

March 2017 - Quarterly Activities Report

The Company has continued to investigate and create opportunities to maximise the value of its strategic assets, the Broula King Mining Lease ("BKML"), processing and storage facilities.

During the quarter, the Company completed an exploration RC drilling campaign consisting of 10 holes for 898m. The drilling targeted a mix of structural and geophysical features around the Broula King gold mine and the historic Cowfell copper mine within the BKML.

The visual appearance of the drill chips from most of the drill holes are encouraging but it is unknown if these chips contain economic values of gold and/or base metals until assaying is completed. Preliminary assays are expected early to mid-May.
