As a result, these financial and operational successes strongly position Skyfii to achieve its strategy to deliver enhanced shareholder returns in FY19.

Key focus areas for Q1 FY19

- Continued growth in both topline and recurring revenue

- Continued growth within the Americas and EMEA regions

About Skyfii

Advancements in cloud, mobile technology and Wi-Fi systems have enabled bricks-and-mortar venues to become more competitive by better understanding the needs of their diverse types of visitors. Today, every smartphone is a chatterbox of information. The cloud-based Skyfii platform uses existing Wi-Fi infrastructure, BLE beacon networks, door-to-people counters, video sources, web and social platforms to allow various types of venues to not only analyse behaviour of anonymous visitors, but also capture data from those who opt-in to free Internet connectivity. In doing so, it converts the data into a critical sales and marketing tool that allows venues and their commercial tenants to deliver content that is catered to each visitor's needs and interests.

Skyfii offers a cloud-based solution in a subscription model consisting of three core 'IO' services:

- IO Connect: a data portal where data is collected (data collection).
- IO Insight: venue performance, customer behaviour and, loyalty & engagement (data analytics).
- IO Engage: targeted content delivery, automated marketing and monetization (marketing tools).

Skyfii also engages clients to provide further revenue generating services:
