Quarterly Activities Report

for the

Quarter ended

31 March 2009

Highlights for the quarter

Development of the Broula King gold mine continuing including;

- Site clearing well advanced
- Infrastructure in place
- Construction underway
- Water supply pipeline under construction
- Clearing for tailings storage facility commenced
- Planning for pre-mining and scheduling commenced

Corporate information:

Status: Australia public company listed on the Australia Securities Exchange (ASX)

ASX Code: RBX

Capital structure:

Fully paid shares	61.6 million
Unlisted options	2 million

Directors :

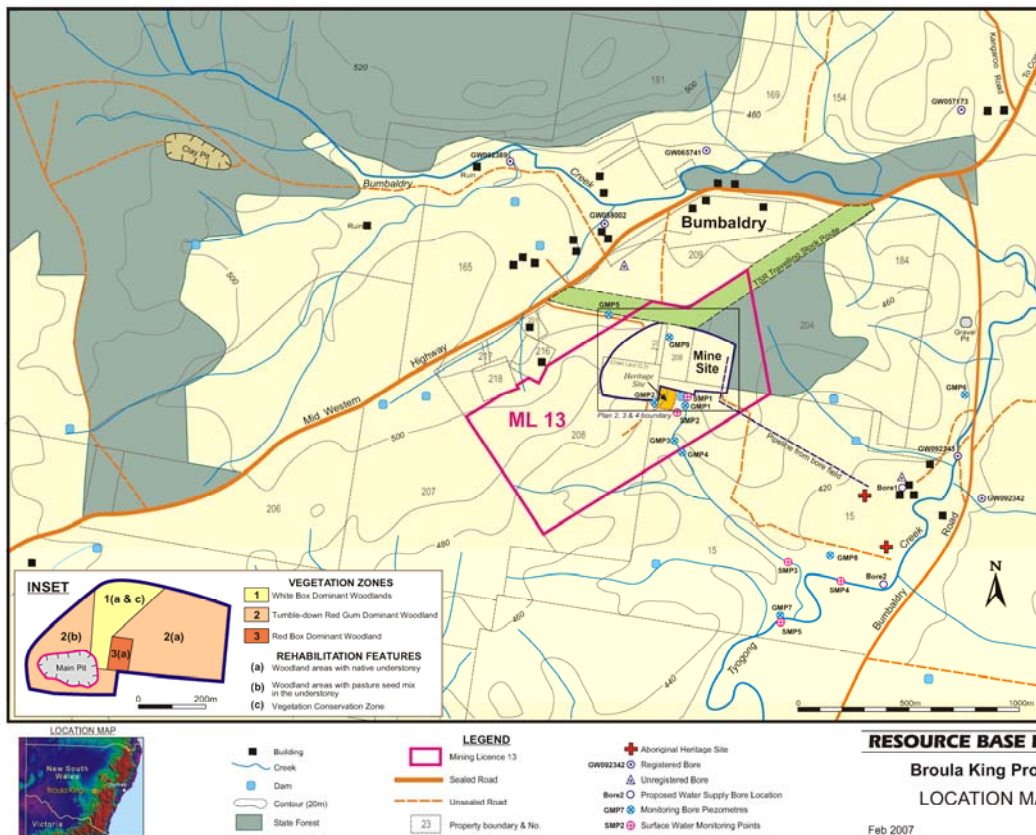

Alan Fraser	Managing Director
Peter Kelliher	Executive Director
Glenn Connor	Non Executive Director

Activities Report

Broula King Gold Mine

The project is situated about 230 km due west of Sydney near Bumbaldry, lying mid way between the towns of Grenfell and Cowra in the Central West Slopes region of NSW.

