

30 April 2025

## ACTIVITIES REPORT – MARCH QUARTER 2025

### SUMMARY OF EXPLORATION ACTIVITIES

#### RARE EARTH ELEMENTS (REE) EXPLORATION

##### *LIMESTONE COAST, SOUTH AUSTRALIA*

**Peake (EL 7015), Wilkawatt (EL 6975), Wolseley (EL 6807) and Parrakie (EL 6795)**

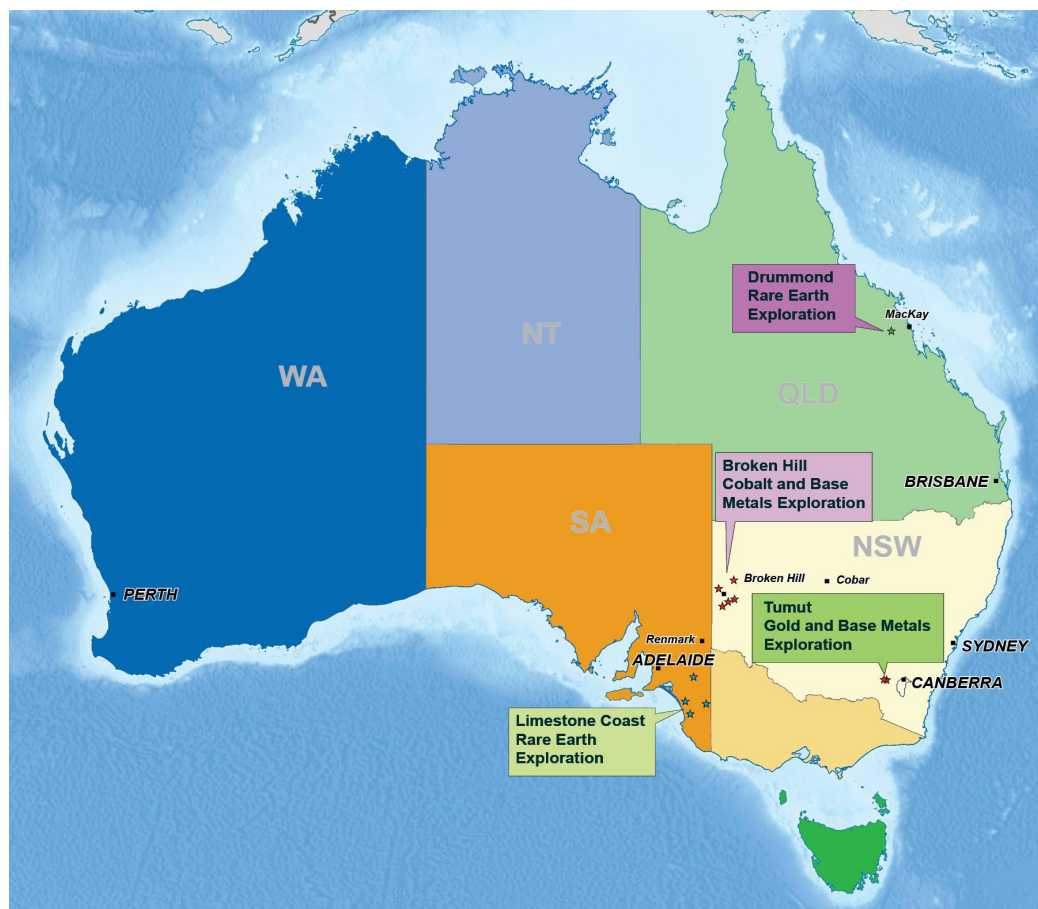

- Submission to Department of Energy and Mining for EPEPR to drill along road verges. Approval received in April 2025 and drilling program planned for May 2025.

#### COBALT, LEAD, ZINC, SILVER AND COPPER EXPLORATION

##### *BROKEN HILL, NEW SOUTH WALES*

**Enmore (EL 9220)**

- Results from pXRF scan of samples from hole 24EBRC001 indicate significant intersections of Zinc. Samples sent to laboratory for assay. Planning for drilling in June 2025 Quarter.

