PRODUCT DEVELOPMENT HIGHLIGHTS

Product development highlights

Two key product and services enhancements will provide continued incremental revenue growth from **marketing tools subscriptions** and **data science capabilities**:

Marketing tools subscriptions – example applications:

- **Department store launch:** Skyfii's platform was utilised to deliver a real-time and location triggered email campaign on the day of a department store launch to shoppers "seen" in a shopping centre to drive them to the store opening. The result of the campaign resulted in customers who received the email being 26% more likely to visit the new store on that day and stayed in the shopping centre for 14% longer than the average customer on that day.
- **Retail venue exit survey:** Skyfii's platform was utilised to deliver an exit survey to shoppers who were "seen" to have exited a retail venue, collecting quantitative and qualitative shopper intent data, resulting in a high quality data set for the retailer to understand "top of mind" shopper intent in real time.

Product development highlights (cont.)

Data science capabilities – example engagements:

- **Elevator analysis:** measuring asset utilisation to support decision making around asset development and investment.
- **Competitor impact analysis:** measuring change in shopper behaviour as a result of new anchor tenants launching at a competitor centre in the same trade area.
- **Audience segmentation:** validating audience segments based on in-centre behaviour.
- **Major retail store launch impact:** measuring impact of launch of a new anchor tenant on shopper behaviour.
- **Spend analysis:** correlating retail spend with centre dwell time to determine acceleration / deceleration of spend over time.
- **Precinct analysis:** analysing shopper behaviour in an under-performing precinct and comparing to rest of centre.

Case Study 1: Objective

Understand the relationship between visit length and visit spend, and whether it accelerates or decelerates.

Solution: We analysed visitor behaviour and transaction size to identify common shopper behaviours.

“Mission shopping”:

- Short visits (under 60 min)
- Higher spend frequency, lower total spend
- Destinations

“Casual shopping”:

- Longer visits (60 min+)
- Lower spend frequency, higher total spend
- Exploration

| Maximum visit duration (h:mm) | 0:30 | 1:00 | 1:30 | 2:00 | 2:30 | 3:00 | 3:30 | 4:00 |
|-------------------------------|-------|-------|-------|---------------------|-------|-------|-------|-------|
| Average spent rate Per 30 min | \$112 | \$73 | \$57 | \$44 | \$41 | \$27 | \$44 | \$43 |
| Average total spend | \$112 | \$146 | \$171 | \$176 | \$205 | \$162 | \$309 | \$345 |
| Highest efficiency | | | | Highest total value | | | | |

Insight: We identified two common shopping behaviours, mission shopping and casual shopping, and the value of these two distinct groups over time in centre.

Case Study 2: Objective

Diagnose why venue performance of one shopping centre precinct is better than other areas.

Solution: We compared zone correlation and visitor behaviour in Precinct X to the rest of the centre

Visitors who start
in Precinct X:

12% ↑

End in Precinct X

4.1% ↓

End in other precincts

Visitors who start
in other precincts:

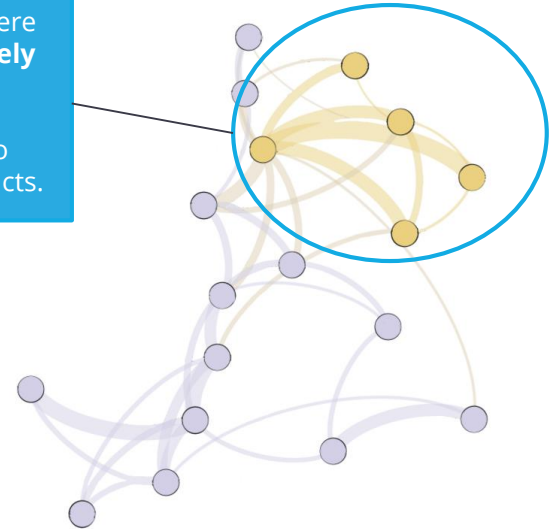

6.1%

End in other precincts

3.2%

End in Precinct X

Shoppers were
twice as likely
to remain in
Precinct X
compared to
other precincts.

Insight: We were able to identify a visitation trap, and recommend initiatives to help drive shopper pollination across precincts.

SUMMARY & OUTLOOK

Outlook

At the conclusion of FY15, Skyfii committed to focussing on a number of **strategic objectives in FY16**, including:

- Continued roll-out of new and existing contracts
- Continued focus on converting mall pipeline prospects into trials and full service contracts
- Continued focus on new verticals outside of retail malls
- Securing further distribution and reseller agreements globally
- Continued product development focus on marketing automation and associated media/advertising partnerships
- Development of new data source integrations and data services products

In addition to growth from the continued execution of these strategic objectives, Skyfii is excited by the significant growth potential in FY17 and FY18 from its investment in international markets such as North America.
