 2024 included contractor management, proposed Nature Positive Act, geopolitical and macro-economic trends, and mandatory climate change reporting. Education sessions focussed on increasing awareness on cyber risk and understanding of positive duties of directors for non-operating joint ventures were also conducted.

Material Business Risks for 2024

Gold Road maintains a risk register with risks undergoing periodic review on either a quarterly, annually or biennially basis. Our material business risks for 2024 are outlined in the Table.

Risk Category	Risk Description	Risk Exposure Trend	Control Measures
Mining Operations	<p>The inability to deliver to guidance as a result of:</p> <ul style="list-style-type: none"> Insufficient gold production, inefficient mining operations, low ore mined, inadequate waste movement. Loss or damage to key mining infrastructure. 	<p>This risk is expected to remain a material risk requiring continued active management by the business in the foreseeable future.</p>	<ul style="list-style-type: none"> Strong financial position Board committee oversight Market price, Risk Management (Hedging) policy Financial policy.
Health and Safety	<p>A fatality or life changing injury as a result of not having a safe working environment.</p>	<p>This risk is expected to remain a material risk requiring continued active management by the business in the foreseeable future.</p>	<ul style="list-style-type: none"> Risk management framework ISO 45001 Occupational Health and Safety Management System certification Leadership education and training Internal compliance auditing practices.
Market Risk	<p>Material negative impacts to the Company's financial position as a result of:</p> <ul style="list-style-type: none"> Adverse changes to gold price Exchange rate changes Increases in interest rates, tax rates or royalties. 	<p>This risk is expected to remain a material risk requiring continued active management by the business in the foreseeable future.</p>	<ul style="list-style-type: none"> Strong financial position Board committee oversight Market price, Risk Management (Hedging) policy.
Black Swan Event	<p>A catastrophic consequence for the Company as a result of a high consequence rare event that cannot be predicted at this time.</p>	<p>This risk is expected to remain a potential unforeseen material risk for the business in the future.</p>	<ul style="list-style-type: none"> Crisis and emergency management systems and response Emerging risks and trend reviews at the Executive Leadership Team and Committee and Board level.
Resource and Reserve Depletion	<p>Failure to replace resources as they are mined or discover a mineable resource resulting in a failure to deliver on the Company's growth strategy.</p>	<p>This risk is expected to remain a material risk requiring continued active management by the business in the foreseeable future.</p>	<ul style="list-style-type: none"> Strategic guidelines to direct project generation and business development Active project pipeline management.

Risk Category	Risk Description	Risk Exposure Trend	Control Measures
Climate Change	Contributing to climate change by emitting greenhouse gas emissions through our business activities. The Company's operations being negatively impacted as a consequence of climate change.	The impacts of climate change and community expectations surrounding management of climate change are expected to increase over time and the Company will need to continue to adapt its response to this risk.	<ul style="list-style-type: none"> Commitment to continue to explore opportunities to reduce emissions Committee and Board oversight Climate change impact assessment and adaptation strategies.
Environment	Damage to the environment, fines, reputational damage, loss of access to land due to non-compliance with regulatory requirements and/or approval commitments.	This risk is expected to remain a material risk requiring continued active management by the business in the foreseeable future.	<ul style="list-style-type: none"> Risk management framework ISO 14001 Environmental Management System certification Internal compliance audit practices Training and awareness.
Cultural Heritage	Loss of access to land, damage to community relationships, damage to culturally sensitive sites, fines and reputational damage as a result of non-compliance with regulatory requirements and/or approval commitments.	This risk is expected to remain a material risk requiring continued active management by the business in the foreseeable future.	<ul style="list-style-type: none"> Collaborative partnerships with Traditional Owners Community Management standard, stakeholder engagement plans Training and awareness.
Cyber Security	Loss of an ability to operate for a prolonged period of time, loss of personal information, loss of profit as a result of a cyber-attack, hack or ransom of Gold Road, our JV partner, suppliers or operators of key infrastructure.	The nature of cyber attacks are expected to evolve over time and the Company will need to continue to adapt its response to this material risk.	<ul style="list-style-type: none"> Security vulnerability testing Information and Communications Technology management framework.

Internal Control and Assurance Framework

Gold Road has an internal audit function to provide independent assurance that risk management, governance and internal control processes are operating effectively. The internal audit function is performed by independent service providers who report their findings directly to the Audit Committee. A rolling four year internal audit plan has been implemented, which is reassessed continually, to ensure that key control processes across the business are regularly reviewed.

Tax Risk Governance Framework

Gold Road has an established Tax Risk Governance Framework that includes a Tax Compliance Policy to identify material tax risks (actual and potential). A risk register is maintained for each tax risk, which is reported to the Board through the Audit and the Risk and ESG Committees that provide oversight of the Enterprise Risk Management Framework. Reputable external tax consultants are engaged to provide tax advice to maintain compliance with taxation regulation. The annual Tax Contribution and Governance Report is available on our website goldroad.com.au

Serious Misconduct Reports

Whistleblower

In 2024, Gold Road did not receive any reports through our Safe2Say anonymous reporting platform that constituted reportable misconduct in accordance with our Whistleblower Policy.

In relation to the Gruyere JV, three Whistleblower reports were made during 2024 alleging inappropriate conduct, one report alleging a breach of policy, and one report alleging fraud. All reports were investigated by the JV operator, Gold Fields, and found to be unsubstantiated.

Psychosocial

In 2024, Gold Road did not receive any psychosocial reports.

In relation to the Gruyere JV, two psychosocial reports were made during 2024 which are currently under investigation. As required, these alleged incidents have been reported to Department of Energy, Mining, Industry Regulation and Safety.

Modern Slavery Statement

The Australian Modern Slavery Act 2018 (Cth) requires large organisations to lodge annual statements that explain what those businesses are doing to assess and address risks of modern slavery in its operations and supply chains. The Act is designed (among other things) to increase business awareness of modern slavery risks and improve transparency across global supply chains.

In 2024 we conducted specific reviews and due diligence on new suppliers and key existing suppliers that focused on human rights risks, child and slave labour, and human trafficking.

Potentially higher commercial risk suppliers, for example those in higher risk industries, received a deeper assessment than those suppliers considered lower risk.

Gold Road's 2024 Modern Slavery Statement is available in the 2024 Sustainability Report on our website goldroad.com.au.

Social

Gold Road is committed to creating an environment that respects diversity and inclusion. Our aim is to ensure equal opportunities, respect, and support for every individual. Gold Road recognises and acknowledges Aboriginal and Torres Strait Islander peoples as the First Peoples of Australia and supports the UN Declaration on the Rights of Indigenous Peoples.

People

Gold Road's Board has oversight of people and culture risks and opportunities across the Company, supported by the Risk and ESG Board Committee, which oversees the enterprise risk management framework.

The Executive Leadership Team is responsible for overseeing day-to-day operational risks, while the People and Culture team directly manages these risks and opportunities at an operational level.

The People and Culture team also supports the Board and its committees in meeting their corporate governance responsibilities by ensuring:

- Compliance with relevant Local, State and Federal legislation
- A positive and inclusive workplace culture that reflects Company values
- Diversity and Inclusivity initiatives are promoted and upheld
- Employee health, safety, and wellbeing initiatives are effectively implemented
- Talent management and retention strategies align with business needs
- Remuneration and performance assessment support the Company strategy
- Workforce planning, skills development, and succession planning to support long-term business goals
- Policies are regularly reviewed and updated as needed

Talent attraction and retention

Gold Road recognises that it operates in a strongly competitive labour market, which means ongoing attention to strategies that attract and retain the best people.

We use talent mapping, retention risk assessment tools and the annual employee culture survey to help calibrate our activities over the year. In 2024, Gold Road:

- Rolled out a new leadership development program across the organisation
- Developed a new remuneration framework that includes both fixed and variable elements to ensure competitiveness and alignment with employee responsibilities, performance and contributions.

Community

Gold Road's Risk and ESG Board Committee provides high-level oversight of community and social risks and opportunities. At the management level, the Sustainability and Risk Committee (**SRC**) oversees and monitors these risks and opportunities, ensuring actions align with the Company's overall strategy and sustainability commitments.

The Social Performance and External Relations team is responsible for implementing the Company's community and social strategies. This includes stakeholder engagement, relationship building, developing strategic partnerships, and designing and implementing the community investment strategy. The SRC supports this team by providing oversight, monitoring, and review of:

- Human rights and modern slavery
- Community and social responsibility
- Stakeholder engagement and strategic partnerships
- Community investment initiatives
- Land access, cultural heritage, and native title
- Grievance mechanisms and community feedback processes

Cultural Heritage

Gold Road recognises and respects Aboriginal and Torres Strait Islander cultural heritage and acknowledges their deep connection to the land. We support the UN Declaration on the Rights of Indigenous Peoples, including the principle of Free, Prior and Informed Consent (FPIC).

We acknowledge that our exploration and mining activities may directly or indirectly impact cultural landscapes, places, and objects of significance. To manage this responsibly, we have land access and heritage agreements in place for our exploration project areas and the Gruyere Joint Venture with all relevant Native Title groups.

Gold Road takes an avoidance-first approach and ensures cultural heritage surveys are conducted before any ground disturbing works begins. Throughout the year, our teams collaborated with Traditional Owners on Country to identify and understand cultural values. By incorporating this knowledge, we modified our work programs to avoid culturally significant areas, ensuring their preservation.

Over the reporting period Gold Road undertook cultural heritage surveys over 6,120 hectares. In 2024, there were no regulatory applications to impact or interfere with objects or places of Aboriginal significance. Additionally, no breaches of Aboriginal heritage legislation were recorded by any regulatory body during this period.

Gold Road is committed to working alongside Traditional Owners, ensuring cultural heritage is protected with the highest level of respect and sensitivity. We honour their right to speak for Country and uphold their role as Custodians while recognising our responsibility to support positive outcomes for their communities.

Community investment and partnerships

Gold Road is committed to supporting the communities where we operate, with a focus on education, youth development, health, and wellbeing.

In 2024, our community investment totalled \$769,000, providing financial and in-kind support, reinforcing our dedication to meaningful and lasting positive impacts.

We continued our support for education and youth initiatives through partnerships with MADALAH, Shooting Stars, and Netball WA, helping to create opportunities for young people to thrive. In addition, we contributed to a range of community programs, including health and wellbeing initiatives, funeral support, and local sporting events, strengthening connections and fostering resilience within our communities.

Gold Road's Board and management teams provide oversight, monitoring, and governance to ensure that our community investments align with our corporate strategy and deliver sustainable benefits. We engage with stakeholders to assess community needs, measure impact, and refine our approach to maximise positive outcomes.

Through these investments, we aim to empower individuals, support local organisations, and contribute to stronger, more sustainable communities.

Procurement

Gold Road is committed to responsible and sustainable procurement practices, ensuring our supply chain operates ethically and aligns with our corporate values. The Board has oversight of supply chain risks and opportunities, with the Risk and ESG Board Committee providing additional governance over modern slavery risks and the Company's enterprise risk register.

The Risk and ESG Board Committee supports the Board in upholding responsible business practices by overseeing, monitoring, and reviewing the Company's approach to:

- Human rights and modern slavery
- Ethical and fair dealings with stakeholders, suppliers, and contract partners

The Chief Financial Officer is responsible for overseeing the development and execution of Gold Road's supply chain function, with operational management led by the Commercial and Procurement team. This structure ensures that procurement decisions are aligned with our business strategy, regulatory requirements, and sustainability commitments.

Local and Indigenous procurement

Gold Road prioritises local suppliers and services wherever possible, recognising that mining and exploration bring the most value to communities when they create local jobs and business opportunities.

In 2024, our total procurement spend was \$35.1 million, with 88% directed to suppliers in our local regions and 7% spent with Aboriginal businesses and corporations. We continue to seek suppliers that are locally based or use local products, services, and workers. We also prioritise businesses that are Aboriginal-owned or actively support Aboriginal employment and respect cultural heritage.

By focusing on local procurement, we contribute to economic growth and build strong, lasting relationships with the communities where we operate.

88%

Spend local regions

Environment

Gold Road aims to find, develop, and operate mines in an environmentally responsible and sustainable manner. We support the precautionary principle in relation to the natural environment as described in the 1992 Rio Declaration.

surveys completed

Environment

Gold Road's Board holds ultimate responsibility for environmental and climate governance, with oversight supported by dedicated committees. The Risk and ESG Board Committee meets at least quarterly to review environmental and climate-related matters, reporting to the Board. The Committee conducts an annual operational review that considers contemporary and emerging risks. Climate-related financial issues fall under the Board Audit Committee's oversight.

Gold Road's Sustainability and Risk Committee (SRC), which reports to the Executive Leadership Team, plays a key role in implementing the sustainability strategy, monitoring emerging risks, as well as overseeing environmental management, community engagement, land access, and stakeholder relations. Key aspects from the SRC are presented to the Executive Leadership Team and Risk and ESG Board Committee quarterly.

Biodiversity

Gold Road adopts a consistent approach to biodiversity governance across all project areas, integrating thorough pre-clearing assessments and adopting impact mitigation strategies.

Desktop studies and pre-clearing in-field inspections are conducted to assess biodiversity values and identify presence of significant landforms, flora and/or fauna. Exploration drilling programs are modified to avoid or minimise impacts on identified features when avoidance is not possible, in line with the impact mitigation hierarchy. Geographical and biological data is captured in GIS layers and used to guide future exploration activities.

Risk assessments are conducted for each exploration project and these are used to develop area-specific Exploration Environmental Management Plans (EEMPs) to inform consistent management practices across each project area. Our exploration environmental management systems have been certified to ISO 14001: 2015 – Environmental Management System requirements.

Gruyere is operated in accordance with its environmental licence issued by DWER. This includes ongoing monitoring of emissions to air, water and land as well as complying with approved infrastructure design criteria, design capacities and operating conditions. Gruyere has attained and maintained ISO certification in accordance with ISO 14001 Environmental Management System, ISO 45001 Occupational Health and Safety Management System and ISO 5001 Energy Management which guide the mines environmental, health, safety and energy management processes.

Additional biodiversity studies have recently been completed at Gruyere to support environmental approvals for the Golden Highway project. These surveys, combined with those conducted by Gold Road for the Gilmour project, have added significantly to our knowledge of the biological diversity across our Yamarna and Gruyere tenement portfolio.

Gruyere has a current operating life to 2032. The mine closure plan was updated in 2024 and is updated every three years with the mine closure cost model and the progressive rehabilitation plan updated annually.

Water

Gold Road and Gruyere recognise water as a precious and limited resource and is committed to using it responsibly. Water quality varies across our project areas, and we prioritise the efficient and sustainable use of available water sources.

Exploration activities do not rely on freshwater resources and have a significantly lower water demand than mining operations. Gold Road primarily uses brackish to saline groundwater, ensuring that freshwater sources are preserved. In 2024, we used 7 ML of water across all our exploration project areas, well within our approval and licencing conditions.

Our exploration projects span diverse climatic regions. In Western Australia, conditions are typically hot and dry, while in Queensland, the climate is hotter and more humid. Water stress ratings vary across these regions, ranging from low to high in Western Australia and very low in Queensland.

At the Gruyere JV, 6,764 ML of water was consumed in 2024, with 36% sourced from recycled water (100% basis). This reflects our ongoing commitment to sustainable water management and reducing our environmental footprint.

Review of Operations

Gold Road is committed to the highest standards of corporate governance, in line with the Company's steadfast belief that excellence in corporate governance creates a corporate culture that values integrity and ethical behaviour and reduces risk to the business.

Gruyere JV

Figure below

Gruyere JV Mineral Resource and Ore Reserve location map

The Gruyere gold mine, located approximately 1,200 kilometres northeast of Perth in Western Australia's northeastern Goldfields, is a 50:50 joint venture between Gold Road and Gruyere Mining Company Pty Ltd, a member of the Gold Fields Ltd group, and the manager of operations. Mining and processing operations at Gruyere run 24 hours a day, seven days a week.

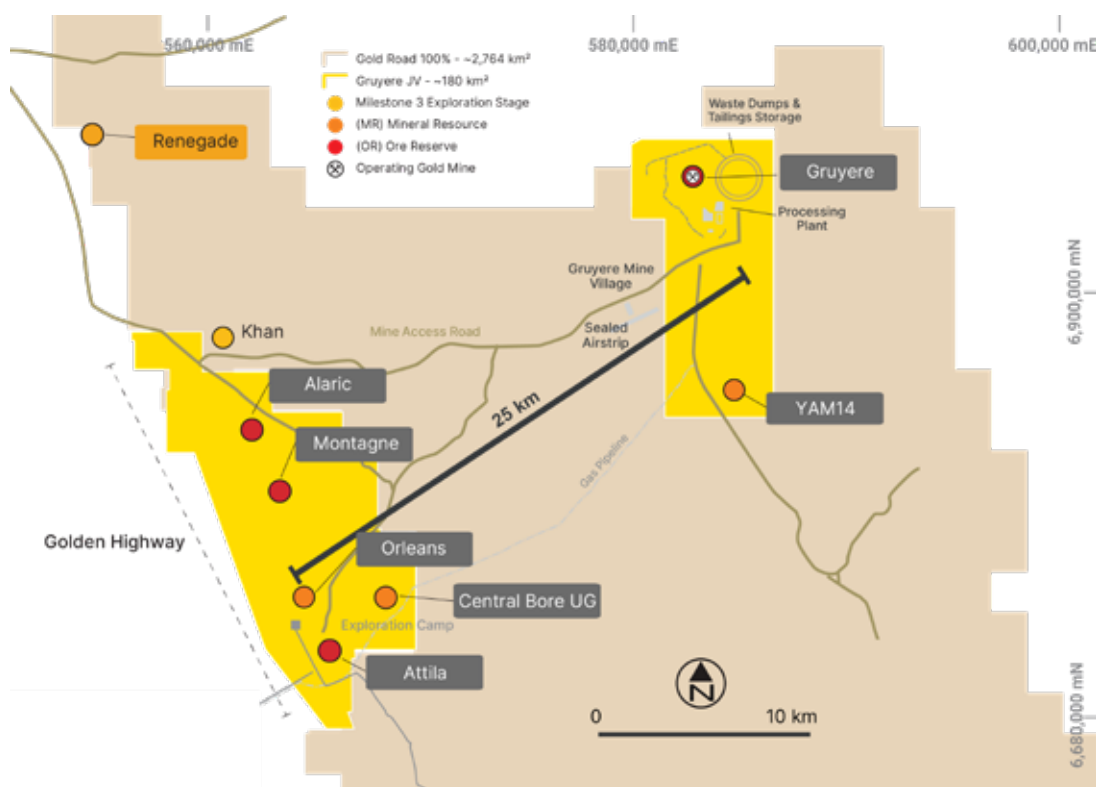

The Gruyere Project operates under the Gruyere Central Bore Native Title Agreement, which was entered into with the Yilka Talintji people in May 2016.

Gruyere has a total workforce of approximately 894 personnel, who fly-in from Perth with a flight time of approximately 90 minutes. Gruyere also has a number of personnel who commute from local communities – Laverton and Cosmo Newberry – up to 200 kilometres from the mine. In 2024, on average, 7% of Gruyere's workforce came from the local Traditional Owner group or other Aboriginal and Torres Strait Islander groups.

The Gruyere workforce female participation rate at the end of the year was 23%.

Gruyere has been producing gold for more than 5.5 years and has produced 1,527,734 ounces (100% basis) since gold was first poured (30 June 2019) to 31 December 2024. Gold has been produced at an average AISC⁸ of A\$1,610 per attributable ounce to Gold Road⁹ over the life of the operation. Based on the 2024 Ore Reserve update¹⁰ Gruyere's mine life will extend to at least 2032. In addition, ongoing infill and extensional exploration programs and supporting studies will evaluate underground mining potential with the objective of sustaining gold production well beyond 2032.

On 31 December 2024, Gruyere had a Total Recordable Injury Frequency Rate (TRIFR) of 8.4 and a Lost Time Injury Frequency Rate (LTIFR) of 1.48. There were no fatalities at the Gruyere operation nor any reportable environmental events during the reporting period.

⁸ All-in Sustaining Cost (AISC) is an unaudited non-IFRS measure, calculated in accordance to World Gold Council guidance

⁹ AISC reported since commercial production was declared on 30 September 2019

¹⁰ ASX announcement dated 23 January 2025

Production and Cost Performance

Production and cost performance was substantially interrupted by an unprecedented regional rain event across the Northeastern Goldfields during March 2024. The unusually protracted rain event resulted in the closure of the Great Central Road, the main supply route to Gruyere, for seven weeks and the forced suspension of operations for part of this time.

Gruyere delivered annual gold production of 287,720 ounces (100% basis) slightly below annual guidance of 290,000 to 305,000 ounces (revised after the rain event in July 2024)¹¹ and lower than prior year production of 321,984 ounces. The lower than prior year production was largely because of the rain event and delayed waste stripping, resulting in the availability of higher-grade ore from the mine being reduced. Pleasingly the mining position was recovered in the December quarter and was the main contributor to record quarterly gold production of 91,631 ounces. The AISC for Gold Road's 50% share of Gruyere's production in 2024 was A\$2,211 per attributable ounce, slightly higher than guidance due to the lower gold production.

Despite the challenging year, the operation finished the year having achieved record, and increasing, total material movement rates and record gold production following full access to the ore body being re-established in the December quarter. The operation is well placed for stronger delivery in 2025.

Gold Road sold 143,793 ounces during 2024 at a record average sale price of A\$3,672 per ounce. Gold Road's production remains unhedged, and shareholders continued to benefit from 100% of our gold sales at record high spot gold prices. Gold Road's Corporate All In Cost (CAIC)¹² was A\$2,721 per ounce during 2024.

Mining

During 2024, Gruyere mined a total of 6.8 Mt of ore at an average grade of 1.28 g/t Au for 287,270 contained ounces (100% basis). As noted previously, access to the ore body was restricted particularly during the first ten months of 2024 resulting in reduced rates of ore mining. With ore mining at lower rates than the process plant capacity, low grade stockpiles supplemented the plant feed. Full access to the Gruyere ore body was restored during the December quarter, with good ore exposure established to underpin delivery in 2025¹³.

Mined grade reconciled well with modelled grades for the year.

Despite the impacts of the rain event, total material movement increased substantially year on year (2024: 48.4 Mt, 2023: 35.1 Mt) as additional mining fleet and personnel were mobilised to support increased rates of waste stripping. Total material movement lifted through the year as shown in the chart on page 32 finishing the year at an annualised rate above 60 Mtpa. Total Material movement rates above 70 Mtpa are targeted in 2025, and while contributing to higher costs in the near term (rather than over mine life) the higher mining rates are necessary to optimise the value of the operations over the life of mine.

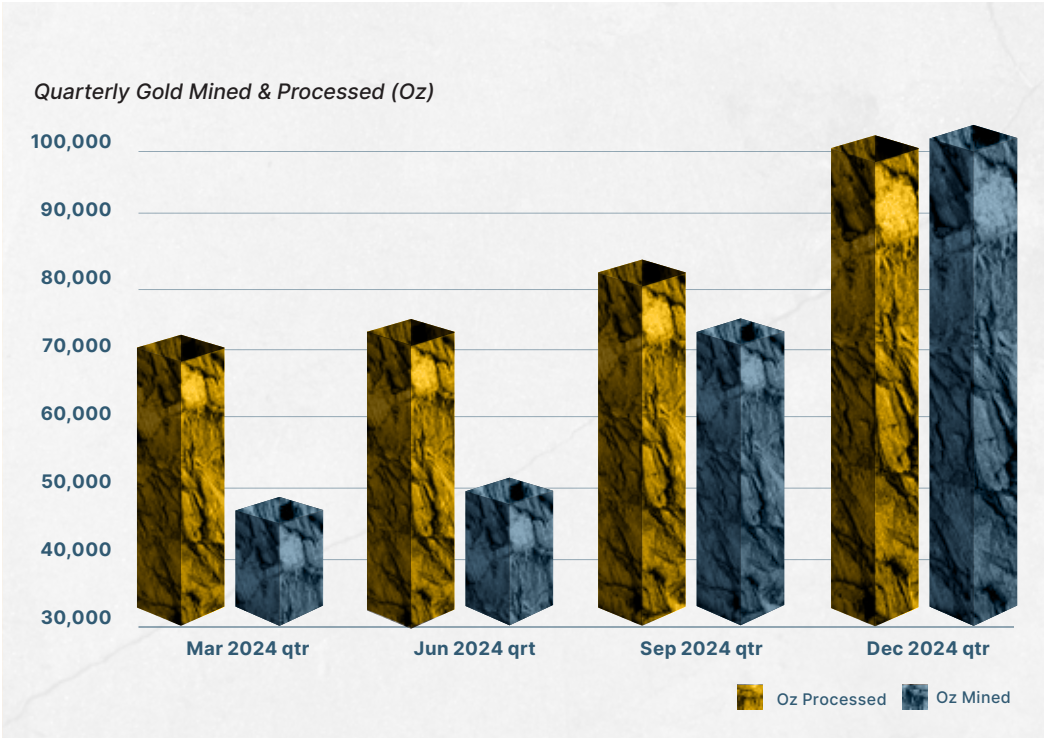

¹¹ ASX announcement dated 31 July 2024

¹² CAIC consists of AISC plus growth capital, exploration costs and corporate costs. It excludes hedging, corporate tax and dividend payments

¹³ ASX announcement dated 29 January 2025

Processing
Total ore processed during 2024 was 8.8 Mt at an average head grade of 1.12 c/t Au, and a gold recovery of 91.7% for 287,270 ounces of gold produced (100% basis). Plant throughput (2024: 8.8 Mt, 2023: 9.4 Mt) and gold production (2023: 321,984 ounces) decreased year on year largely due to weather induced interruptions to the plant, reduced rate of ore mining, and the use of lower grade ore stockpiles to supplement mill feed. Consequently, ore stockpiles decreased through the first three quarters of the year. The December quarter delivered ore mining rates in excess of the plant and stockpiles began to replenish as the operation exited 2024, with ore stockpiles totalling 3.0 million tonnes at 0.84 g/t Au¹⁴.

2025 Annual Guidance

As announced on 28 January 2025, annual guidance for Gruyere is guided at between 325,000 – 355,000 ounces (162,500 – 177,500 attributable) at an attributable AISC of between A\$2,400 and A\$2,600 per ounce.

Annual AISC guidance incorporates an increase in annualised waste stripping following the strong performance during the December 2024 quarter. This increased rate of waste stripping will add further benefit to future production performance at Gruyere.

Annual AISC also includes a further Tailings Dam lift, higher gold related royalties (owing to higher gold sales revenue), cost inflation and the cost of a 100-room camp extension needed to accommodate the labour force to support the increased material movement and the future development and operation of the Golden Highway satellite pits.

AISC guidance excludes the cost of exploration and studies beneath the current Gruyere Ore Reserve.

Capital expenditure associated with 2025 production is determined as sustaining and consequently included in the 2025 AISC guidance.

Growth

In 2024 Gold Road proactively pursued growth opportunities through exploration, project development, and strategic investments, driving the Company’s organic and inorganic expansion.

Gruyere JV

Gruyere JV Resources, Reserves and Exploration

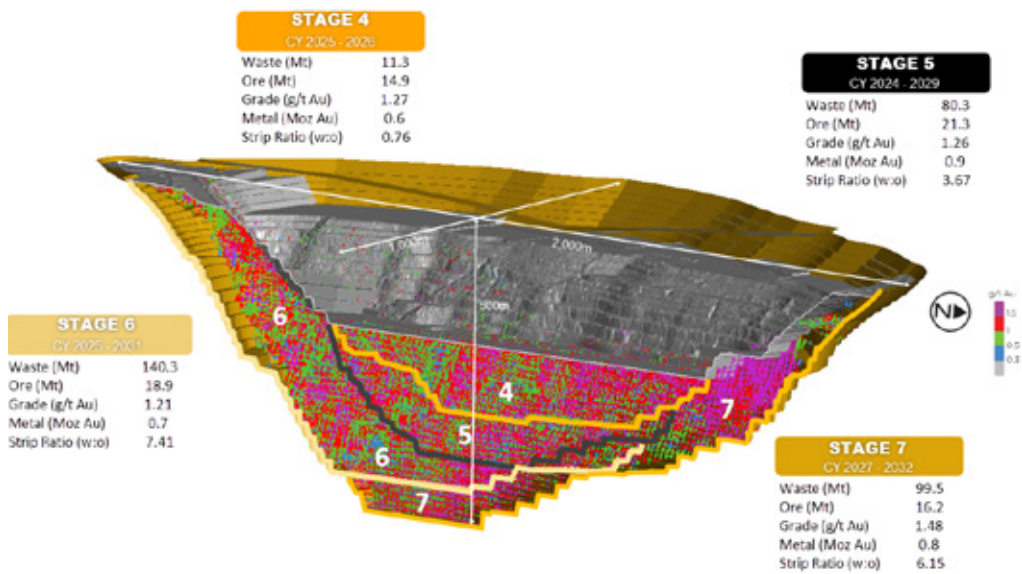

In January 2025, Gold Road reported a 1.1 million ounce increase (18%) to the Gruyere JV Open Pit Mineral Resource after mining depletion, and a decrease of 0.21 million ounces (-6%) to the Gruyere JV Ore Reserves for 3.45 million ounces (Gruyere and Golden Highway Ore Reserves), mostly due to mining depletion. Gold Road’s Gruyere Underground Mineral Resource estimate has decreased to 0.76 million ounces (50% basis) following the inclusion of some of the previous underground resource in the 2024 open pit resource update¹⁵. The Gruyere Ore Reserve continues to incorporate a seven-stage mine plan.

The Golden Highway Ore Reserve estimate decreased by 0.02 million ounces compared to last year. The estimate is based on studies completed in 2024, incorporating revised mine designs and cut-off grades derived from updated gold price and cost assumptions.

Gold Road’s attributable Mineral Resources have increased by 0.30 million ounces (+6%) to 99 million tonnes at 1.52 g/t Au for 4.81 million ounces, largely the result of increases to the Gruyere JV Open Pit Mineral Resource balanced against decreases to Gold Road’s Gruyere Underground Mineral Resource due to the deeper Gruyere open pit resource shell.

Gold Road’s attributable Ore Reserves have increased to 1.92 million ounces of gold, a 5% increase, as a result of the addition of the 100% owned Gilmour Ore Reserve offsetting the reduction of the Gruyere JV Ore Reserve which is largely due to mining depletion¹⁶.

Figure
Gruyere Mine Stages 4 to 7, as per December 2024 Ore Reserves (100% basis). Apparent differences may occur due to rounding, starting surveyed face position, and or stockpile movements.

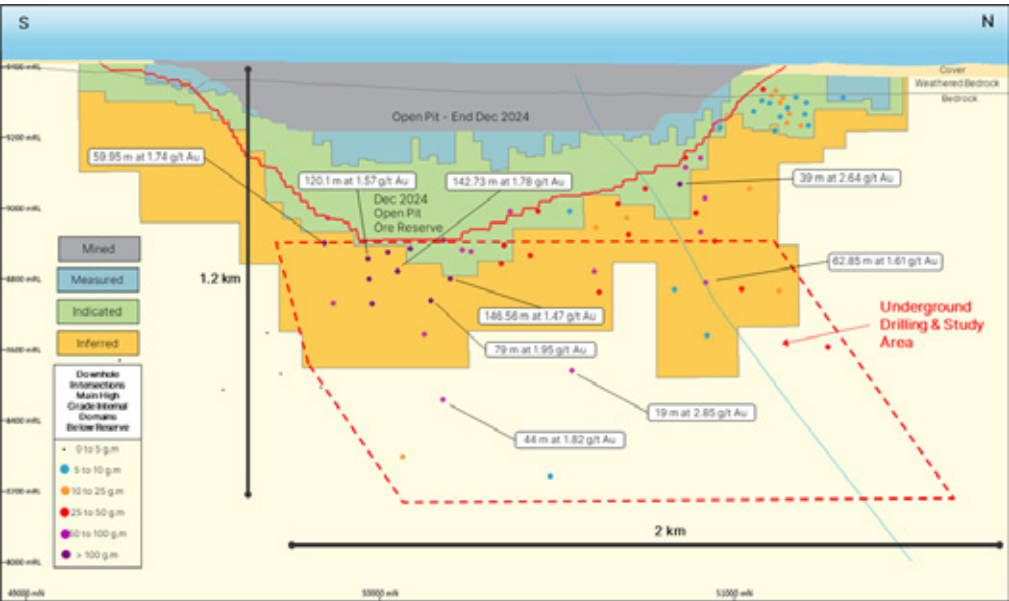

¹⁵ ASX announcement dated 23 January 2025
¹⁶ ASX announcement dated 23 January 2025

The 2024 drilling program targeted areas below and to the north of the Open Pit Ore Reserve. The program has improved existing drill coverage to assist the assessment of possible extensions to the current Ore Reserve and mine life.

Nine diamond holes were completed (approximately 7,806 metres) during the year. Significant results include: 142.73 metres at 1.78 g/t Au from 600.27 metres and 146.56 metres at 1.47 g/t Au from 637.10 metres. The results demonstrate continuity of the mineralisation below the current final open pit limit.

Figure

Gruyere Mine long projection (looking west) illustrating the December 2024 Ore Reserve outlines and the 2025 Underground diamond drilling focus area

Gruyere Underground

The Gruyere JV partners are evaluating the potential for an underground mine to extend operations beyond the current Gruyere open pit Ore Reserve, which supports production until 2032.

A preliminary review of underground mining by SRK Consulting in 2024 assessed the potential to mine assumed extensions of the Gruyere orebody down to a depth of 1,200 metres below surface. This assessment is based on limited drilling and geological data, requiring extensive drilling to validate assumptions and evaluate economic viability.

To test this potential, Gruyere will commence a 60,000 metre diamond drilling program in early 2025 with a budget of \$15 million (\$7.5 million attributable to Gold Road). This expenditure is additional to Gruyere's AISC. The drilling will target deeper ore zones and infill drill the upper ~400 metre portion of the conceptual underground resource to an Indicated Resource level of confidence. If successful, further exploration and studies will continue over several years, with the goal of extending gold production well beyond 2032 and delivering long-term value for shareholders.

Golden Highway (Gruyere JV)

Following extensional drilling completed in 2023, the Golden Highway satellite deposits (Ore Reserve of 6.55 million tonnes at 1.28 g/t Au for 0.27 million ounces at Attila, Montagne, and Alaric) were progressed through a comprehensive Feasibility Study, which is expected to be completed in H1-2025.

The next stage for Golden Highway, commencing in 2025, is to secure the necessary permits and approvals. Once permitted, Golden Highway will be ready to complement the Gruyere process plant feed as a secondary ore source. The optimal timing for integrating ore from Golden Highway will depend on the delivery of the Gruyere mine plan and process plant performance.

Yamarna (Gold Road 100%)

Figure below

Simplified plan showing location of the Gruyere Mill in relation to Gold Road's Yamarna Mine Readiness Project.

The Yamarna Project is located approximately 200 kilometres northeast of Laverton in Western Australia's northeastern Goldfields.

Gold Road's Yamarna exploration is focused on the discovery of resources which may be developed through the Gruyere JV processing facility. In 2024, we focused on progressing the Gilmour Project and other mineral resources towards mine readiness.

In 2024, a total of 34,065 metres of RC and diamond drilling was completed across the Yamarna Project, with most of the drilling focused on the Gilmour Project. Additional drilling targeted Warbler, Monteith, Tamerlane, Khan, Abydos, and areas south of Stock Route.

Adverse weather conditions, including the significant March rain event that impacted Gruyere, also disrupted exploration activities at Yamarna, with drilling resuming in late April.

Planned exploration activities in 2025 will remain focused on delivering resources to the Yamarna Mine Readiness Project. Drilling will continue along the Yamarna Shear Corridor, testing prospects between Golden Highway in the north, and Breeyla in the south. Additionally, drilling will further extend the Gilmour and Gilmour North projects, along with the southern extensions of the Smokebush Shear Zone, down to Earl's Find.

Gilmour Project

In 2024, Gold Road advanced the Gilmour Project as part of the Yamarna Mine Readiness Project, focusing on priority drilling and environmental studies. Drilling targeted geological, geotechnical, and metallurgical sampling to refine mineralisation models and support mine planning. Baseline flora and fauna surveys commenced in March but were delayed by the rain event, pushing completion to Q3 2024. Hydrogeological surveys were initiated in July to further support mine development.

Building on this progress, Gold Road achieved a key milestone with the declaration of a maiden Ore Reserve for Gilmour, comprising **1.5 million tonnes at 4.10 g/t Au for 0.19 million ounces**. This reserve includes a small open pit and a larger underground deposit, which remains open at depth as shown in the image below.

A Pre-Feasibility Study (PFS), released on 20 January 2025, defined an integrated open pit and underground operation at Gilmour with a five year mine life. The study forecasts an average annual production of 50,300 ounces, with a total output of 0.25 million ounces at 3.9 g/t Au. AISC is modelled at \$2,004 per ounce, with a net present value (NPV₅) of \$231 million, based on a flat gold price of A\$3,500 per ounce. The study assumes ore will be transported by road to the Gruyere mill for processing.

The Gilmour Project represents a significant growth opportunity for Gold Road, offering the potential to enhance shareholder value through increased gold production and extended mine life. The next steps in advancing the project include completing all activities required for a Final Investment Decision (FID), which will enable a transition to development. Further infill and extension drilling is planned to enhance confidence in the deposit and explore additional resource potential.

Gold Road is also working towards finalising a Native Title agreement with the Yilka Talintji people for the Yamarna Mine Readiness Project; securing permitting and approvals for the Gilmour project, and continuing optimisation of the Gruyere life of mine plan to maximise operational efficiency of the Gruyere mill feed.

Figure Below

Gilmour open pit and underground concept

New Mine Discovery

Gold Road is the only gold producer in its peer group that has a significant exploration effort oriented towards the discovery of new gold mines, often referred to in the industry as greenfields exploration. The rate of new gold mine discoveries is in decline in both Australia and globally. Existing operations are waning assets, with cost structures across the sector increasing above the rate of inflation as mines progress to greater depth, mine to higher waste stripping ratios or develop more marginal deposits.

Without new discoveries, production from the gold sector will likely decline with opportunities for individual company growth limited to asset acquisitions and corporate consolidations. The growing acquirer competition for a declining number of new discoveries makes growth by acquisition increasingly problematic as a strategy to create shareholder returns.

Gold Road is determined to be at the forefront of the next round of gold discoveries across Australia and has developed the systems, knowledge and teams to succeed.

We have established, and continue to refine, our strategies for selecting highly prospective areas to explore based on industry leading proprietary assessment tools and methods of work.

We seek opportunities at all project phases, leveraging our skills and expertise to recognise value at all stages of the development and production cycle. Our project portfolio reflects this with a combination of 100% owned tenure, Farm-in projects, Farm-out projects, and ASX listed investments.

Gold Road continues to apply our Exploration Investment and Valuation Framework, including Project Pipeline Stages, to ensure a disciplined and strategic approach to exploration portfolio management. This framework aligns with our long-term growth objectives, incorporating cultural fit, risk, and ESG considerations, while reinforcing our commitment to technical excellence, effective target identification, and value-driven exploration.

Figure Below

Gold Road's Project Pipeline Stages

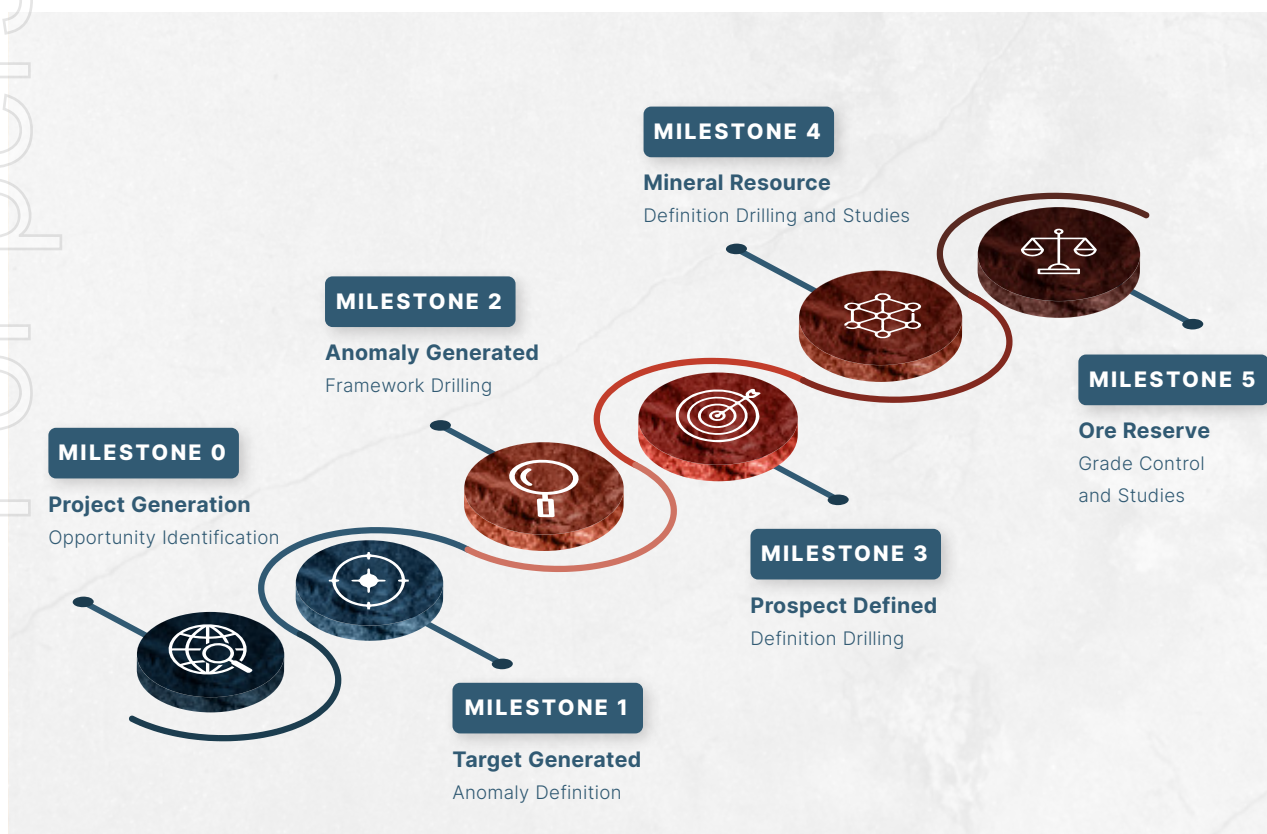

Figure below

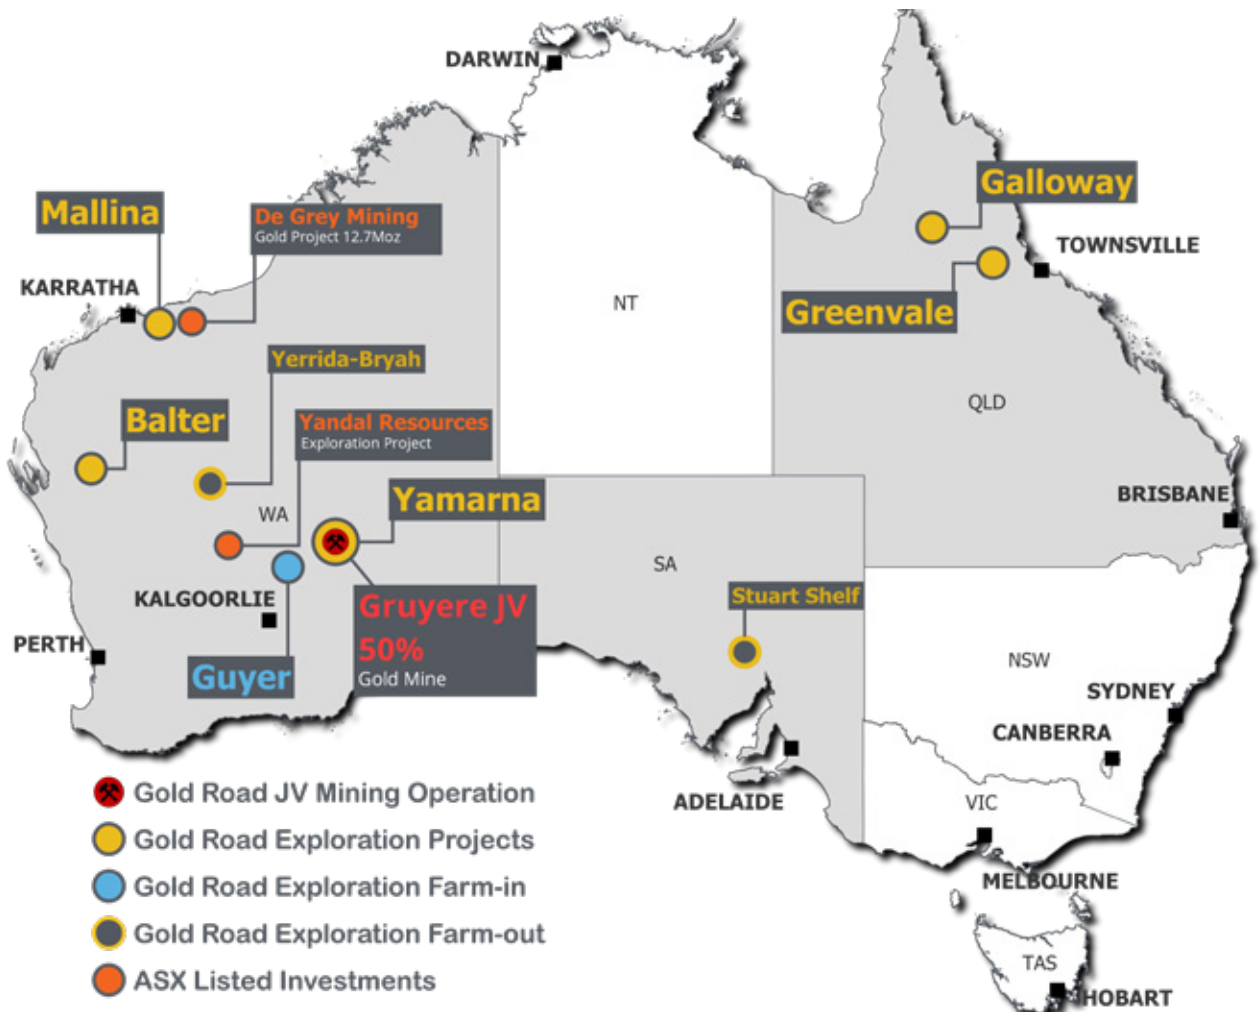

Map showing the location of Gold Road's exploration projects across Australia

Gold Road is committed to value-driven exploration across its portfolio, managing more than 14,000 square kilometres of exploration tenure in Western Australia and northeast Queensland. The Company also has free-carry Farm-out agreements covering a further 2,048 square kilometres of exploration tenure, and Farm-in agreement covering 164 square kilometres. The location of our national exploration portfolio is shown on the map below.

In 2024, we maintained our core tenement holdings targeting highly prospective geological terranes. This included the acquisition of the Balter Project in the Gascoyne region in January 2024, and successfully negotiating a Farm-in Agreement for the Guyer Project in the Goldfields region of Western Australia.

We advanced our exploration efforts through extensive field programs across two projects in Queensland and three projects in Western Australia. These activities included multiple drill programs and remote camp site operations, ensuring disciplined execution across a diverse and strategically focused exploration portfolio.

Additionally, we conducted heritage surveys, soil sampling programs, and airborne geophysical surveys to support our understanding of the geological aspects of these project areas. Fieldwork and drilling at Balter, Yamarna, Greenvale, and Galloway continued until mid-December, when high temperatures in the west and rainfall in the east led to the seasonal suspension of activities.

Exploration planning processes were enhanced, and continued investment in machine learning and AI capabilities led to the development of several proprietary tools aimed at improving target identification and decision-making. Our team enhanced its technical growth, with ongoing development of field skills and leadership capabilities across regional teams, supported by a structured leadership development program.

Gold Road remains committed to exploration best practice. Early and ongoing engagement with key stakeholders, securing land access, ensuring compliance with local regulations, and maintaining high environmental standards are integral to our sustainable exploration strategy. Safe and responsible on-ground exploration continues to be a priority across our nationwide exploration portfolio, and we maintain an ISO accredited HSE management system.

Aligned with our HSE and social goals, we strive to create opportunities for local and regional Aboriginal communities by providing employment where possible and engaging with local and Aboriginal-owned businesses and suppliers.

These efforts support our broader commitment to responsible exploration while fostering long-term relationships with the communities in which we operate.

Gold Road's disciplined approach to investment ensures a balanced allocation of capital between new mine discovery and advancing growth opportunities. In 2025, a \$34 million Gold Road managed budget has been approved by the Board to support exploration and project development across our extensive exploration portfolio. This includes \$9.8 million for ongoing brownfields exploration at Yamarna, and \$5 million allocated to progress exploration of the Guyer trend under the Guyer Farm-in Agreement. Gold Road has committed an additional \$7.5 million (50% attributable) to the Gruyere underground drill program, a key investment aimed at assessing the potential for a future underground mine that could extend mine life well beyond 2032. Growth opportunities within the Golden Highway project are also being progressed by the Gruyere JV partners, complementing Gold Road's strategy to enhance value through both exploration success and project development.

Western Australia

Balter Project (Gold Road 100%)

Gold Road acquired the Balter project, located in the Gascoyne region of Western Australia, in early 2024. The Balter project is located approximately 250 kilometres southeast of Carnarvon and within the Carrandibby Inlier.

Two greater than 5 kilometre long gold in soil anomalies have been defined at Salt Well and Mt Madeline where no historical drilling has been conducted. Balter is hosted by high-grade metamorphic rocks with analogies to the world-class Tropicana Gold Deposit. Initial field work returned exceptional rock chip results of up to 37 g/t Au validating the potential for the project to host high-grade gold mineralisation¹⁷.

During the year Gold Road undertook extensive field campaigns including mapping and soil sampling which culminated in initial drill testing of the Salt Well prospect in late 2024. Eleven RC holes for a total of 1,620 metres were completed prior to the wet season impacting the ability to continue activities¹⁸. The drill program was designed to test down dip continuity of surface anomalies.

Assay results are pending and expected to be returned later in the March 2025 quarter. Mapping and soil sampling will continue in 2025, with drilling scheduled to recommence at Salt Well and the untested Mt Madeline anomaly in mid-2025.

¹⁷ ASX announcement 31 July 2024

¹⁸ ASX announcement 29 January 2025

Mallina Project (Gold Road 100%)

The Mallina project is located in the Pilbara region of Western Australia, approximately 150 kilometres southeast of Karratha.

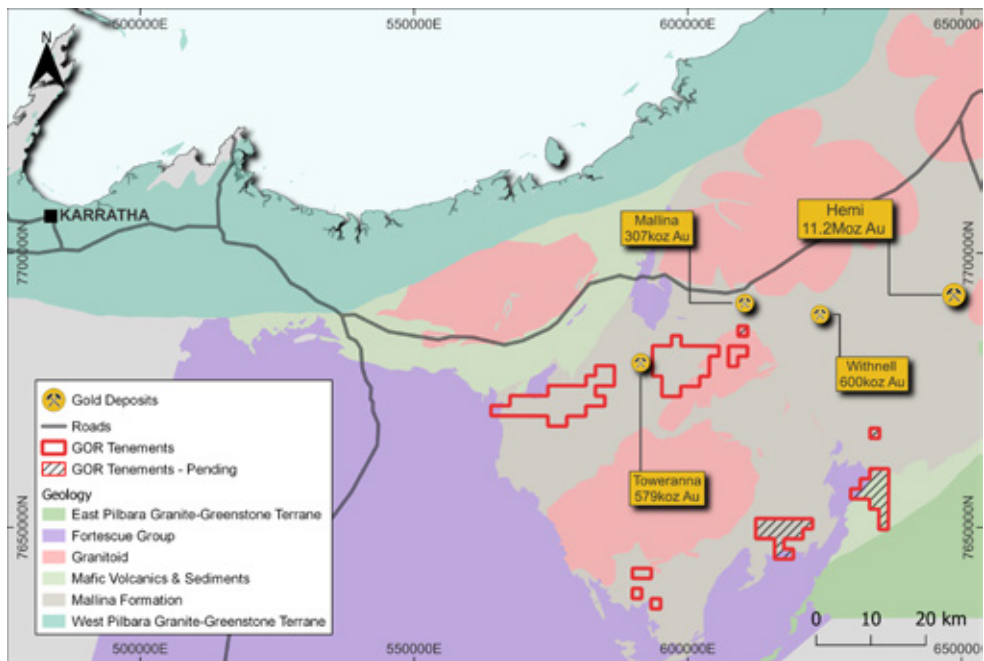

The project lies within the western Pilbara Mallina Basin, which hosts De Grey Mining's 12.7 million ounce Hemi gold project.

A prospectivity framework study was completed across the Mallina Basin and identified several targets within the project area.

Extensive mapping and surface soil sampling programs in early 2024 refined these targets and several were selected for drill testing. A program of 7,240 metres of RC drilling was completed in late 2024. Drilling intersected a variably altered sequence of metasedimentary rocks and granodiorite. Follow up work for 2025 will be determine once all assays have been received and reviewed.

Figure

Map showing location of RC drilling completed in 2024

Figure

Location of Mallina Project tenure in relation to regional geology

Guyer Project (Farm-in Agreement)

In December 2024, Gold Road entered into a binding Farm-in Agreement with Icen Gold (ASX: ICL) over the Guyer Gold Trend within the 14 Mile Well Project, located approximately 100 kilometres southwest of Laverton in the eastern Goldfields of Western Australia. This agreement provides the potential for a significant growth opportunity in a highly prospective gold region.

The key terms of the Farm-in Agreement include:

- Gold Road will invest \$5 million in exploration expenditure, managed by Icen, with an option to assume management upon achieving key success milestones.
- Upon completing the initial commitment, Gold Road can earn a 50% joint venture interest by contributing an additional \$10 million in exploration over two years.
- Gold Road can increase its stake to 70% by free-carrying Icen to the completion of a Pre-feasibility Study (PFS).
- At the completion of the PFS, Gold Road has the option to acquire an additional 10% joint venture interest by paying \$20 million to Icen, potentially increasing its stake to 80%¹⁹.

Exploration Potential

A 6-kilometre-long gold anomaly has been identified near a regional-scale granite-greenstone contact, reinforcing the project's prospectivity. Notable end-of-hole drill results include:

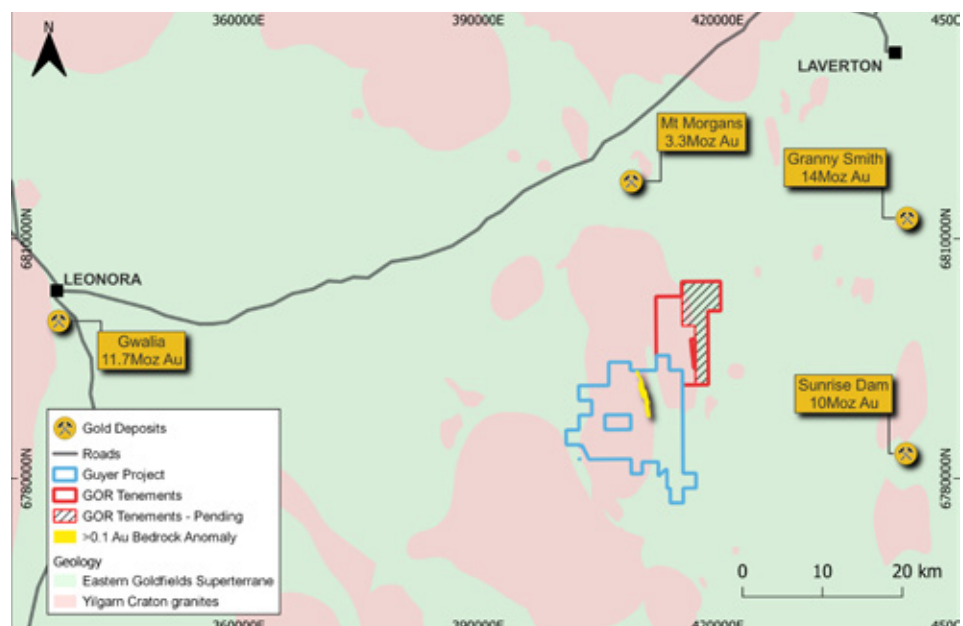

- 5 metres at 1.12 g/t Au from 68 metres (FMAC1102)
- 8 metres at 1.16 g/t Au from 72 metres (FMAC1098)

Drilling commenced in January 2025, with initial results expected in the March 2025 quarter.

This Farm-in Agreement aligns with Gold Road's strategy to expand its exploration footprint in high-potential gold regions, securing a strong pathway to future resource development. With an established exploration model and clear pathway to increasing ownership, this investment enhances Gold Road's long-term growth opportunities and value for shareholders.

For personal use only

Figure below

Map showing the location of the Yerrida Projects

Yerrida Project (Farm-out Agreement)

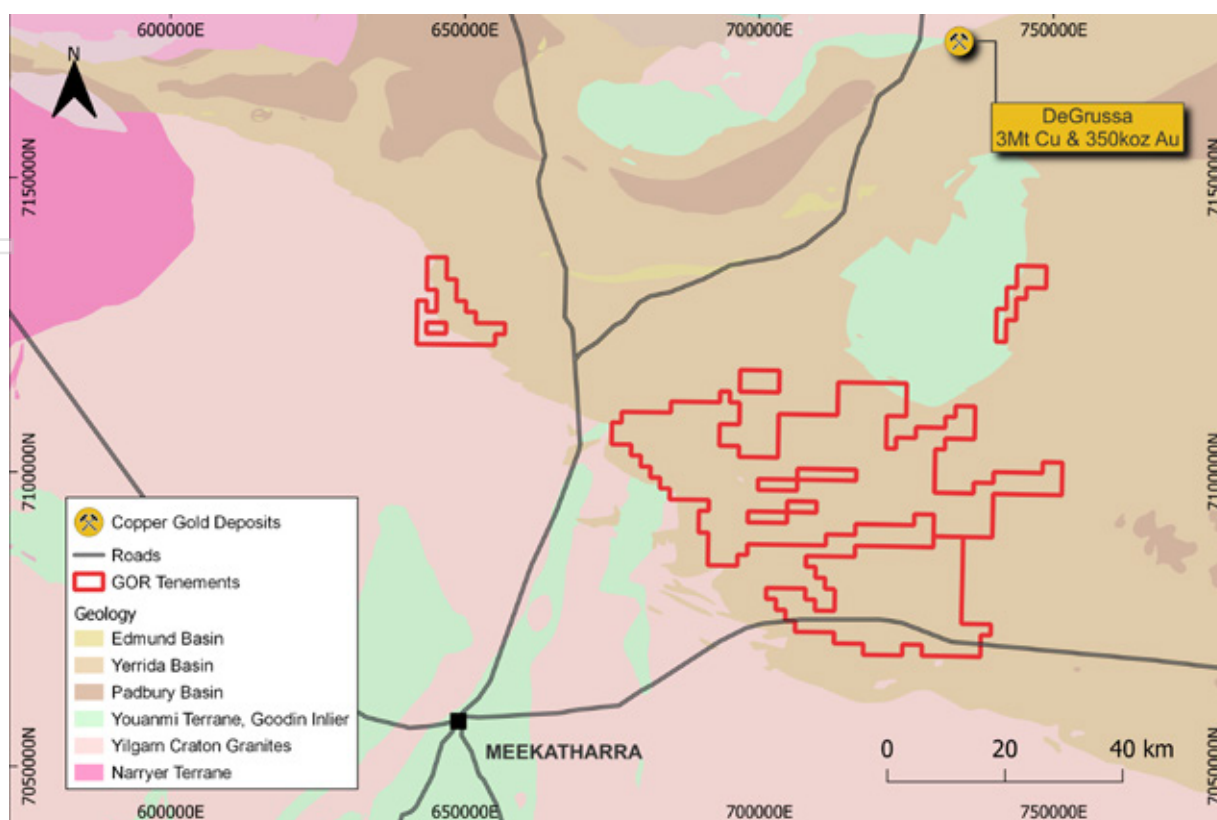

The Yerrida project comprises a total of 1,835 square kilometres of exploration tenure over the Yerrida and Bryah Basins in Western Australia. The area is located approximately 70 kilometres from the DeGrussa copper-gold mine and is prospective for sediment hosted copper and base metal-rich volcanic massive sulphide systems.

In July 2023, Gold Road entered into a Farm-out Agreement for the 100%-owned Yerrida tenement package with Yerrida Co Pty Ltd (**Yerrida Co**), an unlisted private company, whereby Yerrida Co would explore the project enabling Gold Road to maintain participation and potential upside in the project without expending further resources. Under the terms of the Farm-out Agreement, Yerrida Co must spend \$4 million (inclusive of a \$2 million minimum expenditure) to be entitled to be transferred 51% of the project and a further \$6 million to be entitled to be transferred 70% of the project.

In 2024, Yerrida Co completed numerous heritage surveys and conducted a RC drilling program in the latter part of the year.

As at the date of this report, Yerrida Co has not yet achieved the stage 1 expenditure and the project remains 100% Gold Road owned.

Yerrida Co plans to continue exploration activities, including RC drilling on three priority targets.

Northeast Queensland

Greenvale Project (Gold Road 100%)

The Greenvale project is located around the town of Greenvale in northeastern Queensland and is approximately 250 kilometres by road to the northwest of Townsville. The project was acquired through 100% tenement applications after completion of an Australia-wide prospectivity study of gold discovery potential.

Exploration at the Greenvale project is targeting intrusion related gold mineralisation with similarities to nearby multimillion ounce gold deposits at Kidston (5.0 Moz Au) and Mt Leyshon (3.5 Moz Au).

Two targets, the Breakaway and Graceland prospects were selected for drill testing in 2024.

Figure

Map showing the location of the Graceland and Breakaway Prospects within the Greenvale Project

Graceland

Diamond drilling was completed on the Graceland prospect and intercepted broad zones of alteration and mineralisation hosted by granodiorite and feldspar porphyry and metasedimentary rocks of the Kangaroo Hills Formation.

Assay results are anticipated in the March 2025 quarter.

Breakaway

Prospect mapping undertaken in mid-2024 confirmed the presence of a kilometre scale multi-stage intrusive-breccia complex. The system displays many similarities to the 3.5 Moz Au Mt Leyshon gold deposit with geochemical vectors indicating the potential for highest grade mineralisation to be located below the depth of historical drilling.

A combined diamond and RC drill program commenced in the December 2024 quarter where multiple stages of intrusion, brecciation and mineralisation events have been identified. The drill program was suspended in December due to the onset of the wet season. The map [below] shows the location of drill holes completed in 2024 as well as planned 2025 drill locations.

All assay results from the recent and partially completed drill programs are pending. Drilling at Breakaway is planned to recommence in the June 2025 quarter but is contingent on the wet season.

Follow up activities at Graceland will be dependent on assay results.

Outside the Graceland and Breakaway prospects, regional surface soil sampling and mapping programs will continue following the wet season.

Figure
Geological map of the Breakaway prospect showing location of completed and planned drill testing in 2025

Galloway Project (Gold Road 100%)

Figure below

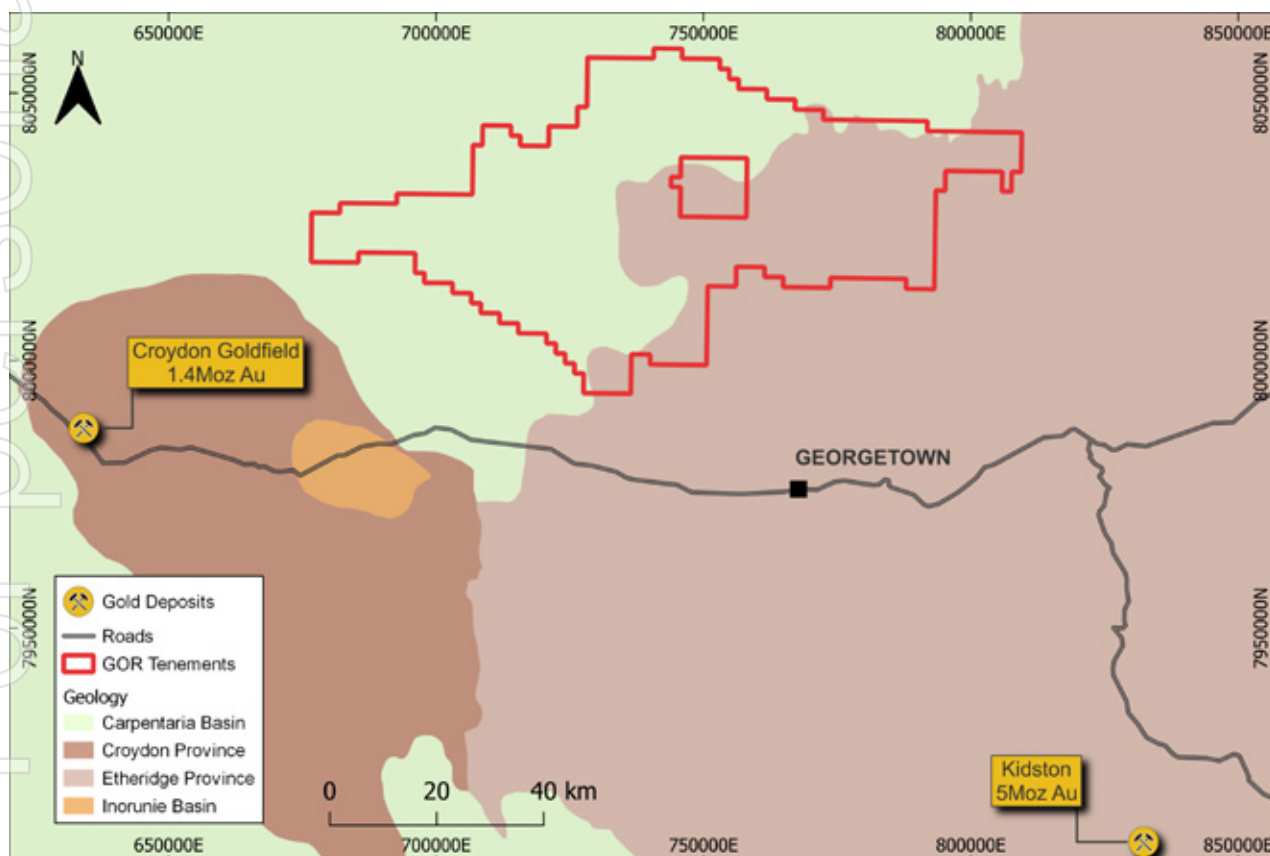

Map showing the location of the Galloway project

The Galloway project is located near Georgetown within the Etheridge Shire, 546 kilometres from Townsville. The project was acquired through 100% owned tenement applications after completion of an Australia-wide prospectivity study of gold discovery potential.

In 2024, our efforts were concentrated on reconnaissance activities, including mapping and soil sampling. We identified extensive hydrothermal alteration around the margins and within granitic stocks, along with zones of sheeted veining.

These findings continue to support the gold prospectivity of the project, with drilling planned for selected targets in 2025.

Following the wet season reconnaissance activities will resume across the Galloway project as we aim to define and drill test initial targets by the end of 2025.

South Australia

Stuart Shelf Project (Farm-out Agreement)

The Stuart Shelf project is located approximately 120 kilometres north of Port Augusta. It comprises a semi-contiguous land package of 3,743 square kilometres and lies within the Olympic Copper-Gold Province of the Gawler Craton, South Australia. Stuart Shelf is prospective for Zambian-style sediment hosted copper and also has Iron Oxide Copper Gold (IOCG) potential analogous to BHP's Carrapateena and Oak Dam West deposits.

In September 2023, Gold Road entered into a Farm-out Agreement for its 100% owned tenement package with Pernatty Co Pty Ltd (**Pernatty Co**), an unlisted private company, whereby Pernatty Co would explore the project enabling Gold Road to maintain participation and potential upside in the project without expending further resources.

Under the terms of the Farm-out Agreement, Pernatty Co must spend \$3.5 million (inclusive of a \$1.5 million minimum expenditure) to be entitled to be transferred 51% of the project and a further \$8 million to be entitled to be transferred 70% of the project.

Since execution of the Farm-out Agreement, Pernatty Co has worked towards earning into the project by conducting RC and diamond drilling. Other on ground exploration including soil sampling has also been completed.

As at the date of this report, Pernatty Co has not yet achieved the stage 1 expenditure and the project remains 100% Gold Road owned.

Figure

Map showing location of Stuart Shelf Farm-out Agreement tenure

Approvals and native title clearance for further RC drilling are underway. Stage 2 soil sampling is designed for completion in the first quarter of 2025. Based on results of soils and drilling in 2024, a three-stage RC drilling program is planned to test geological interpretations while progressing the understanding of any mineralisation.

Listed Investments

Gold Road focuses on investing in projects that have the potential for significant growth. We seek opportunities at all project phases, leveraging our skills and expertise to recognise value at all stages of the development and production cycle. This strategy allows us to participate in projects as they progress, creating opportunities to generate long-term value for our shareholders. By targeting these opportunities, we position ourselves to benefit from their growth potential.

During 2024, Gold Road maintained a portfolio of listed mining and exploration investments with a value at 31 December 2024 of \$741.7 million.

The outstanding investment in the portfolio is the investment in De Grey Mining Limited. De Grey's Mallina project was identified by Gold Road exploration personnel as a potential major discovery and investment opportunity in early 2020.

Gold Road's early interest in De Grey, ultimately culminated in the opportunity to acquire DGO Gold, with the acquisition of a 14% interest completed in August 2022. Through a series of on market purchases using a sophisticated derivative structure and participation in placement and equity raisings, including a substantial placement in 2024, Gold Road currently holds a 17.3% interest in De Grey.

The DGO Gold acquisition, also resulted in an initial investment in Yandal Resources and various exploration properties including Mallina, Yerrida and Pernatty discussed in the preceding section. Gold Road currently holds an 18.8% interest in Yandal Resources, having supported equity raises by the company in 2024.

Gold Road entered into a Farm-in and Placement agreement with Icen Gold Ltd (ASX: ICL) that covers the Guyer Gold Trend within the 14 Mile Well Project in Western Australia. Details of the Guyer exploration property are discussed in the preceding section.

As at 31 December 2024, Gold Road held strategic investments in the following:

De Grey Mining	<p>Located in the Pilbara region of Western Australia, De Grey is focused on developing the Hemi deposit, which is the key deposit within the 13.6 Moz Mallina gold project.</p> <p>On 2 December 2024, De Grey Mining announced that Northern Star Resources Ltd had agreed to acquire 100% of De Grey by way of a scheme of arrangement at a fixed exchange ratio of 0.119 NST shares for each DEG share.</p> <p>www.degreymining.com.au</p> <p>Gold Road holds 414 million shares</p>
Yandal Resources	<p>Yandal is a gold exploration company with early and advanced-staged projects primarily within the Yandal Greenstone Belt, Western Australia. Recent exploration results include encouraging drilling intersections from the Siona Gold Discovery.</p> <p>www.yandalresources.com.au</p> <p>Gold Road holds 57 million shares</p>
Iceni Gold	<p>Iceni is a gold exploration company with early-stage projects along the Guyer Gold Trend within the 14 Mile Well Project located in the eastern Goldfields in Western Australia.</p> <p>www.icenigold.com.au</p> <p>Gold Road holds 30,480,662 shares and 33,065,835 options with varying exercise prices and expiry dates.</p>

Mineral Resource and Ore Reserve

Image above

Balter Project, WA

Gold Road Mineral Resource and Ore Reserve Governance

The Mineral Resource and Ore Reserve is reported according to the Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves (The JORC Code 2012 Edition), Chapter 5 of the ASX Listing Rules and ASX Guidance Note 31.

The Gruyere and Golden Highway (Attila, Orleans, Montagne, Alaric) Open Pit Mineral Resources were compiled by Gold Fields Competent Persons and reviewed by Gold Road Competent Persons. The Gruyere and Golden Highway (Attila, Montagne, Alaric) Open Pit Ore Reserves were compiled by Gold Fields Competent Persons and reviewed by Gold Road Competent Persons. The Central Bore Underground and the YAM14 Mineral Resources were compiled by Gold Road Competent Persons and reviewed by Gold Fields Competent Persons.

The previously reported Argos Mineral Resource and Ore Reserve has been combined with Montagne as this is now one continuous open pit.

The Renegade, Gilmour, Smokebush and Warbler Mineral Resources were compiled and reviewed by Gold Road Competent Persons. The Gruyere Underground Mineral Resource was compiled and reviewed by Gold Road Competent Persons and utilised the same Gruyere JV Mineral Resource model that informed the open pit evaluations.

Gruyere JV Ore Reserve

The Gruyere JV Ore Reserve is derived from the Gruyere and the Golden Highway Open Pit Deposits (Attila, Montagne and Alaric) all of which are located within the Gruyere JV.

On a 100% basis, the December 2024 Gruyere JV Ore Reserve **totals 83 million tonnes at 1.29 g/t Au for 3.45 million ounces of gold** (Table 1). Year on year this represents a decrease of 0.21 million ounces and a 3% increase in grade²⁰.

The Gruyere JV Ore Reserve is estimated after consideration of the level of confidence and by taking account of material and relevant modifying factors. The Proved Ore Reserve estimate is based on the Measured Mineral Resources. The Probable Ore Reserve estimate is based on the Indicated Mineral Resources. No Inferred Mineral Resources have been included in the Ore Reserve (Table 1).

The decrease in the Gruyere JV Ore Reserve is attributed to mining depletion at Gruyere (0.29 million ounces). The decrease was partially offset by minor increases (0.10 million ounces) in the Gruyere Ore Reserves associated with resource modelling parameters and cut-off grades due to updated gold price and cost assumptions.

The Golden Highway Ore Reserve estimate saw a decrease of 0.02 million ounces from last year and is based on updated studies completed in 2024, which incorporated updated mine designs and cut-off grades derived from updated gold price and cost assumptions. The Golden Highway Ore Reserve is estimated based on the October 2023 Mineral Resource geology model, with allowances for ore loss and dilution, and constrained within pit designs.

²⁰ ASX announcement dated 23 January 2025

Gold Road Attributable Ore Reserve Summary

Gold Road's attributable Ore Reserves have increased to 43 million tonnes at 1.39 g/t Au for 1.92 million ounces of gold (Table 2), a 5% increase since the Ore Reserve reported on 31 December 2023, mainly as a result of the addition of the 100% owned Gilmour Ore Reserve offsetting the reduction of the Gruyere JV Ore Reserve which is largely due to mining depletion²¹.

Gold Road's attributable Ore Reserves comprise the attributable portion of the Gruyere JV Ore Reserves (50%) which is 42 million tonnes at 1.29 g/t Au for 1.73 million ounces, and the Gilmour Ore Reserve which is 1.45 million tonnes at 4.10 g/t Au for 0.19 million ounces (Table 2).

The average Ore Reserve grade has increased by 11% primarily due to the high-grade nature of the Gilmour deposit.

²¹ ASX announcements dated 20 January 2025 and 23 January 2025

Gruyere JV Mineral Resource

On a 100% basis the December 2024 Gruyere JV Mineral Resource totals **157 million tonnes at 1.42 g/t Au for 7.14 million ounces** (Table 3). Year on year this represents an addition of 1.1 million ounces and a 5% increase in grade²².

Gruyere Open Pit

The Gruyere Open Pit Mineral Resource has increased by 0.83 million ounces (+16%) to 137 million tonnes at 1.37 g/t Au for 6.05 million ounces (Table 3) and the average grade has increased by 4%. The ounces and grade increase are both largely the result of a 90 metre deeper pit shell driven by improvements to the geology model, incorporation of new drilling and updated economic assumptions.

Golden Highway Open Pits

The updated Golden Highway Mineral Resource incorporates all infill and extensional drilling completed in 2023. The resource has increased by 0.30 million ounces (+45%) to 19 million tonnes at 1.57 g/t Au for 0.96 million ounces. The increase is largely the result of a larger pit shell at Attila driven on the new drilling and updated economic assumptions.

OP = Open Pit
UG = Underground.

²² ASX announcement dated 23 January 2025

Gold Road Attributable Mineral Resource Summary

The Gold Road Attributable Mineral Resource comprises 50% of the Gruyere JV Mineral Resources²³ (Table 4), the Company's Gruyere Underground Mineral Resource (as reported 50% attributable) and Gold Road's 100% owned Mineral Resources on the Yamarna exploration tenements²⁴ (Table 4).

Gold Road's attributable Mineral Resources have increased by 0.30 million ounces (+6%) to 99 million tonnes at 1.52 g/t Au for 4.81 million ounces (Table 4), largely the result of increases to the Gruyere JV Open Pit Mineral Resource balanced against decreases to Gold Road's Gruyere Underground Mineral Resource due to the deeper Gruyere open pit resource shell. The grade of the attributable Mineral Resources has increased by 6% due to improved grade from the Gruyere geology model and a larger underground component combined with improved grade at Gilmour.

Gruyere Underground

Gold Road's updated Gruyere Underground Mineral Resource estimate is an evaluation exclusively below the December 2024 A\$2,600 per ounce Open Pit Mineral Resource optimisation shell. Gold Road reports a 50% attributable Underground Inferred Mineral Resource of 15 million tonnes at 1.58 g/t Au for a total of 0.76 million ounces of gold. As a result of the deeper open pit resource shell the Underground Mineral Resource estimate has decreased by an attributable 0.22 million ounces (-22%). The grade of the resource has increased by +12% due to improved grade of the geology model.

²³ Comprising the Gruyere, YAM14 and Golden Highway (Attila, Orleans, Montagne and Alaric) open pits and the Central Bore underground for simplicity

²⁴ Comprising Renegade, Gilmour, Smokebush and Warbler open pits and Gilmour underground

Notes Tables 1, 2, 3 and 4

Mineral Resource Notes:

- OP = Open Pit and UG = Underground
- All Mineral Resources are completed in accordance with the JORC Code 2012 Edition. All figures are rounded to reflect appropriate levels of confidence. Apparent differences may occur due to rounding. Mineral Resources are inclusive of Ore Reserves and depleted for mining. Gruyere Measured category includes Surface Stockpiles (2.91 Mt at 0.87 g/t Au for 0.08 Moz)
- All Mineral Resources are constrained by optimised shapes to determine the portion of the total resource model that has a reasonable prospect of eventual economic extraction. Open pits have no allowance for ramps, dilution or mining recovery. Undergrounds include a minimum mining width and are reported as diluted tonnage and grade with no allowance for pillars or mining recovery. Cut-off grades allow for mining, haulage and processing costs and metallurgical recovery based on operational, FS, PFS and/or benchmark study data.

Deposit	Modify Factors / Units		
	Gold Price A\$ per ounce	Cut-off Grade g/t Au	Minimum Mining Width metres

ANNUAL REPORT 2024

Financial Report

07

Directors' Report

The Directors present their report on Gold Road for the year ended 31 December 2024.

Directors

The names and details of the Directors of Gold Road during the year and until the date of this report, unless otherwise indicated, are detailed below.

TIMOTHY NETSCHER

Non-executive Chairman

Tim Netscher was appointed as Non-executive Director on 1 September 2014 and Non-executive Chairman on 1 July 2016.

Mr Netscher is a highly experienced public company chairman and director with significant broad-base experience working in the international mining industry. He has held senior executive roles with Gindalbie Metals, Newmont Mining Corporation, Vale, Pt Inco, BHP and Impala Platinum, giving him extensive operational, sustainability management, major capital project development, business improvement and business development experience. His work experience spans North and South America, Africa, Australia and the Asia Pacific, in the commodities of coal, uranium, nickel, copper, cobalt, iron ore and platinum group metals and gold.

Mr Netscher is a Chartered Engineer and holds a Bachelor of Science in Chemical Engineering from The University of the Witwatersrand, a Bachelor of Commerce from The University of South Africa and a Master of Business Administration from The University of Cape Town. He is a Fellow of the Institution of Chemical Engineers (IChemE) and a Fellow of the Australian Institute of Company Directors (FAICD).

DUNCAN GIBBS

Managing Director and CEO

Duncan Gibbs was appointed as Managing Director and Chief Executive Officer (CEO) on 17 September 2018.

Mr Gibbs has 35 years' mining industry experience. Prior to joining Gold Road, he held senior and executive positions with AngloGold Ashanti, Acacia and Shell-Billiton. He led the exploration, discovery and development of the >10Moz Tropicana gold project and was Tropicana's inaugural General Manager. Mr Gibbs also served as General Manager at Sunrise Dam, one of the largest underground gold mines in Australia. As AngloGold's head of exploration for Australasia, Mr Gibbs managed exploration teams across Australia, China, and Mongolia as well as exploration interests in south-east Asia.

Mr Gibbs' experience spans operational management, project studies and construction, HSE management, community engagement, risk and compliance, exploration, mine geology and technical IT.

Mr Gibbs holds a Bachelor of Science with Honours (First Class) in Geology from James Cook University. He is a Member of the Australasian Institute of Mining and Metallurgy (AusIMM) and a Graduate of the Australian Institute of Company Directors (GAICD).

BRIAN LEVET

Non-executive Director

Brian Levet was appointed as Non-executive Director on 1 August 2017.

Mr Levet has 45 years' experience in the mining industry. He worked for Rio Tinto, Zimbabwe Iron and Steel Corporation and Newmont Mining Corporation in exploration, project start-up and operational roles.

Mr Levet retired from Newmont Mining Corporation in 2011 as Group Executive for Exploration. During his 27 years with Newmont, Mr Levet's exploration and team leadership skills resulted in a number of major discoveries, including the Batu Hijau and Elang copper-gold deposits in Indonesia, the North Lanut gold deposit in North Sulawesi, Indonesia and the McPhillamys gold deposit in New South Wales. He also played a significant role in the recognition of Yanacocha Gold Project Peru as a world-class gold mining camp.

Mr Levet holds a Bachelor of Science in Geology from the University of London and is a Member of the Australasian Institute of Mining and Metallurgy (AusIMM).

MAREE ARNASON

Non-executive Director

Maree Arnason was appointed Non-executive Director on 15 June 2020.

Ms Arnason is a highly experienced director and executive who has over 35 years' experience across the natural resources, energy and manufacturing sectors with companies including BHP, Carter Holt Harvey, Svenska Cellulosa AB and Wesfarmers. She has worked across commodities including copper, gold, iron ore, timber, nickel, coal, mineral sands and natural gas in exploration to full production environments and has gained expertise in strategy, sustainability, risk, corporate affairs, stakeholder relations, transformations, divestments and integrations.

Ms Arnason is an independent Non-executive Director of Macmahon Holdings Limited (ASX: MAH), Ardea Resources Limited (ASX: ARL) and VHM Limited (ASX: VHM). Maree serves on the National Board of the Australian Institute of Company Directors (AICD) as a WA AICD Division Director and is a Co-founder and Director of Energy Access Services, which operates an independent Western Australian-focused digital trading platform for wholesale gas buyers and sellers.

Ms Arnason holds a Bachelor of Arts from Deakin University, is a Member of Chief Executive Women, was named as one of the Top 100 Global Inspiration Women in Mining in 2018, is an AICD Fellow and has a significant record of service in the not-for-profit sector.

JULIE JONES***General Counsel and Joint Company Secretary***

Julie Jones was appointed as General Counsel and Joint Company Secretary on 6 February 2023.

Ms Jones is a corporate and commercial lawyer with 20 years' legal practice experience, including 10 years with listed companies complemented by leadership in governance, risk, corporate affairs, compliance and people and culture. She specialises in M&A, corporate governance, capital raisings, commercial contracts, and litigation.

Ms Jones holds a Bachelor of Laws from the University of Western Australia, graduate diplomas in Taxation and Legal Practice, and is a graduate of the Australian Institute of Company Directors. She is admitted to practice in Western Australia, New South Wales, and the High Court of Australia.

Currently, Ms Jones oversees Legal, Compliance, Governance, Risk, Environment, Approvals, and Crisis & Emergency Management. In addition, Ms Jones is a Board member of the Gold Industry Group.

Ms Jones is a responsible person for communications with ASX in relation to Listing Rule matters under ASX Listing Rule 12.6.

KEELY WOODWARD***Joint Company Secretary***

Keely Woodward was appointed as Joint Company Secretary on 22 November 2022.

Ms Woodward joined Gold Road in 2016 and has worked across the Corporate, External Affairs and Investor Relations functions. Ms Woodward holds a diploma of Investor Relations with the Australasian Investor Relations Association (DiplInvRel) and a graduate diploma of Applied Corporate Governance and Risk Management as an affiliate of the Governance Institute of Australia (AGIA).

Ms Woodward is a responsible person for communications with ASX in relation to Listing Rule matters under ASX Listing Rule 12.6.

Directors' Interests

As at the date of this report, the Directors' interests in shares and Performance Rights of the Company are as follows:

Directors	Interests in Ordinary Shares	Interests in Performance Rights
D Gibbs	1,573,805	861,848
T Netscher	846,227	-
B Levet	240,000	-
M Arnason	59,034	-
D McComish	50,724	-

Directors' Meetings

The number of meetings of the Company's Directors (including meetings of Committees of Directors) held during the year ended 31 December 2024 and the number of meetings attended by each Director were:

Nature of Operations and Principal Activities

The principal activities of the Group were mine operations through a joint venture, sale of gold, and mineral exploration.

Operating and Financial Overview

The overview of the Group's operations, including a discussion on production and exploration activities, is contained in the 2024 Annual Report which will be released at the end of the March 2025 quarter.

Profit or Loss

The Group achieved a statutory net profit after tax of \$142.7 million (2023: \$115.7 million). The increase reflects higher gross profit from Gruyere operations and a higher gold price environment.

Gold sales revenue of \$528.0 million (2023: \$472.1 million) was generated from the sale of 143,793 ounces (2023: 161,472 ounces) at an average gold price of \$3,672 per ounce (2023: \$2,924 per ounce).

