Activities Report

Broula King Gold Mine

The project is situated about 230 km due west of Sydney near Bumbaldry, lying mid way between the towns of Grenfell and Cowra in the Central West Slopes region of NSW.

During the quarter top soil and subsoil was removed from the footprint of the Tailings Storage Facility, allowing for the building of the sound mound to the area adjacent to the treatment plant along the north and northeast boundary of the mine site. Drill test work was undertaken by potential drill and blast contractors to establish drill penetration rates preparatory to settling contracts with same.

Limited work continuing on site including maintenance of existing assets.

Environmental monitoring is continuing to provide background data for the project.

Corporate

Capital Raising

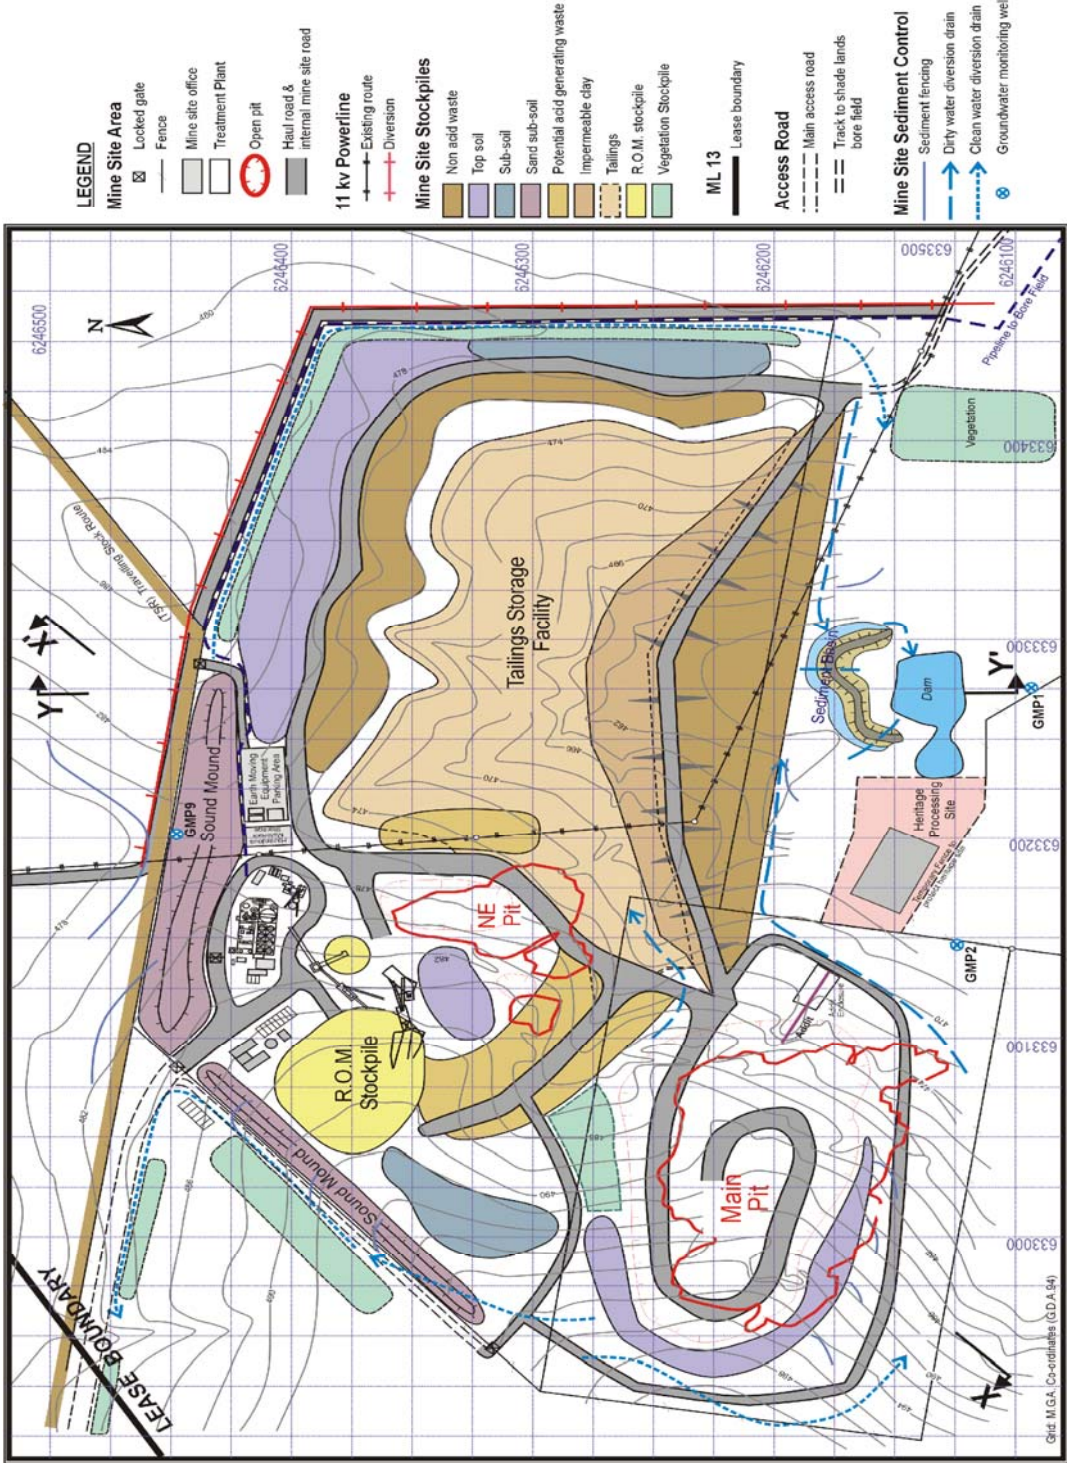

During the quarter, the Company lodged a prospectus for the purposes of undertaking a pro-rata offer of new shares and free attaching options to shareholders.

The offer was undertaken on three new shares for every seven shares held, at an issue price of 5 cents (\$0.05) per share applied for. Each two new shares came with one free attaching option exercisable at 5 cents on or before 30 November 2011. The offer, if fully subscribed would raise \$1,492,857 before associated costs.

As at the closing date of the offer, the Company raised \$342,140 from the offer (representing 6,842,797 shares and 3,421,373 free attaching options).

The Company has accepted an offer from Martin Place Securities Pty Ltd to underwrite a minimum of 50% of the offer, thus a further \$404,288 is receivable under the offer. To date, the Company has received \$250,000 from the underwriter and expects the balance to be settled shortly.

In addition to the shares placed by the underwriter, the Company is continuing to place the shortfall securities (14,928,571 shares and 7,464,285 free attaching options).
