FY25 Overview

Pacific Current Group (PAC) is a global investor in investment management firms, with stakes in 8 investment firms across the US, Europe and Australia.

PAC's boutiques offer a diverse range of investment products across multiple asset classes, delivering **sustainable** and **growing** management fees and significant potential for performance fee income. This diversification reduces PAC's reliance on equity market returns to drive revenues and profits.

- § **Completion of Off Market Share Buy-Back:** Completed a substantial off-market, equal access share buy-back of A\$265m with buy-back price of A\$12 per share.
- § **Profit:** Statutory NPAT of A\$58.2m (FY24: A\$110.1m), Underlying NPAT of A\$26.0m (FY24: A\$32.2m), Underlying Earnings Per Share of A\$0.56 per share (FY24: A\$0.62 per share).
- § **Lower Corporate Costs:** including the first period of externalisation and associated benefits realised in FY25 with 60% cost reduction
- § **Dividend:** Dividend of A\$0.43 per share (unfranked) (FY24: A\$0.38 per share, unfranked)
- § **Enhanced Capital Flexibility:** Successful transactions involving Banner Oak, Carlisle, Victory Park Capital, and Nereus all settled in FY25
- § **Deliver Growth Initiatives:** Targeting opportunities to accelerate growth among existing boutique partners and exploring new investment prospects
- § **Fair value NAV:** PAC's estimated fair value NAV of A\$15.51 per share (FY24: A\$13.47 per share) exceeds statutory NAV by A\$0.76 per share

FY25 Underlying Results

NAV: Fair value NAV increased to A\$15.51 per share, this includes fair value movement for Abacus Life Shares and Bonds received for the sale of Carlisle.

Underlying NPAT: Down 20% (21% USD) due to asset realisations, with large part of net assets now held in cash

Corporate Costs: Reduced by 60% as a result of corporate restructure in late FY24

Revenue Composition

Boutique contributions were lower and PAC's corporate cash and interest income were higher as a result of asset realisations over the past 12 months

§ **FY25 Management Fee Revenues:** Decline was largely due to asset sales/realisations such as Avante, Cordillera, GQG, Proterra, Banner Oak, Carlisle, Pennybacker (partial), and Victory Park (partial)

§ **Performance Fees:** Largely comprised of VPC and Roc

§ **Financial Assets:** Driven predominantly by deferred consideration linked to sale of stake in Pennybacker to Petershill

§ **Corporate Revenues:** Primarily from interest income on higher cash balances from asset realisations

Notes:

- Some boutiques hold marketable securities on their balance sheets, which generate unrealised non-cash income (loss) items.
- FY24 corporate revenues have been restated to incorporate interest income, reflecting PAC's substantial cash holdings and the resulting uplift in interest earnings

Alternate Balance Sheet

Reflects deconsolidation of operating subsidiaries (Aether and SCI) to present PAC on a “look through” basis. Reflects lower cash as a result of buy-back completed in March 2025.

A\$000s	30 Jun 25	30 Jun 24

Financial Assets	119,590	40,624
FVTOCI	8,358	10,704
Net Assets	444,658	599,059

Notable Items

- § PAC's corporate net assets assumes that all current assets and liabilities have been realised at balance date, ignoring underlying cash that will be earned over the next 12 months as these current assets and liabilities are realised
- § Other non-current assets include A\$65.4m (US\$42.3m) held as a restricted deposit, serving as a security for WHSP debt recorded under the other non-current liabilities
- § Deferred consideration receivable from Petershill in FY25 includes current receivables arising from the sale of interest in Pennybacker
- § The decrease in subsidiaries is related to impairment of Aether and subsequent change in classification due to restructure. Aether is now moved to FVTPL investment
- § The increase in FVTPL (decrease in Associates and JVs) relates to sale of partial stake in both Victory Park and Pennybacker, PAC now holds a minority stake in both and remaining stake is reclassified as FVTPL (from Associates in prior period)
- § Financial Assets include shares in Abacus Life and Janus Henderson, bonds issued by Abacus Life, and deferred consideration from Petershill in relation to sale of interest in Pennybacker

Notes: Presentation of Alternate Balance Sheet is an unaudited and a non-IFRS financial measure used by PAC to manage its business. Prior period classifications have been adjusted to enhance consistency with the current year format.

§ IFRS requires PAC to use a variety of accounting treatments, resulting in some assets reported at fair value in PAC's statutory accounts, while others are initially reported at investment cost and can only be written down but not up

§ Accordingly, PAC's reported statutory NAV is lower than its NAV using PAC's fair value estimates

§ As at 30 June 2025, PAC's fair value NAV of A\$15.51 per share exceeds its statutory NAV by A\$0.76 per share

*Refer to the Understanding Fair Value NAV slide in the Appendices

Includes boutiques that are already reported at fair value as FVTPL or FVTOCI. These boutiques were not included in similar numbers for 30 June 24 presentation

FY25 KEY HIGHLIGHTS

PACIFIC CURRENT GROUP

FY25 Portfolio Movements

FY25 was a period of considerable change for PAC's Portfolio Composition which added significant capital flexibility

In July 2024, PAC announced a sale of 100% of its interest in Carlisle to Abacus Life (NASDAQ: ABL). PAC received 1.97m newly issued Abacus bonds with a coupon of 9.875% and an aggregate par value of US\$49.2m. In addition, PAC received 1.36m shares of Abacus common stock. As at 3 Dec 24 (announcement of completion of sale), the aggregate net proceeds to PAC were estimated to be US\$60.3m.