Total cost of goods sold inclusive of amortisation and depreciation was \$261.2 million (2023: \$251.2 million), producing a gross profit from operations of \$266.8 million (2023: \$220.9 million). The increase in costs compared to the prior year is driven by higher royalties due to increased revenue, along with rising production costs, and higher amortisation and depreciation expenses.

Exploration costs expensed during the year were \$27.1 million (2023: \$27.6 million). Exploration and evaluation assets written off during the year was \$4.2 million (2023: 3.5 million).

Corporate and technical service costs for the year totalled \$27.2 million (2023: \$20.4 million), which included expenses related to the corporate office, compliance, and operational support. The increase in costs is primarily the result of increased one off corporate development costs.

Finance income of \$5.0 million (2023: \$5.4 million) relates to interest earned on cash at bank and on deposit. Finance expenses of \$10.8 million (2023: \$8.3 million) principally relates to costs of leases and interest and finance charges.

The income tax expense recognised for the year was \$60.5 million (2023: \$51.4 million expense) reflecting an effective income tax rate of 29.8% (2023: 30.8%).

Key Business Metrics

	31 December 2024	31 December 2023
All-in sustaining cost ¹ (\$/oz)	2,211	1,662
Corporate-all-in-cost ¹ (\$/oz)	2,720	1,966
Total revenue (\$'000)	527,960	472,125
Cost of sales (\$'000)	261,160	251,178
EBIT ¹ (\$'000)	209,067	170,068
EBITDA ¹ (\$'000)	294,413	250,105
Net profit after tax (\$'000)	142,697	115,715

¹ AISC, CAIC, EBIT and EBITDA are non-IFRS financial information and are not subject to audit

The increase in AISC to A\$2,211 per ounce in 2024 (2023: A\$1,662 per ounce) largely reflects the lower gold production arising from the impacts of the weather event and associated road closures during the year.

Included within the Key Business Metrics table are both International Financial Reporting Standard (IFRS) and non-IFRS measures. Set out below is a reconciliation of the non-IFRS metrics to components of IFRS metrics as disclosed in the financial report.

	31 December 2024	31 December 2023
	\$'000	\$'000
Net profit after tax	142,697	115,715
Finance income	(5,004)	(5,362)
Finance expenses	10,839	8,322
Income tax expense	60,535	51,393
EBIT	209,067	170,068
Depreciation and amortisation expense	85,346	80,037
EBITDA	294,413	250,105

Financial Position

The net assets of the Group increased by \$285.7 million during the year. As at 31 December 2024, the Group had:

- Cash and cash equivalents of \$166.3 million (2023: \$143.8 million). The increase is due to \$250.6 million cash inflow from operating activities which was partially offset by payments for property, plant and equipment of \$130.7 million, acquisition of listed investment of \$55.9 million, payments for exploration and evaluation capitalised of \$11.1 million, lease repayments of \$14.4 million, and dividends paid in cash of \$13.4 million.
- Inventories of \$54.7 million (2023: \$56.2 million) decreased as a result of a decrease in ore stockpiles partially offset by an increase in warehouse consumables.
- Property, plant and equipment increased to \$407.5 million (2023: \$343.1 million), driven by expenditure on mine development assets (including the tailings storage facility and deferred waste) and assets under construction (including the village room capacity upgrade). This was partially offset by depreciation and amortisation of \$69.0 million (2023: \$64.4 million).
- Right-of-use assets of \$108.9 million (2023: \$123.2 million) decreased as a result of depreciation expense and transfer to property, plant and equipment which were partially offset by additions.
- Exploration and evaluation assets of \$46.3 million (2023: \$39.5 million) increased mainly as a result of capitalisation of exploration expenditure and acquisition of tenements located in the Gascoyne region of Western Australia, partially offset by exploration expenditure assets written off.
- Financial assets at fair value of \$741.7 million (2023: \$465.0 million) increased mainly as a result of further acquisition of shares in De Grey Mining Limited (De Grey) and movements of the market price of multiple investments in listed entities.
- Lease liabilities of \$119.5 million (2023: \$128.6 million) decreased reflecting repayment of lease liabilities, offset by CPI adjustments.
- Current tax liabilities of \$2.8 million (2023: \$25.0 million) decreased mainly as a result of tax instalments paid.
- Deferred tax liabilities of \$93.0 million (2023: \$2.7 million) increased mainly reflecting significant increased value of financial assets at fair value and increased deduction of pre-stripping cost capitalised.

Cash Flows

Cash and cash equivalents increased during the year by \$22.4 million to \$166.3 million as at 31 December 2024 (2023: \$143.8 million).

Net cash inflow from operating activities for the year was \$250.6 million (2023: \$233.6 million). The increase reflects a higher average gold price offset by decreased ounces sold, and increased payments of income tax.

Net cash outflow used in investing activities amounted to \$197.1 million (2023: \$135.8 million), which included payments for investments in listed securities of \$55.9 million (2023: \$63.4 million), payments for property, plant and equipment of \$130.7 million (2023: \$78.5 million) and payment for exploration and evaluation capitalised of \$11.1 million (2023: \$2.5 million).

Net cash outflow from financing activities totalled \$31.1 million (2023: \$28.3 million) which included dividends paid in cash of \$13.4 million (2023: \$15.5 million), payment for transaction costs related to debt facilities of \$3.3 million (2023: \$nil) and lease repayments of \$14.4 million (2023: \$12.8 million).

Dividends

Total dividends of \$16.2 million were paid during the financial year (\$13.4 million paid in cash and \$2.8 million satisfied by the issue of shares under the dividend reinvestment plan), which consisted of a final dividend for 2023 of 1.0 cent and an interim dividend for 2024 of 0.5 cents.

Material Business Risks

The material business risks of the Group that may have an impact on the financial and operating performance of the Group, the trend of these risks and key control measures are set out below:

Risk Category	Risk Description	Risk Exposure Trend	Control Measures
Mining Operations	The inability to deliver to guidance as a result of: <ul style="list-style-type: none"> insufficient gold production, inefficient mining operations, low ore mined, inadequate waste movement loss or damage to key mining infrastructure. 	This risk is expected to remain a material risk requiring continued active management by the business in the foreseeable future.	<ul style="list-style-type: none"> Competent JV Management team and contractor JV Technical Committee oversight Adequate emergency response and planning for infrastructure and key mining equipment Robust maintenance schedule
Health and Safety	A fatality or life changing injury as a result of not having a safe working environment.	This risk is expected to remain a material risk requiring continued active management by the business in the foreseeable future.	<ul style="list-style-type: none"> Risk management framework ISO 45001 Occupational Health and Safety Management System certification Leadership education and training Internal compliance auditing practices
Market Risk	Material negative impacts to the Company's financial position as a result of: <ul style="list-style-type: none"> adverse changes to gold price exchange rate changes increases in interest rates, tax rates or royalties. 	This risk is expected to remain a material risk requiring continued active management by the business in the foreseeable future.	<ul style="list-style-type: none"> Strong financial position Board committee oversight Market price, Risk Management (Hedging) policy
Black Swan Event	A catastrophic consequence for the Company as a result of a high consequence rare event that cannot be predicted at this time.	This risk is expected to remain a potential unforeseen material risk for the business in the future.	<ul style="list-style-type: none"> Crisis and emergency management systems and response Emerging risks and trend reviews at the Executive Leadership Team and Committee and Board level
Resource and Reserve Depletion	Failure to replace resources as they are mined or discover a mineable resource resulting in a failure to deliver on the Company's growth strategy.	This risk is expected to remain a material risk requiring continued active management by the business in the foreseeable future.	<ul style="list-style-type: none"> Strategic guidelines to direct project generation and business development Active project pipeline management
Climate Change	Contributing to climate change by emitting greenhouse gas emissions through our business activities. The Company's operations being negatively impacted as a consequence of climate change.	The impacts of climate change and community expectations surrounding management of climate. change are expected to increase over time and the Company will need to continue to adapt its response to this risk.	<ul style="list-style-type: none"> Commitment to continue to explore opportunities to reduce emissions Committee and Board oversight Climate change impact assessment and adaptation strategies
Environment	Damage to the environment, fines, reputational damage, loss of access to land due to non-compliance with regulatory requirements and/or approval commitments.	This risk is expected to remain a material risk requiring continued active management by the business in the foreseeable future.	<ul style="list-style-type: none"> Risk management framework ISO 14001 Environmental Management System certification Internal compliance audit practices Training and awareness

Risk Category	Risk Description	Risk Exposure Trend	Control Measures
Cultural Heritage	Loss of access to land, damage to community relationships, damage to culturally sensitive sites, fines and reputational damage as a result of non-compliance with regulatory requirements and/or approval commitments.	This risk is expected to remain a material risk requiring continued active management by the business in the foreseeable future.	<ul style="list-style-type: none"> Collaborative partnerships with Traditional Owners Community Management standard, stakeholder engagement plans Training and awareness
Cyber Security	Loss of an ability to operate for a prolonged period of time, loss of personal information, loss of profit as a result of a cyber-attack, hack or ransom of Gold Road, our JV partner, suppliers or operators of key infrastructure.	The nature of cyber attacks are expected to evolve over time and the Company will need to continue to adapt its response to this material risk.	<ul style="list-style-type: none"> Security vulnerability testing Information and Communications Technology management framework

Performance Rights Over Unissued Capital

At the date of this report, there are 3,093,730 (20 February 2024: 3,346,702) unvested Performance Rights to acquire ordinary shares as follows:

Incentive Plan	Performance Period End Date ¹	Outstanding ²
LTI 2023-2025	31 December 2025	1,490,698
LTI 2024-2026	31 December 2026	1,603,032
Total Performance Rights Outstanding		3,093,730

¹ Subsequent to the Performance Period End Date, the Board determines the number of Performance Rights that vest

² None of the Performance Rights on issue entitles the holder to participate in any share issue of the Company or any other body corporate

The following changes in Performance Rights occurred during the year:

	12 months ended 31 December 2024	12 months ended 31 December 2023
Granted	2,045,185	2,418,698
Exercised	1,020,044	1,952,167
Cancelled	79,447	-
Forfeited	1,556,485	369,092

Since 31 December 2024 to the date of this report, 573,507 Performance Rights have been granted, 1,139,015 Performance Rights have vested, 1,139,015 Performance Rights have been exercised, 976,924 Performance Rights have been forfeited and 387,919 Performance Rights have been cancelled.

Significant Events after the Balance Date

Subsequent to the end of the financial year, on 20 February 2025, the Directors determined to pay a dividend of 1.5 cent per fully paid ordinary share, fully franked for an amount of \$16.3 million. The aggregate amount of the proposed dividend is expected to be paid on 31 March 2025 out of retained earnings at 31 December 2024 and has not been recognised as a liability at the end of the year.

Other than as noted above, there has not arisen in the interval between the end of the year and the date of this report any other item, transaction or event of a material and unusual nature likely, in the opinion of the Directors of the Company, to affect substantially the operations of the Group, the results of those operations or the state of affairs of the Group in subsequent financial years.

Likely Developments and Expected Results of Operations

There are no likely developments of which the Directors are aware which could be expected to significantly affect the results of the Group's operations in subsequent financial years not otherwise disclosed in the Nature of Operations and Principal Activities, Operating and Financial Overview or the Significant Events after the Balance Date sections of the Directors' Report.

Environmental Regulation and Performance

The operations of the Group are subject to environmental regulation under the laws of the Commonwealth and the States of Western Australia, Queensland, and South Australia. The Group holds various environmental licenses issued under these laws, to regulate its mining and exploration activities in Australia. These licenses include conditions and regulations in relation to specifying limits on discharges into the air, surface water and groundwater, rehabilitation of areas disturbed during the course of mining and exploration activities and the storage of hazardous substances. Environmental performance obligations are monitored by the Board. There have been no material breaches of the Group's licenses and mining and exploration activities have been undertaken in compliance with the relevant environmental regulations.

Remuneration Report (audited)

Dear Shareholders

On behalf of the Directors, I am pleased to present the Remuneration Report for the year ended 31 December 2024.

This report is designed to provide you, our shareholders, with information regarding our approach to remunerating our Executive Key Management Personnel (KMP). It includes the principles that underpin our Remuneration Framework and demonstrates how reward outcomes are linked to Company strategy and performance during the year to create sustainable value for shareholders.

2024 Performance

Gold Road continued to demonstrate strong performance in 2024, with a commitment to operational excellence and workforce wellbeing and inclusivity. The Company remained focused on fostering a positive and empowering workplace culture, ensuring both the physical and mental wellbeing of employees while driving sustainable business outcomes.

At Gruyere, gold production remained steady, with 287,270 ounces produced (100% basis) despite a challenging rain event. Encouraging drilling results below the pit identified potential increases in the mineral inventory which have led to a substantial deep drilling program planned for 2025.

The Yamarna Mine Readiness Project also made significant progress, with the Gilmour Project Pre-feasibility Study completed, confirming a potential five-year mine life. Exploration focus continued to expand nationally, with drilling completed at Mallina, ongoing programs at Balter and Greenvale, and a farm-in agreement secured with Icen Gold Limited at Guyer.

Safety remained a top priority, with zero significant or material incidents, a Lost Time Injury Frequency Rate (LTIFR) of Zero, and a Total Recordable Injury Frequency Rate (TRIFR) of 4.6. Gold Road upheld its commitment to heritage and community relations, strengthening relationships with local communities and stakeholders. Diversity and inclusion remained a key focus, with workforce female representation increasing to 35%, women comprising 43% of the Executive Leadership Team, and 40% female representation on the Board. Additionally, Aboriginal and Torres Strait Islander employment was sustained at 6%, reinforcing Gold Road's dedication to fostering an inclusive and equitable workplace.

Short-Term Incentive 2024

The Short-Term Incentive (STI) 2024 outcomes reflect a strong performance in corporate development and ESG, offsetting challenges in operational performance at Gruyere. Growth related metrics, accounting for 45% of the STI weighting, saw noticeable increases in Mineral Resource and Ore Reserve growth and corporate development, driven by value-accretive investments, despite severe weather conditions restricting some of the exploration efforts.

Results of the STI 2024 are shown in Table 8. The overall Company performance for the awarding of the 2024 STI was assessed at 90% (60% of the total maximum at Stretch).

The Company's performance is also reflected in the positive individual performance of the Executive KMP aligned to achieving the Company's overall performance and strategic initiatives.

Long-Term Incentive 2022-2024

The Company's Long-Term Incentive (LTI) 2022-2024 performance achieved a 45% at target (36% at stretch) outcome. Results of the LTI 2022-2024 are shown in Table 10. The outcome reflects strong financial and strategic outcomes but challenges in operational performance. Shareholder returns were positive, however, they did not outperform the selected peer group. Key achievements included successful corporate transactions and significant Earnings Per Share (EPS) growth.

Overall, the results demonstrate progress in long-term value creation, though operational and market performance remain areas for improvement.

Board and Executive Changes

There were no changes to the Board or Executive KMPs during 2024.

Looking Forward

Gold Road remains focused on delivering long-term sustainable value to shareholders by refining its remuneration framework to align with business objectives and market best practices. In 2025, the Company will implement an enhanced remuneration structure, incorporating insights from an independent consultant to ensure market competitiveness.

Key changes include updates to the STI and LTI plans, with an emphasis on aligning performance incentives with priorities such as shareholder returns, Ore Reserve growth, ESG and safety. These refinements aim to further strengthen workforce engagement, foster innovation and retain top talent, ensuring Gold Road remains competitive within the mining sector.

Gold Road is committed to leading the way in people strategies, ensuring that we attract, develop and retain top talent to drive the business success. Our focus on building a high performing, engaged workforce will be key in achieving our strategic objectives.

In collaboration with our JV partner, Gold Fields, we will continue to enhance production efficiency and operational performance at Gruyere, ensuring sustainable growth and long-term value in 2025 and beyond.

We welcome feedback from our shareholders and appreciate your continued support.

Brian Levett
Chair, Remuneration Committee

Table 2: Remuneration outcomes for 2024

Executive KMP Remuneration	Short-Term Incentive	Long-Term Incentive	NED Remuneration
MD & CEO 7% Increase CFO 5% Increase	90% of Target (Company Performance)	45% Vesting	Non-executive Director Fee Increase
The Managing Director and CEO received an economic increase to base salary of 7%, with effect 1 January 2024 and the CFO received an economic increase of 5%, with effect 1 January 2024. There were no other changes to Executive KMP remuneration during the year.	The STI 2024 Company performance was 90% (60% of total maximum opportunity at stretch). The overall individual STI outcome for the Managing Director and CEO was 95%, while the CFO achieved 65% of the maximum, respectively.	The LTI 2022-2024 performance over the three-year period was 45% (36% of the total maximum opportunity).	It was resolved to increase relevant board fees as follows, effective 1 January 2024 (all fees inclusive of superannuation): <ul style="list-style-type: none"> The Board chair fee increased by \$20,274 per annum. Board member fees increased by \$5,560 per annum. Board Committee chair fees increased by \$5,000 per annum. Board Committee member fees increased by \$2,500 per annum. The Board chair is not paid any committee fees.

The pages of the Remuneration Report that follow have been prepared in accordance with section 300A of the *Corporations Act 2001* (Cth) (**Act**) and audited as required by section 308(3C) of the Act. These sections detail the remuneration arrangements for those persons who were KMP of Gold Road for the year ended 31 December 2024, including the persons outlined in the table below.

Key Management Personnel

Executive KMP have authority and responsibility for planning, directing and controlling the activities of the Company.

Table 3: Directors and Executive KMPs of Gold Road

Non-executive Directors

¹ Mr Mullumby does not hold a position on the Board

Our Remuneration Framework

Remuneration Governance

The roles and responsibilities of our Board, Remuneration Committee, management and external advisors in relation to remuneration for KMP and employees at Gold Road are outlined below.

Board	Actively oversees the governance of our remuneration policies and principles, satisfying itself that the Company's remuneration practices are aligned with Gold Road's purpose, values, strategic objectives and risk appetite. The Board determines the quantum of remuneration for Non-executive Directors and approves the remuneration arrangements for the Executive KMP (CEO and CFO) upon recommendation from the Remuneration Committee.
Remuneration Committee	The Committee is established by the Board and is comprised of independent Non-executive Directors. The Committee operates under its own Charter which provides a framework for the consideration of remuneration matters, recognising the need to attract, motivate and retain high calibre individuals. The Committee reviews and makes recommendations on: <ul style="list-style-type: none"> remuneration policy, principles and structure remuneration arrangements for the Company's Directors and Executives setting of performance standards and assessing outcomes for the Executives assessment of cost, risk and effectiveness of the elements of reward monitoring and measuring culture inclusion and diversity principles and objectives
Managing Director and CEO and Management	The Managing Director and CEO recommends remuneration for non-Executive KMPs within the parameters approved by the Board. Management also: <ul style="list-style-type: none"> provides information and analysis to assist the Remuneration Committee to make informed decisions executes the remuneration policy, principles and processes of the Company
External Advisors	The Committee may obtain independent professional or other advice from suitably qualified external advisors in the fulfilment of its duties. This information may include remuneration related insights, benchmarking information and market data. During the year, an independent consultant was used to provide comparative ASX market remuneration data to assess pay levels and remuneration design for the KMP. The Remuneration Committee did not receive any remuneration recommendations from the external consultant in relation to KMP in 2024.

Our Remuneration Strategy and Guiding Principles

We provide market-competitive remuneration to attract, motivate and retain high calibre Executives that can achieve the Company's strategy and deliver long-term value to our shareholders. Our guiding principles that underpin our remuneration strategy are outlined below.

Our Guiding Remuneration Principles

Vision and Strategy	Culture and Values	Shareholders	Performance	Market
Our short and long-term performance measures drive the execution of the Company's strategy including our Vision to discover and unlock world-class gold assets	How we conduct ourselves and our Values are at the forefront of our focus. The Gold Road Values are: <ul style="list-style-type: none"> We care for the wellbeing of all We act with integrity We deliver We innovate to improve We work as one team 	Align the interests of our Executives with the long-term interests of our shareholders. We achieve this by ensuring LTI performance measures deliver shareholder value and by ensuring meaningful levels of Executive share ownership	Remuneration outcomes are aligned to Company performance by ensuring an appropriate amount of pay is 'at risk' to drive and recognise high performance	We benchmark our remuneration levels with similar sized ASX gold miners and peer companies to ensure a competitive offering that allows us to attract and retain high performing Executives

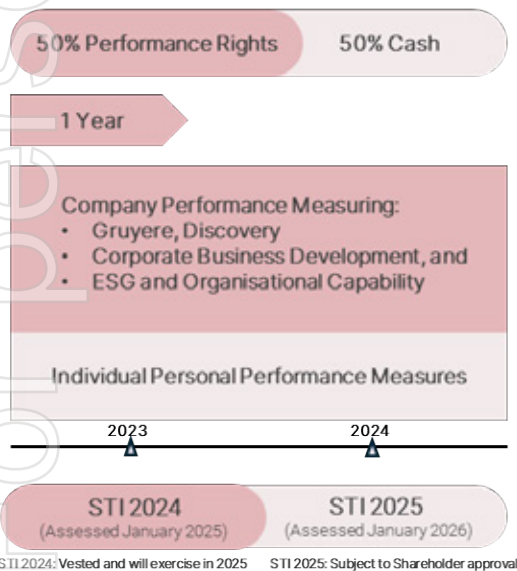

Summary of Remuneration Activities (Incentive Plans)

The incentive plan consists of two components being the short and long-term incentive components. The STI component has been designed to incentivise and reward the Executives for the attainment of short-term objectives whilst the LTI component has been designed to reward Executives for the creation of long-term shareholder and sustained business value (Figure 3).

All Performance Rights under the incentive plan are awarded at the start of the performance measurement period, subject to approval at the Annual General Meeting (AGM). After the conclusion of the incentive period, the Board assesses performance achievements and approves the allocation of vested Performance Rights, which are then automatically exercised.

The Executive KMP remuneration has a fixed component (base salary plus superannuation and benefits), and a variable component (incentives) designed to reward for achievement of strategic objectives aligned with shareholders' interests. Remuneration mix is weighted towards the variable component, which for 2024 represented between 51% and 68% of the Executive KMP's total remuneration opportunity.

Short-Term Incentive (STI)

Long-Term Incentive (STI)

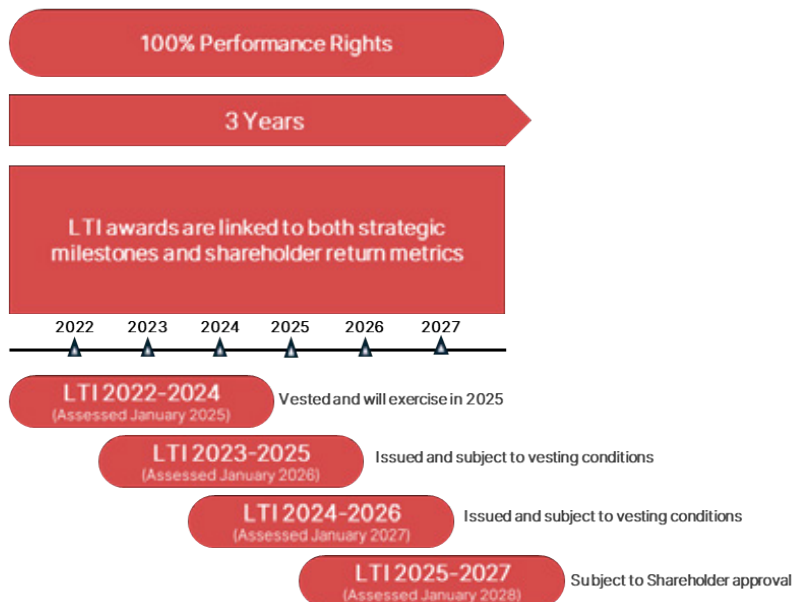

Figure 3: Gold Road STI and LTI overview

Executive KMP 2024 Remuneration Framework

Table 4 provides an overview of components of remuneration for the 2024 year for Executive KMPs.

Table 4: 2024 Executive KMP Remuneration Components

Fixed Remuneration	Variable/At-Risk																			
	2024 Short-Term Incentive	2024 – 2026 Long-Term Incentive																		
Purpose																				
Aimed to provide a base salary that is appropriate for the role and level of responsibility, delivered at a level that is competitive in the market.	STI motivates and rewards the achievement of challenging performance targets that are aligned to delivery of core strategy pillars, to ensure success for Gold Road in both the short and long-term.	LTI awards are linked to both strategic milestones and shareholder return metrics to reward the creation of long-term, sustainable value and shareholder alignment.																		
Delivery Method																				
Base salary, superannuation and non-monetary benefits.	50% delivered in cash and 50% delivered in rights to Gold Road shares, with a 12 month performance period based on Company and individual performance hurdles.	Rights to Gold Road shares, with a three year performance period and based on the Company's Strategic, Relative and Absolute Total Shareholder Return and EPS Growth.																		
Opportunity																				
Set based on alignment with peer companies listed on the ASX and market data.	STI opportunity is calculated as a percentage of the base salary, which is allocated as a Company Performance portion and an Individual Performance portion:	LTI opportunity is calculated as a percentage of the base salary:																		
	<table> <tr> <th></th><th>D Gibbs</th><th>J Mullumby</th></tr> <tr> <td>Target</td><td>65%</td><td>45%</td></tr> <tr> <td>Stretch</td><td>94%</td><td>61%</td></tr> </table>		D Gibbs	J Mullumby	Target	65%	45%	Stretch	94%	61%	<table> <tr> <th></th><th>D Gibbs</th><th>J Mullumby</th></tr> <tr> <td>Target</td><td>100%</td><td>65%</td></tr> <tr> <td>Stretch</td><td>130%</td><td>84.5%</td></tr> </table>		D Gibbs	J Mullumby	Target	100%	65%	Stretch	130%	84.5%

Performance Measures																				
	Measure	Measure																		
	Company Performance Measure (150% Stretch)	Company Performance Measure (130% Stretch)																		
	D Gibbs: 90% of total STI weighting																			
	J Mullumby: 70% of total STI weighting																			
	Growth	Strategic Measures is achieved through an exploration discovery capable of supporting a new mining and processing operation that meets Gold Road's investment criteria; and/or the completion of a transaction that has been approved by the Board and viewed positively by the market, leading to value enhancement.																		
	Exploration performance is measured by the efficiency of in-ground expenditure and total exploration costs, the effectiveness of advancing prospects through the exploration and business development pipelines and growth opportunities meeting Gold Road's investment criteria.																			
	Gruyere	Relative Total Shareholder Return (RTSR) relative to a peer group of companies measured over three years ² .																		
	Production and AISC within guidance. Optimisation and sustaining future value including studies, capital projects and mine development.																			
	ESG	Absolute Total Shareholder Return (ATSR) measures the total return that shareholder have received.																		
	Measures continuous improvements across all areas of ESG, including health, safety and wellbeing, environmental impact, climate change, and community engagement, including Gruyere.																			
	Individual Performance Measure (No Stretch)	EPS growth based on the Company's three year net profit after tax divided by the weighted average number of shares for each year. The baseline is based on audited EPS at the end of 2022 \$6.49c per share and excludes non-recurring items.																		
	D Gibbs: 10% of total STI weighting																			
	J Mullumby: 30% of total STI weighting																			
	Personal Performance Measures based on overall individual performance and against the Key Performance Indicators (KPIs) established at the beginning of the period assessed against successful completion of each KPI.																			
ESG Gateway¹	The Board may reduce the outcome of the STI in whole or part, for some or all participants, in the event of any catastrophic ESG event occurring during the performance period at any 100% Gold Road owned and operated entity.																			

¹ The ESG performance gateway reflects the values of Gold Road and the continued commitment and focus on ESG performance

² LTI 2024-2026 peer group of companies: Alkane Resources Ltd, Bellevue Gold Ltd, Calidus Resources Ltd, Capricorn Metals Ltd, Evolution Mining Ltd, Genesis Minerals Ltd, Northern Star Resources Ltd, Ramelius Resources Ltd, Red 5 Ltd, Regis Resources Ltd, Silver Lake Resources Ltd, Westgold Resources Ltd

Variable Remuneration

Variable remuneration is comprised of Short-Term Incentives and Long-Term Incentives. Both the STI and LTI are granted annually on set percentages of fixed base remuneration for each eligible recipient. The STI is assessed over a 12 month performance period and is calculated based on an assessment against performance, for both the Company and individual performance. The LTI is assessed over a three year period and is calculated based on an assessment of performance against Company focused longer term performance criteria and hurdles. Performance criteria and hurdles can include Threshold, Target and Stretch metrics and these are outlined in Table 5 below.

