An investment in the Company's shares is subject to investment and other known and unknown risks, some of which are beyond the control of the Company. Such risks and uncertainties include, but are not limited to: the acquisition and retention of customers, third party service provider reliance, competition, reliance on key personnel, additional requirements for capital, the ability to raise sufficient funds to meet the needs of the Company in the future, potential acquisitions, platform disruption, commercialisation, changes in technology, reliance on new products, development timeframes, product distribution, insurance, security breaches, maintenance of key business partner relationships, management of growth, brand establishment and maintenance, as well as political and operational risks, and governmental regulation and change in laws. Additional risks and uncertainties that the Company is unaware of, or that it currently considers to be immaterial, may also become important factors that adversely affect the Company's operating and financial performance.

Usability of the Company's products depend upon various factors outside the control of the Company including, but not limited to: device operating systems, mobile device design and operation and platform provider standards and reliance on access to internet. A number of the Company's products and possible future products contain or will contain open source software, and the Company may license some of its software through open source projects, which may pose particular risks to its proprietary software and products in a manner that could have a negative effect on its business. The Company's intellectual property rights are valuable, and any inability to protect them could reduce the value of its products and brand. The Company's products may contain programming errors, which could harm its brand and operating results. The Company will rely on third party providers and internet search engines (amongst other facilities) to direct customers to the Company's products.

The Company does not guarantee any particular rate of return or the performance of the Company, nor does it guarantee the repayment of capital from the Company or any particular tax treatment. Before investing in the Company, you should consider whether this investment is suitable for you. Potential investors should consider publicly available information on the Company, carefully consider their personal circumstances and consult their professional advisers before making an investment decision.