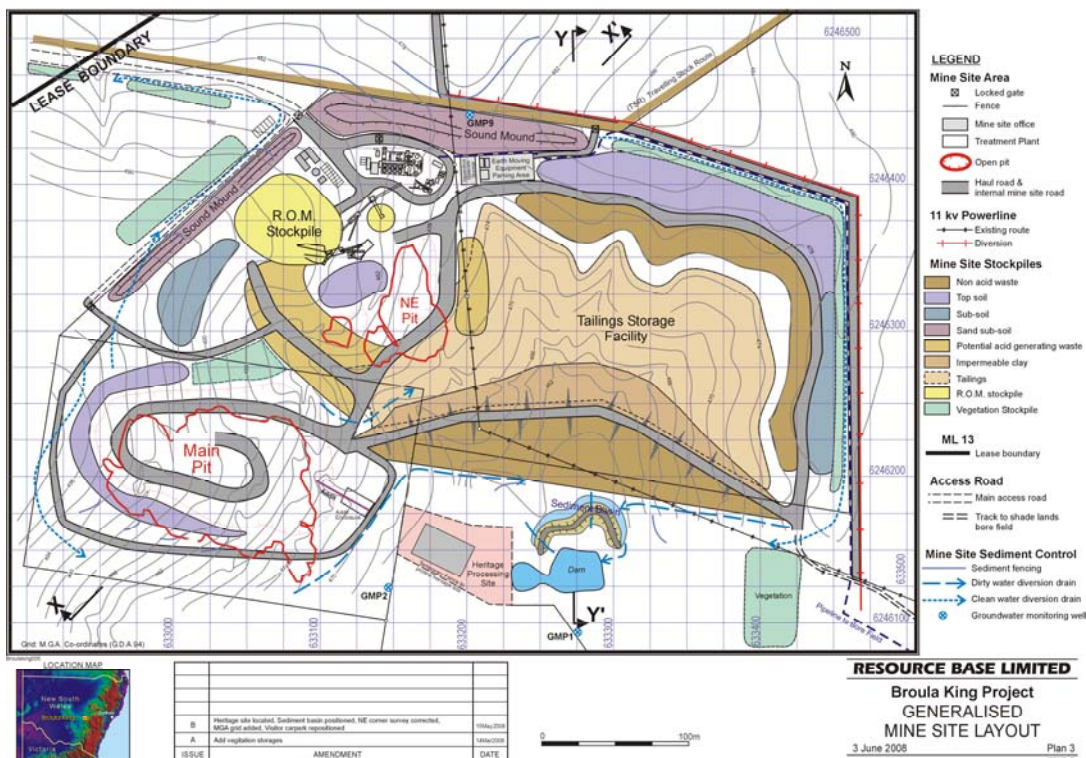

During the quarter the clearing of the vegetation from the tailings storage facility, open cut and the remainder of the treatment plant area continued and is now 90% complete with the vegetation removed and stocked for future use for rehabilitation.

Work on the water supply pipeline from the already completed water borefield site has progressed and is now 90% completed.

Grid power has been extended to the onsite office complex.

Further off site engineering of the plant continued and a considerable amount of plant is awaiting transport to site.

Environmental monitoring is continuing to provide background data for the project.

Bethanga Exploration Project EL 4436

The Bethanga Project is in the north east of Victoria, 15 km east of Albury. The township of Bethanga is 1 to 2 km south east of the principal workings.

Past gold production has been estimated to have been 78,000 oz of gold from 62,000 tonnes of ore. In addition to the gold production, 618 tonnes of copper were produced plus minor amounts of silver and arsenic.

The ore was hand sorted to produce an average head grade at the treatment plants of 39 g/t, the highest average grade of all the major goldfields in Victoria.

A recent rationalisation of the tenement holding has seen the tenement consolidated into one EL 4436

The License is prospective for high-grade narrow vein auriferous (Au-Ag-Cu) sulphidic lode systems. Gold at Bethanga occurs in a series of parallel quartz reef systems striking NNE, with strike lengths up to 4 km, and widths from a few centimetres to less than 1 metre. The reefs are vertical or dip steeply to the north-west, and the productive sections of the reefs are known to occur in shoots. These shoots are 100 to 200 metres long and appear to have a moderate plunge to the north.

The exploration program will be directed to establishing economic mineralisation along strike and down dip of previous workings. Work during the quarter concentrated on landowner access for drilling.

Notes

- 1 The quarterly report provides a basis for informing the market how the entity's activities have been financed for the past quarter and the effect on its cash position. An entity wanting to disclose additional information is encouraged to do so, in a note or notes attached to this report.
- 2 The "Nature of interest" (items 6.1 and 6.2) includes options in respect of interests in mining tenements acquired, exercised or lapsed during the reporting period. If the entity is involved in a joint venture agreement and there are conditions precedent which will change its percentage interest in a mining tenement, it should disclose the change of percentage interest and conditions precedent in the list required for items 6.1 and 6.2.
- 3 **Issued and quoted securities** The issue price and amount paid up is not required in items 7.1 and 7.3 for fully paid securities.
- 4 The definitions in, and provisions of, *AASB 1022: Accounting for Extractive Industries* and *AASB 1026: Statement of Cash Flows* apply to this report.
- 5 **Accounting Standards** ASX will accept, for example, the use of International Accounting Standards for foreign entities. If the standards used do not address a topic, the Australian standard on that topic (if any) must be complied with.