Table 5: Threshold, Target, Stretch Criteria Definitions

Term	Definition
Threshold	The minimum level of performance that would be seen as deserving of reward. Typically, this is set just below budget or targets where the budget or targets are challenging but achievable, and ought to have a probability of $\geq 80\%$ of being achieved. The reward associated with this outcome is typically 50% of the Target reward.
Target	The outcome that is focussed on and is expected to represent a challenging but achievable goal or goals. It is the level of 'at-risk' remuneration that should be communicated as part of the discussion with incumbents regarding their intended remuneration packages to manage expectations. Targets should have a probability of being achieved of around 50%-60%. At this level of performance, the target reward should be paid.
Stretch	The upper limit of possible outcomes that are planned for and typically represents a very challenging goal that is unlikely to be achieved and should have a probability of being achieved of around $\leq 10\%$. This should generally not be the focus of remuneration communications as it tends to create expectations that are unlikely to be realised, which may undermine the value of the 'at risk' components of remuneration and fail to align with the foregoing approach to remuneration setting.

Executive KMP 2024 Remuneration Mix

Target Remuneration is determined by the Remuneration Framework (see page 11).

The diagram below outlines the weighting of each component of the Remuneration Framework, including the fixed remuneration, STI and LTI potential at Target and Stretch, which is based on the value of rights at grant for the STI 2024 and LTI 2024-2026. Fixed remuneration is base salary plus superannuation, which is capped at the maximum superannuation contribution base of ordinary time earnings.

68% OF STRETCH REMUNERATION AT RISK FOR THE MANAGING DIRECTOR & CEO

The 2024 Executive KMP Remuneration breakdown

Remuneration potential is only achieved if the Executive KMP meet all of their demanding STI and LTI hurdles at Target and Stretch.

Service Agreements

Remuneration and other terms of employment for the Executive KMP are formalised in Service Agreements (**agreements**). The agreements provide for the provision of performance related cash and share-based incentives. Key terms of agreements for Executive KMP as at 31 December 2024 are set out below.

Table 6: Service Agreements for Executive KMP

KMP	Term of Agreement	Notice Required
D Gibbs	No fixed term. Commenced 17 September 2018	6 months by individual or 6 months by the Company
J Mullumby	No fixed term. Commenced 15 December 2021	3 months by individual or 3 months by the Company

Services from Remuneration Consultants

In accordance with the Remuneration Committee's charter, where an independent remuneration consultant is appointed in relation to remuneration of Executive KMPs, the Committee directly engages and receives the reports of the consultant. During the year, an independent consultant was used to provide comparative ASX market remuneration data to assess pay levels and remuneration design for the KMP. The Remuneration Committee did not receive any remuneration recommendations from the external consultant in relation to KMP in 2024.

2024 Outcomes

Fixed Remuneration

Fixed remuneration is comprised of base salary plus statutory superannuation benefits. Fixed base remuneration for Executive KMPs is reviewed annually, with any changes approved by the Board. There are no guaranteed fixed base remuneration increases included in the Executive KMPs contracts.

Effective from 1 January 2024, the base salary (excluding superannuation) for the Managing Director and CEO was increased by 7% to \$626,913 and the Chief Financial Officer was increased by 5% to \$463,000.

Superannuation benefits are paid to complying superannuation funds nominated by the Executive KMPs capped at the maximum superannuation contribution base of ordinary time earnings, which for the tax year ending 30 June 2024 was \$30,000.

There were no other changes made to Fixed Remuneration for the Executive KMPs during 2024.

Realised Pay for KMP

Realised Pay details the cash and other benefits actually received by the Executive KMP in respect of 2024.

This disclosure is voluntary and aims to provide shareholders with a better understanding of the cash and other benefits received by Executive KMPs. It includes Fixed Remuneration (inclusive of superannuation), and non-monetary benefits earned, which vested in 2024 including from the STI 2023 and LTI 2021-2023. This table has not been prepared in accordance with Australian Accounting Standards. See statutory remuneration Table 15 that has been prepared in accordance with Australian Accounting Standards.

Table 7: Total Realised (Actual) Executive KMP Remuneration Received

Executive KMP		Fixed Remuneration	STI Cash	STI Rights	LTI	Other	Total Actual Pay
D Gibbs	2024	655,579	86,640	70,430 ¹	269,992 ¹	-	1,082,641
	2023	612,246	139,458	138,582 ¹	753,604 ¹	-	1,643,890
J Mullumby	2024	491,665	49,116	45,303 ²	- ³	261,764 ²	847,848
	2023	467,346	70,261	70,740 ²	- ³	-	608,347

¹ Mr Gibbs' STI 2023 and LTI 2021-2023 rights are valued at the recipient's taxing date being the 5 day VWAP of Gold Road shares on the day following the conclusion of blackout period, of \$1.398 per share (STI 2022 and LTI 2020-2022: \$1.456 per share)

² The STI 2023 and Onboarding rights are valued at the recipient's taxing date being the sale price within 30 days since shares allocation, of \$1.592 per share (STI 2022: the 5 day VWAP of Gold Road shares on the day following the conclusion of blackout period \$1.456 per share)

³ Mr Mullumby commenced 15 December 2021, therefore did not meet the eligibility requirements of the LTI 2021-2023

Short-Term Incentive 2024 Performance Outcomes

The STI 2024 was based over a 12 month period, commencing 1 January 2024 to 31 December 2024, on a set percentage of base salary, with performance assessed against a mix of Company strategic and personal hurdles as outlined in Table 8. The Company KPI achievement was 90% (60% of stretch). The STI 2024 performance outcomes are outlined in Table 8.

Table 8: STI 2024 Performance Outcomes**Company Performance Criteria and Hurdles**

Managing Director and CEO: 90% of total STI 2024 weighting at Target and 135% of total STI 2024 weighting at Stretch

Chief Financial Officer: 70% of total STI 2024 weighting at Target and 105% of total STI 2024 weighting at Stretch

Weighting		Measure at Target	2024 Outcome	Achievement
Growth (45% Weighting)				
Threshold	15%	Attributable Mineral Resource and Ore Reserve: Achieve attributable Mineral Resource and Ore Reserve growth targets, inclusive of Gruyere	Between Threshold and Target, achieving 24% with Mineral Resources and Ore Reserves increasing modestly, primarily driven by open-pit growth at Gruyere, partially offset by decreases in underground resources and Yamarna.	109% (49% Weighted Outcome)
Target	30%			
Stretch	45%			
Threshold	10%	Attributable Exploration Pipeline (10% weighting): Establishing and sustaining a high-value exploration pipeline aimed at significantly enhancing the potential for transformative discoveries.	The portfolio achieved its target of 10% in 2024 with the Guyer farm-in agreement, assessing additional opportunities, and leveraging the strategic value of the Gilmour project, with plans for transformative drill testing activities in 2025.	
Target	20%			
Stretch	30%	Exploration Portfolio (10% weighting): Expand and manage the attributable exploration pipeline and inground expenditure effectively.	In-ground expenditure and total exploration costs achieved 0% of the target due to severe weather, including widespread rain and flooding, which caused delays to fieldwork and drilling.	
Threshold	25%	Corporate Development and Growth: Accelerate corporate development initiatives and strategic growth aligned with Gold Road's investment criteria and long-term value creation goals.	Stretch achieved at 75% by advancing corporate development initiatives, including generating significant long-term value in strategic investments.	
Target	50%			
Stretch	75%			
Gruyere (30% Weighting)				
Threshold	35%	Operating Performance (70% weighting): Gruyere delivery within the stated guidance range for gold production and AISC.	The mining volume target was not met, resulting in a 0% achievement. Gold production, ounces produced and AISC targets were not met, resulting in a 0% achievement.	25% (7% Weighted Outcome)
Target	70%			
Stretch	105%			
Threshold	15%	Sustaining Value: Optimising and sustaining the future value of the operation including though the delivery of budgeted studies, capital projects and mine development.	Sustaining Value targets resulted in 25% achievement, with notable successes including the delivery of 90% of capital projects, advancing critical studies, and supporting mine development efforts to optimise and sustain the future value of operations.	
Target	30%			
Stretch	45%			
ESG (25% Weighting)				
Threshold	13%	Continued improvement in ESG performance including health, safety and wellbeing, environment, climate change and community across our exploration activities and operations, including Gruyere.	ESG performance, achieving stretch outcomes across key environmental, social, and governance areas, maintaining progress toward Net Zero by 2050, advancing renewable energy initiatives, and demonstrating strong health, safety, and diversity achievements while aligning long-term operations with sustainable and carbon-reduction goals.	135% (34% Weighted Outcome)
Target	25%			
Stretch	38%			
100% (150% at Stretch)			90% at Target (60% at Stretch)	

Individual Performance Measures

Managing Director and CEO: 10% of total STI 2024 weighting at Target, no stretch

Chief Financial Officer: 30% of total STI 2024 weighting at Target, no stretch

Company KPI	Weighting	Measure at Target	Outcome	Achievement
D Gibbs (10% of total STI 2024 weighting, with no Stretch)	100%	Performance is assessed by considering overall achievements throughout the year, including the fulfillment of KPIs set at the beginning of each calendar year. The evaluation is centred on the contribution to strategic value and the enhancement of the Company's overall performance.	The Board evaluated Duncan Gibbs' individual performance, considering factors such as achievements in exploration and growth, effective recovery efforts following the rain even and the successful achievement of the majority of ESG targets.	95%
J Mullumby (30% of total STI 2024 weighting, with no Stretch)	100%		The Board and Managing Director and CEO have considered John Mullumby's impact on the Company's overall performance and strategic initiatives while assessing the fulfillment of individual KPIs.	65%

Table 9: 2024 STI Outcome for Executive KMPs (measured at 31 December 2024)

Executive KMP	STI Opportunity		FY24 STI Outcome		STI Cash Award	STI Performance Rights Award				Total
	STI Max - Quantum of Base Salary	STI Max (\$)	% of Max STI Award ¹	% of Max STI Forfeited	STI Cash Awarded (50% of the STI)	STI Performance Rights Granted (50% of STI Max) ²	STI Performance Rights Vested	STI Performance Rights Lapsed	Value of STI Performance Rights Vested ³	Total Value of FY24 STI Awarded ⁴
D Gibbs	94%	\$590,866	63%	37%	\$184,941	151,893	95,085	56,808	\$235,811	\$420,752
J Mullumby	61%	\$281,273	61%	39%	\$86,163	69,629	44,300	25,329	\$109,864	\$196,027
Total					\$271,104	221,522	139,385	82,137	\$345,675	\$616,779

¹ The percentage of Max STI Award is determined by the STI cash awarded plus the value of the STI Performance Rights vested using the 5 day VWAP to 1 January 2024 (\$1.95) divided by the STI max value

² 50% of the maximum STI opportunity is granted in STI Performance Rights at the start of the performance period, calculated using the 5 day VWAP to 1 January 2024 (\$1.95)

³ The value at vesting is the number of Performance Rights vested multiplied by the Gold Road share price on the date of vesting (30 January 2025) being \$2.48

⁴ Total value of FY24 STI awarded is the STI cash awarded and the value of STI Performance Rights vested at 30 January 2025

Long-Term Incentives Outcomes

The LTI 2022-2024 award was tested for vesting of the performance measures for the three years, commencing 1 January 2022 to 31 December 2024. Table 10 outlines the performance measures and achievement outcomes applicable to this award.

Table 10: LTI 2022-2024 Performance Measures and Outcomes

Weighting at Target (and Stretch)		Measure	Outcome	Achievement	
Strategic Growth					
25% (50% at Stretch)	The pre-set Company Strategic Hurdles are:				
	Measure	Weighting			
	Discovery of JORC resource(s) capable of supporting a new mining and processing operation meeting Gold Road's investment criteria		25%	Discovery of JORC resource was not achieved.	
	Completion of a value accretive Board approved, and market positively viewed transaction		25%	The target for this measure was achieved, driven by a robust investment rationale underpinning transactions, including the DGO Gold Pty Ltd (DGO) acquisition and the strategic investment in De Grey.	25%
Stretch of 50% if both of these hurdles are achieved					
Gruyere					
25%	Assessed based on the improvement and actual delivery for 2023 and 2024 against the JV approved life of mine budget and advancement towards the 2022 Gold Road strategic plan.				
	Measure	Weighting			
	1.5% Increase to gold production		25%	The production outlook for 2023–2028 fell below the baseline target, resulting in a nil outcome.	0%
	Stretch achieved through a 10% increase in gold production over the period, five year extension to asset life OR equivalent value uplift from increased production and life.				
Relative Total Share Return (RTSR)					
30%	RTSR relative to a peer group of companies ¹ , measured over a three year period. Vesting occurs based on the vesting schedule below:				
	TSR Vesting Schedule TSR Performance	Vesting Outcome			
	0–50 th percentile		0% vesting	Gold Road's RTSR was 43.7% over the three year period, placing the Company slightly below the 50 th percentile relative to our 11 peer group of companies, resulting in a nil outcome.	0%
	50 th percentile		50% vesting		
	50 th –75 th percentile on a straight-line pro rata		Straight line from 50% to 100%		
	75 th percentile		100% vesting		
EPS Growth					
20%	EPS growth based on the Company's three year net profit after tax divided by the weighted average number of shares for each year. The baseline is based on audited EPS for 2021 of \$4.2c per share and excludes non-recurring items. Target is met by achievement of a minimum 5-10% growth to EPS over the three year period.		Gold Road's EPS growth over the period was 143%, therefore 20% was achieved.	20%	
100% (125% at Stretch)				45% (36% at Stretch)	

¹ Peer Group of Companies for the LTI 2022-2024 RTSR: Bellevue Gold Ltd, Capricorn Metals Ltd, De Grey Mining Ltd, Evolution Resources Ltd, Northern Star Resources Ltd, Ramelius Resources Ltd, Red 5 Ltd, Regis Resources Ltd, Silver Lake Resources Ltd, St Barbara Ltd, Westgold Resources Ltd

Table 14: LTI Plans on-issue during 2024

Feature	Description of LTI Plans		
LTI Plan	LTI 2022-2024	LTI 2023-2025	LTI 2024-2026
Performance Period	3 years 1 January 2022 – 31 December 2024	3 years 1 January 2023 – 31 December 2025	3 years 1 January 2024 – 31 December 2026
Assessment Date	January 2025	January 2026	January 2027
Relevant Plan	2020 Plan	2023 Plan	2023 Plan
Status	Vested	Unvested	Unvested
Instrument	Grants are made in the form of Performance Rights which are issued in accordance with the relevant approved Plan ¹		
Grant Frequency	Grants are made on an annual basis but are subject to Board discretion		
Target Quantum (% of base salary)	The percentage remuneration levels are reviewed at each grant and determined based on market and peer group practice for the relevant period		
	Managing Director and CEO: 100% (Stretch 125%) ² Chief Financial Officer: 65% (Stretch 81.25%) ⁵	Managing Director and CEO: 100% (Stretch 130%) ³ Chief Financial Officer: 65% (Stretch 84.5%) ⁶	Managing Director and CEO: 100% (Stretch 130%) ⁴ Chief Financial Officer: 65% (Stretch 84.5%) ⁷
Performance Criteria / Vesting Hurdles (% of base salary)	The Company has selected the performance hurdles and criteria outlined below to align the interests of Executive KMPs with the long-term interests of its shareholders.		
	Relative TSR: 30% EPS: 20% Strategic: 50% (Stretch 75%)	TSR: 60% ⁸ EPS: 10% Strategic: 30% (Stretch 60%)	TSR: 60% ⁸ EPS: 10% Strategic: 30% (Stretch 60%)
Exercise	The percentage of Performance Rights that meet Vesting Hurdles (as determined by the Board) automatically exercise into Company shares and the remainder are forfeited/cancelled. The Board may also, in its absolute discretion, permit the exercise of incentives (irrespective of whether the relevant vesting conditions have been met) during such period as the Board determines where: (a) the Company passes a resolution for voluntary winding up; (b) an order is made for the compulsory winding up of the Company; or (c) the Company passes a resolution in accordance with ASX Listing Rule 11.2 to dispose of its main undertaking.		
Dividends and Voting Rights	Performance Rights carry no entitlement to voting or dividends		
Cessation of Employment	The Board, in its discretion, may determine that some or all of an Incentiveholder's unvested Incentives, as applicable: (i) lapse; (ii) are forfeited; (iii) vest (immediately or subject to conditions); (iv) are only exercisable for a prescribed period and will otherwise lapse; and/or (v) are no longer subject to some of the restrictions (including any Vesting Condition) that previously applied, as a result of the Incentiveholder (or the relevant Eligible Employee, where the Incentiveholder is the nominee of the Eligible Employee) ceasing to be an employee of the Group. The Board may specify in the Invitation to the Incentiveholder how the Incentives will be treated on cessation of employment.		
Change of Control	Incentives granted under the 2023 Plan will vest on a pro rata basis based on the proportion of the performance period elapsed to the date of the change of control and performance against the vesting hurdles, as determined by the Board. The remainder of any incentives will lapse or be forfeited unless the Board in its absolute discretion determines otherwise.		
Board Discretion and Clawback	For all LTI plans the Board has discretion to reduce or cancel any unvested or unexercised Performance Rights. The Board can enact clawback rights for vested shares in the event of serious misconduct, a material misstatement in the Group's financial statements or a material adverse effect on the reputation of the Company. The Board did not exercise its discretion or clawback clauses in 2023.		

¹ Performance Rights are rights to receive fully paid ordinary shares in Gold Road subject to meeting performance and vesting conditions (**Rights**). The percentage of Rights that meet the performance conditions (as determined by the Board) will automatically convert to shares in the Company for nil consideration and the remainder are forfeited/cancelled

² Includes provision for a Stretch of 150% on the strategic metrics (Target 50% Stretch 75%) resulting in a total Stretch of 125% of base salary

³ Includes provision for a Stretch of 200% on the strategic metrics (Target 30% Stretch 60%) resulting in a total Stretch of 130% of base salary

⁴ Includes provision for a Stretch of 200% on the strategic metrics (Target 30% Stretch 60%) resulting in a total Stretch of 130% of base salary

⁵ Includes provision for a Stretch of 150% on the strategic metrics (Target 50% Stretch 75%) resulting in a total Stretch of 81.25% of base salary

⁶ Includes provision for a Stretch of 200% on the strategic metrics (Target 30% Stretch 60%) resulting in a total Stretch of 84.5% of base salary

⁷ Includes provision for a Stretch of 200% on the strategic metrics (Target 30% Stretch 60%) resulting in a total Stretch of 84.5% of base salary

⁸ This measure assesses both RTSR 30% at Target and ATSR 30% at Target, no stretch

Statutory Remuneration

Table 15 details the remuneration expense recognised for Executive KMP in 2024 and 2023 and has been prepared in accordance with Australian Accounting Standards.

Table 15: Statutory Remuneration for Executive KMP

Executive KMP		Short-Term benefits			Post-employment benefits	Long-Term Benefits ²	Share-based payments		Total	Percentage performance related
		Salary	Cash STI	Other Short-Term benefits ¹	Superannuation		STI ³	LTI		
D Gibbs	2024	626,913	184,941	43,206	28,666	25,567	235,811	391,037	1,536,142	53%
	2023	585,900	86,640	13,910	26,346	16,474	77,069	183,273	989,612	35%
J Mullumby	2024	463,000	86,163	22,059	28,666	-	109,864	191,015	900,766	43%
	2023	441,000	49,116	12,398	26,346	-	43,691	262,097	834,648	43%

¹ Includes the accounting expense of annual leave entitlements

² Long-term benefits are the accounting expense of long service leave entitlements

³ Share-based payments is calculated in accordance with Australian Accounting Standards and is measured at fair value of \$2.48 (2023: \$1.53)

Non-executive Director Remuneration

Remuneration Policy

The Company's policy is to remunerate Non-executive Directors, at rates comparable to other ASX listed companies in the same industry, for their time, commitment and responsibilities.

Non-executive Directors' fees are benchmarked on an annual basis. The Chair fee is determined independently to the fees of Non-executive Directors with the Chair fee inclusive of all responsibilities, including participation on any Board Committees. Non-executive Director remuneration does not include any at risk remuneration component.

Fee Pool

The board fees were increased as follows, effective 1 January 2024 (all fees inclusive of superannuation)¹:

- Board chair fee increased by \$20,274 per annum
- Board member fees increased by \$5,560 per annum
- Board Committee chair fees increased by \$5,000 per annum
- Board Committee member fees increased by \$2,500 per annum

The Non-executive Directors' Fee Pool was increased from A\$700,000 to A\$1,100,000 (approved at the AGM on 19 May 2022).

Table 16 outlines the fees payable to Non-executive Directors, inclusive of superannuation.

Table 16: 2024 Board Fees

Fees per annum	Chair (\$)	Member (\$)
Board	225,759 ¹	116,684
Audit, Remuneration, Risk & ESG and Growth & Development Committees ²	20,000	10,000

¹ The Board Chair is not eligible to receive any additional fees for participation as a Member of any Board Committee(s)

² There are no Committee fees payable for the Nomination Committee of which all directors are members

2024 Non-executive Director Remuneration

Table 17 details the statutory disclosures for remuneration paid to Non-executive Directors in 2024 as required under the Corporations Act and in accordance with Australian Accounting Standards.

Non-executive Directors do not receive performance-related compensation and are not provided with retirement benefits apart from statutory superannuation.

Table 17: Non-executive Director remuneration

Non-executive Director	Year	Board Fees ¹ (\$)	Committee Fees ¹ (\$)	Total (\$)
T Netscher	2024	225,759	-	225,759
	2023	205,485	-	205,485

	2023	111,124	30,000	141,124
Total	2024	575,811	120,000	695,811
	2023	538,857	90,000	628,857

¹ Board and Committee fees are inclusive of superannuation

Looking Forward to 2025

Gold Road remains committed to its strategy of delivering sustainable value to shareholders and stakeholders by leveraging growth opportunities and driving long-term success. In 2025, we will prioritise the refinement and implementation of competitive remuneration frameworks, including updated Short-Term and Long-Term Incentive plans.

Leveraging the expertise of an independent remuneration consultant, the Board conducted a detailed benchmark and assessment of our remuneration practices to ensure they are fit-for-purpose for Gold Road and are aligned to our Guiding Principles. As a result of this review, a number of enhancements have been made to the Short-Term and Long-Term Incentive plans. These are designed to further align performance incentives with strategic objectives, such as Ore Reserve growth, safety, ESG priorities, and shareholder returns, while fostering innovation and excellence.

Attracting and retaining top talent will remain central to our people management strategy, supported by a more inclusive and structured incentive approach across all organisational levels. These efforts aim to strengthen workforce engagement and sustain a high-performance culture for all our employees that underpins our operational and strategic goals. By aligning our people, performance, and purpose, Gold Road will continue to position itself as a leader in the mining sector, creating lasting value for all stakeholders.

Fixed Remuneration

Effective January 2025, Mr Gibbs received an increase of 6.7% and Mr Mullumby received an economic increase of 4% to their fixed base remuneration. Executive KMP remuneration will continue to be assessed by the Remuneration Committee and Board, in alignment with our remuneration principles and frameworks, during our annual remuneration review process.

Table 18: 2024 Executive KMP Remuneration

Executive KMP	Base salary ¹	2025 Superannuation ²	Fixed Remuneration	Increase (%)
D Gibbs	\$669,592	\$30,000	\$699,592	6.7%
J Mullumby	\$481,520	\$30,000	\$511,520	4%

¹ Increase for CEO and CFO is effective 1 January 2025

² Superannuation is capped at the maximum contributions base of ordinary time earnings of \$30,000 for tax year ending 30 June 2024

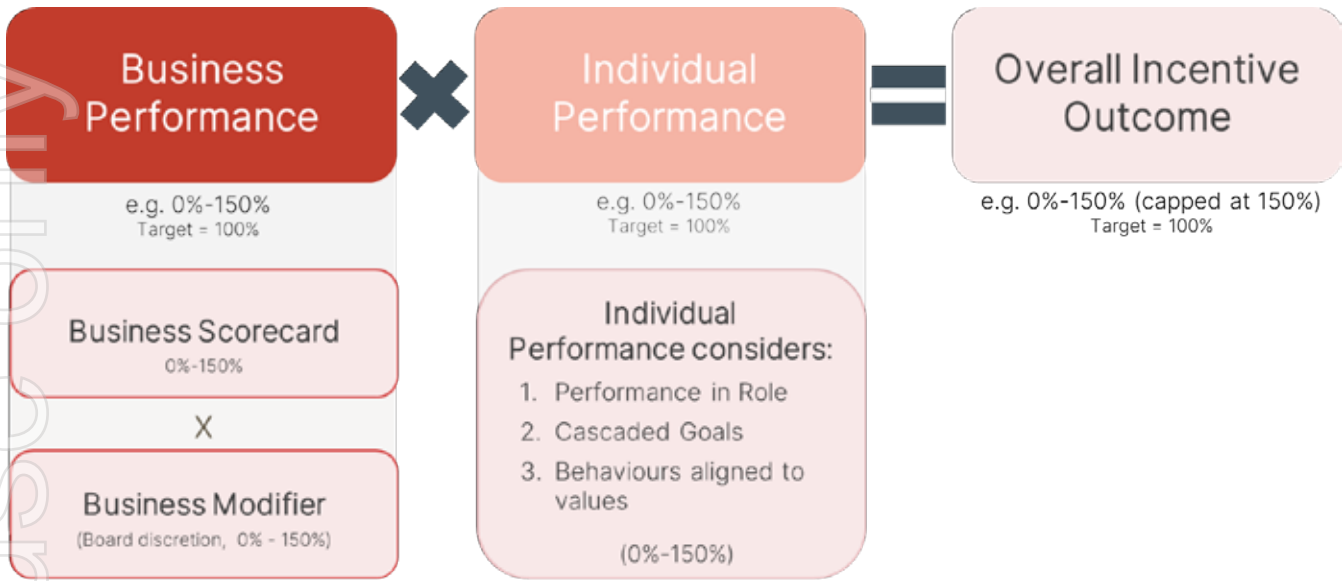

Short-Term Incentive 2025

The STI framework for 2025 has been updated to enhance flexibility, ensure market alignment, and better support Gold Road's strategic goals. These changes aim to provide a more structured and inclusive incentive plan that aligns individual and organisational performance with the Company's broader objectives.

The STI plan now incorporates a Business Scorecard model to determine the total bonus pool for all employees. This model replaces the former reliance on individual metrics alone, aligning rewards with broader organisational performance. The existing scorecard was adjusted to serve as the foundation for this new approach, ensuring consistency across the Company.

The introduction of a Business Modifier replaces previous STI "Gates". This modifier provides the Board with discretion to consider factors beyond the defined scorecard, allowing adjustments based on external or extraordinary circumstances that may impact the business but may not be reflected directly in the scorecard metrics. It is anticipated that Board discretion would be applied conservatively and only where necessary.

The new approach to determine the individual STI outcomes is as follows:

The existing scorecard was adjusted to serve as the foundation for this new approach, ensuring continuity with the key focus areas and consistency across the company. The measures for 2025 are outlined in table 19 below.

The updated STI also removes Mineral Resource and Ore Reserve metrics, concentrating on Ore Reserve Growth exclusively within the LTI framework. This prevents duplication across incentive plans and ensures alignment with long-term strategic objectives. ESG measures have been simplified through the business modifier, while Community Engagement and Health, Safety, and Wellbeing have been prioritised as distinct focus areas. Culture has been positioned as an overarching element influencing all measures to integrate ESG and organisational values holistically.

The delivery of the STI has also been adjusted, by including a deferral period for the 50% portion that is delivered in performance rights. As from 2025, the portion that is granted in rights at the start of the performance year and following shareholder approval, will vest two years later (rather than after 12 months, at the end of the financial year). This change provides longer-term alignment with shareholders and enhances the clawback mechanism.

Table 19: STI 2025 Performance Criteria and Hurdles

Managing Director and CEO: The quantum of the 2025 STI has increased from 65% (127.5% at stretch) to 85% (97.5% at stretch) of the base salary.

Chief Financial Officer: The quantum of the 2025 STI has increased from 45% (67.5% at stretch) to 50% (75% at stretch) of the base salary.

