Artificial Intelligence For Multi-Mission Counterdrone Investor Presentation

June 2025

Key Highlights

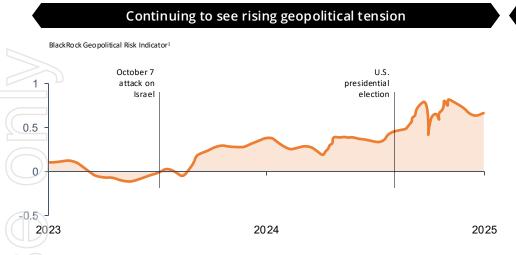

Strong start to 2025 across all key areas of the business

Strong Global Tailwinds in Defence Spending Resulting in Attractive Outlook for Counterdrone Technology

Technology & drones playing an increasing role in modern warfare

Advanced technology is crucial for maintaining military superiority – with modern militaries investing heavily in electronic countermeasures

 Drone / Counterdrone: Drone warfare continues to rapidly evolve – need for next generation counterdrone technology increasingly critical

AI: AI systems are increasingly being used to more precisely and autonomously engage targets – *integration likely to deepen necessitating advanced countermeasures*

2024: A year marked by the rise of drone warfare

'World's first drone war' taking place in Middle East 'It is impossible to outrun them': how drones transformed war in Ukraine

Global defence spend at all-time-high – sovereign capability a key priority

Drone / Counterdrone a key focus area of military budgets

Continuing increased expenditure by Western Governments in response to drones being used in virtually all conflicts globally

- Counterdrone identified as one of 17 key priority spend areas for the US DoD³, with US\$1.3bn earmarked for C-UAS programs as part of a US\$150bn increase in defence spending⁴
- UK Ministry of Defence announced that 10% minimum of equipment budget for novel technologies including drones and AI-enabled equipment
- The EU has released its €800bn ReArm Europe plan with drone / counterdrone systems identified as one of 7 priority capability areas⁶

EU chief unveils €800bn plan to 'rearm' Europe

New spending on drones and lasers will 'revolutionise' UK defence, says Reeves House Republicans unveil \$150 billion defense spending increase plans with \$1.3 billion earmarked for C-UAS programs

Reconciliation bill includes billions for new drone capabilities

Multiple Applications for DroneShield Technology and Service Offering Represents Significant Market Opportunity

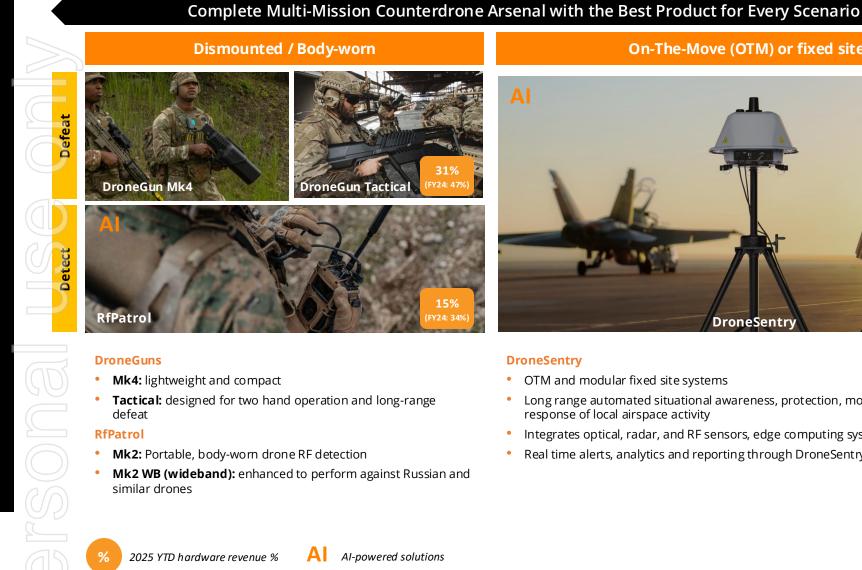

Numerous and growing applications for DRO counterdrone technology represents significant opportunity for expansion across multiple end markets