*Figure 1: Location of Company Exploration Projects in Australia*

For personal use only

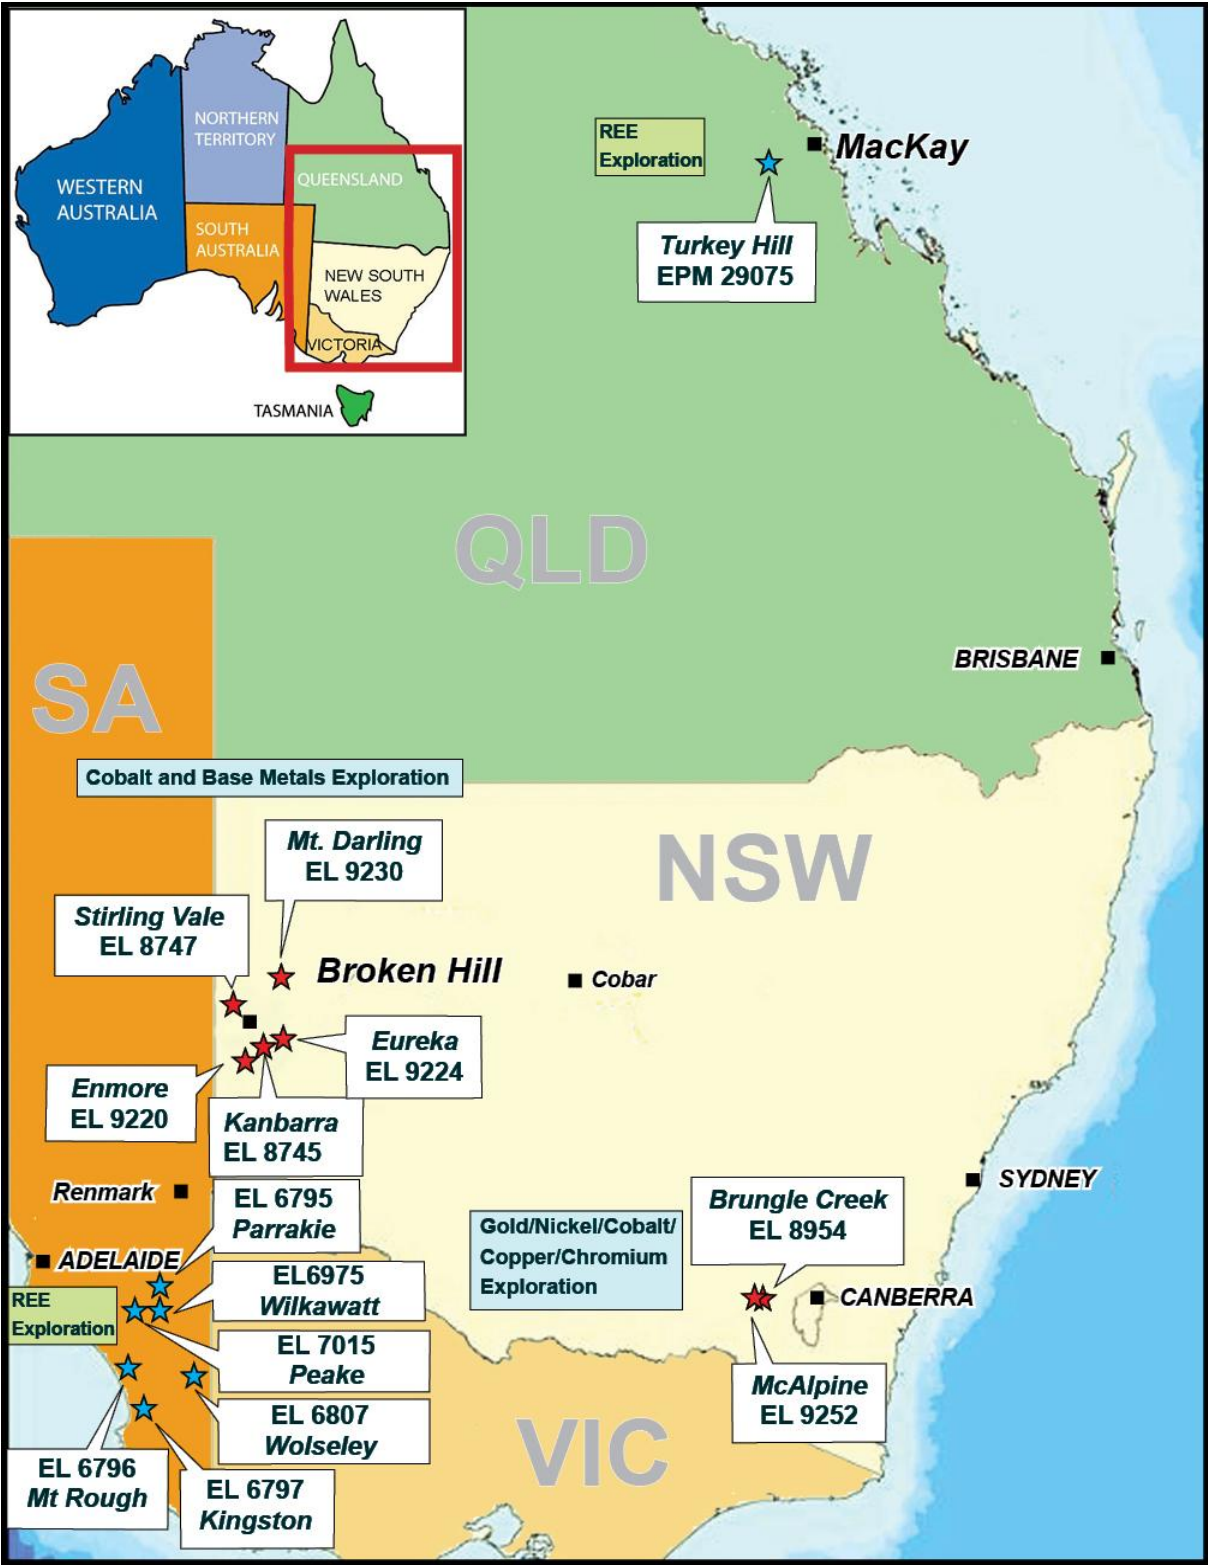

Figure 2: Location of granted licences in NSW, SA and QLD

## SOUTH AUSTRALIA

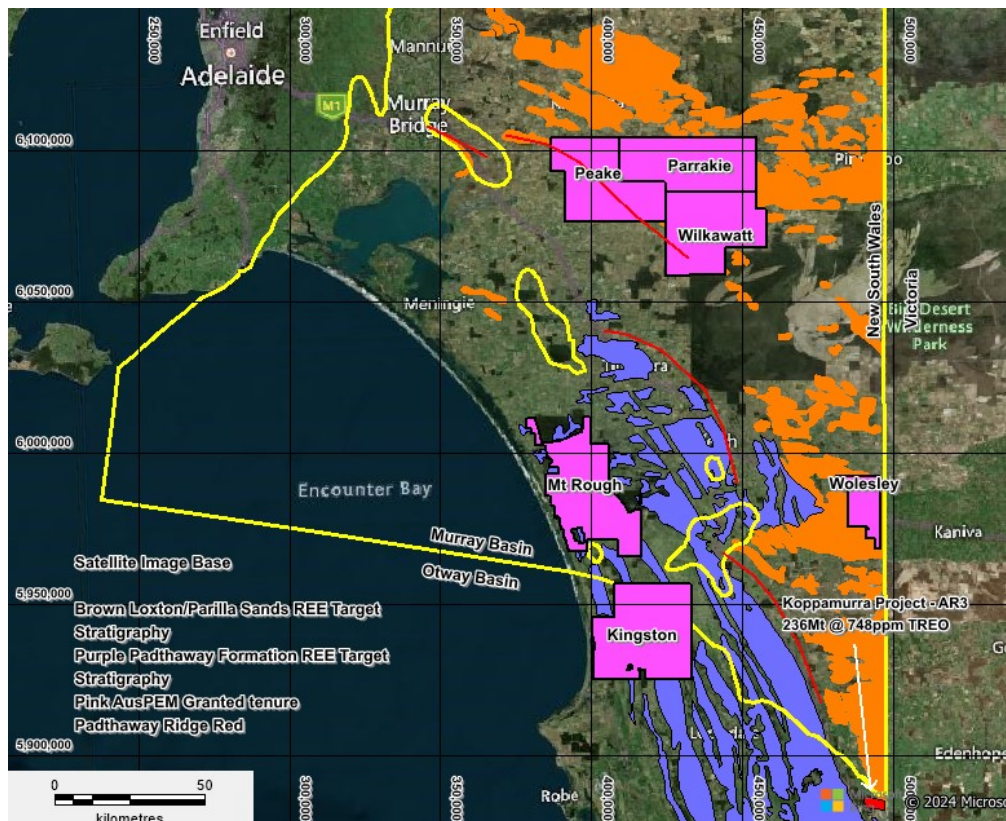

### RARE EARTH ELEMENTS (REE) EXPLORATION

*Murray and Otway Basins - 100% interest*

*Parrakie (EL 6795), Mt Rough (EL 6796), Kingston (EL 6797), Wolseley (EL 6807), Wilkawatt (EL 6975) and Peake (EL 7015)*

The 6 granted tenements cover a total area of 4,306 km<sup>2</sup> within the Murray and Otway Basins in Limestone Coast southeast of Adelaide prospective for Rare Earth Elements (“REEs”) in the Loxton/Parilla Sands (Parrakie, Wolseley, Wilkawatt and Peake) and the Padthaway Formation (Mt Rough and Kingston). Mt Rough and Kingston have been relinquished during the March 2025 quarter and the total area controlled by the Company has been reduced to 2,529 km<sup>2</sup>.