Company Performance Criteria and Hurdles

Weighting		Measure
Gruyere Performance		
Threshold	18%	Delivery within the stated guidance range for gold production and AISC, while optimising and sustaining the future value of the operation including though the delivery of budgeted studies, capital projects and mine development.
Target	35%	
Stretch	53%	
Growth		
Threshold	20%	Exploration Portfolio: Enhancing the exploration portfolio by sustaining and increasing the quality and value of the exploration pipeline through material discoveries and disciplined in ground expenditure, aligning with the Company's strategic growth objectives. Corporate Development: Achievement of a value-accretive transaction that is strategically aligned with Gold Road's objectives and positively received by the market, demonstrating long-term growth potential and shareholder value creation.
Target	40%	
Stretch	60%	
ESG		
Threshold	13%	Maintain a strong ESG culture to drive and support the successful execution of corporate strategy: Environment (zero significant environmental incidents): Continue to assess and manage environmental hazards, risks and opportunities to further reduce our environmental footprint and foster a culture of environmental accountability that strengthens our reputation with regulators. Community Engagement (maintain social license): Continue to engage proactively with local communities to build and maintain trust. Health, Safety and Wellbeing (zero significant injuries or fatalities): Reinforce a safety and wellness culture that prioritises injury and incident prevention to keep our people safe. Governance (zero significant breaches of law or reputational damage): Uphold our reporting and compliance standards to prevent legal and reputational risks and maintain transparent communication on governance, showcasing our leadership in ethical practices.
Target	25%	
Stretch	38%	
Business Performance – Business Modifier		
The Business Modifier allows the Board to consider overall business outcomes or other factors that are not specifically contemplated in the Business Scorecard, such as the shareholder experience, overall business performance/delivery, safety/environmental factors, reputational issues or other events.		
Individual Performance Criteria		
The Company has adopted a new formula and process for evaluating individual performance, based on three key criteria: Operational and Compliance Excellence, Strategic and Transformational Impact and Leadership and Cultural Impact. This approach allows for discretionary management assessments, with individual outcomes ranging from 0% to 150%, ensuring a comprehensive and flexible evaluation aligned with Company priorities.		

Long-Term Incentive 2025-2027

The LTI framework for 2025-2027 has been updated to align with Gold Road's strategic priorities, simplify performance structures, and enhancing market competitiveness. The performance rights are assessed over a three year period from 1 January 2025 to 31 December 2027, with a target weighting of 100%. The LTI retains a clear focus on fostering long-term shareholder value through a balanced and achievable approach to performance hurdles.

A key change to the framework is the removal of the "stretch" component that previously only applied to Growth targets. Under the revised structure, LTI vesting will range from 0% to 100% of granted rights, streamlining the incentive plan and ensuring targets are realistic and straightforward. Ore Reserve growth has been prioritised as a critical strategic metric, measured through exploration success and acquisitions, while Mineral Resource and Ore Reserve metrics have been removed from STIs to avoid overlap and reinforce long-term objectives.

The LTI framework incorporates four distinct performance metrics with updated weightings: Reserve Growth (30%), Relative Total Shareholder Return (TSR) (15%), Absolute TSR (45%), and Earnings Per Share (EPS) Growth (10%). Overall, the updated LTI framework strengthens alignment between executive performance and Gold Road's strategic objectives, ensuring sustainable value creation for shareholders.

Table 20: LTI 2025-2027 - Performance Criteria and Hurdles

Managing Director and CEO: The quantum of the LTI 2025-2027 has increased from 100% to 110% of the base salary, with the remove of stretch.
Chief Financial Officer: The quantum of the LTI 2025-2027 has remained at 65% of the base, with the removal of stretch.

Weighting	Measure	Vesting Schedule
Reserve Growth		
30%	Attributable Ore Reserve Growth (Ore Reserve ounces at end of period less Ore Reserve ounces at beginning of period, inclusive of Gruyere, exploration and/or acquisitions).	Threshold (33%): Mine life is maintained at the Gruyere production rate (at the commencement of the Incentive period). Target (100%): Ore Reserves are increased by at least one year of production (at the commencement of the incentive period).
Relative Total Shareholder Return (RTSR)		
15%	RTSR relative to a peer group of companies ¹ , measured over a three year period. Vesting occurs based on the RTSR Vesting Schedule.	Threshold (50%): 50th – 75th Percentile Target (100%): 75th Percentile and above
Absolute Total Shareholder Return (ATSR)		
45%	ATSR measures the total return that shareholders have received. Vesting occurs based on the ATSR Vesting Schedule.	Threshold (33% - 100%): 10%-20% per annum Target (100%): Above 20% per annum
EPS Growth		
10%	EPS growth based on the Company's internal three year net profit after tax divided by the weighted average shares issued for each year in the 2025-2027 period. The baseline is based on the audited Basic EPS for 2024 of 13.17c per share and excludes non-recurring items.	Threshold (33% - 100%): 5%-25% total growth in the three year EPS Target (100%): Above 25% total growth in the three year EPS

100% (No Stretch)

¹ RTSR Peer group for LTI 2025-2027: Bellevue Resources Ltd, Capricorn Metals Ltd, Evolution Mining Ltd, Genesis Minerals Ltd, Northern Star Resources Ltd, Ora Banda Mining Ltd, Pantoro Ltd, Ramelius Resources Ltd, Regis Resources Ltd, Southern Cross Gold Ltd, Spartan Resources Ltd, Westgold Resources Ltd, Vault Resources Ltd

Non-executive Director Fees for 2025

There was an economic increase to the Non-Executive Director fees, following a board fee review against peer companies, it has been resolved to increase the Non-executive Chairman fees by 4% and the Non-executive Director fees by 3%.

Table 21: 2024 Non-executive Director fees (inclusive of superannuation)

Fees per annum	Chair (\$)	Member (\$)
Board	234,789	121,351
Audit, Remuneration, Risk & ESG and Growth & Development Committees ¹	20,000	10,000

¹ There are no Committee fees payable for the Nomination Committee

The Directors consider that the fee pool available for Non-executive Directors should provide sufficient flexibility for the Company to take on additional Non-executive Directors when deemed necessary and to provide flexibility for succession planning or business growth. The Directors therefore consider that the aggregate fee pool of A\$1,100,000 will continue to provide appropriate capacity for the Company's future requirements.

Rights and Shareholdings of KMP

Changes in Rights held by KMP

Table 22 details information regarding the Rights over Gold Road shares held by KMP, including the movement in Rights held to the date of this report. See Table 14 for the terms and conditions of Rights held under our equity plans.

Table 22: Changes in Rights held

KMP Shareholdings

A summary of shareholdings held directly, indirectly or beneficially by KMP and their close related parties, including movements as at 31 December 2024 is detailed in Table 23.

Table 23: Summary of Director and KMP Shareholdings

Director and KMP	Held at 31 December 2023	Received on vesting of Performance Rights	Other net change ¹	Held at 31 December 2024	Value of Shares held (\$) ²
Non-executive Directors					
T Netscher	803,016	-	43,211	846,227	1,745,749
B Levet	240,000	-	-	240,000	495,115
M Arnason	28,660	-	30,374	59,034	121,786
D McComish	20,430	-	30,294	50,724	104,643
Executive KMP					
D Gibbs	1,120,036	243,473	(56,179)	1,307,330	2,696,994
J Mullumby	-	193,556	(193,556)	-	-

¹ Other net change includes purchases and sales of shares including through the Dividend Reinvestment Plan

² The value of shares held is the number of shares held at 31 December 2024, multiplied by the 30 day VWAP of Gold Road shares to 31 December 2024 being \$2.063

Additional Information

Transactions with KMP

During 2024, there were no transactions, other than remuneration set out in this Report between KMP or their close related parties and Gold Road.

There are no amounts payable to any KMP at 31 December 2024.

There are no loans with KMP and there were no other transactions between the Company or any of its subsidiaries and any KMP or their close related parties during the year.

This Remuneration Report was approved by the Board on 20 February 2025.

THIS IS THE END OF THE REMUNERATION REPORT

Officers' Indemnities and Insurance

Since the end of the previous financial year, the Company paid an insurance premium to insure certain officers of the Company. The officers of the Company covered by the insurance policy include the Directors named in this Report.

The Directors and Officers Liability insurance provides cover against all costs and expenses that may be incurred in defending civil or criminal proceedings that fall within the scope of the indemnity and that may be brought against the officers in their capacity as officers of the Company. The insurance policy does not contain details of the premium paid in respect of individual officers of the Company. Disclosure of the nature of the liability cover and the amount of the premium is subject to a confidentiality clause under the insurance policy.

Proceedings on Behalf of the Company

No person has applied to the Court under section 237 of the *Corporations Act 2001* for leave to bring proceedings on behalf of the Company, or to intervene in any proceedings to which the Company is a party, for the purpose of taking responsibility on behalf of the Company for all or part of those proceedings.

No proceedings have been brought or intervened in on behalf of the Company with leave of the Court under section 237 of the *Corporations Act 2001*.

Rounding of Amounts

The Company is of a kind referred to in ASIC Instrument 2016/191 dated 24 March 2016 and in accordance with that Instrument, amounts in the Financial Statements and Directors' Report have been rounded to the nearest thousand dollars, unless otherwise stated.

Corporate Governance

The 31 December 2024 Corporate Governance Statement is available on the Company's website at goldroad.com.au.

Audit and Non-Audit Services

During the year the following fees were paid or payable for services provided by the auditor of the parent entity, its related practices and non-related audit firms:

	12 months ended 31 December 2024	12 months ended 31 December 2023
Audit and other assurance services	\$	\$
Audit and review of financial statements – Group	156,955	146,075
Audit and review of financial statements – jointly controlled entities	56,100	53,813
Other assurance services	62,500	63,200
Total remuneration of KPMG	275,555	263,088

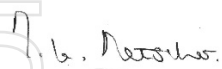

It is the Company's policy to employ KPMG on assignments additional to their statutory audit duties where their expertise and experience with the Company are important.

KPMG continues in office in accordance with section 327 of the *Corporations Act 2001*.

A copy of the Auditor's Independence Declaration as required under Section 307C of the *Corporations Act 2001* is set out on page 27.

This report is made in accordance with a resolution of the Directors.

DATED at Perth this 20th day of February 2025

Tim Netscher
Non-executive Chairman

Lead Auditor's Independence Declaration under Section 307C of the Corporations Act 2001

To the Directors of Gold Road Resources Limited

I declare that, to the best of my knowledge and belief, in relation to the audit of Gold Road Resources Limited for the financial year ended 31 December 2024 there have been:

- i. no contraventions of the auditor independence requirements as set out in the *Corporations Act 2001* in relation to the audit; and
- ii. no contraventions of any applicable code of professional conduct in relation to the audit.

Notes to the Consolidated Financial Statements

For the year ended 31 December 2024

Corporate Information and Basis of Preparation

Note 1 Corporate Information

The financial statements cover the consolidated group comprising Gold Road Resources Limited and its subsidiaries, together referred to as Gold Road, the Company or the Group.

Gold Road is a company incorporated and domiciled in Australia, limited by shares, and is a for profit entity whose shares are publicly traded on the Australian Securities Exchange.

Note 2 Basis of Preparation

The financial statements were authorised for issue in accordance with a Resolution of the Directors on 20 February 2025.

These general purpose financial statements have been prepared in accordance with Australian Accounting Standards and Interpretations issued by the Australian Accounting Standards Board (AASB) and the *Corporations Act 2001*.

(a) Compliance with International Financial Reporting Standards

The Consolidated Financial Statements of the Group also comply with International Financial Reporting Standards as issued by the International Accounting Standards Board.

(b) Historical cost convention

These Consolidated Financial Statements have been prepared under the historical cost convention, and on an accruals basis (except for derivative financial assets/liabilities and certain other financial assets and liabilities which are required to be measured at fair value).

(c) Functional and presentation currency

Items included in the financial statements of each of the Group's entities are measured using the currency of the primary economic environment in which the entity operates – the functional currency. The Consolidated Financial Statements are presented in Australian dollars, which is Gold Road's functional and presentation currency.

(d) Rounding of amounts

The Company is of a kind referred to in ASIC Corporations (Rounding in Financial/Directors' Reports) Instrument 2016/191 and in accordance with that Instrument, all financial information presented in Australian dollars has been rounded to the nearest thousand unless otherwise stated.

(e) Critical accounting estimates

The preparation of financial statements requires the use of certain estimates, judgements and assumptions that affect the application of the Group's accounting policies. Actual results may differ from these estimates and application of different assumptions and estimates may have a significant impact on the Group's net assets and financial results.

Estimates and assumptions are reviewed on an ongoing basis and are based on the latest available information at each reporting date. Revisions to accounting estimates are recognised in the period in which the estimate is revised. The areas involving a higher degree of judgement or complexity, or areas where assumptions and estimates are significant to the financial statements are found in the following notes.

Note 8	Exploration and evaluation
Note 9	Property, plant and equipment (depreciation and amortisation)
Note 10	Right-of-use assets (depreciation)
Note 14	Provisions
Note 21	Income tax, current tax liabilities and deferred tax

Financial Performance

Note 3 Segment Information

The Group has identified its operating segments based on the internal reports that are reviewed and used by the Group's Board of Directors, being the Group's Chief Operating Decision Maker (**CODM**), in assessing performance and in determining the allocation of resources. An operating segment is a component of the Group that engages in business activities which may earn revenue and incur expenditure, and separate financial information is available that is evaluated regularly by the CODM. These are measured in the same way as in the financial statements.

The following have been identified as individual operating segments:

(a) Operations

All operating segments within Australia are one reportable segment being Operations, consisting of the Gruyere joint operation with Gold Fields. Exploration activities on Gruyere JV tenements are included in the Exploration segment.

(b) Exploration

The Exploration segment includes the activities on all mineral exploration, including all joint venture tenements.

(c) Investment

The Investment segment includes the activities on equity securities investments.

(d) Unallocated

Unallocated items comprise Corporate which includes those expenditures supporting the business during the year, and items that cannot be directly attributed to the Operations, Exploration or Investment segments.

The segment information for the reportable segments for the year ended 31 December 2024 is as follows:

	Operations \$'000	Exploration \$'000	Investment \$'000	Unallocated \$'000	Total \$'000
31 December 2024					
Segment revenue ¹	527,960	-	-	-	527,960
Segment profit/(loss) before tax	261,660	(31,662)	-	(26,766)	203,232
Income tax (expense)/benefit	-	-	-	(60,535)	(60,535)
Capital expenditure additions	133,698	12,756	-	537	146,991
Segment assets	587,702	55,127	741,719	151,517	1,536,065
Segment liabilities	(204,743)	(1,903)	-	(101,270)	(307,916)

31 December 2023

Segment revenue ¹	472,125	-	-	-	472,125
Segment profit/(loss) before tax	215,519	(31,173)	-	(17,238)	167,108
Income tax (expense)/benefit	-	-	-	(51,393)	(51,393)
Capital expenditure additions	102,333	2,557	-	1,933	106,823
Segment assets	539,148	47,585	464,961	126,558	1,178,252
Segment liabilities	(201,091)	(2,595)	-	(32,121)	(235,807)

¹ Revenues from one customer of the Group's Operations segment represented all of the Group's total revenue (2023: all)

Recognition and measurement

Operating segments are identified, and segment information disclosed, where appropriate, on the basis of internal reports reviewed by the Board of Directors, being the Company's CODM, as defined by AASB 8.

Note 4 Revenue

(a) Revenue from contracts with customers

Gold revenue

12 months ended 31 December 2024	12 months ended 31 December 2023
\$'000	\$'000
527,960	472,125
527,960	472,125

Recognition and measurement

The Group recognises revenue at a point in time when control (physical or contractual) is transferred to the buyer, and the amount of revenue can be reliably measured. Revenue is measured based on the fair value of the consideration specified in the contract with a customer.

(b) Other income

Profit on disposal of exploration and evaluation assets
Profit on sales of investments in unlisted securities
Other income

12 months ended 31 December 2024	12 months ended 31 December 2023
\$'000	\$'000
500	240
67	-
195	455
762	695

Note 5 Expenses

(a) Cost of sales

Costs of production
Royalties and other selling costs
Depreciation and amortisation expense
Changes in inventory

12 months ended 31 December 2024	12 months ended 31 December 2023
\$'000	\$'000
(157,053)	(149,238)
(17,397)	(15,607)
(83,342)	(78,095)
(3,368)	(8,238)
(261,160)	(251,178)

(b) Exploration expenditure expensed

Costs expensed in relation to areas of interest in the exploration and evaluation phase

12 months ended 31 December 2024	12 months ended 31 December 2023
\$'000	\$'000
(27,050)	(27,635)
(27,050)	(27,635)

Recognition and measurement

Exploration and evaluation expenditure related to separate areas of interest is capitalised when either of the following criteria has been met:

- a Mineral Resource has been defined; or
- the Group has determined that there is a reasonable expectation that Mineral Resources will be defined.

If the criterion is not met, exploration and evaluation expenditure is expensed.

Each area of interest is an individual geological area which is considered to constitute a favourable environment for the presence of a mineral deposit or has been proved to contain such a deposit.

The exception to this treatment is the acquisition of an exploration and evaluation asset through an asset acquisition or business combination which will be recognised as an asset on acquisition and only future exploration and evaluation spend on the area of interest acquired will be subject to the above criteria.

Where a decision has been made to proceed with development in respect of a particular area of interest, the relevant exploration and evaluation asset is tested for impairment and the balance is then transferred to mine development.

Any gain or loss on disposal of an area of interest is recognised in profit or loss.

(c) Corporate and technical services

Administration and technical services
Employee benefits expense
Equity based remuneration expense
Depreciation expense
Loss on sale of assets

12 months ended 31 December 2024	12 months ended 31 December 2023
\$'000	\$'000
(12,184)	(7,750)
(10,754)	(9,258)
(1,891)	(1,451)
(2,004)	(1,942)
(414)	-
(27,247)	(20,401)

(d) Finance expenses

Interest and finance charges
Amortisation of debt establishment fees
Interest on lease liabilities
Foreign exchange loss
Provisions: unwinding of discount

12 months ended 31 December 2024	12 months ended 31 December 2023
\$'000	\$'000
(2,740)	(1,791)
(1,900)	(358)
(5,026)	(5,024)
(75)	(48)
(1,098)	(1,101)
(10,839)	(8,322)

Note 6 Earnings Per Share

(a) Basic earnings per share

Profit attributable to ordinary equity holders of the Company

12 months ended 31 December 2024 Cents	12 months ended 31 December 2023 Cents
13.17	10.73

(b) Diluted earnings per share

Profit attributable to ordinary equity holders of the Company

13.12	10.68
-------	-------

(c) Profit used in calculation of basic and diluted earnings per share

Profit for the financial year

\$'000	\$'000
142,697	115,715

(d) Weighted average number of shares used as the denominator

Weighted average number of shares used as the denominator in calculating basic earnings per share

1,083,097,386	1,078,443,595
---------------	---------------

Adjustments for calculation of diluted earnings per share: Performance Rights

4,488,834	5,013,371
-----------	-----------

Weighted average number of shares used as the denominator in calculating diluted earnings per share

1,087,586,220	1,083,456,966
---------------	---------------

Recognition and measurement

(i) Basic earnings per share

Basic earnings per share is calculated by dividing the earnings attributable to equity holders of the Company, excluding any costs of servicing equity other than ordinary shares, by the weighted average number of ordinary shares outstanding during the year, adjusted for bonus elements in ordinary shares issued during the year.

(ii) Diluted earnings per share

Diluted earnings per share adjusts the figures used in the determination of basic earnings per share to take into account the after income tax effect of interest and other financing costs associated with dilutive potential ordinary shares and the weighted average number of shares assumed to have been issued for no consideration in relation to dilutive potential ordinary shares.

Operating Assets and Liabilities

Note 7 Cash and Cash Equivalents

	31 December 2024 \$'000	31 December 2023 \$'000
Cash at bank	166,276	143,812
Restricted cash	-	35
Cash and cash equivalents	166,276	143,847

(a) Cash at bank

Included in cash at bank of \$166.276 million (2023: \$143.812 million) is \$19.211 million (2023: \$20.302 million) representing the Company's share of cash at bank held in the Gruyere JV, refer Note 22(b).

(b) Cash flows from operating activities reconciliation

	12 months ended 31 December 2024 \$'000	12 months ended 31 December 2023 \$'000
Profit from ordinary activities after income tax	142,697	115,715
Adjustments for non-cash items:		
Depreciation and amortisation	85,346	80,037
Share based payments expense	1,891	1,451
Profit on disposal of exploration and evaluation assets	-	(240)
Rehabilitation accretion	1,098	1,101
Amortisation of debt establishment fees	1,900	358
Exploration and evaluation write offs	4,198	3,538
Change in operating assets and liabilities:		
Increase in other operating receivables	(1,906)	(2,852)
Decrease/(increase) in inventory	1,489	1,166
Increase in employee entitlements	4	818
Increase/(decrease) in operating trade and other payables	12,059	3,550
Increase in current tax liability	(88,442)	21,336
Increase/Decrease/increase in deferred tax liability	90,257	7,593
Net cash inflow from operating activities	250,591	233,571

Recognition and measurement

For cash flow statement presentation purposes, cash and cash equivalents includes cash on hand, deposits held at call with financial institutions, other short term, highly liquid investments that are readily convertible to known amounts of cash and which are subject to an insignificant risk of changes in value.

Note 8 Exploration and Evaluation

	31 December 2024 \$'000	31 December 2023 \$'000
In the exploration and evaluation phase		
Opening balance	39,455	37,108
Exploration acquired through Abarta acquisition	-	3,405
Exploration acquired through Balter tenements acquisition	1,108	-
Exploration and evaluation written off during the year	(4,198)	(3,538)
Exploration expenditure capitalised during the year	9,980	2,480
Closing balance	46,345	39,455

Recognition and measurement

Accounting for exploration and evaluation expenditures is assessed separately for each area of interest. Each area of interest is an individual geological area which is considered to constitute a favourable environment for the presence of a mineral deposit or has been proved to contain such a deposit.

Exploration and evaluation expenditure relating to an area of interest is capitalised when either of the following criteria has been met:

- a Mineral Resource has been defined; or
- the Group has determined that there is a reasonable expectation that Mineral Resources will be defined.

If the criterion is not met, exploration and evaluation expenditure is expensed.

The exception to this treatment is the acquisition of an exploration and evaluation asset through an asset acquisition or business combination which will be recognised as an asset on acquisition and only future exploration and evaluation spend on the area of interest acquired will be subject to the above criteria.

Where a decision has been made to proceed with development in respect of a particular area of interest, the relevant exploration and evaluation asset is tested for impairment and the balance is then transferred to mine development.

Any gain or loss on disposal of an area of interest is recognised in profit or loss.

Critical accounting estimates and judgements

(a) Determination of Mineral Resources and Ore Reserves

The Group estimates its Mineral Resources and Ore Reserves in accordance with the Joint Ore Reserves Committee Australasian Code of Reporting of Exploration Results, Mineral Resources and Ore Reserves (the **JORC Code**). The information on Mineral Resources and Ore Reserves is prepared by or under the supervision of Competent Persons as defined in the JORC Code. The amounts presented are based on the Mineral Resources and Ore Reserves determined under the JORC Code.

There are numerous uncertainties inherent in estimating the Mineral Resources and Ore Reserves and assumptions that are valid at the time of estimation may change significantly when new information becomes available.

Changes in the forecast prices of commodities, exchange rates, production costs or recovery rates may change the economic status of Ore Reserves and may ultimately result in the Ore Reserves being restated. Such changes in Ore Reserves could impact depreciation and amortisation rates, asset carrying values, impairment assessments and provisions.

(b) Impairment of capitalised exploration and evaluation expenditure

Capitalised mineral exploration and evaluation expenditure incurred is accumulated in respect of each identifiable area of interest and are assessed for indicators of impairment during each reporting period.

In the event that an area of interest is abandoned or if the Directors consider the expenditure to be of reduced value, accumulated costs carried forward are written down to recoverable amount in the year in which that assessment is made.

For the purposes of impairment testing, exploration and evaluation assets are allocated to cash-generating units to which the exploration activity relates. The cash-generating unit is not larger than the area of interest.

The future recoverability of capitalised exploration and evaluation expenditure is dependent upon a number of factors, including whether the Group decides to exploit the related lease itself or, if not, whether it expects to successfully recover the related exploration and evaluation asset through sale.

Factors that could impact future recoverability include the level of Mineral Resources and Ore Reserves, future technological changes which could impact the cost of mining, future legal changes (including changes to environmental restoration obligations) and changes to commodity prices.

To the extent that capitalised exploration and evaluation expenditure is determined not to be recoverable in the future, an impairment expense is recognised in the period in which the determination is made. An exploration and evaluation write-off of \$4.2 million was recognised for the year ended 31 December 2024 (2023: 3.5 million).

Note 9 Property, Plant and Equipment

	Plant and Equipment \$'000	Buildings \$'000	Mine Development Assets \$'000	Assets Under Construction \$'000	Total \$'000

Closing net book value	197,316	1,824	123,774	20,227	343,141

Non-current assets pledged as security

Under the Gruyere Joint Venture Agreement, each party's obligations are secured by first ranking securities over each party's share in the assets in the Gruyere Project of \$400,073,000 (2023: \$335,932,000).

The borrowings under the Finance Facilities are secured by first ranking securities over the assets of the Group or second ranking securities in respect of assets in the Gruyere Project.

Recognition and measurement

Property, plant and equipment is stated at historical cost less depreciation and any impairment losses. Historical cost includes expenditure that is directly attributable to the acquisition of the assets.

Subsequent costs are included in the asset's carrying amount or recognised as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Group and the cost of the item can be measured reliably. All other repairs and maintenance are charged to the profit or loss during the financial period in which they are incurred.

Depreciation of property, plant and equipment is calculated using the straight line and written down value methods to allocate their cost, net of residual values, over their estimated useful lives, as follows:

Plant and equipment	2 - 15 years/units of production
Buildings	5 - 12 years

Mine development assets are amortised on a unit of production basis over the reserves of the relevant mining area.

The asset's residual values and useful lives are reviewed, and adjusted if appropriate, at each reporting date.

An asset's carrying amount is written down immediately to its recoverable amount if the asset's carrying amount is greater than its estimated recoverable amount.

The group uses the unit of production basis when depreciating/amortising life of mine specific assets which results in a depreciation/amortisation charge proportionate to the depletion of the anticipated remaining life of mine production. Each item's economic life, which is assessed annually, has due regard for both its physical life limitations and to present assessments of the available resource of the mine property at which it is located.

(a) Assets under construction

The cost of assets under construction includes the cost of materials and direct labour and any other costs directly attributable to bringing an asset to a working condition ready for its intended use. Borrowing costs related to the acquisition or construction of qualifying assets are capitalised. When the asset is in the location and condition necessary for it to be capable of operating in the manner intended by management, the assets are transferred into property, plant and equipment or mine development assets, as appropriate.

(b) Mine development assets

Development expenditure relates to costs incurred to access a Mineral Resource. It represents those costs incurred after the technical feasibility and commercial viability of the extraction of Mineral Resources in a particular area of interest is demonstrated and the identified Ore Reserve is being prepared for production.

Capitalised development expenditure includes:

- Reclassified exploration and evaluation assets;
- Tailings storage facility assets;
- Production stripping; and
- Mine closure and rehabilitation assets.

Mine development costs are deferred until commercial production commences at which time they are amortised on a unit of production basis over mineable reserves. Capitalised costs are amortised from the commencement of commercial production.

The Group assesses the stage of each mine under development to determine when a mine moves into the production phase, this being when the mine is substantially completed and ready for its intended use. This point is commonly referred to as the attainment of commercial production.

On attainment of commercial production the depreciation and amortisation of the development assets commences.

The criteria used to assess the start date are determined based on the unique nature of each mine development project, such as the complexity of the project and its location. The Group considers various relevant criteria to assess when the production phase is considered to have commenced.

(c) Impairment of assets

The carrying amounts of assets in the development or production phase are reviewed at each reporting date to determine whether there is any indication of impairment. If any such indication exists, then the asset's recoverable amount is estimated.

The recoverable amount of an asset or cash-generating unit is the greater of its value in use and its fair value less costs of disposal (**FVLCD**). In assessing FVLCD, the estimated future cash flows are discounted to their present value using a discount rate that reflects current market assessments of the time value of money and the risks specific to the asset.

For the purpose of impairment testing, assets that cannot be tested individually are grouped together into the smallest group of assets that generates cash inflows from continuing use that are largely independent of the cash inflows of other assets or groups of assets (the **cash-generating unit**).

An impairment loss is recognised if the carrying amount of an asset or its cash-generating unit exceeds its recoverable amount. Impairment losses are recognised in the Consolidated Statement of Profit or Loss. Impairment losses recognised in respect of cash-generating units are allocated to reduce the carrying amount of assets in the unit (group of units) on a pro-rata basis.

Impairment losses recognised in prior periods are assessed at each reporting date for any indications that the loss has decreased or no longer exists. An impairment loss is reversed if there has been a change in the estimates used to determine the recoverable amount. An impairment loss is reversed only to the extent that the asset's carrying amount does not exceed the carrying amount that would have been determined, net of depreciation or amortisation, if no impairment loss had been recognised. An impairment loss in respect of goodwill is not reversed.

Note 10 Right-of-Use Assets

(62,758)	(49,273)
108,914	123,186

Amounts recognised in profit or loss

Income from sub-leasing right-of-use assets presented in Other Income	
Expenses relating to short-term leases and leases of low-value assets	

12 months ended 31 December 2024	12 months ended 31 December 2023
\$'000	\$'000
108	172
9,067	9,804

Recognition and measurement

Right-of-use assets are stated at historical cost less depreciation and any impairment losses. Historical cost includes expenditure that is directly attributable to the acquisition of the assets.

Subsequent costs are included in the asset's carrying amount or recognised as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Group and the cost of the item can be measured reliably.

Depreciation of right-of-use assets is calculated using the straight line and written down value methods to allocate their cost, net of residual values, over their estimated useful lives, as follows:

Right-of-use assets 5 – 15 years

An asset's carrying amount is written down immediately to its recoverable amount if the asset's carrying amount is greater than its estimated recoverable amount.

Right-of-use assets are depreciated on a straight-line basis over the shorter of their estimated useful lives or the lease term.

Right-of-use assets are measured at an amount equal to the lease liability, adjusted by the amount of any prepaid or accrued lease payments.

The Group leases a gas pipeline, power facilities, mine infrastructure and equipment, and office premises.

Note 11 Receivables and other assets

	31 December 2024	31 December 2023
	\$'000	\$'000
Prepayments	4,715	3,017
GST and other receivables	5,543	4,476
Receivables and other assets - current	10,258	7,493
Prepayments	329	-
Receivables and other assets – non-current	329	-
	10,587	7,493

Recognition and measurement

Receivables are recognised and carried at original invoice amount less a provision for any uncollectible debts. An estimate for doubtful debts is made when collection of the full amount is no longer probable.

Note 12 Inventories

	31 December 2024	31 December 2023
	\$'000	\$'000
Ore stockpiles	8,038	12,032
Gold in circuit, doré and bullion	4,831	5,398
Consumable supplies and spares	28,294	26,416
Inventories – at cost - current	41,163	43,846
Ore stockpiles	13,516	12,323
Inventories – at cost – non-current	13,516	12,323
	54,679	56,169

Recognition and measurement

Inventories, comprising ore stockpiles, gold in circuit and gold doré are valued at the lower of weighted average cost and net realisable value. Costs include fixed direct costs, variable direct costs and an appropriate portion of fixed overhead costs. A portion of the related depreciation and amortisation charge is included in the cost of inventory.

Inventories of consumable supplies and spare parts are valued at the lower of cost and net realisable value. Cost is assigned on a weighted average basis. Net realisable value is the estimated selling price in the ordinary course of business less estimated costs of completion, and the estimated costs necessary to make the sale. The recoverable amount of surplus items is assessed regularly and written down to its net realisable value when an impairment indicator is present.

Note 13 Trade and Other Payables

	31 December 2024	31 December 2023
	\$'000	\$'000
Trade payables	18,682	15,798
Accruals and other payables	33,972	24,798
Trade and other payables	52,655	40,596

The carrying amounts of trade and other payables are assumed to be the same as their fair values, due to their short-term nature.

Recognition and measurement

These amounts represent liabilities for goods and services provided to the Group prior to the end of the year which are unpaid. The amounts are unsecured and usually paid within 30 days of recognition.

Note 14 Provisions

	31 December 2024			31 December 2023		
	Current \$'000	Non-current \$'000	Total \$'000	Current \$'000	Non-current \$'000	Total \$'000
Employee entitlements	5,676	615 ¹	6,291	5,748	519 ¹	6,267
Rehabilitation	-	33,661	33,661	-	32,585	32,585
Provisions	5,676	34,276	39,952	5,748	33,104	38,852

¹ Represents long service leave entitlements expected to be settled beyond 12 months of the reporting date

Movements in provisions

Movements in each class of provision during the year are set out below:

	31 December 2024			31 December 2023		
	Employee Entitlements \$'000	Rehabilitation \$'000	Total \$'000	Employee Entitlements \$'000	Rehabilitation \$'000	Total \$'000
Opening balance	6,267	32,585	38,852	5,449	26,583	32,032
Additional provisions recognised	1,168	2,040	3,208	1,480	4,167	5,647
Effect of change in discount rate and inflation rate	-	(2,042)	(2,042)	-	734	734
Unwinding of discount	-	1,098	1,098	-	1,101	1,101
Amounts used during the year	(1,144)	(20)	(1,164)	(662)	-	(662)
Closing balance	6,291	33,661	39,952	6,267	32,585	38,852

Information about individual provisions and significant estimates

(a) Employee entitlements

The provision for employee benefits relates to the Group's liability for long service leave and annual leave.

(b) Rehabilitation

Rehabilitation costs include the dismantling and removal of mining plant, equipment and building structures, waste removal and restoration of the site in accordance with the requirements of the mining permits. Such costs are determined using estimates of future costs, current legal requirements and technology.

The provision for rehabilitation has been recorded initially as a liability at fair value, assuming a risk-free nominal discount rate of 4.3% at 31 December 2024 (31 December 2023: 4.0%) and long-term inflation of 2.5% (31 December 2023: 2.6%).

Recognition and measurement

(a) Wages, salaries and annual leave

Liabilities for wages and salaries, including non-monetary benefits are recognised in other payables, and annual leave expected to be settled within 12 months of the reporting date is recognised in provisions in respect of employees' services up to the reporting date and are measured at the amounts expected to be paid when the liabilities are settled.

(b) Long service leave

The liability for long service leave is recognised in the provision for employee benefits and measured as the present value of expected future payments to be made in respect of services provided by employees up to the reporting date. Consideration is given to expected future salaries, experience of employee departures and periods of service. Expected future payments are discounted using market yields at the reporting date on national government bonds with terms to maturity and currency that match, as closely as possible, the estimated future cash outflows.

(c) Rehabilitation

When an obligation arises to decommission or restore a site to a certain condition after abandonment as a result of bringing the assets to its present location, the costs of rehabilitation are recognised in full at present value as a non-current liability, and an equivalent amount is capitalised as a part of the cost of the asset.

The capitalised cost is amortised over the life of the project and the provision is accreted periodically as the discounting of the liability unwinds. The unwinding of the discount is recorded as a finance cost.

Any changes in the estimates for the costs or other assumptions against the cost of relevant assets are accounted for on a prospective basis.

Critical accounting estimates and judgements

The Group assesses its mine rehabilitation provision twice annually. Significant judgement is required in determining the provision for mine rehabilitation and closure as there are many factors that will affect the ultimate liability payable to rehabilitate the mine sites, including future disturbances caused by further development, changes in technology, changes in regulations, price increases, changes in timing of cash flows which are based on life of mine plans and changes in discount rates. When these factors change or become known in the future, such differences will impact the mine rehabilitation provision in the period in which the change becomes known.

Capital and Financial Risk Management

Note 15 Financial Risk Management

Risk management is carried out at a corporate level under policies approved by the Board who maintain overall responsibility for the establishment and oversight of the Enterprise Risk Management Framework. The Risk and ESG Committee is responsible for developing and monitoring financial risk management policies. The Committee reports regularly to the Board on its activities.

The Group's financial risk management policies are established to identify and analyse the financial risks faced by the Group, to set appropriate risk limits and controls, and to monitor risks and adherence to limits. Risk management policies and systems are reviewed regularly to reflect changes in market conditions and the Group's activities.

The Group's activities expose it to a variety of financial risks: market risk (including interest rate risk and commodity price risk), credit risk and liquidity risk. The Group's exposure to these risks and how these risks could affect the Group's future financial performance is detailed below.

(a) Categories of financial instruments

Financial assets not measured at fair value

Cash and cash equivalents
Receivables and other assets

31 December 2024	31 December 2023
\$'000	\$'000
166,276	143,847
3,304	2,142
169,580	145,989

Financial assets measured at fair value - FVOCI

Equity securities
Equity options

740,589	464,961
1,130	-
741,719	610,952

Financial liabilities not measured at fair value

Trade payables
Lease liabilities

18,682	15,798
119,486	128,624
138,168	144,422

(b) Market risk

Market risk is the risk that changes in market prices, such as foreign exchange rates, interest rates, equity prices and commodity prices will affect the Group's income or the value of its holdings of financial instruments. The objective of market risk management is to manage and control market risk exposures within acceptable parameters, while optimising any return.

(i) Foreign exchange risk

At reporting date, the Group has minimal exposure to foreign currency risk. The Group's operations are all located within Australia and material transactions are denominated in Australian dollars, the Group's functional currency.

(ii) Interest rate risk

The Group's income and operating cash flows are exposed to changes in market interest rates in respect of interest-bearing assets and liabilities. The assets are cash balances on hand which earn interest at variable interest rates. The liabilities are lease liabilities with fixed interest rates.

At the reporting date the profile of the Group's interest-bearing financial instruments was as follows:

Fixed rate instruments

Lease liabilities

Variable rate instruments

Cash at bank – at call

31 December 2024	31 December 2023
\$'000	\$'000
(119,486)	(128,624)
166,276	143,812

Fair value sensitivity analysis for fixed rate instruments

The Group does not account for any fixed rate financial assets and liabilities at fair value through profit or loss. Therefore, a change in interest rates at the reporting date would not affect profit or loss.

Cash flow sensitivity analysis for variable rate instruments

A change of 100 basis points in interest rates at the reporting date would have increased/(decreased) profit or loss before tax by the amounts shown below. This analysis assumes that all other variables remain constant.

	31 December 2024 \$'000	31 December 2023 \$'000
Interest Revenue		
Increase 1.0% (2023: 1.0%)	1,663	1,438
Decrease 1.0% (2023: 1.0%)	(1,663)	(1,438)
Interest Expense		
Increase 1.0% (2023: 1.0%)	-	-
Decrease 1.0% (2023: 1.0%)	-	-

(iii) Commodity price risk

The Group's exposure to commodity price risk arises largely from Australian dollar gold price fluctuations. The Group is exposed to commodity price risk due to the sale of gold on physical delivery at prices determined by markets at the time of sale.

(iv) Other market price risk

The primary goal of the Group's investment in equity securities and equity options is to hold the investments for the long term for strategic purposes.

Sensitivity analysis – Equity price risk

All of the Group's listed equity investments are listed on the Australian Securities Exchange. For investments classified at fair value through other comprehensive income (FVOCI), a 11% change at the reporting date is considered to be a reasonably possible change in the relevant index and would have increased/(decreased) equity after tax by the amounts shown below. This analysis assumes that all other variables remain constant.

	31 December 2024 \$'000	31 December 2023 \$'000
Equity after tax		
Increase 11.0% (2023: 2.0%)	56,050	7,780
Decrease 11.0% (2023: 2.0%)	(56,050)	(7,780)

(c) Credit risk

Credit risk is the risk of financial loss to the Group if a customer or counterparty to a financial instrument fails to meet its contractual obligations and arises principally from cash at bank and deposits. The carrying amount of financial assets represents the maximum credit exposure.

The Group has adopted the policy of dealing with creditworthy counterparties as a means of mitigating the risk of financial loss from defaults. Cash is deposited only with institutions approved by the Board. The Group has determined that it currently has no significant exposure to credit risk as at the reporting date.

(i) Cash and cash equivalents

At the reporting date, the Group held significant cash and cash equivalents. The cash and cash equivalents are held with bank and financial institution counterparties, all of which have investment grade ratings as determined by a reputable credit rating agency e.g. Standard & Poor's.

(ii) Receivables and other assets

The Group's receivables and other assets at the reporting date relates to interest receivable. The risk of non-recovery of receivables from these sources is considered to be minimal.

In determining the recoverability of receivables and other assets, the Group performs a risk analysis considering the type and age of the outstanding receivable and the creditworthiness of the counterparty. If appropriate, an impairment loss will be recognised in profit or loss. The Group does not have any impaired receivables or other assets as at 31 December 2024 (31 December 2023: Nil).

(d) Liquidity risk

Liquidity risk is the risk that the Group will not be able to meet its financial obligations as they fall due. The Group manages liquidity risk by monitoring immediate and forecasted cash requirements and ensures adequate cash reserves are maintained to pay debts as and when due.

Management is cognisant of the future demands for liquid financial resources to finance the Group's current development activities and future operations, and consideration is given to the liquid assets available to the Group before commitment is made to future expenditure or investment.

(i) Financing arrangements

Financing arrangement comprises a \$300 million Revolving Corporate Facilities and a Gold Hedging Arrangement with a bank syndicate. As at 31 December 2024, the facilities remained undrawn (31 December 2023: nil drawn).

The Group leases a gas pipeline, power facilities, mine infrastructure and equipment, and office premises. Refer to Note 17.

(ii) Maturities of financial liabilities

The tables below analyse the Group's financial liabilities into relevant maturity groupings based on their contractual maturities.

The amounts disclosed in the table are the contractual undiscounted cash flows. Balances due within 12 months equal their carrying balances as the impact of discounting is not significant.

(iii) Contractual maturities of financial liabilities

	Less than one year \$'000	Between one and five years \$'000	More than five years \$'000	Contractual cash flows \$'000	Carrying amount \$'000
31 December 2024					
Trade and other payables	18,682	-	-	18,682	18,682
Lease liabilities	18,363	65,251	56,676	140,290	119,486
	37,045	65,251	56,676	158,972	138,168
31 December 2023					
Trade and other payables	15,798	-	-	15,798	15,798
Lease liabilities	18,709	66,669	68,143	153,521	128,624
	34,507	66,669	68,143	169,319	144,422

(e) Capital management

The Group's policy is to maintain a strong capital base so as to maintain investor, creditor and market confidence and to maintain sufficient working capital for exploration, development and production assets. The Group defines capital as being the ordinary share capital of the Company, plus retained earnings and reserves.

The Group monitors the adequacy of capital by analysing cash flow forecasts for each of its operating segments. Appropriate capital levels are maintained to ensure that all approved expenditure programs are adequately funded.

Recognition and measurement

Recognition and initial measurement

Trade receivables and debt securities issued are initially recognised when they are originated. All other financial assets and financial liabilities are initially recognised when the Group becomes a party to the contractual provisions of the instrument.

A financial asset (unless it is a trade receivable without a significant financing component) or financial liability is initially measured at fair value plus, for an item not at fair value through profit or loss, transaction costs that are directly attributable to its acquisition or issue. A trade receivable without a significant financing component is initially measured at the transaction price.

Classification and subsequent measurement

(i) Financial assets

On initial recognition, a financial asset is classified as measured at: amortised cost, FVOCI; or fair value through profit or loss (FVTPL). Financial assets are not reclassified subsequent to their initial recognition unless the Group changes its business model for managing financial assets, in which case all affected financial assets are reclassified on the first day of the first reporting period following the change in the business model.

A financial asset is measured at amortised cost if it meets both of the following conditions and is not designated as at FVTPL:

- it is held within a business model whose objective is to hold assets to collect contractual cash flows; and
- its contractual terms give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

On initial recognition of an equity investment that is not held for trading, the Group may irrevocably elect to present subsequent changes in the investment's fair value in other comprehensive income (OCI). This election is made on an investment-by-investment basis.

All financial assets not classified as measured at amortised cost or FVOCI as described above are measured at FVTPL. This includes all derivative financial assets. On initial recognition, the Group may irrevocably designate a financial asset that otherwise meets the requirements to be measured at amortised cost or at FVOCI as at FVTPL if doing so eliminates or significantly reduces an accounting mismatch that would otherwise arise.

(ii) Financial assets – subsequent measurement and gains and losses

Financial assets at fair value through profit or loss

These assets are subsequently measured at fair value. Net gains and losses, including any interest or dividend income, are recognised in profit or loss.

Financial assets at amortised cost

These assets are subsequently measured at amortised cost using the effective interest method. The gross carrying amount of amortised cost is reduced by impairment losses. Interest income, foreign exchange gains and losses and impairment are recognised in profit or loss. Any gain or loss on derecognition is recognised in profit or loss.

Equity investments at fair value through other comprehensive income

These assets are subsequently measured at fair value. Dividends are recognised as income in profit or loss unless the dividend clearly represents a recovery of part of the cost of the investment. Other net gains and losses are recognised in OCI and are never reclassified to profit or loss.

(iii) Financial liabilities – classification, subsequent measurement and gains and losses

Financial liabilities are classified as measured at amortised cost or FVTPL. A financial liability is measured at FVTPL if it is classified as held-for-trading, it is a derivative or it is designated as such on initial recognition. Financial liabilities at FVTPL are measured at fair value and net gains and losses, including any interest expense, are recognised in profit or loss. Other financial liabilities are subsequently measured at amortised cost using the effective interest method. Any gain or loss on derecognition is also recognised in profit or loss.

Derecognition

(iv) Financial assets

The Group derecognises a financial asset when the contractual rights to the cash flows from the financial asset expire, or it transfers the rights to receive the contractual cash flows in a transaction in which substantially all of the risks and rewards of ownership of the financial asset are transferred or in which the Group neither transfers nor retains substantially all of the risks and rewards of ownership and it does not retain control of the financial asset.

(v) Financial liabilities

The Group derecognises a financial liability when its contractual obligations are discharged or cancelled or expire. The Group also derecognises a financial liability when its terms are modified and the cash flows of the modified liability are substantially different, in which case a new financial liability based on the modified terms is recognised at fair value.

On derecognition of a financial liability, the difference between the carrying amount extinguished and the consideration paid (including any non-cash assets transferred or liabilities assumed) is recognised in profit or loss.

Derivative financial instruments

Derivatives are initially measured at fair value. Subsequent to initial recognition, derivatives are measured at fair value, and changes therein are generally recognised in profit or loss.

Fair value measurements

The Group measures some of its assets and liabilities at fair value on either a recurring or non-recurring basis, depending on the requirements of the applicable Accounting Standard.

Fair value is the price the Group would receive to sell an asset or would have to pay to transfer a liability in an orderly (i.e. unforced) transaction between independent, knowledgeable and willing market participants at the measurement date. The carrying value of the Group's financial assets and financial liabilities approximate their fair value.

As fair value is a market-based measure, the closest equivalent observable market pricing information is used to determine fair value. Adjustments to market values may be made having regard to the characteristics of the specific asset or liability. The fair values of assets and liabilities that are not traded in an active market are determined using one or more valuation techniques. These valuation techniques maximise, to the extent possible, the use of observable market data.

To the extent possible, market information is extracted from either the principal market for the asset or liability (i.e. the market with the greatest volume and level of activity for the asset or liability) or, in the absence of such a market, the most advantageous market available to the entity at the end of the reporting period (i.e. the market that maximises the receipts from the sale of the asset or minimises the payments made to transfer the liability, after taking into account transaction costs and transport costs).

For non-financial assets, the fair value measurement also takes into account a market participant's ability to use the asset in its highest and best use or to sell it to another market participant that would use the asset in its highest and best use.

The fair value of liabilities and the entity's own equity instruments (excluding those related to share-based payment arrangements) may be valued, where there is no observable market price in relation to the transfer of such financial instruments, by reference to observable market information where such instruments are held as assets. Where this information is not available, other valuation techniques are adopted and, where significant, are detailed in the respective note to the financial statements.

AASB 13: Fair Value Measurement requires the disclosure of fair value information by level of the fair value hierarchy, which categorises fair value measurements into one of three possible levels based on the lowest level that an input that is significant to the measurement can be categorised into as follows:

Level 1 - Measurements based on quoted prices (unadjusted) in active markets for identical assets or liabilities that the entity can access at the measurement date.

Level 2 - Measurements based on inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly or indirectly.

Level 3 - Measurements based on unobservable inputs for the asset or liability.

The fair values of assets and liabilities that are not traded in an active market are determined using one or more valuation techniques. These valuation techniques maximise, to the extent possible, the use of observable market data. If all significant inputs required to measure fair value are observable, the asset or liability is included in Level 2. If one or more significant inputs are not based on observable market data, the asset or liability is included in Level 3.

The Group would change the categorisation within the fair value hierarchy only in the following circumstances:

- if a market that was previously considered active (Level 1) became inactive (Level 2 or Level 3) or vice versa; or
- if significant inputs that were previously unobservable (Level 3) became observable (Level 2) or vice versa.

When a change in the categorisation occurs, the Group recognises transfers between levels of the fair value hierarchy (i.e. transfers into and out of each level of the fair value hierarchy) on the date the event or change in circumstances occurred.

Note 16 Financial Assets at Fair Value

	31 December 2024 \$'000	31 December 2023 \$'000
Equity securities		
Investment in De Grey Mining Ltd	728,525	461,445
Investment in Yandal Resources Ltd	9,890	3,395
Investment in SensOre Ltd	-	121
Investment in Premier1 Lithium Ltd	10	-
Investment in Icen Gold Ltd	2,164	-
	740,589	464,961
Equity options		
Unlisted option in Icen Gold Ltd	1,130	-
	1,130	-
Financial assets at fair value	741,719	464,961

Recognition and measurement

The Group designated the above investments as equity securities and unlisted options at Fair Value through Other Comprehensive Income (FVOCI) because these equity securities represent investments that the Group intends to hold long term for strategic purposes.

Fair value movements continue to be recognised in equity through other comprehensive income and are not eligible for recycling through profit or loss upon realisation of the asset.

Dividends on FVOCI equity securities are recognised in profit or loss when the Group's right to receive the dividends is established.

When measuring the fair value of these assets, the Group uses observable market data as far as possible. Fair values are categorised into different levels in a fair value hierarchy based on the inputs used in the valuation techniques as follows:

- Level 1: quoted prices (unadjusted) in active markets for identical assets or liabilities.
- Level 2: inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices).
- Level 3: inputs for the asset or liability that are not based on observable market data (unobservable inputs).

The fair value of the Group's listed equity investments is recognised as a Level 1 in the fair value hierarchy, and equity options as a Level 2.

Note 17 Lease Liabilities

Lease liabilities – current
Lease liabilities – non-current

31 December 2024	31 December 2023
\$'000	\$'000
13,786	13,798
105,700	114,826
119,486	128,624

The lease liabilities relate to the gas pipeline, power facilities, mine infrastructure and equipment, and office premises.

Lease liabilities (including interest yet to be incurred) are payable as follows:

	Contractual undiscounted lease payments	
	2024	2023
	\$'000	\$'000
Less than one year	18,363	18,709
Between one and five years	65,251	66,669
More than five years	56,676	68,143
	140,290	153,521

Recognition and measurement

At the inception of a contract, the Group assesses whether a contract is, or contains, a lease. A contract is, or contains, a lease if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration, recognises a right-of-use asset and a lease liability at the lease commencement date.

The right-of-use asset is initially measured at cost and subsequently depreciated using the straight-line method from the commencement date to the earlier of the end of the useful life of the right-of-use asset or the end of the lease term.

The lease liability is initially measured at the present value of the remaining lease payments, discounted using the interest rate implicit in the lease or, if that rate cannot be readily determined, the Group's incremental borrowing rate. Generally, the Group uses the incremental borrowing rate as the discount rate.

The lease liability is measured at amortised cost using the effective interest method. It is remeasured when there is a change in future lease payments arising from a change in an index or rate, if there is a change in the Group's estimate of the amount expected to be payable under a residual value guarantee, or if the Group changes its assessment of whether it will exercise a purchase, extension or termination option.

Note 18 Contributed Equity

(a) Share capital

	31 December 2024	31 December 2023	31 December 2024	31 December 2023
	Number	Number	\$'000	\$'000
Ordinary shares	1,084,021,090	1,081,201,240	442,848	440,050
Total share capital	1,084,021,090	1,081,201,240	442,848	440,050

(b) Movements in ordinary shares during the year

	Number	\$'000
Opening balance	1,081,201,240	440,050
Dividend Reinvestment Plan	1,799,806	2,798
Performance Rights exercised	1,020,044	-
Closing balance	1,084,021,090	442,848

(c) Ordinary shares

Ordinary shares entitle the holder to participate in dividends and the proceeds on winding up of the Company in proportion to the number of and amounts paid on the shares held.

On a show of hands every holder of ordinary shares present at a meeting in person or by proxy, is entitled to one vote, and upon a poll each share is entitled to one vote. Ordinary shares have no par value and the Company does not have a limited amount of authorised capital. The Company's shares are limited whereby the liability of its members is limited to the amount (if any) unpaid on the shares respectively held by them.

(d) Performance Rights

Information relating to the Plan, including details of Performance Rights issued, exercised and lapsed during the year and Performance Rights outstanding at the end of the financial year, is set out in Note 26.

Recognition and measurement

Ordinary shares are classified as equity. Incremental costs directly attributable to the issue of new shares are shown in equity as a deduction, net of tax, from the proceeds.

Note 19 Reserves and Retained Earnings

(a) Equity remuneration reserve

	31 December 2024	31 December 2023
	\$'000	\$'000
Opening balance	2,107	5,724
Transfer to retained earnings	(2,227)	(4,041)
Net movements in Performance Rights	1,891	1,451
Tax effect on Share-Based payments	2	(1,027)
Closing balance	1,773	2,107

Nature and purpose of Equity Remuneration Reserves

The equity remuneration reserve is used to recognise the cumulative expense recognised in respect of Performance Rights granted. Refer to Note 26 for further information.

(b) Fair value reserve

	31 December 2024	31 December 2023
	\$'000	\$'000
Opening balance	68,604	67,215
Changes in fair value of financial assets	220,829	2,994
Income tax on other comprehensive income	(66,249)	(898)
Transfer to retained earnings	-	(707)
Closing balance	223,184	68,604

Nature and purpose of Fair Value Reserve

The fair value reserve is used to recognise the cumulative change in fair value of investments measured at fair value through other comprehensive income.

(c) Gain on acquisition reserve

	31 December 2024	31 December 2023
	\$'000	\$'000
Opening balance	46,376	41,843
Derecognition of deferred tax following disposal of acquired assets	(26)	4,533
Closing balance	46,350	46,376

Nature and purpose of Gain on Acquisition Reserve

The gain on acquisition reserve represents the increase in deferred tax asset resulting from the fair value uplift for tax purposes relating to the tax consolidation of DGO.

(d) Retained earnings

	31 December 2024	31 December 2023
	\$'000	\$'000
Opening balance	385,308	282,872
Profit for the year	142,697	115,715
Dividends paid	(16,238)	(18,330)
Transfer from equity remuneration reserve	2,227	4,041
Transfer from fair value reserve	-	707
Tax effect on disposal of assets valued through other comprehensive income	-	303
Closing balance	513,994	385,308

Note 20 Dividends

(a) Dividends paid during the year on ordinary shares (fully franked at 30%)

	31 December 2024	31 December 2023
	\$'000	\$'000
2022 final dividend: \$0.005	-	5,389
2023 interim dividend: \$0.012	-	12,941
2023 final dividend: \$0.010	10,821	-
2024 interim dividend: \$0.005	5,417	-
Total dividends paid	16,238	18,330

(b) Dividends paid

	31 December 2024	31 December 2023
	\$'000	\$'000
Dividends paid in cash	13,440	15,529
Dividend Reinvestment Plan – satisfied by issue of shares	2,798	2,801
Total dividends paid	16,238	18,330

Subsequent to 31 December 2024, the Directors determined to pay a dividend of 1.5 cent per fully paid ordinary share fully franked for an amount of \$16.3 million. The aggregate amount of the proposed dividend is expected to be paid on 31 March 2025 out of retained earnings at 31 December 2024 and has not been recognised as a liability at the end of the year.

Franking credits available to shareholders of Gold Road for subsequent financial years at 31 December 2024 are \$149,571,872 (31 December 2023: \$97,811,186), which are available for distribution in subsequent financial years subject to the Board determining to pay dividends.

Dividend Reinvestment Plan

The Dividend Reinvestment Plan (DRP) permits eligible shareholders to elect to re-invest part or all of their dividend into Gold Road shares. The DRP allows a discount to be applied to shares issued under the DRP, at the discretion of the Company. A 1.5% discount to the 10 day volume weighted average price was applied to allotments for the interim dividend announced on 26 August 2024. No brokerage, commission or other transaction costs are payable by eligible shareholders on shares acquired under the DRP.

Other Information

Note 21 Income Tax, Current Tax Liabilities and Deferred Tax

(a) Income tax expense

	31 December 2024	31 December 2023
	\$'000	\$'000

Set off of deferred tax assets	(60,578)	(77,219)
Net deferred tax assets	-	-

Tax Consolidation

Effective 1 January 2017, the Company made an election to form a tax consolidated group, comprising all of its wholly owned subsidiaries. As a consequence, all members of the tax-consolidated group are taxed as a single entity. The head entity within the tax-consolidated group is Gold Road Resources Limited.

Recognition and measurement

(i) Income tax

The income tax expense or benefit for the year is the tax payable or receivable on the current period's taxable income based on the national income tax rate for each jurisdiction adjusted by changes in deferred tax assets and liabilities attributable to the temporary differences between the tax bases of assets and liabilities and their carrying amounts in the financial statements, and to unused tax losses.

(ii) Deferred tax

Deferred tax assets and liabilities are recognised for temporary timing differences at the tax rates expected to apply when the assets are recovered or liabilities are settled, based on those tax rates which are enacted or substantially enacted for each jurisdiction. The relevant tax rates are applied to the cumulative amounts of deductible and taxable temporary differences to measure the deferred tax asset or liability. An exception is made for certain temporary differences arising from the initial recognition of an asset or a liability. No deferred tax asset or liability is recognised in relation to those timing differences if they arose in a transaction, other than a business combination, that at the time of the transaction did not affect either accounting profit or taxable profit or loss.