1 https://www.droneshield.com/counterdrone-market

DroneShield is a Pioneer in Counterdrone Technology with a **Comprehensive Product Range...**

On-The-Move (OTM) or fixed site

- OTM and modular fixed site systems
- Long range automated situational awareness, protection, monitoring and threat response of local airspace activity
- Integrates optical, radar, and RF sensors, edge computing systems and software
- Real time alerts, analytics and reporting through DroneSentry-C2 software

...And Proprietary Software Solutions...

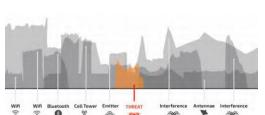

Al Software solutions used for multi-mission threat protection and counterdrone defence

Radiofrequency AI (RFAI) and RFAI-ATK

DroneSentry-C2 (with SFAI)

Electronic Warfare & Signals Intelligence

AI / ML signal detection and classification and electronic attack engines

- Detects, classifies, records and adds signals of interest within hours
- Cuts through RF noise with low false alarms
- Data is sent from deployed services for extensive data set generation, enabling future refinement of AI engines
- RFAI-ATK is a fully software defined, digital electronic response to detected threats. The AI powered software determines the radio frequency response based on the characteristics and vulnerabilities of the threat protocol

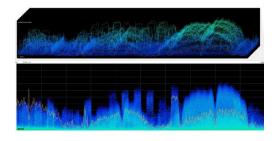

DroneSentry-C2

DroneSentry-C2 Tactical

Detect, identify, track and respond to drone targets and includes SensorFusion AI (SFAI) and DroneOptID

- Software platform with remote access, realtime awareness and reporting capabilities
- Embedded Digital Twin Planning Tool for rapid planning, setup and simulating systems
- SFAI is a multi-sensor solution including RF, Radar, acoustic and camera systems
- DroneOptID is an AI powered optical and thermal spectrum counterdrone surveillance software specifically for small, fast-moving targets
- Available as DroneSentry-C2 Tactical for handheld and on-the-move applications

Recognition of never seen before threats in multiple domains

- Cutting-edge spectrum awareness capability using proprietary Al
- Identifies Signals of Interest (SOI) to enable threat Indications & Warnings (I&W), threat geolocation and the targeting cycle to obtain intelligence
- Electronic attack capabilities such as directed electromagnetic energy to jam, degrade, disrupt or neutralize an adversary capability
- Current 2-year R&D contract with the Australian Department of Defence; additional and large contracts expected based on discussions

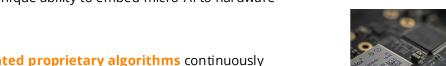

Cutting-edge AI model developed for drone detection and integration with DroneShield's best-in-class equipment

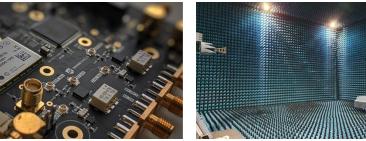

Market leading Al capability
Advanced AI & ML to instantaneously detect, classif track drones in complex environments
Precise and effective threat detection underpinned fully digitalized AI enabled RFAI response
Substantial & irreplicable proprietary database supports unique ability to embed micro-Al to hardware
Sophisticated proprietary algorithms continuously adapting to latest drone threats
Regular software updates to maintain technological edge

AI & ML to instantaneously detect, classify & es in complex environments

ket leading AI capability

d effective threat detection underpinned by ized AI enabled RFAI response

Supported by an expansive data strategy

- ✓ Full ownership of a very significant proprietary drone data set, built over years of collection, cleaning and tagging globally
- ✓ Global data sources from partners in **real-world counterdrone** environments
- Access to private test ranges to conduct testing in field conditions
- ✓ Unique ability to collect operational drone data at granular level of detail
- ✓ In-house data engineering team to manage custom datasets
- **V** Strong Government support to develop, test and collect data