REEs mineralisation is proven in the basins with Australian Rare Earths (AR3:ASX) reporting estimated JORC 2012 resource of 236Mt @ 748 ppm Total Rare Earth Oxides (TREO) (AR3 ASX Release of 30<sup>th</sup> September 2024) and preparing for pre-preliminary feasibility study and construction of a demonstration plant to develop their resource (AR3 ASX Release of 23<sup>rd</sup> January 2025).

**Figure 3: Tenements Parrakie, Wilkawatt, Peake, Wolseley, Mt Rough, and Kingston (pink) in relation to the target REE Loxton/Parilla Sands (brown) and Padthaway Formation (purple)**

***Parrakie (EL 6795), Wolseley (EL6807), Wilkawatt (EL 6975) and Peake (EL 7015)***

In 2024 the Company completed 2 drilling programs for 100 holes along road verges within Parrakie (Figures 4 and 5). All holes intersected the target Loxton/Parilla Sands, and every drilled meter was scanned by pXRF and selected drill intervals were submitted to ALS Laboratory in Adelaide for the full REE suite using method ME-MS81.

The significant drill intersections of TREO are as follows (See ASX Announcement of 29 July 2024):

24PKAC052: 1m @ **1,253.9 ppm** TREO from 12m, in clayey sand above Gambier Limestone

24PKAC068: 1m @ **1,156.8 ppm** TREO from 17m, in clayey sand above Gambier Limestone

24PKAC094: 1m @ **1,015.2 ppm** TREO from 12m, in Karoonda Surface ferricrete above Gambier Limestone

24PKAC071: 1m @ **1,019.4 ppm** TREO from 19m, in clayey sand above Gambier Limestone

24PKAC079: 1m @ **912.6 ppm** TREO from 9m, in sand

24PKAC054: 1m @ **847.3 ppm** TREO from 19m, in clayey sand

High grade of 4,400 ppm Zr is identified in an intersection of an interval between 13 m and 14 m in hole 24PKAC061.

During the March 2025 quarter an application for additional EPEPR (exploration program for environment protection and rehabilitation) has been submitted to the Department of Energy and Mining (“DEM”) for drilling along road verges within an undrilled northwest corner of Parrakie, Wolseley, Wilkawatt and Peake. In April 2025 DEM approved the EPEPR and council approval has also been received. The drilling program is planned to commence in the first week of May 2025.

Future work program will involve:

- Compilation of all historic exploration.
- Roadside mapping of regolith and geology.
- Communication with local council(s).
- Surface shallow Aircore drilling along road verges.

***Mt Rough (EL 6796) and Kingston (EL 6797)***

In the previous quarter during the EPEPR approval process for a drilling program within Mt Rough and Kingston, the DEM has advised the presence of extensive shallow water tables within these tenements which would require challenging drilling management. After assessment of the possible adverse economic and environmental impact on future development of these 2 tenements the Company decided to relinquish them in February 2025 and to focus in the Murray Basin targeting the Loxton/Parilla Sands where the water tables lie deeper.

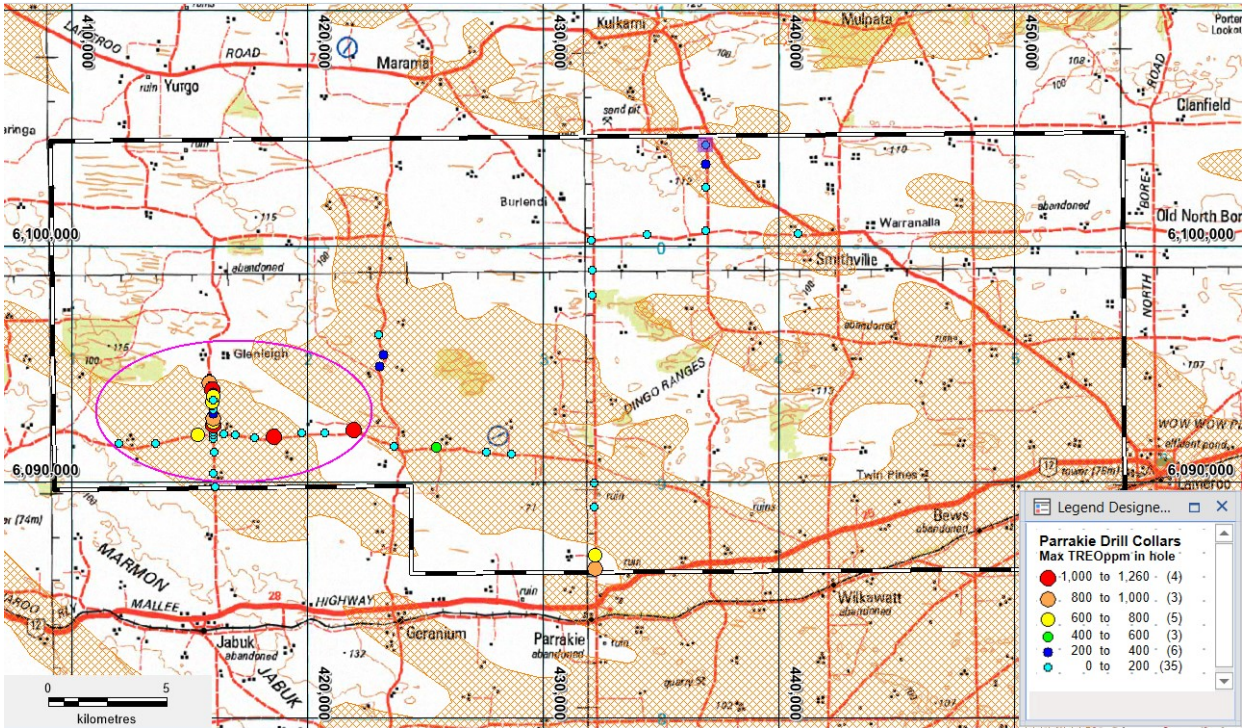

Figure 4: Completed Phase 2 Aircore Drill traverses shown in green targeting the NW corner of the Parrakie licence.

