ASX Market Announcements

**BROKEN HILL COBALT-NICKEL PROJECT – EL 8747  
CONFIRMED NATIVE TITLE EXTINGUISHED FOR AREAS OF INTEREST**

Ausmon Resources Limited (ASX:AOA) advises that the Department of Planning and Environment – Division of Resources and Geoscience has confirmed it is satisfied that sufficient evidence exists that native title has been extinguished within Exploration Licence 8747 except for 2 lots containing a track that runs along the northern part of the EL 8747. Those 2 small lots are of no interest as the Company is unlikely to explore along that track.

Exploration within the three ELs 8745, 8746 and 8747 of the Broken Hill Cobalt-Nickel Project can therefore proceed without any ongoing Native Title compliance requirements.