In August 2024, PAC announced a sale of 55% of its equity stake in VPC's management company and 22% of PAC's 24.9% future carried interest entitlements in VPC's funds yet to be launched. PAC received upfront consideration of US\$33.9m (before transaction costs), 75% in cash and 25% in Janus Henderson stock (NYSE: JHG). PAC could also receive up to an additional US\$27.7m earnout payment based on certain VPC gross revenue milestones measured in calendar years 2025 and 2026. Finally, the agreement also includes provisions for the potential sale of the remaining equity stake in VPC's management company and an incremental portion of carried interest in the future.

In December 2024, PAC fully redeemed its investment in Banner Oak Capital Partners. PAC originally invested US\$35m in Banner Oak in January 2022. The redemption of US\$19.1m, coupled with US\$15.9m of historical distributions from Banner Oak, represents a full return of PAC's invested capital, on a pre-tax basis.

In December 2024, PAC disposed all of its equity interest in Nereus Capital Investments.

In March 2025, PAC completed restructure of its investment in Aether Investment Partners from an equity share to a revenue share agreement, while maintaining a liquidation right of 24.9% should the company be sold. As noted in HY25 results, PAC recognised an impairment expense on its investment in Aether.

In March 2025, PAC completed equal access off-market buy-back of A\$265m with buy-back price set at A\$12.

OUTLOOK

PACIFIC CURRENT GROUP

Near-Term Focus

PAC will focus on growth initiatives, supporting Boutiques, optimising organisational effectiveness, reducing debt, managing cost base and other capital initiatives

PACIFIC CURRENT GROUP

Accelerate Growth

- § Leverage high-potential opportunities with existing boutique partners and assess new investment prospects to drive scalable growth

Unlock Shareholder Value

- § Evaluate targeted capital initiatives to enhance returns and optimise capital structure

Control Operating Costs

- § Maintain disciplined cost management to support margin stability and capital efficiency

Strengthen Balance Sheet

- § Prioritise debt reduction to improve financial flexibility and resilience

Enhance Organisational Efficiency

- § Embed and refine the structural and governance changes introduced in FY24 and FY25 to improve agility and decision-making

Note: Outlook assumes flat equity markets and no change in currency. Growth expectations are based primarily but not exclusively on PAC or boutique knowledge of specific prospects that appear likely to allocate to boutiques through FY26. New allocations to boutiques cannot be known with certainty, nor can the timing of any allocations be precisely forecasted. Additionally, PAC revenues and earnings can be influenced by some marketable securities held on boutique balance sheets, which can impact results in ways that cannot be readily predicted.

How to think about the PAC portfolio

PAC's portfolio can be broken down into four distinct asset types, with varying growth and yield expectations

PAC Asset Breakdown
Cash (30% of Portfolio) <ul style="list-style-type: none">§ A\$138m of surplus cash remaining after the payment of A\$265m for the share buy-back in March 2025
Financial Assets (25% of Portfolio) <ul style="list-style-type: none">§ Pennybacker receivables (Petershill deferred consideration), Abacus Life Shares and Bonds, Janus Henderson shares§ To be crystalised to cash as and when possible
Investment in Boutiques (45% of Portfolio) <ul style="list-style-type: none">§ Residual stakes in Pennybacker and VPC management company, VPC Carry Holdco as well as existing stakes in Roc, Aether, Astarte, Global IMC, IFP, and NLAA§ Some investments, including VPC Carry Holdco and Roc, are carry-related and may generate substantial cashflows, though timing is expected to be uneven.

Victory Park and Carlisle transactions resulted in fair value uplift of investments in boutiques and increased Financial Assets (Abacus Life and Janus Henderson shares, and Abacus Life bonds).

PAC Go-Forward Strategy

PAC will allocate capital to its most accretive uses, including re-investment and distribution to shareholders

Assets for Harvesting and Mature Boutiques

In addition to its large cash balance (A\$138m) and ongoing distributions from Boutiques, PAC has a number of assets that are in 'Harvest', these are financial assets or receivables that PAC is waiting to realise in cash. Some of these transactions are subject to various approvals and not yet finalised.

Abacus
Stock

US\$7.0m

Abacus
Bonds

US\$48.9m

Janus
Henderson
Shares

US\$8.4m

VPC
Earn-Outs*

US\$3.1m

Capital Allocation

The divestment of investments in Pennybacker, Carlisle, Banner Oak, and VPC has resulted in a substantial pool of capital awaiting reallocation.