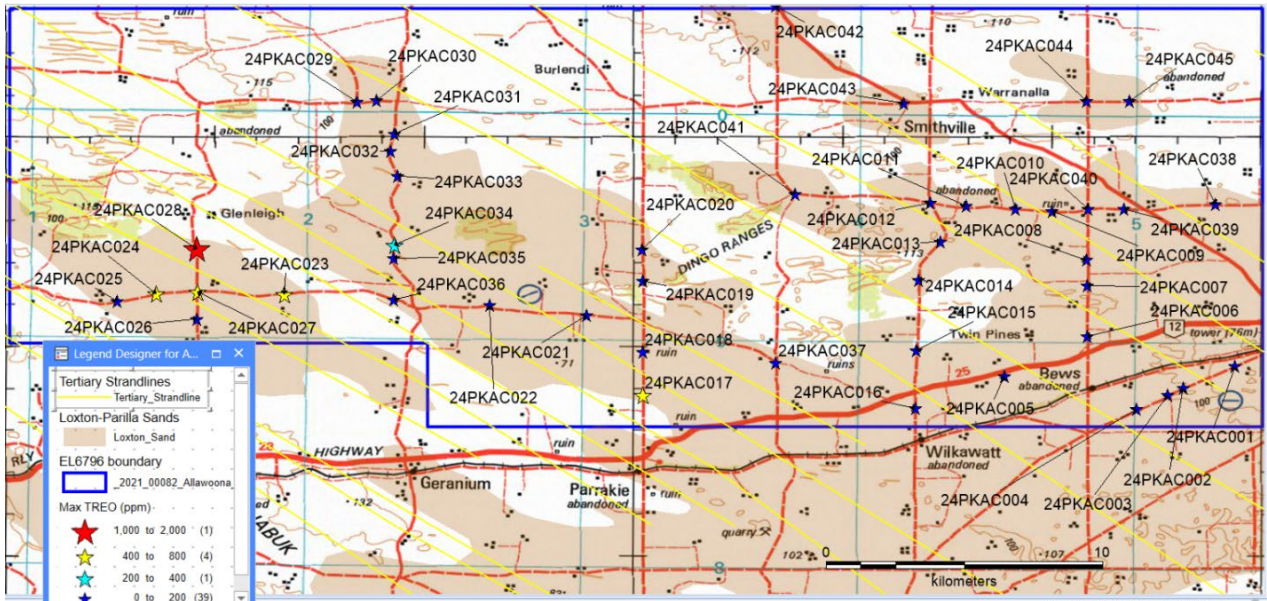

Figure 5: Initial Phase 1 Drilling Parrakie Drilling (stars) showing the broad nature of the initial drilling program within the Loxton / Parilla Sands and maximum ppm TREO in each drill hole

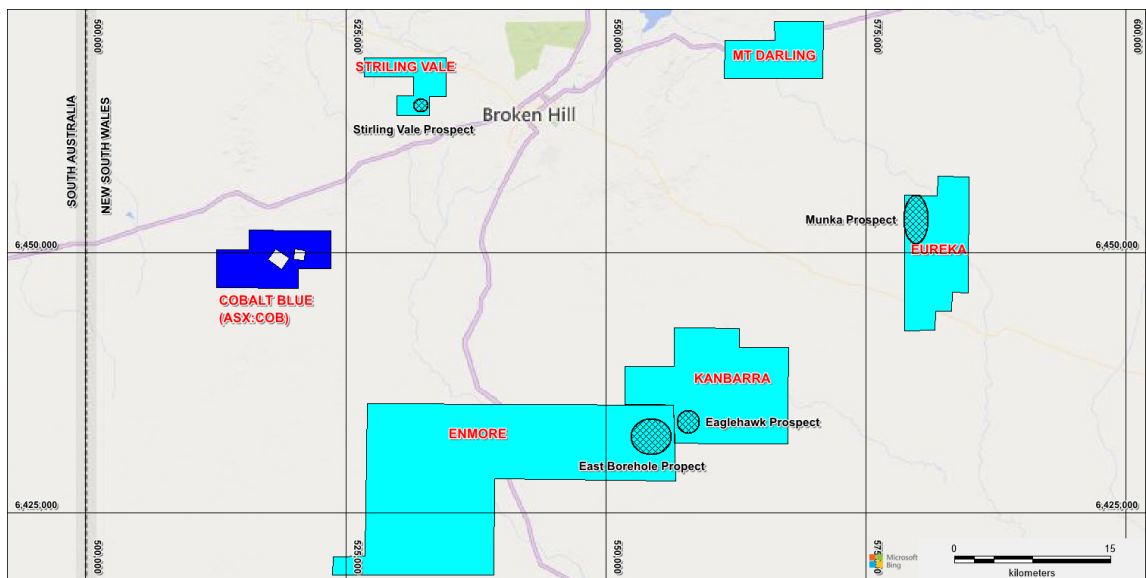

## NEW SOUTH WALES

### COBALT, COPPER, LEAD, ZINC AND SILVER EXPLORATION

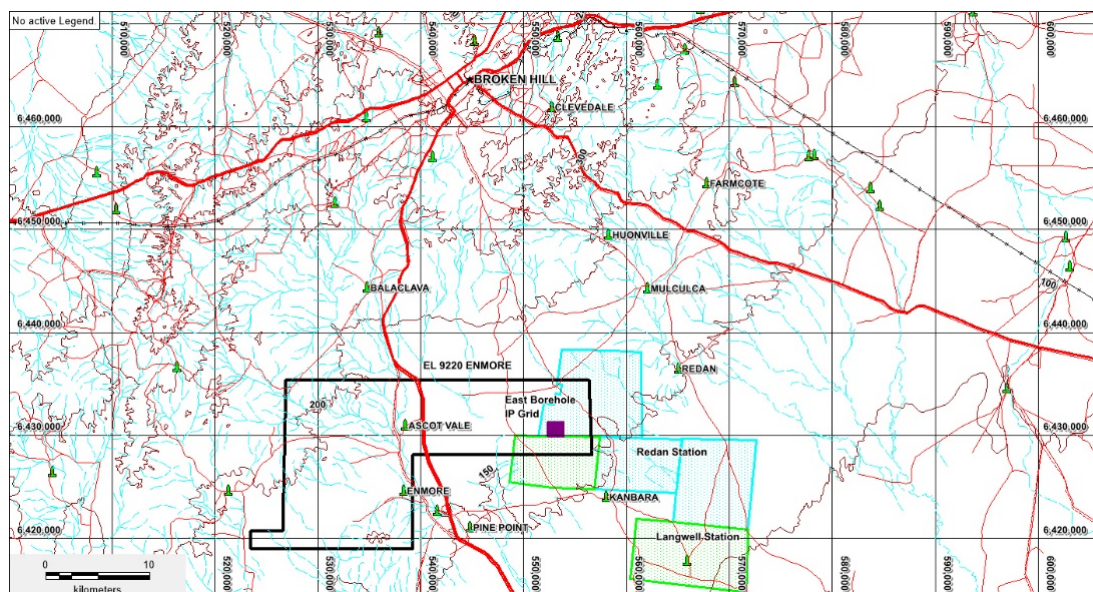

Near Broken Hill – 100% interest

**Kanbarra (EL 8745), Stirling Vale (EL 8747), Enmore (EL 9220), Eureka (EL 9224) and Mt Darling (EL 9230)**

The 5 granted licences cover an area of approximately 685 km<sup>2</sup> near Broken Hill (Figure 6) prospective for base metals resource.

**Figure 6: Location of granted tenements near Broken Hill and the key prospects for exploration**

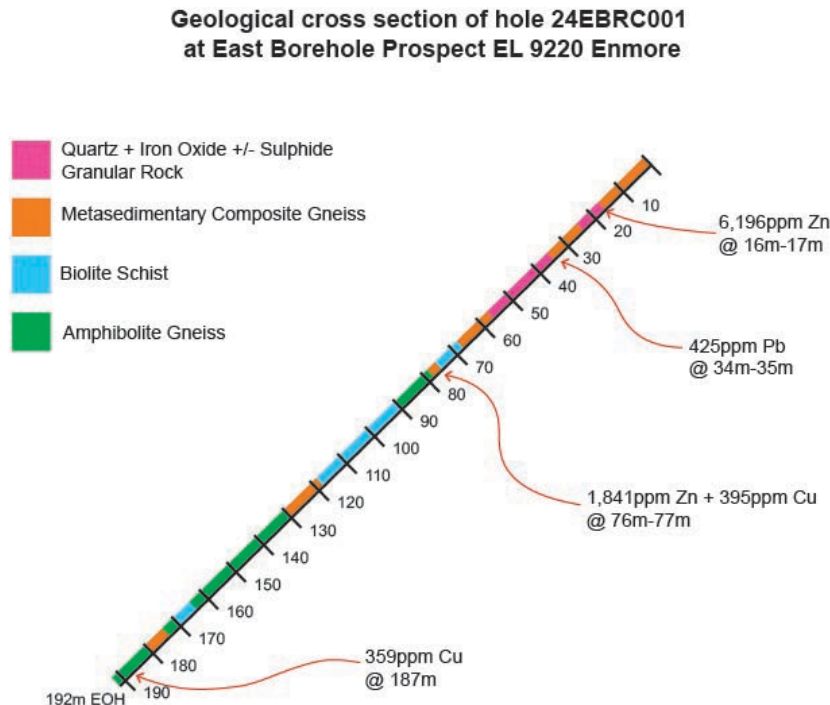

**Figure 7: East Borehole Prospect within EL 9220 Enmore southeast of Broken Hill  
Enmore (EL 9220), Eureka (EL 9224) and Mt Darling (EL 9230)**

Within the 3 tenements (**Figure 6**) the Company aims to explore for Broken Hill-type Pb-Zn-Ag, Iron Oxide Cu-Au (IOCG) and cobalt mineralisation within Palaeoproterozoic Willyama Supergroup rocks as found by Cobalt Blue.

An IP survey conducted in 2023 within Enmore EL 9220 (**Figure 7**) defined 2 main anomalies within the East Borehole Prospect at the contact of the Cues Formation and Redan Gneiss. (See the *September 2023 Quarter Activities Report released on ASX on 31 October 2023*).

To test those 2 targets a two-hole RC drilling program commenced on 29 May 2024 at the locations in Table 1. The drilling was paused after difficulties were encountered at the first hole EBRC001(EB1) at 192 m down hole and target depth of 275m could not be reached. Samples from the hole have subsequently been scanned with the Company's Vanta pXRF.

Following a review of the pXRF results, the diagnosis is that the drilling encountered rhythmic layering of Cues Formation, metasedimentary composite gneiss and quartz+iron oxide+/-sulphide granular rocks over the first 70m. Deeper downhole there were alternating layers of amphibolite granulite gneiss, sheared biotite schist, and metasedimentary composite gneiss. A geological cross section based on these results is shown at **Figure 8**.

**Figure 8: Geological Cross Section of hole 24EBRC001 showing elevated downhole geochemistry**

The preliminary results from the pXRF scans indicate significant intersections of base metals as follows (see AOA ASX Announcement of 17 March 2025):

- **6,196ppm Zinc @ 16m-17m**
- **425ppm Lead @ 34m-35m**
- **1,841ppm Zinc + 395ppm Copper @ 76m-77m**
- **359ppm Copper @ 187m**

The elevated Zinc geochemistry in particular is an encouraging indication that there may be base metals sulphides at depth.

28 of the samples collected between 0 and 80m downhole and 2 samples collected at the base of the hole between 120m and 128m were submitted to the laboratory for assay for multi element geochemical method ME-MS61.

Significant assay intervals are as follows (see AOA ASX Announcement of 15 April 2025):

- **36-40m 4m @ 1,095ppm Zn, 400ppm Mn<sup>1</sup> and 176ppm Pb**
- **40-68m 28m @ 583ppm Zn**
- **68-77m 7m @ 1,168ppm Mn<sup>1</sup>**
- **120-128m 8m @ 1,622ppm Mn and 369ppm Zn<sup>1</sup>**
- **Upper portion of the hole to 68m averages 26ppm Ga<sup>2</sup>**

Zn = Zinc; Mn = Manganese; Pb = Lead; Ga = Gallium.

<sup>1</sup> The Palaeoproterozoic Broken Hill Pb–Zn–Ag stratiform orebody is intimately associated with Manganese rich garnet-bearing rocks.

<sup>2</sup> Gallium is currently considered a critical metal used in cutting-edge technologies, including semiconductors, data centers, satellite communications, smart phones, medical, radar and military equipment. China which accounts for 98% of world production of Gallium has recently banned its export along with Antimony and Germanium. 10-20% of global Gallium supply is mainly obtained as a byproduct from the refining of zinc ores, particularly sphalerite (ZnS).

After review on how best to drill the IP targets the Company has decided on RC pre-collars to about 190m with diamond tails for the remainder of the hole. The Company plans to resume the drilling at East Borehole in the June 2025 quarter and tenders have been sent to drillers and quotes have been received.

