Note 1. Operating Segments

Identification of reportable operating segments

Segment information is based on the information that management uses to make decisions about operating matters and allows users to review operations through the eyes of management. Operating segments represent the information reported to the chief operating decision makers (CODM), being the executive management team, for the purposes of resource allocation and assessment of segment performance.

The Group has identified operating segments applicable to the sale of assistive communications technology systems within the disability sector. The reported loss for the combined segments within the sector before income tax is \$6,108,667 for the year (2024 loss: \$5,913,779).

The segment currently has two functioning operations in two geographical locations: Australia and North America, market exploration in alternate geographical locations including Japan, a corporate function in addition to a substantial Research and Development program. This is consistent with the internal reporting provided to the CODM and is aligned to the one major revenue stream.

The CODM reviews EBITDA (earnings before interest, tax, depreciation, and amortisation). The accounting policies adopted for internal reporting to the CODM are consistent with those adopted in these financial statements.

The information reported to the CODM is on a monthly basis.

Types of products and services

The principal products and/or services of each of the geographical locations within the operating segment are as follows:

Australia (Aust) Sales of systems related units and components in Australia

North America (US) Manufacture and sales of systems units and components in North America

Japan and other markets

Activities undertaken to establish viable and additional operating markets, but not yet determined to

be a material market segment in their own right.

R&D (**R&D**) Research activities undertaken in regards to the Group's products.

Corporate The provision of support, regulatory and infrastructure activities, and elimination entries above the

EBITDA line.

Segment assets and liabilities

The internal management reporting presented to key business decision makers report total assets and liabilities on the basis consistent with that of the consolidated financial statements. These reports do not allocate assets and liabilities based on the operations of each segment or by geographical location.

Under the current management reporting framework, total assets are not reviewed to a specific reporting segment or geographical location.

Ordinary shares

Ordinary shares entitle the holder to participate in dividends and the proceeds on the winding up of the Company in proportion to the number of and amounts paid on the shares held. The fully paid ordinary shares have no par value and the Company does not have a limited amount of authorised capital.

On a show of hands every member present at a meeting in person or by proxy shall have one vote and upon a poll each share shall have one vote.

Capital risk management

The Group's objectives when managing capital is to safeguard its ability to continue as a going concern, so that it can provide returns for shareholders and benefits for other stakeholders and to maintain an optimum capital structure to reduce the cost of capital.

Capital is regarded as total equity, as recognised in the statement of financial position (unaudited), plus net debt. Net debt is calculated as total borrowings less cash and cash equivalents.

In order to maintain or adjust the capital structure, the Group may adjust the amount of dividends paid to shareholders, return capital to shareholders, issue new shares or sell assets to reduce debt.

The Group would look to raise funds for working capital or when an opportunity to invest in a business or company was seen as value adding relative to the current company's share price at the time of investment.

The number of ordinary shares used in the calculation of diluted loss per share is the same as the number used in the calculation of basic loss per share in the year ended 30 June 2025 and the prior year ended 30 June 2024 as potential ordinary shares are not considered dilutive as a loss was incurred in both years.

Note 14. Matters subsequent to the end of the financial year

On 22 July 2025, the Company entered into a loan facility agreement with Phoenix Development Fund Limited for \$450,000. The loan is secured by the Company's R&D tax refund, is subject to 12% interest per annum, and is due and payable on the earlier of 6 months from the date of the agreement or the date on which the R&D refund is received.

On 28 August 2025, Control Bionics Limited announced a Non-Renounceable Rights Issue Offer (Offer) for 58,922,220 new shares at a price of \$0.035 per share. If fully subscribed, the Offer will raise up to approximately \$2.062 million (before costs). The Offer is underwritten to the extent of \$1,157,725 and is available to eligible shareholders on the record date of 2 September 2025.

No other matter or circumstance has arisen since 30 June 2025 that has significantly affected, or may significantly affect the Group's operations, the results of those operations, or the Group's state of affairs in future financial years.
