ASX ANNOUNCEMENT

Lumos Secures Sixth MAC for U.S. Medicare Reimbursement Coverage for FebriDx®

Key Highlights

- Lumos has secured reimbursement coverage for FebriDx® from a further Medicare Administration Contractor (MAC) at US\$41.38 per test, retroactive from 1 May 2025.
- US reimbursement coverage is now achieved with six of seven MACs, representing over 85% of US Medicare payment coverage.
- Momentum continues with negotiations in process with the remaining MAC.
- Medicare adoption generally serves as a precedent for reimbursement decisions by private insurance payors.

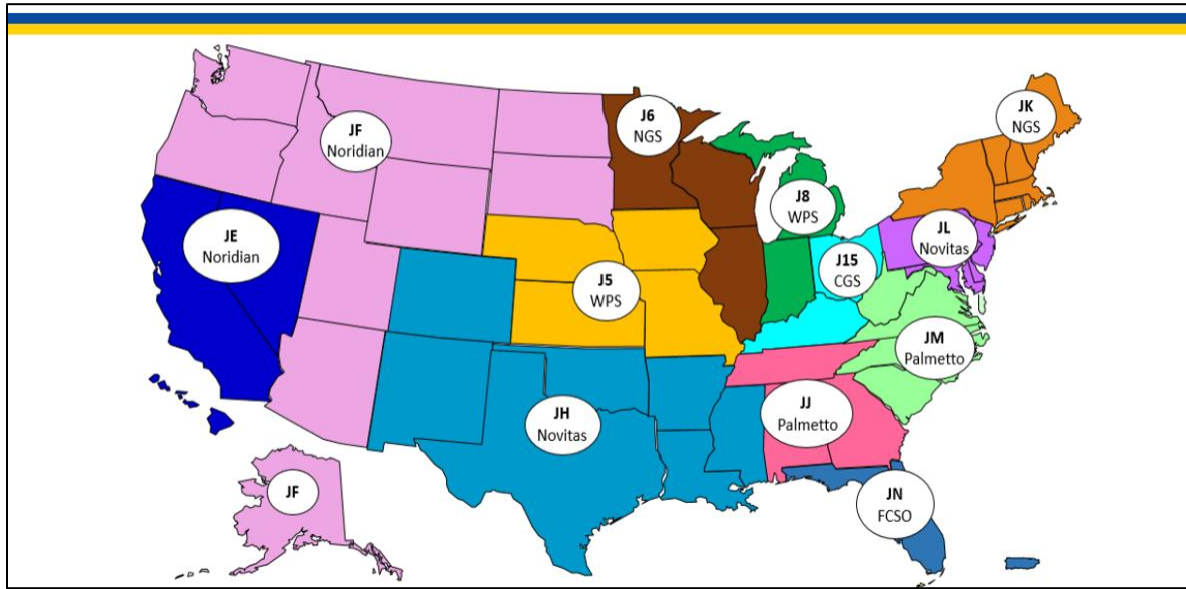

MELBOURNE, Australia (27 May 2025) – Lumos Diagnostics (ASX: LDX), (“Lumos” or the “Company”) a leader in rapid, point-of-care diagnostic technologies, is pleased to announce that it has received confirmation of Medicare reimbursement coverage from an additional Medicare Administrative Contractor (“MAC”), CGS Administrators (“CGS”). FebriDx will be included in the Medicare Fee Schedule of CGS, retroactive from 1 May 2025.

CGS is responsible for managing Medicare payments in the states of Kentucky and Ohio.

With the inclusion of CGS, to the previously announced coverage from Novitas and Palmetto (ASX: 17 April 2025), First Coast Service Options and Noridian Healthcare Solutions (ASX: 23 April 2025), and WPS Health Solutions (ASX: 19 May 2025) Lumos now has Medicare reimbursement from six of the seven MACs, representing over 85% of the total US Medicare payment coverage. This continued momentum in the Company’s commercialisation efforts significantly expands Lumos’ access to the Medicare patient population, with only National Government Services (“NGS”) MAC remaining to be added.

Medicare comprises approximately 20%–24% of the U.S. payor mix and often sets a precedent for private payors.

Map of U.S. MAC Jurisdictions

Achieving reimbursement coverage is a critical validation milestone on the pathway to meaningful adoption of FebriDx in the U.S. Over time, commercialisation success will be driven by demonstrating three essential outcomes:

1. **Clear clinical benefit** – evidence that the test improves patient care;
2. **Impact on the clinical care pathway** – showing that the test makes the diagnostic and treatment process more efficient or effective; and
3. **Favourable economics** – proving that the test is financially beneficial for the healthcare system.

Commenting on the announcement, Doug Ward, Managing Director of Lumos Diagnostics said: *“Securing additional Medicare coverage from CGS for FebriDx reinforces our commitment to developing a point-of-care diagnostic solution that not only benefits patients, but also integrates seamlessly into care pathways and delivers value to the broader health system.”*

“Lumos remains committed to securing adoption from the remaining MAC, NGS, and pursuing reimbursement coverage from private payors, with the goal of achieving nationwide access for patients and supporting broad clinical adoption of FebriDx.”

-Ends-

This announcement has been approved by the Lumos Disclosure Committee.

About Lumos Diagnostics

Lumos Diagnostics specializes in rapid and complete point-of-care diagnostic test technology to help healthcare professionals more accurately diagnose and manage medical conditions. Lumos offers customized assay development and manufacturing services for point-of-care tests and proprietary digital reader platforms. Lumos also directly develops, manufactures, and commercializes novel Lumos-branded point-of-care tests that target infectious and inflammatory diseases.