Hole	East (MGA54)	North (MGA54)	Elev	Dip	Azim (MGA54)	Depth
EB1	552450	6430450	174	-60	180	275
EB2	553650	6430870	178	-60	180	325

*Table 1: East Borehole drill collars*

### Next Phase of Exploration at Enmore EL 9220

- Review all historic exploration in light of the 2023 Ground IP Survey.
- Geological mapping in the vicinity of the large chargeability high in the NE of the survey area to determine if it is a lithological response.
- Fine fraction soil grid sampling of the Clues Formation in the NW of the tenement where there has been very little exploration apart from a small historic shallow drilling program in the south of the area. This is a high priority area for surficial exploration within the Enmore tenement.
- Review and report on the results of REE sampling conducted in June 2024.
- Conduct revised drill program of East Borehole IP chargeability anomalies.

During the March 2025 quarter there have been no activities within Eureka (EL 9224) and Mt Darling (EL 9230) as the Company focuses at Enmore.

### *Kanbarra (EL 8745) and Stirling Vale (EL 8747)*

No field activities have been conducted during the quarter and the Company will consider new areas within those tenements for future exploration work.

## NEW SOUTH WALES

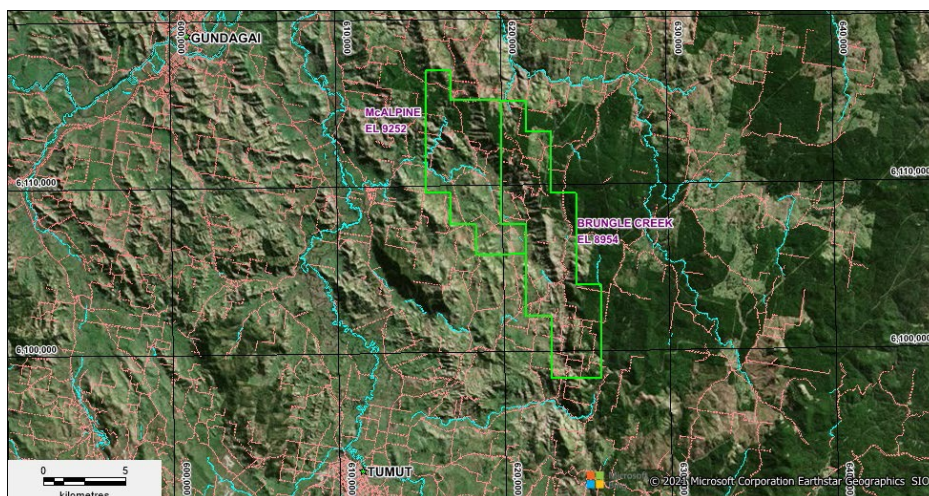

### **GOLD AND BASE METALS EXPLORATION**

#### *Near Tumut – 100% interest*

#### ***Brungle Creek (EL 8954) and McAlpine (EL 9252)***

In a region with potential for gold and base metals, the two adjacent tenements Brungle Creek EL 8954 and McAlpine EL 9252 (**Figure 9**) cover a total area of approximately 106 km<sup>2</sup> 15 km north-east of Tumut, 15 km south-east of Gundagai and adjacent to the serpentine ridge of the Honeysuckle Range.

In light of latest sampling results, gold exploration is currently the focus as opposed to base metals. During the quarter no field activities have been conducted at Brungle Creek EL 8954 and McAlpine EL 9252.

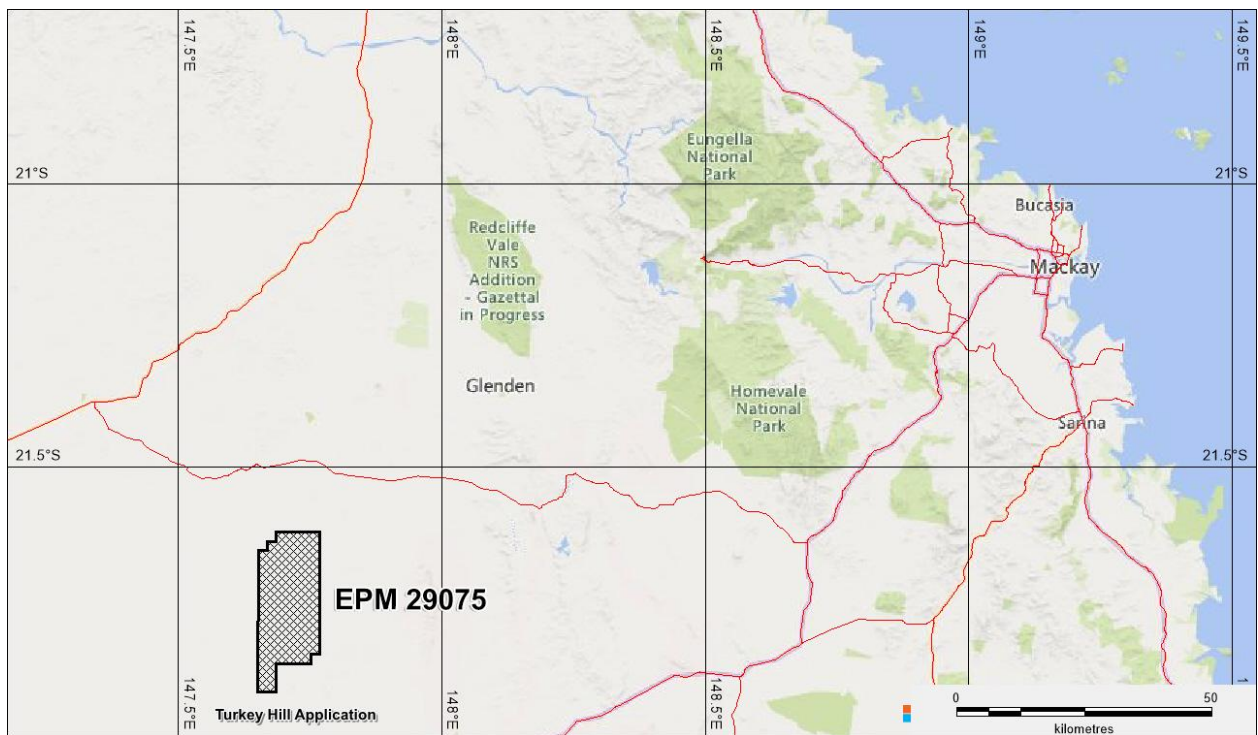

**Figure 9: McAlpine EL 9252 and Brungle Creek EL 8954 location map – BING Aerial Photograph**

**QUEENSLAND**  
**RARE EARTHS EXPLORATION**  
**Drummond Basin - 100% interest**  
**Turkey Hill (EPM 29075)**

The Queensland Government has granted EPM 29075 Turkey Hill (**Figure 10**) for 5 years to 17 September 2029 to explore for rare earths.

