**Ava Risk Group secures contract to supply detection systems to major Australian transport infrastructure project**

**Ava Risk Group Limited (ASX: AVA) ("Ava" or "the Company")** is pleased to announce that it has secured a contract with Siemens Limited to supply its market leading fibre sensing technology for deployment in a major Australian transport infrastructure project.

The contract, valued at \$0.8 million, is for the provision of the Ava's Aura Ai-X Distributed Acoustic Sensing (DAS) technology, which will be used to monitor and identify risks critical to the safe and efficient operation of the infrastructure. Delivery will occur in Q1 FY2026 and there are no conditions precedent to the order.

In addition to the immediate supply of the sensing systems, Ava anticipates further contract variations to support system commissioning and provide associated services. These are estimated at an additional \$0.4 million, subject to finalisation of project scope.

Commenting on the contract award, Ava Group CEO Mal Maginnis said: "We are delighted to receive this order from Siemens to supply our fibre sensing solutions to a critical Australian transport project. This order builds on our previous success in delivering our fibre sensing technology to the Sydney Metro project and reinforces the capability of Aura Ai-X in transport infrastructure applications. We continue to see strong domestic demand for our technology, and this contract highlights our strategic focus on expanding our presence in Australian infrastructure projects. Looking ahead, we are confident of further opportunities across both Australian and international transport sectors."

**About Ava Risk Group**

Ava Risk Group is a global leader in providing technologies and services to protect critical and high value assets and infrastructure. It operates three business segments – Detect, Access and Illuminate. The Detect segment manufactures and markets 'smart' fibre optic sensing systems for security and condition monitoring for a range of applications including perimeters, pipelines, conveyors, power cables and data networks. Access is a specialist in the development, manufacture and supply of high security biometric readers, security access control and electronic locking products. Illumination specialises in the development and manufacture of illuminators, ANPR cameras and perimeter detectors. Ava Risk Group products and services are trusted by some of the most security conscious commercial, industrial, military and government clients in the world.