A Pioneer Leading the Market in Innovation and Quality. Complete Suite of Multi-mission Products

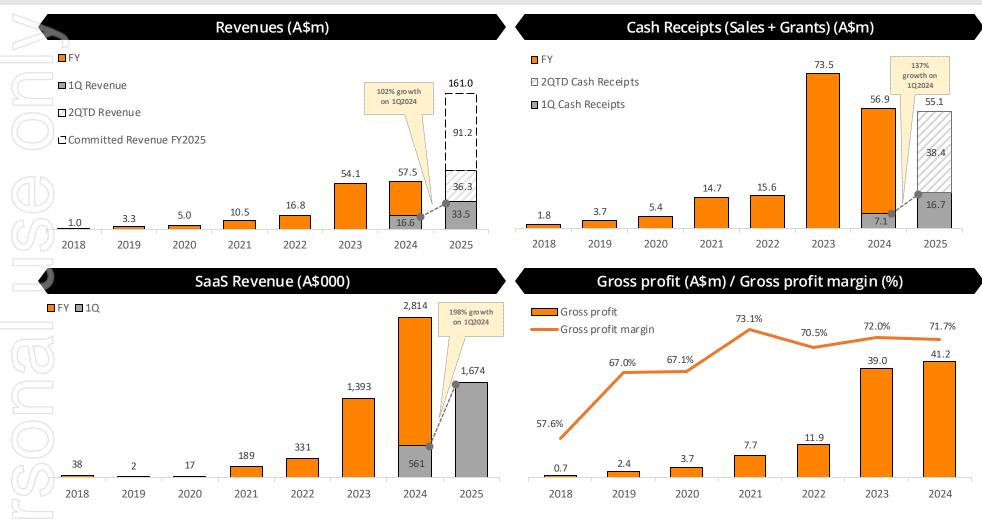

Continuing to Deliver Significant Growth in Revenue and Earnings

1Q2025 showing revenues up 102% and cash receipts up 135% (compared to 1Q24). SaaS revenue is up 198%. The difference between revenues and cash receipts is mostly due to several 1Q deliveries having payments due in 2Q.

Note: Committed Revenues are as at 23 June 2025

YTD 2025 results are preliminary estimates. The audited results are due in February 2026, as part of the 2025 Annual Report

Continuing to Deliver Significant Growth in Revenue and Earnings (cont'd)

A\$m (unless otherwise stated)	Q1 2025 (period ended 31 March 2025)	Q1 2024 (period ended 31 March 2024)	% change
Revenue	33.5	16.6	↑ 102%
SaaS Revenue	1.67	0.56	♠ 198%
Operating cash receipts	16.8	7.1	136%
Revenue split (geography)	USA Europe UK	Australia Asia Other	The business is becoming more geographically diverse
Pipeline (Value, A\$m)	2,418 (at June 2025)	519	The size and quantity of
Pipeline (Number of Opportunities)	268 opportunities (at June 2025)	93 opportunities	revenue opportunities are increasing rapidly

Sales Pipeline at \$2.41bn (as of June 2025)

Diverse pipeline across geographies, customers, products and stages of maturity of the deals

USA

\$663m / 101 projects

- Sales YTD: A\$13.9m (20% YTD revenue)
- **Distributors:** 6
- 25-person office supported by distributors
- A small but well-regarded local team with key relationships across the board, driving customer requirements

\$1.1bn / 59 projects

- **Sales YTD:** A\$11.3m (16% YTD revenue)
- **Distributors:** 77 .
- In progress to establish a European manufacturing and regional sales hub facility to respond to rising demand

\$14m / 2 projects

- Sales YTD: A\$3.8m (5% YTD revenue)
- **Distributors:** 1

United Kingdom

- Mutual exclusivity via BT (British Telecom), which has a dedicated well-positioned Defence subsidiary

\$77m / 16 projects

- **Sales YTD:** A\$6m (9% YTD revenue)
- **Distributors:** 12
- Continue execution on 2-year DoD contract, with further larger contracts expected on its renewal in mid 2025

\$443m / 30 projects

- Sales YTD: A\$19.5m (28% YTD revenue)
- **Distributors:** 43
- Continue working with experienced distributer network and leveraging deep relationship with customers and partners

\$98m / 60 projects

- **Sales YTD:** A\$15.3m (22% YTD revenue)
- **Distributors:** 76
- On the ground sales staff in Mexico and UAE, supported by distributors

Notes: The pipeline includes existing defined sales opportunities at various stages of maturity The opportunities are unweighted for probability

Technology Roadmap: Accelerating the Development of New Generation Products & Software Capabilities

Expansion of DRO solution pipeline will accelerate towards a SaaS based revenue model, further increase gross margins, and well-position DRO to always be at the forefront of C-UxS technology

Accelerate current generation platforms

- Continue to improve performance through regular software updates supported by more robust data
- Evolve DroneSentry-C2 to represent a complete C-uXs landscape with widespread up & downstream integrations
- Expansion into civilian markets through specific configuration and deployment of core products

Respond to customer needs and more sophisticated threats Further embed DroneShield products into the customers' ecosystem

Seize further opportunity across the US\$10bn+ TAM

Release of next generation flagship products

- Significantly uplift hardware capabilities against next generation drone threats
- Cutting edge modular AI detection platform with smart disruption technology
- Development of AI and ML engines for enhanced detection, identification and response to drones without a static RF library
- Maintains technical and innovation leadership
- Increase adoption of SaaS and grow revenue and margin
- Expand portfolio with more options for capabilities and price points to customers

Executing on our Strategic Priorities

Leveraging our established and scalable platform to execute on numerous and highly actionable growth levers

2025-2026

- Launch of next gen hardware across product families
- Grow SaaS revenue through new products and additional SaaS options on existing products
- Expand wallet share by embedding more solutions to customers
- Establish European manufacturing and regional sales hub facility
- Initial material sales within the civilian sector, underpinned by increase in drone threat and evolving legislation to enable counterdrone purchases in this sector

2027-2028

- Grow pipeline by 100%+ to \$5bn
- Roll-out of AI software to all hardware and SaaS subscriptions
- Substantial amount of sales are driven off system (as opposed to product) sales, and from "whole of lifecycle" sales (true partner to the customer as opposed to a vendor)
- Ongoing feature enhancement and subsequent commercialisation of Access Portal
- Expand EW capabilities/contracts and broader distribution opportunities

2029+

- Majority of revenue from SaaS, long term counterdrone contracts and EW contracts
- Increase penetration in existing markets (including civilian markets) and a substantial amount of revenues from replacement of hardware
- Regional manufacturing and regional sales hubs in Middle East and South America