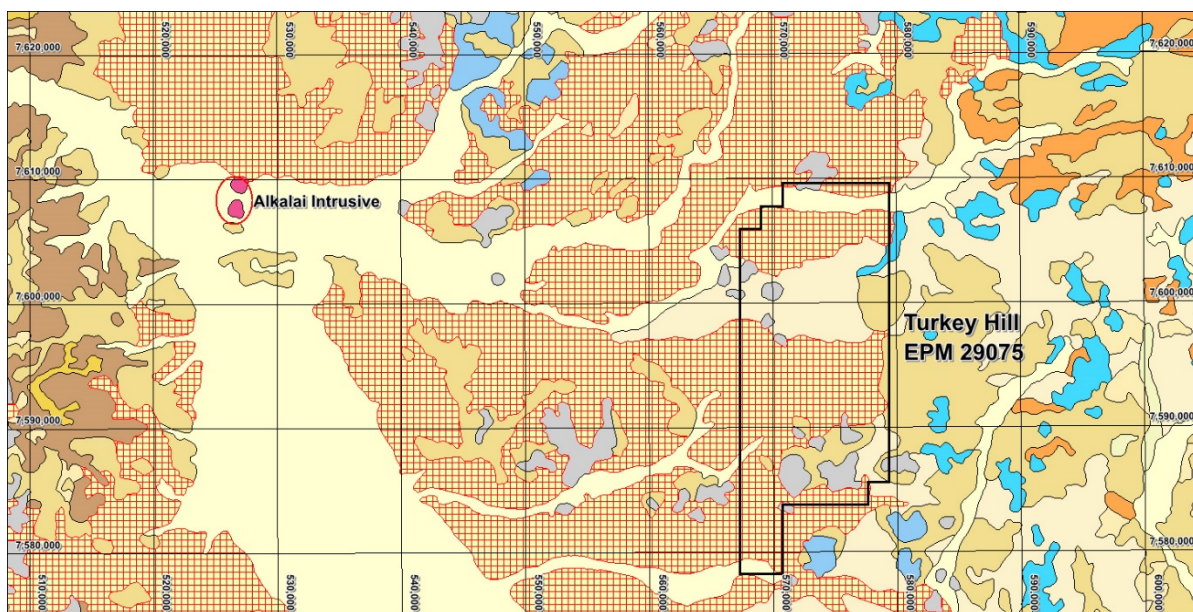

The tenement covers an area of 320 km<sup>2</sup> within the Drummond Basin in Central Queensland, 165 km SW of MacKay and 34 km NW of Moranbah accessible via the Peak Downs Highway then via all-weather unsealed roads.

**Figure 10: Location of Turkey Hill tenement application.**

The Turkey Hill project is targeting a surficial layer of clays and iron-manganese-rich pisolites, and nodules forming part of a sequence of a tropically weathered sedimentary basin of Tertiary age. They are poorly consolidated and predominantly clay-rich, with minor amounts of fine sand and gravel. The basin overlies and is adjacent to alkali granitic rocks which have historically produced significant tin and tungsten and are enriched in rare earth elements. The granites are the possible source of the rare earths.

The REE mineralisation, if any, is likely concentrated in the weathered profile where it has dissolved from its primary mineral form, such as monazite, and then ionically bonded (adsorbed) or colloiddally bonded on to fine particles of aluminosilicate clays, including kaolinite).

**Figure 11: Turkey Hill tenement showing the REE target stratigraphy in red hatch**

During the quarter, there has been no activities within the tenement as the conduct for the first field work of surficial scanning of rocks and soils with the Company’s Vanta pXRF has been scheduled for April 2025.

Initial work program will involve:

- Compilation of all historic exploration
- Roadside mapping of regolith and geology
- Communication with local council(s)
- Surface shallow Aircore traverses along road verges

## **TECHNICAL RELEASES RELEVANT TO THE REPORT FOR MARCH 2025 QUARTER**

This Quarterly Activities Report contains information extracted from the Company’s ASX market announcements reported in accordance with the 2012 edition of the “Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves” (2012 JORC Code). Further details (including 2012 JORC Code reporting tables where applicable) of exploration results can be found in the following announcements lodged on the ASX:

31 October 2023	Quarterly Activities Report
29 July 2024	Results of Drilling for Rare Earths at Parrakie EL 6795 SA
31 January 2025	Quarterly Activities Report
18 February 2025	Field Reconnaissance for Rare Earth Drilling SA
17 March 2025	pXRF Scan Results of Samples RC Holes at EL9220 Enmore NSW
15 April 2025	Assay Results from East Borehole prospect EL 9220 Enmore NSW

The Company is not aware of any new information or data that materially affects the information included in these announcements.

## EXPLORATION EXPENDITURE

During the quarter the Group incurred (as adjusted for accrual basis of accounting to the cash flow item 2.1(d) in Appendix 5B) the following amounts in mineral exploration and evaluation activities:

	\$
Rent levy	12,000
Geology and geophysics	24,000
Project management costs	12,000
Total	<u>50,000</u>

There were no mining production and development activities during the quarter.

## LICENCES STATUS

Minerals tenements held as of 31 March 2025 and their locations are set out in the table below. There has been no change in the tenements holding in the March Quarter 2025 other than the relinquishment of EL 6796 and EL 6797 in February 2025

Tenement	Area Name	Location	Beneficial Interest	Status
EL8745	Kanbarra	NSW Broken Hill	100%	Expiry on 15 May 2030
EL8747	Stirling Vale	NSW Broken Hill	100%	Expiry on 24 May 2030
EL 9220	Enmore	NSW Broken Hill	100%	Expiry on 21 July 2026
EL 9224	Eureka	NSW Broken Hill	100%	Expiry on 21 July 2026
EL 9230	Mt Darling	NSW Broken Hill	100%	Expiry on 21 July 2026
EL 8954	Brungle Creek	NSW Tumut	100%	Expiry on 11 March 2026
EL 9252	McAlpine	NSW Tumut	100%	Expiry on 6 August 2026
EL 6795	Parrakie	SA Murray Basin	100%	Expiry on 4 July 2028
EL 6796	Mt Rough	SA Murray Basin	100%	Relinquished in February 2025
EL 6797	Kingston	SA Otway Basin	100%	Relinquished in February 2025
EL 6807	Wolseley	SA Murray Basin	100%	Expiry on 18 July 2028
EL 6975	Wilkawatt	SA Murray Basin	100%	Expiry on 7 February 2030
EL 7015	Peake	SA Murray Basin	100%	Expiry on 20 September 2030
EPM 29075	Turkey Hill	QLD Drummond Basin	100%	Expiry on 17 September 2029

## CORPORATE

### Payments to related parties of the entity and their associates

The aggregate amount of payments to related parties and their associates for the quarter reported in item 6.1 in Appendix 5B Cash Flow Report of \$33,000 were as follows:

- Director fee balance for the year ended 30 June 2024	\$13,000
- Director's management fees and superannuation	\$17,000
- Office rent contribution and service fees to a related entity of Managing Director John Wang	\$3,000

The aggregate amount of payments to related parties and their associates for the quarter reported in item 6.2 in Appendix 5B Cash Flow Report of \$3,000 were as follows:

- Director's management fees and superannuation	\$3,000
---	---------

### **Competent Person Statement**

*The information in the report above that relates to Exploration Results, Exploration Targets and Mineral Resources is based on information compiled by Mr Mark Derriman, who is the Company's Consultant Geologist and a member of The Australian Institute of Geoscientists (1566). Mr Mark Derriman has sufficient experience that is relevant to the style of mineralization and type of deposit under consideration and to the activities which he is undertaking to qualify as a Competent Person as defined in the 2012 Edition of the Australasian Code for Reporting of Exploration Results, Exploration Targets, Mineral Resources and Ore Reserves. Mr Mark Derriman consents to the inclusion in this report of matters based on his information in the form and context in which it appears.*

### **Forward-Looking Statement**

*This document may include forward-looking statements. Forward-looking statements include, but are not limited to, statements concerning planned exploration program and other statements that are not historical facts. When used in this document, the words such as "could", "plan", "estimate", "expect", "intend", "may", "potential", "should" and similar expressions are forward-looking statements. Although Ausmon Resources Limited believes that its expectations reflected in these forward-looking statements are reasonable, such statements involve risks and uncertainties and no assurance can be given that actual results will be consistent with these forward-looking statements.*

### **Authorised by the Board of Directors**

Eric Sam Yue

6.2	Aggregate amount of payments to related parties and their associates included in item 2	3

*Note: if any amounts are shown in items 6.1 or 6.2, your quarterly activity report must include a description of, and an explanation for, such payments.*

## Mining exploration entity or oil and gas exploration entity quarterly cash flow report

7.	<b>Financing facilities</b>	<b>Total facility amount at quarter end \$A'000</b>	<b>Amount drawn at quarter end \$A'000</b>
	<i>Note: the term "facility" includes all forms of financing arrangements available to the entity. Add notes as necessary for an understanding of the sources of finance available to the entity.</i>		
7.1	Loan facilities	1,600	535
7.2	Credit standby arrangements		
7.3	Other (Loan Notes)	270	270
7.4	<b>Total financing facilities</b>	<b>1,870</b>	<b>805</b>
7.5	<b>Unused financing facilities available at quarter end</b>		1,065
7.6	Include in the box below a description of each facility above, including the lender, interest rate, maturity date and whether it is secured or unsecured. If any additional financing facilities have been entered into or are proposed to be entered into after quarter end, include a note providing details of those facilities as well.		
	<p>-Fort Capital Pty Ltd, an unrelated company, has provided a loan facility to the Company to fund general working capital of up to \$1,600,000 until 1 October 2026. The funds advanced under the loan facility are unsecured and bear interest at 11.00% per annum reduced from 11.25% on 1 March 2025.</p> <p>-The Company raised \$270,000 for general working capital by the issue of unsecured Loan Notes to an unrelated entity. The Loan Notes bear interest at the rate of 10.5% per annum and mature on 26 June 2025.</p>		

8.	<b>Estimated cash available for future operating activities</b>	<b>\$A'000</b>
8.1	Net cash from / (used in) operating activities (item 1.9)	(115)
8.2	(Payments for exploration & evaluation classified as investing activities) (item 2.1(d))	(75)
8.3	Total relevant outgoings (item 8.1 + item 8.2)	(190)
8.4	Cash and cash equivalents at quarter end (item 4.6)	212
8.5	Unused finance facilities available at quarter end (item 7.5)	1,065
8.6	Total available funding (item 8.4 + item 8.5)	1,277
8.7	<b>Estimated quarters of funding available (item 8.6 divided by item 8.3)</b>	6.72
	<i>Note: if the entity has reported positive relevant outgoings (ie a net cash inflow) in item 8.3, answer item 8.7 as "N/A". Otherwise, a figure for the estimated quarters of funding available must be included in item 8.7.</i>	
8.8	If item 8.7 is less than 2 quarters, please provide answers to the following questions:	
8.8.1	Does the entity expect that it will continue to have the current level of net operating cash flows for the time being and, if not, why not?	
	Answer: N/A	
8.8.2	Has the entity taken any steps, or does it propose to take any steps, to raise further cash to fund its operations and, if so, what are those steps and how likely does it believe that they will be successful?	
	Answer: N/A	

**Mining exploration entity or oil and gas exploration entity quarterly cash flow report**

8.8.3 Does the entity expect to be able to continue its operations and to meet its business objectives and, if so, on what basis?

Answer: N/A

*Note: where item 8.7 is less than 2 quarters, all of questions 8.8.1, 8.8.2 and 8.8.3 above must be answered.*

**Compliance statement**

- 1 This statement has been prepared in accordance with accounting standards and policies which comply with Listing Rule 19.11A.
- 2 This statement gives a true and fair view of the matters disclosed.

Date: 30 April 2025.....

Authorised by: By the Board .....  
(Name of body or officer authorising release – see note 4)

**Notes**

1. This quarterly cash flow report and the accompanying activity report provide a basis for informing the market about the entity's activities for the past quarter, how they have been financed and the effect this has had on its cash position. An entity that wishes to disclose additional information over and above the minimum required under the Listing Rules is encouraged to do so.
2. If this quarterly cash flow report has been prepared in accordance with Australian Accounting Standards, the definitions in, and provisions of, *AASB 6: Exploration for and Evaluation of Mineral Resources* and *AASB 107: Statement of Cash Flows* apply to this report. If this quarterly cash flow report has been prepared in accordance with other accounting standards agreed by ASX pursuant to Listing Rule 19.11A, the corresponding equivalent standards apply to this report.
3. Dividends received may be classified either as cash flows from operating activities or cash flows from investing activities, depending on the accounting policy of the entity.
4. If this report has been authorised for release to the market by your board of directors, you can insert here: "By the board". If it has been authorised for release to the market by a committee of your board of directors, you can insert here: "By the [name of board committee – eg *Audit and Risk Committee*]". If it has been authorised for release to the market by a disclosure committee, you can insert here: "By the Disclosure Committee".
5. If this report has been authorised for release to the market by your board of directors and you wish to hold yourself out as complying with recommendation 4.2 of the ASX Corporate Governance Council's *Corporate Governance Principles and Recommendations*, the board should have received a declaration from its CEO and CFO that, in their opinion, the financial records of the entity have been properly maintained, that this report complies with the appropriate accounting standards and gives a true and fair view of the cash flows of the entity, and that their opinion has been formed on the basis of a sound system of risk management and internal control which is operating effectively.