PAC will consider a range of capital management initiatives which may include:

Re-invest in new
Growth Opportunities

On-Market Share Buyback

Re-invest in existing
Boutique Opportunities

Dividends

Any growth opportunities will need to be accretive compared to buybacks or distributions to shareholders

* VPC Earn-outs are present value of estimated earn-out and included in the total fair value estimate of Victory Park. This number could materially change higher or lower in future depending on revenue thresholds being achieved in years 2025 and 2026.

Key Definitions

Revenue Share

Boutique investments where PAC is entitled to a percentage of boutique's top-line revenues (largely made up of management fees and performance fees). This equity structure removes fluctuations related to the boutique's cost base over time. For these boutiques, in the instance where there is a liquidity event, PAC is entitled to a certain percentage of proceeds from such events

Closed-end funds

Funds under management where the investor has committed capital for a fixed period. The fixed period is notable as the manager collects management fees throughout the duration of the fixed period

Open-end funds

Funds under management that are not committed for an agreed period. These funds can be redeemed by an investor on relatively short notice, which subsequently impacts the management fees paid to the portfolio manager

Management Fees

PAC's allocable share of boutique profits (excluding performance fee revenue and after deducting operating expenses of the boutique) or revenues (where PAC has revenue share arrangement)

Profit Share

Boutique investments where PAC is entitled to percentage of boutique's bottom-line profit. Note: for the underlying earnings presentation, PAC reclassifies all subsidiary accounting into boutique Profit Share

Net Asset Value (NAV)

Pacific Current Group's total equity (attributable to owners of the company and excluding non controlling interests) calculated as total assets less total liabilities

Underlying Results/Earnings

Unaudited and non-IFRS financial measures used by PAC management to reflect the recurring elements of PAC's business

Boutique Contributions

PAC's economic entitlement from portfolio company/boutique investments including Management Fees and performance fees

A\$ & US\$

A\$ refers to Australian Dollar (reporting currency of PAC), US\$ refers to United States Dollar

Understanding Fair Value NAV

The statutory consolidated financial statements have been prepared on the basis of historical cost, except for certain financial instruments that are measured at fair value at the end of each reporting period.

As such, the Group's investments in operating subsidiaries and Associates and Joint ventures (such as Roc) at their historical cost while investments in boutiques, are carried at their fair value.

Fair value is the price that would be expected to be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date, regardless of whether that price is directly observable or estimated using another valuation technique.

In determining this estimate, assets whose shares trade in active markets, can be based on unadjusted quoted prices. In other cases, the Group needs to use valuation techniques that are appropriate in the circumstances and for which sufficient data is available, maximising the use of relevant observable inputs and minimising the use of unobservable inputs.

For the investments that are carried at historical cost, the Group is required by the accounting standards to determine whether it is necessary to recognise any impairment loss with respect to these investments. This assessment compares the investment's recoverable amount (i.e. the higher of its "value in use" or its "fair value less costs to sell") with its carrying amount. If its recoverable amount is less than its carrying value, an impairment loss is recognised. Should the investment's recoverable amount be greater than its carrying value then the value of the investment is not increased.

The Group undertakes this impairment assessment at the end of each reporting period, using valuation techniques like those utilised in determining the value of investments carried at fair value. As such, at the end of each reporting period, the Group has an assessment of the book value and the fair value of each of its investments.

These estimates of fair value have been developed for the purposes of complying with the appropriate accounting standards and as such may not be the precise value at which the investment may or will be sold.

The valuation techniques used in determining these fair values are based on forecast information that has been prepared using a set of assumptions about future events and management actions that are not certain to occur. Furthermore, other events and management actions which have not been forecast to occur may nevertheless occur. If events do not occur as assumed, the actual results achieved may vary significantly from the forecast outcome, significantly impacting the resulting value.

In addition, given the nature of these investments it may be difficult to deal with a specific investment in a specific market at a specific time. Alternatively, the most appropriate acquirer of an investment, may be a special purchaser that can enjoy benefits of owning that asset that are not available to other potential owners.

As such the Group does not warrant or guarantee that these fair values are the amounts that any specific investment would be realised at.

Tips for Analysing PAC

Revenue recognition

- § Private equity, private infrastructure, and private real estate managers normally charge fees on committed capital. Thus, new FUM becomes revenue immediately after the legal commitment is received, even though it may take several years to invest the committed capital
- § Private credit strategies generally generate management fees on the capital that is invested (i.e. not on committed capital). It will typically take 2 to 3 years for the fund to be fully invested and earn the full fee on the total committed capital

Placement fees

- § Private capital managers typically pay commissions to placement agents (firms that raise capital for investment managers) that represent the annual management fee multiplied by the committed capital (i.e. \$100m committed capital @ 1.5% management fee = \$1.5m commission). This commission is generally paid in equal installments over 2 to 3 years
- § Long only / Traditional investment managers generally pay commissions that are a declining percentage of annual revenues (for example, 20% of year 1 revenue, 10% of year 2 revenue, and 5% for year 3) get paid commissions over several years. These commissions are not recognised at the time of commitment but rather after they are paid