Deferred tax assets are recognised for deductible temporary differences and unused tax losses only if it is probable that future taxable amounts will be available to utilise those temporary differences and losses.

Deferred tax liabilities and assets are not recognised for temporary differences between the carrying amount and tax bases of investments in controlled entities where the parent is able to control the timing of the reversal of the temporary differences and it is probable that the differences will not reverse in the foreseeable future.

Deferred tax assets and liabilities are offset when there is a legally enforceable right to offset current tax assets and liabilities and when the deferred tax balances relate to the same taxation authority. Current tax assets and liabilities are offset where the entity has a legally enforceable right to offset and intends either to settle on a net basis, or to realise the asset and settle the liability simultaneously.

Current and deferred tax balances attributable to amounts recognised directly in equity are also recognised directly in equity.

Critical accounting estimates and judgements

The Group is subject to income taxes in Australia. Significant judgement is required in determining the provision for income taxes. There are certain transactions and calculations undertaken during the ordinary course of business for which the ultimate tax determination is uncertain. The Group estimates its tax liabilities based on the Group's understanding of the tax law. Where the final tax outcome of these matters is different from the amounts that were initially recorded, such differences will impact the current and deferred income tax assets and liabilities in the period in which such determination is made.

Judgement is required to determine whether deferred tax assets are recognised in the balance sheet. Deferred tax assets, including those arising from unutilised tax losses, require management to assess the likelihood that the group will generate sufficient taxable earnings in the future periods in order to recognise and utilise those deferred tax assets. Judgement is also required in respect of the expected manner of recovery of the value of an asset or liability (which will then impact the quantum of the deferred tax assets or deferred tax liabilities recognised) and the application of existing laws in each jurisdiction. The presumption of the expected manner of recovery of certain deferred tax assets of \$46.4 million for equity investments held at fair value (including those at FVOCI) is through sale.

Estimates of future taxable income are based on forecast cash flows from operations and existing tax laws in each jurisdiction. These assessments require the use of estimates and assumptions such as exchange rates, commodity prices and operating performance over the life of the assets. To the extent that cash flows and taxable income differ significantly from estimates, the ability of the group to realise the net deferred tax assets reported at the reporting date could be impacted.

Additionally, future changes in tax laws could limit the ability of the group to obtain tax deductions and recover/utilise deferred tax assets in future periods. As at 31 December 2024, the ability of the Gold Road tax group to access and utilise carried forward tax losses has been assessed as probable.

Note 22 Interests in Other Entities

(a) Subsidiaries

The Group's subsidiaries at 31 December 2024 are set out below. The Consolidated Financial Statements incorporate the assets, liabilities and results of the following principal subsidiaries:

Name	Principal place of business	Ownership interest	
		31 December 2024	31 December 2023
		%	%
Gold Road (Gruyere) Pty Ltd	Australia	100	100
Gold Road (Gruyere Holdings) Pty Ltd	Australia	100	100
Gold Road (North Yamarna) Pty Ltd	Australia	100	100
Gold Road (North Yamarna Holdings) Pty Ltd	Australia	100	100
Gold Road (South Yamarna) Pty Ltd	Australia	100	100
Gold Road (South Yamarna Holdings) Pty Ltd	Australia	100	100
Gold Road (Projects) Pty Ltd	Australia	100	100
Gold Road (Exploration Holdings) Pty Ltd	Australia	100	100 ¹
Gold Alpha Investments Pty Ltd	Australia	100	100

Abarta Resources Limited	Australia	100	100 ²
Abarta Laverton Pty Ltd	Australia	100	100 ²
Opaleye Minerals Pty Ltd	Australia	100	100 ²
Vampyr Resources Pty Ltd	Australia	100	100 ²

¹ Gold Road (Exploration Holdings) Pty Ltd was incorporated on 6 July 2023

² Acquisition of Abarta Resources Ltd, Abarta Laverton Pty Ltd, Opaleye Minerals Pty Ltd and Vampyr Resources Pty Ltd had an acquisition date for accounting purposes of 29 November 2023. Refer Note 27

The above subsidiaries have share capital consisting solely of ordinary shares that are held directly by the Group, and the proportion of ownership interests held equals the voting rights held by the Group. The country of incorporation or registration is also their principal place of business.

(b) Joint operations

Name	Principal activity	Principal place of business	Ownership interest	
			31 December 2024	31 December 2023
			%	%
Gruyere Unincorporated Joint Venture	Exploration & Production	Australia	50	50

Gruyere Joint Operation

On 13 December 2016, the Company entered into the Gruyere JV with a wholly owned subsidiary of Gold Fields with the objective of developing and operating the Gruyere Project in Western Australia. The joint venture is a contractual arrangement between participants for the sharing of costs and outputs. It does not in itself generate revenue and profit and is not structured through a separate vehicle. Management have classified the arrangement as a joint operation and the Group recognises its direct right to the jointly held assets, liabilities, revenues and expenses. Gold Fields, as the joint venture manager, oversees all exploration activities.

Recognition and measurement

(a) Basis of consolidation

The financial statements incorporate all of the assets, liabilities and results of the parent and all of the subsidiaries. Subsidiaries are entities the parent controls. The parent controls an entity when it is exposed to, or has rights to, variable returns from its involvement with the entity and has the ability to affect those returns through its power over the entity.

The assets, liabilities and results of all subsidiaries are fully consolidated into the financial statements of the Group from the date on which control is obtained by the Group. The consolidation of a subsidiary is discontinued from the date that control ceases. Intercompany transactions, balances and unrealised gains or losses on transactions between Group entities are fully eliminated on consolidation.

(b) Joint arrangements

Under AASB 11: Joint Arrangements investments in joint arrangements are classified as either joint operations or joint ventures. The classification depends on the contractual rights and obligations of each investor, rather than the legal structure of the joint arrangement. A joint operation is a joint arrangement in which the parties with joint control have rights to the assets and obligations for the liabilities relating to that arrangement.

(c) Joint operations

The Group recognises its direct right to the assets, liabilities, revenues and expenses of joint operations and its share of any jointly held or incurred assets, liabilities, revenues and expenses. These have been incorporated in the financial statements under the appropriate headings.

Note 23 Deed of Cross Guarantee

Pursuant to ASIC Instrument 2016/785, wholly owned controlled entities Gold Road (Gruyere Holdings) Pty Ltd and Gold Road (Gruyere) Pty Ltd are relieved from the *Corporations Act 2001* requirements for preparation, audit and lodgement of its financial reports and director's report.

It is a condition of the Class Order that the Company and each of its eligible controlled entities enter into a Deed of Cross Guarantee. Effective from 12 December 2019, Gold Road Resources Limited, Gold Road (Gruyere Holdings) Pty Ltd and Gold Road (Gruyere) Pty Ltd entered into a Deed of Cross Guarantee and formed the Closed group.

The effect of the Deed is that Gold Road Resources Limited has guaranteed to pay any deficiency in the event of winding up of the abovementioned controlled entities under certain provisions of the *Corporations Act 2001*. Gold Road (Gruyere Holdings) Pty Ltd and Gold Road (Gruyere) Pty Ltd have also given a similar guarantee in the event that Gold Road Resources Limited is wound up.

A Consolidated Statement of Comprehensive Income and Consolidated Balance Sheet comprising the Closed group which are parties to the Deed of Cross Guarantee, after eliminating all transactions between parties to the Deed is set out below.

Closed Group Statement of Comprehensive Income

For the year ended 31 December 2024

	12 months ended 31 December 2024 \$'000	12 months ended 31 December 2023 \$'000

Total equity	780,246	812,377

(d) Guarantees entered into by the parent entity
Refer to Note 30.

(e) Contingent liabilities of the parent entity
Other than as disclosed in Note 30, the parent entity has no contingent liabilities as at 31 December 2024.

(f) Contractual commitments for the acquisition of property, plant or equipment
The parent entity has no contractual commitments for the acquisition of property, plant or equipment as at 31 December 2024.

Note 25 Related Party Transactions

(a) Parent entities

The ultimate parent entity within the Group is Gold Road Resources Limited.

(b) Subsidiaries

Interests in subsidiaries are set out in Note 22.

(c) Compensation for Key Management Personnel

	12 months ended 31 December 2024	12 months ended 31 December 2023
	\$	\$
Short-term employee benefits	2,051,733	1,756,784
Long-term employee benefits	25,567	16,474
Post-employment benefits	127,692	113,729
Share-based payments	927,727	566,130
Total compensation	3,132,719	2,453,117

Detailed remuneration disclosures are provided in the Remuneration Report on pages 9 to 25.

(d) Outstanding balances

The following balances are outstanding at the end of the reporting period in relation to transactions with related parties:

	31 December 2024	31 December 2023
	\$	\$
Current receivables		
Other receivables – Gruyere Management Pty Ltd	74,778	14,326
Current payables		
Other payables – Gruyere Management Pty Ltd	98,655	194,947

Other current receivables and the current payables have no formal repayment terms. Each party's obligations are secured over the assets in the Gruyere Project.

(e) Loans made to related parties

No loans were made to related parties, Directors or any other senior personnel, including personally related entities during the reporting period.

(f) Terms and conditions

All related party transactions were made on normal commercial terms and conditions and at market rates.

There is no allowance account for impaired receivables in relation to any outstanding balances, and no expense has been recognised in respect of impaired receivables due from related parties.

Note 26 Share-Based Payments

(a) Expenses arising from share-based payment transactions

Total expenses arising from share-based payment transactions recognised during the year were as follows:

	12 months ended 31 December 2024 \$'000	12 months ended 31 December 2023 \$'000
Expenses arising from equity settled share-based payment transactions	1,891	1,451

(b) Types of share-based payment plans

The Employee Incentive Plan was established and approved by shareholders at the AGM held on 18 May 2023. The 2023 Plan provides for Performance Rights as detailed below.

Performance Rights are comprised of STI, LTI and Retention rights:

- STI performance rights are granted annually on set percentages of fixed base remuneration for each eligible recipient (Executive KMP and non-KMP). The STI is assessed over a 12 month performance period and is calculated based on an assessment of performance against KPIs, for both the Company and individual performance.
- The LTIs are granted annually on set percentages of fixed base remuneration for each eligible recipient (Executive KMP and non-KMP). Each LTI is assessed over a three year performance period and is calculated based on an assessment of performance against Company focused longer term performance criteria and hurdles.

(c) Performance Rights

The following table illustrates the number of, and movements in, Performance Rights during the year.

	31 December 2024 Number	31 December 2023 Number
Outstanding at the beginning of the year	5,634,872	5,537,433
Performance Rights granted (i)	2,045,185	2,418,698
Performance Rights exercised (ii)	(1,020,044)	(1,952,167)
Lapsed/cancelled during the year	(79,447)	-
Forfeited during the year	(1,556,485)	(369,092)
Outstanding at the end of the year (iii)	5,024,081	5,634,872
Vested and exercisable at the end of the year	-	-

(i) Performance Rights granted during the year

Number of Performance Rights Granted	Incentive Plan	Fair Value at Grant Date	Grant Date	Performance Period End Date ¹

1,358,363	LTI 2024-2026	12 June 2024	31 December 2026
419,016 ⁴	LTI 2024-2026	12 June 2024	31 December 2026
5,024,081	Total Performance Rights outstanding		

¹ Subsequent to the end of the performance period end date, the Board determines the number of Performance Rights that vest

² Represents Performance Rights issued to Executive Director. The key vesting conditions and performance conditions are that the holder must remain employed until 31 December 2024. Of these Performance Rights, 26% will vest and convert over a three year measurement period to 31 December 2024 based on meeting market based performance criteria (which includes provision for a stretch of 125% of the 30% market based metric resulting in a stretch weighting of 18%), 74% will vest on meeting non-market performance conditions by 31 December 2024 (which includes provision for a stretch of 200% of the 25% Growth metric resulting in a stretch weighting of 59%, and provision for stretch of 140% of the 25% Gruyere optimisation metric resulting in a stretch weighting of 24%)

³ Represents Performance Rights issued to Executive Director. The key vesting conditions and performance conditions are that the holder must remain employed until 31 December 2025. Of these Performance Rights, 46% will vest and convert over a three year measurement period to 31 December 2025 based on meeting market based performance criteria (which includes provision for a stretch of 100% of the 60% market based metric resulting in a stretch weighting of 46%), 54% will vest on meeting non-market performance conditions by 31 December 2025 (which includes provision for a stretch of 200% of the 30% Growth metric resulting in a stretch weighting of 46%, and provision for stretch of 100% of the 10% EPS Growth metric resulting in a stretch weighting of 8%)

⁴ Represents Performance Rights issued to Executive Director. The key vesting conditions and performance conditions are that the holder must remain employed until 31 December 2026. Of these Performance Rights, 46% will vest and convert over a three year measurement period to 31 December 2026 based on meeting market based performance criteria (which includes provision for a stretch of 100% of the 60% market based metric resulting in a stretch weighting of 46%), 54% will vest on meeting non-market performance conditions by 31 December 2026 (which includes provision for a stretch of 200% of the 30% Growth metric resulting in a stretch weighting of 46%, and provision for stretch of 100% of the 10% EPS Growth metric resulting in a stretch weighting of 8%)

(iv) Weighted average remaining contractual life

The weighted average remaining contractual life for the Performance Rights outstanding as at 31 December 2024 is 1.55 years (31 December 2023: 1.04 years).

(v) Weighted average fair value

The weighted average fair value of the Performance Rights granted during the year was 116.79 cents.

(vi) Fair value of Performance Rights granted

The fair value of Performance Rights allocated as part of the STIs are valued by multiplying the underlying market value at grant date of the ordinary shares over which they are granted. The fair value of Performance Rights allocated as part of the LTIs are valued using a Monte Carlo simulation for rights with market based vesting conditions and Black-Scholes pricing model for rights with non-market based vesting conditions.

The following table lists the inputs to the models used for Performance Rights granted as LTIs during the year ended 31 December 2024:

	Tranche A/D ¹	Tranche B ²	Tranche C ²
Underlying share price at measurement date	\$1.570	\$1.570	\$1.570
Exercise price	Nil	Nil	Nil
Grant date	12 June 2024	12 June 2024	12 June 2024
Life of the Rights (years)	3.00	3.00	3.00
Vesting period (years)	2.55	2.55	2.55
Volatility	45%	45%	45%
Risk-free rate	3.941%	3.941%	3.941%
Dividend yield	1.00%	1.00%	1.00%
Valuation per Right	\$1.531	\$0.544	\$0.708

¹ Performance Rights granted subject to non-market based performance conditions had their values verified using a Black-Scholes pricing model

² Performance Rights granted subject to market based performance conditions of ATSR and RTSR had their values verified using a Monte Carlo simulation

The expected price volatility is based on the historic volatility (based on the remaining life of the Performance Right), adjusted for any expected changes to future volatility due to publicly available information.

Recognition and measurement

Share-based compensation payments are made available to Executive KMP and non-KMP.

The fair value of Share Options at grant date is determined using a Black-Scholes pricing model that takes into account the exercise price, the term of the instrument, the share price at grant date and expected price volatility of the underlying share, the expected dividend yield and the risk-free rate for the term of the instrument.

The fair value of Performance Rights allocated as part of the STIs are valued by multiplying the underlying market value at grant date of the ordinary shares over which they are granted. The fair value of Performance Rights allocated as part of the LTIs are valued using a Monte Carlo simulation for rights with market based vesting conditions and Black-Scholes pricing model for rights with non-market based vesting conditions.

The grant date fair value of any instrument granted to employees is recognised as an employee expense, with a corresponding increase in equity, over the period that the employees become unconditionally entitled to the instrument. The amount recognised as an expense is adjusted to reflect the actual number of instruments that vest, however no adjustment is made where the rights fail to vest due to market conditions not being met.

The fair value of the instruments granted is adjusted to reflect market vesting conditions and non-vesting conditions. Non-market vesting conditions are included in assumptions about the number of instruments that are expected to become exercisable. At each reporting date, the Company revises its estimate of the number of instruments that are expected to become exercisable. The employee benefit expense recognised each period takes into account the most recent estimate.

Note 27 Acquisition of Abarta Resources Limited

On 29 November 2023, Gold Road acquired Abarta Resources Limited (**Abarta**). All consideration was in the form of Gold Road ordinary fully paid shares.

Consideration paid for Abarta	\$'000
Purchase cost (including transaction costs)	3,407
Less: Gold Road transaction cost	(229)
Cash acquired on acquisition	(2)
Shares issued as consideration	(3,078)
Payment for acquisition of assets net of cash acquired at 29 November 2023	98

The group has determined that the transaction does not constitute a business combination in accordance with AASB 3 Business Combinations. The acquisition of the net assets has therefore been accounted for, as an asset acquisition. When an asset acquisition does not constitute a business combination, the assets and liabilities are allocated a carrying amount based on their relative fair values in an asset purchase transaction.

Details of the purchase consideration and the net assets acquired are as follows:

Net assets acquired	\$'000
Cash and cash equivalents	2
Receivables and other assets	10
Exploration and evaluation	3,405
Total assets	3,417
Trade and other payables	(10)
Total liabilities	(10)
Total purchase consideration	3,407

Note 28 Remuneration of Auditors

During the year the following fees were paid or payable for services provided by the auditor of the parent entity and its related practices:

	12 months ended 31 December 2024	12 months ended 31 December 2023
	\$	\$
(a) Audit and other assurance services		
Audit and review of financial statements – Group	156,955	146,075
Audit and review of financial statements – jointly controlled entities	56,100	53,813
Other assurance services	62,500	63,200
Total remuneration of KPMG	275,555	263,088

It is the Group's policy to employ KPMG on assignments additional to their statutory audit duties where their expertise and experience with the group are important.

Note 29 New Standards and Interpretations

The Group has adopted all of the new and revised *Standards and Interpretations* issued by the AASB that are relevant to its operations and effective for an accounting period that begins on or after 1 January 2024.

Certain new accounting standards and interpretations have been published that are not mandatory for 31 December 2024 report periods and have not been early adopted by the Group. These accounting standards and interpretations are detailed below. The Group has assessed that these new standards and interpretations will not have a material impact on the financial measurement, reporting, nor disclosures of the Group's financial report.

Effective date	New accounting standards or amendments
1 January 2025	Lack of Exchangeability – Amendments to IAS 21 Sale or Contribution of Assets between an Investor and its Associate or Joint Venture – Amendments to IFRS 10 and IAS 28
1 January 2026	Classification and Measurement of Financial Instruments – Amendments to IFRS 9 and IFRS 7 Annual Improvements to IFRS Accounting Standards – Volume 11
1 January 2027	IFRS 18 Presentation and Disclosure in Financial Statements IFRS 19 Subsidiaries without Public Accountability: Disclosures

Unrecognised Items

Note 30 Contingencies

Contingent liabilities

Guarantees

The Company has provided bank guarantees in favour of various service providers in respect to contractual obligations and leased premises at 31 December 2024. The total of these guarantees at 31 December 2024 was \$123,422 with various financial institutions (31 December 2023: \$158,353).

The Group also has guarantees in relation to its joint venture commitments in favour of various service providers with respect to the supply of electricity and development of associated infrastructure for the joint venture. The Group's portion of these commitments at 31 December 2024 was \$18.75 million with various financial institutions (31 December 2023: \$18.75 million).

There were no other material contingent liabilities noted or provided for in the financial statements of the Group as at 31 December 2024.

Note 31 Commitments

(a) Exploration expenditure commitments

In order to maintain current rights of tenure to exploration tenements the Group has certain obligations to perform minimum exploration work on mineral leases held. These obligations may vary over time, depending on the Group's exploration programs and priorities. These obligations are not provided for in the financial report and are payable:

	31 December 2024	31 December 2023
	\$'000	\$'000
Within one year	10,942	9,079
	10,942	9,079

(b) Commitments by joint venture operation

The joint venture has various contracts for services such as gas transportation, open pit mining services, road maintenance service and supply of gas. The Group's portion of these commitments are not provided for in the financial report and are payable:

	31 December 2024	31 December 2023
	\$'000	\$'000
Within one year	31,841	28,138
Later than one year but not later than five years	71,373	59,739
Later than five years	55,320	71,592
	158,534	159,469

(c) Icení Farm-In Agreement

During the year, the Company entered into a farm-in agreement and a placement agreement and a placement agreement with Icení Gold Limited. The farm-in agreement covers the Guyer Gold Trend within the 14 Mile Well Project in Western Australia. Under the terms of the farm-in agreement, the Company has committed to an initial \$5m million minimum expenditure.

	31 December 2024	31 December 2023
	\$'000	\$'000
Within one year	5,000	-
	5,000	-

Note 32 Significant Events after the Balance Date

Subsequent to the end of the financial year, on 20 February 2025, the Directors determined to pay a dividend of 1.5 cent per fully paid ordinary share, fully franked for an amount of \$16.3 million. The aggregate amount of the proposed dividend is expected to be paid on 31 March 2025 out of retained earnings at 31 December 2024 and has not been recognised as a liability at the end of the year.

Other than as noted above, there has not arisen in the interval between the end of the year and the date of this report any other item, transaction or event of a material and unusual nature likely, in the opinion of the Directors of the Company, to affect substantially the operations of the Group, the results of those operations or the state of affairs of the Group in subsequent financial years.

CONSOLIDATED ENTITY DISCLOSURE STATEMENT

As at 31 December 2024

The Consolidated Entity Disclosure Statement has been prepared in accordance with the *Corporations Act 2001* and includes required information for each entity that was part of the consolidated entity as at the end of the financial year.

The following list contains details of each entity within the company's consolidated group:

Name	Entity type	Country of incorporation	% of share capital held	Country of tax residence

Directors' Declaration

In the opinion of the Directors of Gold Road Resources Limited:

- (a) The Consolidated Financial Statements and Notes that are set out on pages 28 to 61 and the Remuneration Report on pages 9 to 25 in the Directors' Report, are in accordance with the Corporations Act 2001, including:
 - (i) giving a true and fair view of the Group's financial position as at 31 December 2024 and of its performance, for the financial year ended on that date; and
 - (ii) complying with Australian Accounting Standards and the Corporations Regulations 2001.
- (b) The Consolidated Entity Disclosure Statement as at 31 December 2024 set out on page 62 is true and correct.
- (c) There are reasonable grounds to believe that the Company will be able to pay its debts as and when they become due and payable.
- (d) At the date of this declaration, there are reasonable grounds to believe that the members of the extended closed group identified in Note 23 will be able to meet any obligations or liabilities to which they are, or may become, subject by virtue of the deed of cross guarantee described in Note 23.
- (e) The Directors have been given the declarations required by Section 295A of the Corporations Act 2001 from the Managing Director and CEO, and CFO for the year ended 31 December 2024.
- (f) The Directors draw attention to Note 2 to the Consolidated Financial Statements, which includes a statement of compliance with International Financial Reporting Standards.

Signed in accordance with a resolution of the Directors, on behalf of the Board.

Signed at Perth this 20th day of February 2025

Tim Netscher
Non-executive Chairman

Independent Auditor's Report

To the shareholders of Gold Road Resources Limited

Report on the audit of the Financial Report

Opinion

We have audited the **Financial Report** of Gold Road Resources Limited (the Company).

In our opinion, the accompanying Financial Report of the Company gives a true and fair view, including of the **Group's** financial position as at 31 December 2024 and of its financial performance for the year then ended, in accordance with the *Corporations Act 2001*, in compliance with *Australian Accounting Standards* and the *Corporations Regulations 2001*.

The **Financial Report** comprises:

- Consolidated statement of financial position as at 31 December 2024
- Consolidated statement of profit or loss and other comprehensive income, Consolidated statement of changes in equity, and Consolidated statement of cash flows for the year then ended
- Consolidated entity disclosure statement and accompanying basis of preparation as at 31 December 2024
- Notes, including material accounting policies
- Directors' Declaration.

The **Group** consists of the Company and the entities it controlled at the year-end or from time to time during the financial year.

Basis for opinion

We conducted our audit in accordance with *Australian Auditing Standards*. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Our responsibilities under those standards are further described in the *Auditor's responsibilities for the audit of the Financial Report* section of our report.

We are independent of the Group in accordance with the *Corporations Act 2001* and the ethical requirements of the *Accounting Professional and Ethical Standards Board's APES 110 Code of Ethics for Professional Accountants (including Independence Standards)* (the Code) that are relevant to our audit of the Financial Report in Australia. We have fulfilled our other ethical responsibilities in accordance with these requirements.

Key Audit Matters

Key Audit Matters are those matters that, in our professional judgement, were of most significance in our audit of the Financial Report of the current period.

This matter was addressed in the context of our audit of the Financial Report as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on this matters.

Revenue Recognition - \$527,960 thousand

Refer to Note 4(a) to the Financial Report

The key audit matter

The Group generates revenue from the sale of gold.

Revenue recognition is considered to be a key audit matter given the significance of revenue to the Group's results as well as the audit effort required to evaluate whether the gold sales revenue recognised before and after balance date is in compliance with the Group's revenue recognition policy and the requirements of the applicable accounting standard.

How the matter was addressed in our audit

Our procedures included:

- Assessing the Group's accounting policies for recognition of revenue against the requirements of the accounting standards and consistency of disclosure in the financial report.
- Understanding the Group's processes for recognition of revenue and testing the design and implementation of key controls, including the month end metals account register reconciliation.
- Testing gold revenue transactions recorded by the Group during the year to the amount per the sales invoice issued by the customer.
- Assessing a sample of gold revenue transactions recorded by the Group before and after balance date. For each sample selected we:
 - Checked the amount of revenue recorded by the Group to the amount per sales invoice issued by the customer.
 - Checked the date the revenue was recognised to the customer contract, assessing the date at which control of the gold was delivered and accepted by the customer.

Other Information

Other Information is financial and non-financial information in Gold Road Resources Limited's annual report which is provided in addition to the Financial Report and the Auditor's Report. The Directors are responsible for the Other Information.

The Other Information we obtained prior to the date of this Auditor's Report was the Directors' Report, ASX Announcements 2024, Shareholder Information, and Corporate Directory. The Chairman's Letter, Managing Director's Report, Governance, Review of Operations, and Mineral Resource and Ore Reserve are expected to be made available to us after the date of the Auditor's Report.

Our opinion on the Financial Report does not cover the Other Information and, accordingly, we do not and will not express an audit opinion or any form of assurance conclusion thereon, with the exception of the Remuneration Report and our related assurance opinion.

In connection with our audit of the Financial Report, our responsibility is to read the Other Information. In doing so, we consider whether the Other Information is materially inconsistent with the Financial Report or our knowledge obtained in the audit, or otherwise appears to be materially misstated.

We are required to report if we conclude that there is a material misstatement of this Other Information and based on the work we have performed on the Other Information that we obtained prior to the date of this Auditor's Report we have nothing to report.

Responsibilities of the Directors for the Financial Report

The Directors are responsible for:

- preparing the Financial Report in accordance with the *Corporations Act 2001*, including giving a true and fair view of the financial position and performance of the Group, and in compliance with *Australian Accounting Standards* and the *Corporations Regulations 2001*
- implementing necessary internal control to enable the preparation of a Financial Report in accordance with the *Corporations Act 2001*, including giving a true and fair view of the financial position and performance of the Group, and that is free from material misstatement, whether due to fraud or error
- assessing the Group and Company's ability to continue as a going concern and whether the use of the going concern basis of accounting is appropriate. This includes disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless they either intend to liquidate the Group and Company or to cease operations or have no realistic alternative but to do so.

Auditor's responsibilities for the audit of the Financial Report

Our objective is:

- to obtain reasonable assurance about whether the Financial Report as a whole is free from material misstatement, whether due to fraud or error; and
- to issue an Auditor's Report that includes our opinion.

Reasonable assurance is a high level of assurance but is not a guarantee that an audit conducted in accordance with *Australian Auditing Standards* will always detect a material misstatement when it exists.

Misstatements can arise from fraud or error. They are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of the Financial Report.

A further description of our responsibilities for the audit of the Financial Report is located at the *Auditing and Assurance Standards Board* website at: https://www.auasb.gov.au/media/bwvjcgre/ar1_2024.pdf. This description forms part of our Auditor's Report.

Report on the Remuneration Report

Opinion

In our opinion, the Remuneration Report of Gold Road Resources Limited for the year ended 31 December 2024, complies with *Section 300A* of the *Corporations Act 2001*.

Directors' responsibilities

The Directors of the Company are responsible for the preparation and presentation of the Remuneration Report in accordance with *Section 300A* of the *Corporations Act 2001*.

Our responsibilities

We have audited the Remuneration Report included in pages 9 to 25 of the Directors' report for the year ended 31 December 2024.

Our responsibility is to express an opinion as to whether the Remuneration Report complies in all material respects with *Section 300A* of the *Corporations Act 2001*, based on our audit conducted in accordance with *Australian Auditing Standards*.