DroneShield: A Decade of Prediction, Execution and Agility

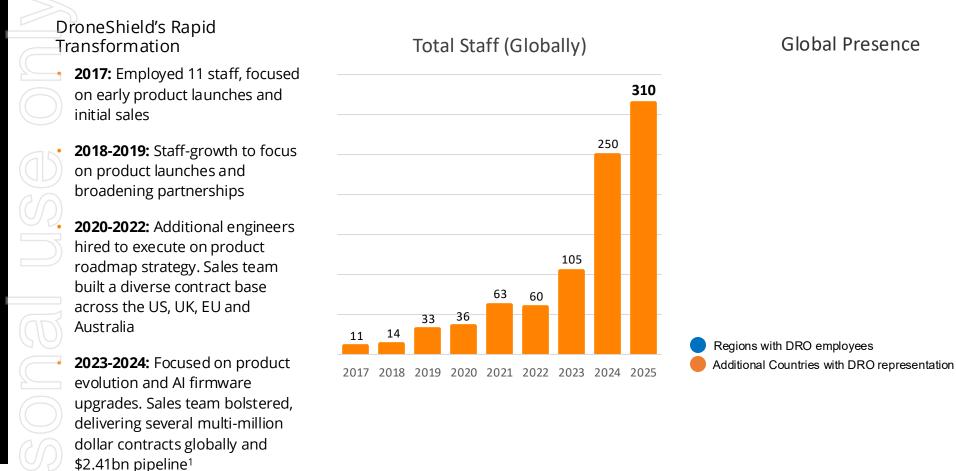

DroneShield is utilising its current leadership role in the sector to lead the next phase of evolution in C-UxS technology, driven by rapid advances in drone technology

A Global Company

Global Presence

Counterdrone Detection Solutions

DRO uses multi-sensor drone detection for optimal results, unaffected by time of day or weather. DRO is an integrator as well as sensor maker, meaning it combines its own and 3rd party solutions

	Radio Frequency	Radar*	Cameras*	Acoustic*
Imagery				
Overview	 Foundational layer Detects drone comms protocols (via conventional RF library or an Al engine) 	• Motion tracker - emits signals which are then reflected back to the radar by targets	 Electro-Optical (EO), Infrared (IR) and Thermal Video analytics and image capture identification of drone activity 	 Compares noise of drone blades or motor to a database of acoustic signatures
Advantages	 No interference with other sensors Tracks multiple targets Passive - cannot be "seen" Low false alarm rate Direction-finding capability Long ranges Cost effective 	 Picks up drones without RF emissions Tracks multiple targets 	 Best used for verification, classification and tracking of a target detected by other sensors Potential identification of payloads Provides "eye on target" 	 Passive, cost effective Supporting sensor, filling gaps from other sensors
Disadvantages	 Doesn't pick up RF-silent drones Requires firmware updates 	 False alarms (birds etc) Is "seen" as emits energy (passive radars are early stage) Longer range detection is expensive Struggles with hovering drones 	 Not well suited for detection on its own due to field-of-view vs distance trade-off Short ranges 	 Short range False alarms Cannot accurately locate or track Requires signature database updates

```
* Third party hardware, integrated into DRO combined multi-sensor solution, with differentiated offering via Al-powered software layers
```

Counterdrone Defeat Solutions

DRO uses smart jamming which has advantages over other technologies, particularly, in its use across civil and military applications, and does not compete against large Defence Primes

			otic Tech, ed Reliability Physical	A Defence Prime area, such as Kongsberg or EOS Kinetic – "hard kill" I force used with potential for destru	Traditionally a Defence Prime area, however new solutions emerging, e.g. Epirus and AIM Defence
	Smart Jamming	Spoofing/Cyber/ Protocol Manipulation	Counterdrone Drones	Projectile Fire Kinetic Systems	Directed Energy (Laser or Microwave)
Imagery			Ť 1		
Overview	Radio waves force a drone to fly back, hover, or land	• Hijacks the control of a drone	• "Kamikaze" or "catching drones	g" • Remote weapons systems shoot down drones	 Lasers and high-power microwave systems "dazzle" or destroy a drone
Advantages	 Universal effectiveness, including against "autonomous drones" flying via GNSS/satellite waypoint navigation 360-degree defeat coverage Effective against swarms Civil and military environments 	 Allows for the re-routing and re-direction of malicious drone flight paths Applications in both civil and military environments 	 "Catching" the drone is available to a wider ran of customers 		 Effective against RF/GNSS silent drones Systems can be mounted on naval vessels for complex defence systems
Disadvantages	 Potential for collateral interference (for a "dirty" jammer) – noting DRO jammers are in-band Drones controlled without RF/GNSS (eg fibre-optic) 	 Not effective against all drones Higher chance of collateral damage 30-90sec per drone to engage, can't engage multiple drones at same time 	 Generally slow to deple Not effective against swarms 	 oy Collateral damage Unsuitable for use in a civil environment 	 In relatively early stages Only available for military applications

Important Notices and Disclaimer

This presentation has been prepared by DroneShield Limited ACN 608 915 859 ("**DroneShield**" or "**Company**"). This presentation contains summary information about DroneShield and its associated entities, and their activities current as at the date of this presentation. The information contained in thispresentation is for information purposes only and is provided as at the date of this presentation (unless otherwise stated). It should be read in conjunction with DroneShield's most recent financial report and other periodic and continuous disclosure announcements lodged with the Australian Securities Exchange ("**ASX**"), which are available at www.asx.com.au under the Company's ticker code (ASX:DRO).

Not an offer

This presentation is for information purposes only and does not constitute or form any part of any offer or invitation to sel or issue, or any solicitation of any offer to purchase or subscribe for, any securities in the Company in any jurisdiction. This presentation and its contents must not be distributed, transmitted or viewed by any person in any jurisdiction where the distribution, transmission or viewing of this document would be unlawful under the securities or other laws of that or any other jurisdiction.

Not investment advice

This presentation is for information purposes and does not constitute investment or financial product advice (nor taxation, accounting, or legal advice), is not a recommendation to acquire or dispose of DroneShield's shares or other securities and is not intended to be used or relied upon as the basis formaking an investment decision. In preparing and providing this presentation, DroneShield has not considered the investment objectives, financial position or needs of any particular recipients.

Future performance

This presentation may contain forward-looking statements. Forward looking statements can generally be identified by the use of forward-looking words such as, "expect", "anticipate", "likely", "intend", "should", "could", "may", "predict", "plan", "propose", "will", "believe", "forecast", "estimate", "targe" and other similar expressions. Indications of, and guidance or outlook on, future earnings or financial position or performance are also forward-looking statements. Forward looking statements involve inherent risks and uncertainties, both general and specific, and there is a risk that such predictions, forecasts, projections, and other forward-looking statements will not be achieved. Forward looking statements are provided as a general guide only, and should not be relied on as an indication or guarantee of future performance and involve known and unknown risks, uncertainty, and other factors, many of which are outside the control of DroneShield. The forward-looking statements are based on information available to the Company as at the date of this presentation. Circumstances may change and the contents of this presentation may become out-dated as a result. As such, undue reliance should not be placed on any forward-looking statement.

Past performance

Past performance information (including past share price performance of DroneShield and proforma historical information) given in this presentation is given for illustrative purposes only and is not a guarantee of, and is not necessarily a guide to future performance and no representation or warranty is made by any person as to the likelihood of achievement or reasonableness of any forward-looking statements, forecast financial information, future share price performance or other forecast. Nothing contained in this presentation, nor any information made available to you is, or shall be relied upon as, a promise, representation, warranty or guarantee as to thepast, present or the future performance of DroneShield.

Disclaimer

No representation or warranty, express or implied, is made as to the accuracy, reliability, completeness or fairness of the information, opinions and conclusions contained in this presentation. DroneShield does not represent or warrant that this presentation is complete, free from errors, omissions, or misrepresentations or that it contains all material information about DroneShield or which a prospective investor or purchaser may require in evaluating a possible investment in DroneShieldor an acquisition or other dealing in shares.

To the maximum extent permitted by law, DroneShield expressly disclaims any and all liability, including, without limitation, any liability arising out of fault or negligence, for any direct, indirect, consequential or contingent loss or damage arising from the use of information contained in this presentation including representations or warranties or in relation to the accuracy or completeness of the information, statements, opinions or matters, express or implied, contained in, arising out of or derived from, or for omissions from, this presentation including, without limitation, any financial information, any estimates or projections and any other financial information derived therefrom.

Statements made in this presentation are made only at the date of the presentation. DroneShield is under no obligation to update this presentation. The information in this presentation remains subject to change by DroneShield without notice to you.

Acceptance

By attending an investor presentation or briefing, or accepting, accessing, or reviewing this presentation, you acknowledge and agree to the terms set out in this Important Notices and Disclaimer'.
